Section 8. If an employe of the Isthmian Canal Commission, the Government of the Canal Zone, or the Panama Railroad Company should be adjudged insane by the Canal Zone Courts and have an estate not exceeding $1,000.00 in value and consisting entirely of personal property, and no regular guardianship of such estate shall have been instituted in the Canal Zone Courts, it shall be the duty of the Collector of Revenues to take possession of the estate of such insane person, including any salary or other acknowledged claim due to such employe by the Isthmian Canal Commission, the Canal Zone Government, or the Panama Railroad Company, and make a complete inventory thereof and file the same with the Judge of the Circuit Court of the First Judicial Circuit of the Canal Zone; and under the direction and with the approval of the Judges of the said Court, the Collector of Revenues may pay the lawful indebtedness due by the insane person, as well as the expenses incurred in administering said estate, and he shall hold the residue of the estate subject to the orders of the Circuit Judge.

If the insane person has a wife, minor child or children, or dependent relative, in necessitous circumstances, to be determined by the Circuit Judge, the court shall set aside a sufficient sum out of the said estate for their maintenance and support, not to exceed the sum of $500.00 in the aggregate, to be paid in such manner and at such times as the Circuit Judge may prescribe, and which allowance shall be superior to all other claims against the estate; and the order of the Judge shall be sufficient authority for the Collector of Revenues to make such payment, taking proper receipts therefor.

In case the insane person is a citizen of the United States and has no wife, child or children, or dependent relative, the Collector of Revenues shall retain possession of the residue of said estate, after the debts and other charges have been paid as above mentioned, and hold same subject to the orders of the court.

If the insane person is a Panamanian and has no wife, child or children, or dependent relative, the residue of the estate, with the approval of the Circuit Judge, may be delivered by the Collector of Revenues to the authorities designated for that purpose by the Panamanian laws or decrees.

If the insane person is an alien, other than a Panamanian and has no wife, child or children or dependent relative, the Collector of Revenues, with the approval of the Judge of the Circuit Court, shall pay over the residue of the said estate to the diplomatic or consular representative of the country to which the insane person belongs accredited to the Republic of Panama, to be disposed of by him in accordance with the laws of his country.

Section 9. When the estate of the insane person is finally administered and the moneys paid over to the person or persons entitled to receive same as herein provided for, the Collector of Revenues shall make his final report on said estate to the Judge of the Circuit Court, and the Court shall approve the same if found to be correct, and discharge the Collector of Revenues from such guardianship.

Section 10. When the Collector of Revenues shall have performed his duties in accordance with the provisions of this Order and shall have delivered the estate or paid over the sums due from the funds of said estate to the person or persons entitled thereto in accordance with the orders of the court, such settlement of the estate shall be deemed a lawful settlement thereof, and the Collector of Revenues shall not be accountable on his bond and shall not be liable to any other person for the estate so administered by him; *provided*, that nothing in this Order shall prohibit the lawful heirs or claimants of any person whose estate has been settled in accordance with the provisions of this Order from bringing suit in any court having jurisdiction of the subject-matter and of the parties to the action against the person or persons who received the estate by virtue of the provisions of this act, and from recovering the same or the value thereof from such person or persons upon proof that the estate has been delivered to the persons not entitled to receive and retain same.

Section 11. This Order shall apply to the estate of persons who died or became insane prior to the passage of this Order, as well as to those who die or become insane after the date of its promulgation.

Section 12. If the Collector of Revenues shall deem it to the best interest of the estate of the deceased or insane person to convert any part or all of the property of the estate into cash, he may dispose of the same by public or private sale, with the approval of the Circuit Judge.

Section 13. The proceedings to be had before the Judge of the Circuit Court as herein provided for may be conducted without the necessity of any prior notice being given of the same, either by publication or otherwise; and the judge may proceed in such cases in open court or in chambers, and shall give precedence to such matters over all other business pending before him, in order that the estates may be administered and closed as expeditiously as the rights of all parties concerned may permit. No court costs of any kind shall be taxed against estates administered under the provisions of this Order.

Section 14. The official bond of the Collector of Revenues shall be security for the moneys and properties received by him in the performance of the duties prescribed for him by this Order.

Section 15. Act 24, of the Canal Zone Laws, entitled:

> "An Act providing for an inexpensive method of Administration upon the Estates of Employes of the Government of the Canal Zone, or of the Isthmian Canal Commission, who are citizens of the United States and who die in the Canal Zone, Isthmus of Panama, leaving estates of small value upon which regular administration is deemed inadvisable."

enacted March 1, 1905, and Executive Order dated June 22, 1907, effective July 1, 1907, and Executive Order dated July 21, 1909, respectively, amendatory of said Act 24, and all laws in conflict herewith, are hereby repealed.

Section 16. This Order shall take effect 30 days from and after this date.

WM. H. TAFT,

THE WHITE HOUSE,
February 5, 1912.

[No. 1,468.]

Non-assembled Examinations.

In the Manual of Examinations for the spring of 1912 announcement is made of the following-named examinations, applications for which may be filed at any time, as competitors are not required to appear at any place for examination:

Animal husbandman, Bureau of Animal Industry, Department of Agriculture.

Chief marine engineer, Coast and Geodetic Survey.

Mate, Coast and Geodetic Survey.

In requesting application blanks or information in regard to any of the above-named examinations the exact title should be given.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.
Culebra, C. Z., February 17 1912.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters and engineers, and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on February 28, 1912. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8.00 a. m. on February 28, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their capacity properly to operate an automobile, and must have the automobile with them.

Obituary.

R. H. Colip, an employe of the Panama Railroad Company at Cristobal, died in Colon Hospital on February 2. He was 51 years of age, born in the state of Indiana, and had been on the Isthmus seven years. He is survived by his wife living at Cristobal.

OFFICIAL CIRCULARS.

Care of Locomotive Tools and Oiling Equipment.

CULEBRA, C. Z., February 6, 1912.

CIRCULAR 411-C. (Superseding Circulars 411, 411-A, and 411-B.)

1. My attention has been invited to the frequent loss of locomotive tools and oiling equipment, resulting in most cases, from the failure of engineers to see that tools and oil boxes are properly locked before they leave their engines.

2. Boxes and chains with locks for securing tools, etc., being provided on each locomotive, the loss of such equipment from this cause is inexcusable, and any such loss will, in the future, subject the engineer responsible to discipline.

3. Locomotive engineers will be expected to see that their engines are provided with a sufficient number of locks and boxes to insure the proper safeguarding of this equipment, and in any case in which locks or boxes have been broken and equipment removed, they will be expected to report the same promptly to the foreman of the engine house where engine is tied up when not working, who shall, in turn, report the facts to the yardmaster.

4. Hostlers will make a personal inspection of the firing tools and boxes containing locomotive tools and oil cans on each engine assigned to them as early as practicable after the arrival of the engine at the enginehouse, and will report to the foreman the number of each engine on which firing tools and boxes containing tools and oil cans are unlocked.

5. Before an engine is released from an engine house for service it will be inspected by a hostler, who will personally see that it is provided with an adequate supply of coal or oil, water, and sand; that the fire is clean and in proper condition; that steam is raised to the required pressure; and that the authorized tools and oil cans are on the engine, and that all firing tools and boxes containing locomotive tools are locked.

6. When any equipment is delivered to any shop for repairs, the employe delivering the equipment will turn over the tools thereon to the shop officials and obtain a receipt for them. When any equipment is sent out of the shop, the tools received with it will be issued to the employe taking same, and the latter will receipt for them.

7. Difficulty in properly fixing property accountability for locomotive equipment has been encountered on account of locomotive engineers leaving personal tool equipment on locomotives, which becomes checked with I. C. C. equipment. In order to keep property records accurately, locomotive engineers will in future confine their personal tool equipment to such tools as are not furnished by the Isthmian Canal Commission. Any duplication by locomotive engineers of standard tools furnished by the Isthmian Canal Commission or the Panama Railroad Company is prohibited.

8. In order to assist in the identification of locomotive tools, etc., all such equipment will be numbered by the Mechanical Division with the number of the locomotive to which the same belongs. This numbering will be performed at the different engine houses upon the delivery of the equipment there by the different divisions concerned. When engines are transferred from one division to another, the tools will be transferred with the engine to which they belong.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Personal Calls on Telephone Lines.

CULEBRA, C. Z., February 13, 1912.

CIRCULAR NO. 433:

A recent test has indicated that the telephone lines are occupied each day a total of more than three hours by personal calls. It is expected that employes will not use the lines during the usual hours of business for other than official purposes except in case of emergency.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Washington's Birthday.

CULEBRA, C. Z., February 14, 1912.

CIRCULAR NO. 434:

Washington's Birthday, Thursday, February 22, 1912, will be observed as a holiday in the Canal Zone, and, as far as practicable, all public business will be suspended on that day.

H. F. HODGES, *Acting Chairman.*

Compensation for Time of Witnesses Before a Court Martial.

CULEBRA, C. Z., February 15, 1912.

CIRCULAR NO. 276-C:

Employes of the Isthmian Canal Commission or of the Panama Railroad Company who are duly summoned to testify before a court-martial in the Canal Zone will be compensated for time lost in the same manner as employes selected for jury duty or summoned as witnesses in criminal cases. Certificates showing the time the employe is actually in attendance should be issued by the Judge Advocate or Trial Officer of the Court. In other respects, the same procedure will be followed as is prescribed in Circular No. 276.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Station Names on 120-Trip Tickets.

CULEBRA, C. Z., February 16, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

In view of the fact that the old line station numbers printed on I. C. C. 120-trip tickets do not agree with the new station numbers on the relocated line, employes using this form of transportation will, in the future, indicate the stations between which it is desired to travel by name instead of number.

By direction of the Acting Chairman.

Respectfully,
C. A. MCILVAINE, *Chief Clerk.*

Stages of the Chagres.

Macimum heights of the Chagres River for the week ending midnight, Saturday, February 17, 1912. All heights are in feet above mean sealevel.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Acting Chairman's Report.

The report of the Acting Chairman of the Isthmian Canal Commission for the month of January is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Completed Sections of Canal Channel.

A steamshovel is engaged in excavating part of the dike which separates the channel of the Chagres River from Culebra Cut at Gamboa and is the means by which the trains of the Panama railroad cross from the old main line at Matachin to the relocated line. About 30,000 cubic yards are to be taken out now, though enough of the dike will be left to afford protection from the Chagres and support for the railway track. After May 1, when the excavations at San Pablo, Tabernilla, and Bohio will have been completed, this dike, containing about 70,000 cubic yards of rock and earth, will be the only obstruction in the otherwise completed channel from Gatun Locks to Las Cascadas (Mile 7.8 to Mile 33.3), a distance of 25½ miles.

Commercial Freight by Panama Route.

Under date of February 10 the Secretary of War issued the following statement regarding commercial business over the Panama railroad:

> After a full hearing of all parties with respect to the proposed raising of Panama railroad rates, I have come to the conclusion that the volume of commercial traffic which is now carried over the Panama railroad must be very materially cut down so as not to interfere with Colonel Goethals' work of construction. On the fifteenth of February the present double track railroad of the Company must be abandoned owing to the progress of the construction work in the Gatun Lake section; and thereafter all of the traffic, both that involved in construction and the ordinary commercial traffic, must be carried over the new single track railroad. This means that the capacity of the railroad will be cut down at least one third. During the past year the volume of commercial freight over the railroad has doubled, and this constantly increasing volume has very much interfered with the work of constructing the Canal. It is therefore apparent that the operation of this commercial route via the Panama Canal is now interfering with, and unless checked will still more interfere with and delay the completion of the Canal. Under these circumstances I have no hesitation in deciding that the rights of present commerce, both coastwise and foreign, must yield to the rights of construction.
>
> On the other hand I find after a full hearing that the proposed increase of rates will not effectively check this increasing volume of commercial business. Even at the proposed rates, all of the freight accomodations of the company's steamships have been booked for a month ahead. It is therefore evident that other steps must be taken. Furthermore, it has been urged before me that to increase the present rates might lead to the raising of the rates over the transcontinental railroads which operate in competition with the present Panama route. This would be highly undesirable.
>
> I also find that while the steamers of the Panama Railroad Company have been operated at a loss during this year, the Company as a whole is still making a fair profit on this commercial business. Under all the circumstances it seems best to me that the freight rates should remain the same for the present, but I have directed the officers of the Company to materially cut down the volume of commercial freight which they accept for shipment at the terminals of the Company, to such an extent as will insure in the future that the work of Colonel Goethals in the Canal shall not be interfered with. I am aware that this will necessarily cause inconvenience to shippers who have become accustomed to using this line. It is, however, a temporary inconvenience which is made necessary by this great national work of completing the Panama Canal. I feel sure that they with all the rest of us, will bear cheerfully this temporary inconvenience as their sacrifice towards the completion of this great work.

Foundation for Miraflores Approach Wall.

When work was begun on sinking the 250 concrete caissons on which the cellular upper approach wall at Miraflores Locks is to rest some excavation had still to be done for the upper portion of the center wall and the floors for the two chambers. The first caisson was accordingly sunk near the middle of the site of the approach wall, in the swampy area north of the lock site, and later operations were carried from that point toward the outer end. In the meantime the excavation at the end of the chambers has been completed, and last week operations were begun for the placing of the cassions in the section next the center wall. The site of the approach wall is crossed by the railway track that leads to Miraflores Dam, the cement shed and the stock trestle supplying the berm cranes on the west side of the locks. New connections are now under way and these tracks will shortly be removed so that the construction of the approach wall can be continued.

Chapels at Hospital Morgues.

Plans have been approved for two chapels to be attached to the morgues at Ancon and Colon Hospitals for the holding of funeral services over the remains of persons who die in the hospitals. Each building will be 30 by 20 feet, and will contain a chancel, space for the body in front of the chancel, and seats for a limited number of persons.

Inspection of Scales.

All of the scales in public use on the Isthmus by the Commission and the Panama Railroad Company are inspected at least once every three months. For this purpose the Mechanical Division maintains a service for its own departments and for the Panama railroad and the Quartermaster's Department; and the Subsistence Department has a separate service for the hotels and commissary stores. The Mechanical Division has four scales, in intermittent service; the Panama railroad has 44, including a railway track scale at Colon; and the Quartermaster's Department, with which are listed the scales in use at its storehouses, in the Division of Posts and Revenues, at the hospitals and dispensaries and in the Commission clubhouses, has in all 164 scales. In the Subsistence Department, in addition to the 200 scales in use at the 14 hotels and 18 commissary stores and branches, there are 37 cash registers which are kept in order by the scale-inspection service.

Each service requires the constant employment of a skilled mechanic and a helper. They convey from point to point a kit of tools and lubricants for minor adjustments, and a set of weights of such sizes that a scale may be tested for measurements anywhere between 1 ounce and 575 pounds. Minor repairs are made by the inspector, but if he finds a scale in bad order he recommends that it be sent to Gorgona Shops, where the repairs are made and the scale is painted and tested before it is returned. All of the heavy scales in Commission service are painted uniformly, with blue platforms and uprights and trimmed on the sides with black. Each scale is numbered with a brass plate and after an inspection a report on its condition is made to the department to which it belongs and a duplicate is sent to the office of the inspector and recorded.

The regular system of inspection of scales of the Panama railroad was begun on July 1, 1911; scales belonging to the Quartermasters Department have been inspected since September 1, 1911. Minor adjustments are almost continuously necessary; and when the service was inaugurated many of the scales were found to be considerably out of order. In one of the dispensaries the pharmacist reported that the druggists' balance was unsatisfactory; the inspector found that the presence of a nest of ants within the scale was the cause of its variance. Many others were severely corroded, clogged with dust or in need of lubrication. On each visit the inspector carefully oils the knife edges of scales, to lubricate and preserve them from further deterioration, so that they are kept in excellent condition.

The Subsistence Department has had a regular scale inspection since February, 1911. It has a set of metric weights certified to by the German *Pruefungs Komision*, and a set of pound and ounce weights certified to by the Bureau of Standards at Washington. Also a set of measures of capacity from five gallons down, with a standard half-bushel and a standard cubic foot, all certified to by the Bureau of Standards. It has a working set

NOTES OF PROGRESS.

(Continued.)

of galvanized iron weights up to fifty pounds, which are used at the cold storage plant and tested every day. The controlling scales in use in the cold storage department are galvanized steel agate bearing scales, made by Troemner of Philadelphia, and weigh up to 200 pounds with an error of but five grains. Scales in maufacturing plants and cold storage plant, Commissary Department, are tested daily.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 81 per cent completed, 184,068 cubic yards, out of a total of 225,000, having been placed at the close of work on February 24. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked	No. Mixers.
February 19	416	8.00	1
February 20	424	16.00	2
February 21	440	16.00	2
February 22. (Holiday)	....	....	....

Total	18.17	9,057

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending February 24, follows:

DATE.	Hours worked.	Cubic Yards.
February 19	7.10	2,855
February 20	6.35	2,509
February 21	2.35	1,336
February 22. . (Holiday)	....	....
February 23	4.50	1,903
February 24	6.15	2,229
Total	27.25	10,832

Two Killed in Dynamite Explosion.

Edwin McClary and Hubert Williams, negro laborers, were killed in Culebra Cut on the morning of February 23 in a dynamite explosion. They had been sent to get a piece of pipe through which to load dynamite, and finding one that had explosive in the end of it, attempted to dislodge this by pounding the piece of pipe on the rail. An explosion resulted, in which both men were killed. They had worked on dynamite gangs several years and were familiar with the danger they incurred in handling the explosive.

Postal Business and Tax Collections.

Money orders to the amount of $404,891.70 were issued in the Canal Zone post offices during the month of January, of which $302,635.93 were payable in the United States, $101,404.02 in the Canal Zone, and the balance in Costa Rica and Martinique. The number of orders issued was 18,483 and the average value was $21.96. The Cristobal office issued orders to the amount of $63,398.38, the largest of any office. Gatun, $54,860.65; Gorgona, $43,321.61; Ancon, $41,906.15. Postal sales amounted to $7,202.91, of which $4,321.75 was net. Tax collections of various classes amounted to $6,704.69.

Obituary.

Howard Ferguson died at Ancon Hospital on February 17, after 8 days' illness. He had resided at East Balboa about two weeks, and was employed by the Quartermaster's Department.

CONCRETE WORK IN THE LOCKS.

Over 79 per cent of the concrete for the locks is in place, the amount at the close of work on February 24 being 3,331,921½ cubic yards, out of a total of approximately 4,199,400. A total of 23,807 cubic yards of concrete was laid in the locks during the week ending February 24.

GATUN LOCKS.

Over 91 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on February 24 being 1,820,845½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending February 24, and of the total, follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

MIRAFLORES LOCKS.

Over 50 per cent of the concrete for the system of two twin locks at Miraflores was in place on February 24, the total amount on that date being 694,465 cubic yards, bucket measurement, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			½-cubic yard mixers.

RED CROSS FINANCES.

Statement for January—Sale of Stamps.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of January, follows:

RECEIPTS.

January 1.	On hand	$2,197.48	
January 13.	Received from Mr. A. B. Dickson, account of Christmas seals	156.38	
January 18.	November interest credited at bank	3.27	
January 31.	Net proceeds of reception, January 13.	896.00	
January 31.	Dues	2.00	
	Total		$3,255.13

DISBURSEMENTS.

January 4.	Relief of destitute American, Cristobal.	$25.00	
January 8.	Relief of destitute Americans, Ancon	30.00	
January 10.	Deportation of Zone prisoner to Spain	25.00	
January 10.	Relief of family at Colon, account of fire	25.00	
January 13.	Isthmian Canal Commission, printing	2.67	
January 16.	Expense of musicians for reception, Jan. 13	6.00	
January 19.	Hotel Metropole for board of stranded American lady	34.10	
January 19.	Relief of destitute woman at Empire	5.00	
January 23.	Relief of ex-employe suffering from tuberculosis	25.10	
	Total		$177.87
January 31.	Balance on hand		$3,077.26

JOHN L. PHILLIPS, *Treasurer.*

Final report on sale of Red Cross Seals, season December, 1911–January, 1912, follows:

Total seals received for sale	50,000		$500
Total seals sold	43,471	$434.71	
Seals unsold and destroyed as per instructions	6,529	65.29	
Donated		1.00	
Total			$501

As per the terms of agreement, 12½ per cent of the total sales, $54.46, was forwarded to Charles L. Magee, Secretary of the American National Red Cross, State, War and Navy Building, Washington, D. C., and the balance, $381.25, retained in the general Red Cross funds on the Isthmus as a separate fund for the purpose of aiding tuberculosis patients, to be disbursed on recommendation of Col. W. C. Gorgas, Chief Sanitary Officer.

The sale of seals far surpassed that of last year. The largest number was disposed of by Mrs. C. A. Devol, Chairman of the Women's Auxiliary, under whose supervision 18,263 were sold by the various women's organizations. The Boy Scouts throughout the Zone and the Anti-Cigarette League under the direction of Mrs. Hackenberg of Gorgona accomplished splendid work in this connection. Miss Dorothea Hill, daughter of E. H. Hill of Colon, sold 2,000 seals.

PERSONAL.

Col. Geo. W. Goethals, who went to the States on January 28 on official business, has been directed to go to Europe to investigate matters relating to canal terminals.

The Hon. Philander C. Knox, Secretary of State, accompanied by Mrs. Knox and their son and daughter-in-law, arrived at Colon on February 27 on the *U. S. S. Washington.* The *U. S. S. Maryland* is waiting in Panama roads to take them to various Central American ports.

Mr. Isham Randolph, who was a member of the International Board of Consulting Engineers on the Panama Canal, and of the special board that investigated the construction of Gatun Dam in February, 1909, accompanied by his son, is on the Isthmus inspecting the Canal work.

CANAL WORK IN JANUARY.

Monthly Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., February 15, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of January, 1912.

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	34,495	1,443,401	168,984	1,646,880
Work excavation, wet	Cubic yards	520,228	991	412,118	933,337
Total work excavation	Cubic yards	554,723	1,444,392	581,102	2,580,217
Plant excavation, dry	Cubic yards	....	8,443	....	8,448
Plant excavation, wet	Cubic yards	52,779	....	....	52,779
Total Canal Excavation	Cubic yards	607,502	1,452,840	581,102	2,641,444
Material placed in dams	Cubic yards	413,166	....	62,964	476,130
Concrete placed in locks and dams	Cubic yards	43,888	....	63,493	107,381
Explosives used	Tons (Gross)	69.31	252.03	42.91	364.25
Rock drilled	Feet	58,597	482,731	80,403	621,731
Tracks removed	Miles	....	19.56	....	19.56
New tracks laid	Miles	2.41	25.47	....	27.88
Rock crushed	Cubic yards	46,858	....	59,043	105,901
Cement used	Barrels	48,394	110	67,088	115,592
New roads built	Miles	0.39	....	....	0.39
Water mains laid	Feet	15,825	15,228	13,053	44,106
Sewers laid	Feet	3,810	159	1,355	5,324
Open drains and ditches dug	Feet	30,496	1,874	5,270	37,640
Average daily force	....	6,756	8,290	5,780	20,826
Average rainfall	Inches	0.60	0.17	....	0.22

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the Division Engineers, the inspection being cared for by this subdivision. Work was continued on the grinding of fixed irons and preparing valve chambers for the installation of the valves, which work is being done under supervision of this office. This subdivision is also charged with general inspection of the masonry work of all the locks.

LOCK GATES AND PROTECTIVE DEVICES.

Shop Work in the United States—Up to January 20, a total of 45,427 tons of structural steel had been accepted at the rolling mills, or about 90 per cent of the total, of which 1,587 tons were accepted between December 20 and January 20; and a total of 25,663 tons of riveted structural material was shipped from the Rankin shops, or a little over 50 per cent of the total contract weight. Of this last item, 940 tons were shipped between December 20 and January 20. About 3,000 tons of additional structural steel have been manufactured and inspected, but cannot be painted on account of unfavorable weather and are held in the yard at Rankin. It should be noted that the above total includes the parts lost on the steamship *Moldegaard*, and ascertained to be 1,419 tons in all. This lost material has been re-ordered and in part received and fabricated at the shops. The following are details of material shipped to January 20:

Gatun Locks—Upper guard gates, 4 leaves, 54 feet 8 inches high, Nos. 37 to 40, inclusive; all material shipped. Upper and middle gates, upper lock, 8 leaves, 77 feet high, Nos. 29 to 36, inclusive; all material shipped. Safety and lower gates, upper lock, 8 leaves, 77 feet high, Nos. 21 to 28, inclusive; all completed and nearly all shipped. Middle and lower gates, middle lock, 8 leaves, 77 feet 10 inches high, Nos. 13 to 20, inclusive; about 17 per cent of the total has been shipped, none of it in the last month. Middle gates, lower lock, 4 leaves, 77 feet high, Nos. 9 to 12, inclusive; 45 per cent completed; none shipped. Lower guard gates, 4 leaves, 47 feet 4 inches high, Nos. 1 to 4, inclusive; 20 per cent completed, none shipped.

Pedro Miguel Lock—Upper guard gates, 4 leaves, 54 feet 8 inches high, Nos. 50 to 53, inclusive; all material shipped. Upper, safety, lower, and middle gates, 16 leaves, 79 feet high, Nos. 54 to 69, inclusive, and lower guard gates, 4 leaves, 47 feet 4 inches high, Nos. 70 to 73, inclusive; practically all manufactured and shipped.

Miraflores Locks—Practically no material has been manufactured.

The manufacture of castings, handrailing and piping has proceeded satisfactorily.

LOCK GATE ERECTION.

Gatun—Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive, Riveting has proceeded on these leaves and is nearly completed. The grinding of end plates to fit reaction castings was completed on the quoin posts of leaves Nos. 37 and 38. The assembling of reaction castings on these posts began January 30. The piping has also been partly installed.

Upper gates, upper lock, 77 feet high, leaves Nos. 33 to 36, inclusive: The skeleton is assembled and practically riveted. The sheathing is in place in all leaves, but is not fully adjusted and bolted. No reaming or riveting on same has been done on leaves Nos. 33 and 34, while on leaves Nos. 35 and 35 four panels have been reamed on both faces and one panel riveted.

Middle gates, upper lock, 77 feet high, leaves Nos. 29 to 32, inclusive: The erection bridges were moved to this point and the bottom girders placed in the lock on January 27. The second girder was placed in leaves Nos. 31 and 32.

Pedro Miguel—Upper guard gates, 54 feet 8 inches high, Nos. 50 to 53, inclusive: The material, with the exception of five plates not yet located, and some smaller parts, was completely put in place and the moving of the erection bridges began January 23. The interior skeletons are riveted up. The riveting of sheathing was practically completed on leaf No. 50. The reaming was two-thirds completed and riveting of sheathing about 20 per cent completed on leaf No. 51. On leaf No.

52, five panels upstream sheathing was riveted, but no part of the downstream sheathing. About nine panels were riveted up on leaf No. 53.

Upper gates, 79 feet high, Nos. 54 to 57, inclusive: The bottom girders were placed in position on January 29 and 30.

Safety gates, 79 feet high, leaves Nos. 62 to 65, inclusive: The skeleton was erected 8 panels high in leaf No. 62, 12 panels high in leaf No. 63, and 13 panels high in leaf No. 64, but no reaming or riveting of same was done. Leaf No. 65 was erected 13 panels high and riveted 5 panels high.

No sheathing was put in place on these gates. Two sets of bridges are at work in this lock.

The total tonnage of lock gates erected on the canal to February 1, 1912, without regard to its being riveted or fully fitted, was about 6,646 tons, out of a total of 58,000 tons, or 13 per cent; 330,000 field rivets were driven, out of a total of 5,500,000, or about 6 per cent.

LOCK GATE RECESS COVERS.

The material for a total of 30 recess covers, excepting the cast iron plates, has been received on the Isthmus and unloaded at Gatun. Material for 12 covers was delivered to the contractors for the erection at Gatun, and 4 at Pedro Miguel. Eight covers were in course of erection at Gatun, 3 being practically riveted up, 2 partly riveted, and 3 bolted up and aligned. The grouting of covers will not be done until the rack sections and rails are attached and fully aligned and leveled. No covers have been erected at Pedro Miguel.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection as follows:

(*1*) *For the Stoney gate and cylindrical valve machines, purchased under Circular 614*—The first Stoney gate valve machine was erected, complete, except stem, with motor in place. Final test of the second machine was completed satisfactorily at shop of manufacturer and the same was received on the Isthmus January 2, and will be tested in the same manner as the first machine. Contractors have completed all drawings for the remaining 114 machines and work is progressing satisfactorily. The first cylindrical valve machine was received on the Isthmus and underwent a preliminary mechanical and hydrostatic test on January 6, 1912. The second machine was lost on the steamship *Moldegaard*, which was wrecked. Contractors are making replace shipment.

(*2*) *For the rack railway and other material purchased under Circulars 619, 636-D, 635, 647, and 647-A*—Satisfactory progress has been made during the month on all portions of these contracts.

(*3*) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, purchased under Circular 627*—The first miter gate moving machine was received and partially installed. The first miter forcing machine was received on January 15, and will be installed and tested when the miter gates are completed to such a stage as will permit of same.

(*4*) *For the gate and girder hoisting machinery for the emergency dams, purchased under Circular 616*—Satisfactory progress was made on this machinery during the month.

(*5*) *For the Gatun hydro-electric station, purchased under Circular No. 648*—Contract was entered into with the Pelton Water Wheel Company on December 2, 1911, for the turbines, governors, headgates, and penstocks; with the Niles-Bement-Pond Company on January 8, 1912, for one 30-ton crane; and with the General Electric Company on December 2, 1911, for generators, exciters and exciter sets. No deliveries have yet been made under this Circular.

(*6*) *For electric towing locomotives, purchased under Circular 650*—Working drawings are being prepared for Class 1, Item 1, covering one trial towing locomotive; award not yet made for the balance of the locomotives.

(*7*) *For locomotive cranes, derricks and hoisting engines for erection plant of machinery and electrical equipment, purchased under Circular 662*—Work is progressing satisfactorily on Class 1, Items 1 and 2, covering four 15-ton locomotive cranes and auxiliary hooks and lines. On January 18, bids under Class 2, for 4 stiff-leg derricks and 4 hoisting engines were rejected, and 2 locomotive cranes with auxiliary hooks and lines were requested instead.

The force installing machinery and electrical equipment on the Isthmus during the month continued with the placing of bench marks for various equipment at Gatun Locks, and on January 2, 1912, similar work was started at Pedro Miguel Lock, at which time the First Division field office for the Pacific lock was established. Three hundred and thirty-two and four-tenths tons of locomotive track material were distributed along the lock walls ready for assembling, and during the month 23.55 cubic yards of concrete were placed.

EMERGENCY DAMS.

The inspection work in the United States progressed satisfactorily during the month. Up to January 20, a total of 312 drawings of the turning and wedging machinery, and a large number of drawings covering structural parts, have been completed and approved. At the rolling mills and foundries, 294 tons of riveted nickel steel, 138 tons of riveted structural steel, 65 tons of carbon steel castings and forgings, and about 150 tons of miscellaneous cast iron castings, vanadium wheels and vanadium steel castings, in all about 650 tons of material, were fabricated and accepted during the month. Satisfactory progress has been made on the roller bearings, all the roller bearings for three complete dams having been manufactured and accepted to date.

AIDS TO NAVIGATION.

During the month 117 acres of land were cleared in the Gatun Lake section for sites for beacons and reference buoys; 12,200 linear feet of trochas were cut, and the necessary land for making surveys was cleared and profile taken. The locations for two buoys were referenced during the month in the Gatun Lake section.

Range 9–11. Pacific Division—The spiral reinforced concrete stairways in both towers have been erected, and the doors and windows have been put in place.

Range 1–2. Pacific Division—Same status as when reported last month.

Range 13–14. Pacific Division—Front light—The tower walls have been carried up to their final height, 44 feet to focal plane; the newel post has been erected to a height of 12 feet, and the wooden forms for the concrete entrance steps have been completed ready for pouring the concrete. Rear tower—The concrete vestibule and entrance steps have been completed; the newel post has been carried up to its final height, and the spiral concrete stairs are in place up to a height of 8 feet.

Range 5–6. Atlantic Division—The walls of the front tower have been carried up to a height of 11 feet above the foundation. The rear walls have been carried up to their final height of 48 feet to focal plane.

Range 21–22. Gatun Lake Section—The front tower walls have been carried up to a height of 20 feet above the foundation.

Range 24–25. Gatun Lake Section—The excavations for both towers have been dug and the concrete foundation for the front tower is under way. The greater portion of the material for both towers has been delivered near the sites.

At the general plant of the Lighthouse subdivision at Balboa, 174 reinforced concrete stair treads, 28 radial beams, 11 stair strings, 18 architrave moldings, 10 window lintels, and 9 window sills were cast during the month.

The sun valve used in connection with the acetylene outfits temporarily installed in the towers of Range 9-11, Pacific Division, was installed and the test of its efficiency was started on the 17th of the month. During the month both lights worked satisfactorily.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month two shovels were engaged on borrow-pit excavation for the locks backfill, 49,686 cubic yards of material being excavated.

Backfill—Backfilling behind the side walls of the middle and lower locks, and in the center wall of the middle lock, was continued. A total of 75,555 cubic yards were placed during the month, of which 6,892 cubic yards were placed in the center wall, making the total to February 1st, 1,199,598 cubic yards. Backfilling, on the basis of the present estimate, is therefore 74.72 per cent completed. Calculations are now being made on the basis of the width of the berm required for the fortification work. This increased width of berm will largely increase the backfill, especially on the east side of the locks, where it was originally proposed to limit the width of fill to 100 feet from the face of the wall.

Receiving and Issuing Material—The receipts of rock exceeded the issues by 10,281 cubic yards; the consumption of cement exceeded the receipts by 1,707 barrels; the consumption of sand exceeded the receipts by 7,430 cubic yards.

Mixing and Placing Plants—Both plants, and all portable mixers, have been kept in satisfactory operation during the month.

Power Plant and Pumps—The operation of the power plant and pumps during the month was satisfactory. The total output of the power plant was 1,383,800 k. w. hours.

Iron and Steel Work—During the month 267.5 tons of fixed steel and 100,191 feet of reinforcing rods were placed; 23 tons of reinforcing rails and 24.7 tons of electric return track were laid.

Concrete Work—There was a decrease of 8,607 cubic yards in the amount of concrete laid as compared with the figures for the preceding month. The daily average for the 26 working days was 1,345½ cubic yards as compared with a daily average during December of 1,744 cubic yards. The total amount of concrete placed during the month was 34,983 cubic yards, including 6,177¼ cubic yards of reinforced concrete. The place measurement exceeded the bucket measurement by 68 cubic yards. Of the total concrete, 6,535 cubic yards were placed in the upper lock 912 cubic yards in the middle lock, and 27,536 cubic yards in the lower lock. The concrete work for the entire lock system was 89.8 per cent completed at the end of January.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)..	11.47	8.50
Average number of hours per day worked, per strand of cableway, laying concrete and large stone (actual working time)......................	3.54	....
Average number of mixers per day......................	3.47	2.00

Total amount of concrete and large stone laid, cu. yds.......	26,572	8.343.5

GATUN DAM.

*Construction during the month increased the total fill by 413,166 cubic yards, making the total amount in place 17,723,733 cubic yards. The dam is 80.19 per cent completed.

**Hydraulic Fill*—The dredges increased the hydraulic fill by 173,900 cubic yards. The total hydraulic fill in place January 31, was 8,941,195 cubic yards.

**Dry Fill*—The material received from the Central Division, and from steamshovels Nos. 116 and 134, amounting to 239,266 cubic yards, was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 8,782,538 cubic yards.

*Figures given are based on semi-annual survey of dam.

GATUN SPILLWAY.

Excavation—During the month, 125 cubic yards of earth and 1,125 cubic yards of rock were excavated by hand in preparing foundations, making the total January 31st 1,587,626 cubic yards.

Backfill—During the month, no extension was made in the backfill.

Concrete—The work of placing concrete was continued. The amount placed during the month aggregated 8,905 cubic yards, which increased the total to †176,404 cubic yards. The concrete work for the spillway was 78.4 per cent completed.

†One thousand yards added to cover error in August report.

HARBOR AND CHANNEL SECTION.

Excavation below Sealevel at Mindi—During the month two steamshovels removed 450 cubic yards of earth and 32,715 cubic yards of rock from the canal prism.

Dredging from Ocean to Mindi—Six dredges removed 495,340 cubic yards of earth and 24,888 cubic yards of rock from the canal prism. In addition, Dredge *No. 4* removed 40,434 cubic yards of earth from the pit for spoiling dredged rock at the lock site, and derrick-barge *No. 1* removed 12,345 cubic yards of earth from the East Diversion at Mount Hope. The drillboat *Terrier* drilled 360 feet, used 3,400 pounds of powder and shot 1,672 cubic yards of rock to minus 45 feet. At Mile Post 6 plus 4,000 feet to 4,250 feet, 2,565 cubic yards of rock were drilled with star drills and blasted. On January 31st, 40 feet of water could be carried from Zero to Zero plus 2,800 feet; 35 feet to Mile Post 3 plus 2,600 feet; 30 feet to Mile Post 3 plus 3,700 feet; 20 feet to Mile Post 5 plus 2,438.9 feet, the point of intersection with the French Canal.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day, hours............	8.00
Average number of hours worked per day...	3.76
Average number of cubic yards per hour of working day.........................	225.28
Average number of cubic yards per working hour................................	479.78
Maximum day's output (4 hours 48 minutes) cu. yards.........................	2,279
Average day's output (26 days) cu yds......	1,802.23
Average hourly output (173 hours 11 minutes) cu. yds.........................	270.57
Total output for the month, cu. yds........	46,858

SAND, STONE, AND CEMENT SERVICE.

In connection with this service plant steamed 4,165 miles, handled 454 barges, and carried 2,436 passengers.

WEST BREAKWATER, COLON.

Forty-eight thousand, eight hundred and twenty-three cubic yards of material were excavated, of which 48,423 cubic yards were dumped from the trestle into the breakwater, and 400 cubic yards used in tracks. The double track trestle was extended 319 linear feet. On January 31 the trestle extended 9,065 linear feet from shore. During the month 7,287 cubic yards of Porto Bello rock were placed on the breakwater, making a total of 24,395 cubic yards used for that purpose to February 1. The total amount of rock dredged and dumped on the west breakwater to January 1, 1912, was 854,717 cubic yards. During the month 24,888 cubic yards of rock were dredged and dumped, increasing the total to 879,605 cubic yards. The amount of dry fill placed to February 1 was 618,918 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work.

Central Division.

During the month of January the total amount of material excavated in the Central Division was 1,452.840 cubic yards, of which 241,035 cubic yards were classified as earth and 1,211,805 cubic yards as rock. Of this quantity, 1,421,133 cubic yards were removed by steamshovels, 23,168 cubic yards by cranes, and contractors removed 991 cubic yards by sluicing and 7,548 cubic yards by hand. Of the total, 1,444,392 cubic yards was primary excavation for the canal prism, and 8,448 was gravel removed outside the prism.

The daily average number of steamshovels at work during the month was 41.92, and the total number of shovel days was 1,090, as compared with 41.54 at work during the month of December with 1,038½ shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'k'g days.	Av. yards per shovel day
		Rock.	Earth.			
	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. Y.
1911: Jan.....	1,585,406	1,158.360	427,046	47.68	25	1,330.04
1912: Jan....	1,421,133	1,204.657	216,476	41.92	26	1,303.79

Rainfall at Empire: 1911, 0.02 ins.; 1912, 0.01 ins.

The above table shows the average output per shovel to be 1.97 per cent greater in January, 1911, than in the corresponding month of 1912.

The total amount of material excavated from the prism in the Culebra Section of the Central Division in January, 1912, 1,416,035, cubic yards, was the greatest record in that section for the month of January, the next highest being January, 1911, when 1,356,394 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division, according to the revised estimate of July 1, 1911, was 101,801,296 cubic yards, and up to February 1, 1912, 86,871,307 cubic yards had been removed, leaving 14,929,989 cubic yards to be removed in order to complete all excavation in the Central Division. From these figures it will be seen that 85.33 per cent of all excavation in the Central Division had been completed up to the close of the month of January, and 14.67 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of January operations was as follows:

CULEBRA SECTION.	Cu. Yds.
Completed..........................	74,918,859
To be completed.....................	14,525,146
CHAGRES SECTION.	***Cu. Yds.***
Completed..........................	11,952,448
To be completed.....................	404,843

From the above figures it will be seen that the Culebra Section, locally known as the "Culebra Cut," was 83.76 per cent completed, with 16.24 per cent to be completed; the Chagres Section was 96.72 per cent completed, with 3.28 per cent to be completed.

During the month 87,502 cubic yards of material were hauled from the canal prism and dumped in the embankment for the roadbed of the relocated Panama railroad. The total amount of spoil from the Central Division used for this purpose at the close of the month was 4,146,793 cubic yards. The Central Division also delivered at Gatun 221,228 cubic yards of rock and earth for use in the construction of the dam, making the total for this purpose at the end of January 5,277,395 cubic yards. During the month 11,539 cubic yards of rock and earth were furnished for the Colon breakwater, and 30,780 cubic yards to the Pacific Division for backfill at Pedro Miguel Locks.

The daily average number of laborers at work on the whole Division during the month was 7,506, and the daily average number of gold employes was 785.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 168,984 cubic yards, of which 35,202 cubic yards were classified as earth, and 133,782 cubic yards as rock.

Filling and Embankment—During January, 38,044 cubic yards of dry filling were added to the prism of the west dam at Pedro Miguel, increasing the total amount of material in place at the close of the month to 356,965 cubic yards. The backfill at Pedro Miguel was increased by 30, 747 cubic yards, the total in place at the end of the month amounting to 500,056 cubic yards.

At Miraflores, 24,920 cubic yards were added to the dry fill in the toes of the west dam, increasing the total amount in place at the end of the month to 1,095,297 cubic yards. The backfill was increased by 38,733 cubic yards, making the total amount of backfill in place at the end of the month 390,414 cubic yards.

Pedro Miguel Lock—The general backfilling of the lock walls was continued. The work of constructing the west dam was continued by filling rock into the west toe by Lidgerwood trains from Culebra Cut, also by filling in the east and west toes with spoil from the lock excavation. The McClintic-Marshall Contruction Company began dismantling the fourth and final chamber crane at Pedro Miguel during the latter part of the month, preparatory to moving it to Miraflores and re-erecting it in the east chamber of the lower lock. The amount of iron placed in the masonry aggregated 175,897 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 15,077 cubic yards, as compared with 14,360 cubic yards during December. The concrete was placed as follows: 308 cubic yards in the northeast wing wall; 3,921 cubic yards in the north center guide wall; 3,225 cubic yards in the east wall; 4,115 cubic yards in the center wall; 171 cubic yards in the west wall; 1,849 cubic yards in the floors; 1,414 cubic yards in the southeast wing wall; 74 cubic yards in the railroad culvert, west dam.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT PEDRO MIGUEL.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	0.64	4.65
Average number of mixers per day	....	4.54
	Cu. Yds.	*Cu. Yds.*
Average hourly output per mixer (actual working time)	....	19.00
Average amount of concrete and large stone laid per hour, per chamber crane (actual working time)	42.61	....
Large stone laid	....	....
Concrete laid	706.00	14,371.00
Total concrete laid	706.00	14,371.00

Permanent plant consisted of 1 chamber crane. Auxiliary plant consisted of a daily average of two 2-cubic yard mixers, 2.54 ½-cubic yard mixers and 4.19 locomotive cranes and derricks.

Miraflores Locks—Excavation for the culvert system, and the placing of concrete in the lower lock were continued during the month. Dry excavation was continued in the lower lock and in the canal prism immediately south of same by the use of 6 steamshovels. The backfilling of the east and west lock walls, also filling on the east and west toes of the west dam were continued. The sinking of foundation caissons for the north center guide wall, and the construction of concrete caisson shells, were continued. The McClintic-Marshall Construction Company completed the erection of chamber crane No. 1 in the east chamber of the lower lock on January 24. During the month the amount of iron placed aggregated 281,626 pounds.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00 & 12.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	5.62	5.85
Average number of mixers per day	6.31	3.85
	Cu. Yds.	*Cu. Yds.*
Average hourly output per mixer (actual working time)	41.25	31.21
Average amount of concrete and large stone laid per hour, per berm, or chamber crane (actual working time)	59.83	....
Large stone laid	....	....
Concrete laid	30,541.00	17,875.00

Permanent plant consisted of 2 berm cranes working 8-hour day and 2 berm cranes working 12-hour day, and a daily average of 1.54 chamber cranes.

Auxiliary plant consisted of two 2-cubic yard mixers, daily average 1.62; three ½-yard mixers, daily average 2.31, and four locomotive cranes and derricks, daily average 1.88.

Concrete Work—The total amount of concrete and large stone laid at Miraflores was 48,416 cubic yards, as compared with 48,772 cubic yards during December. The concrete was placed as follows: 1,004 cubic yards in the north center guide wall; 24,592 cubic yards in the east wall; 8,224 cubic yards in the center wall; 6,126 cubic yards in the west wall; and 8,470 cubic yards in the floors.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

Dredge.	Type.	Work.		Plant.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 50,287 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work.

Work was continued on the Panama street improvements.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours)	8.00
Average number of hours per day (actual working time)	6.47
Average number of cubic yards crushed per hour per working day	252.3
Average number of cubic yards crushed per working hour	349.5
Total output for the month, cu. yds	59,043.0

Relocation of Panama Railroad.

During the month 316,666 cubic yards of material were excavated, increasing the total excavation at the close of the month to 9,939,837 cubic yards, and 501,290 cubic yards of material were placed in embankment, increasing the total for this purpose to 16,145,874 cubic yards.

The daily average number of steamshovels at work was 8.76. and the total number of working days was 26.

For comparison with the work done by steamshovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock	Earth.			
1911:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
Jan	251,175	162,3 0	88,785	6.00	25	1,675
Dec	345,520	197,355	148,165	10 40	25	1,329
1912:						
Jan	320,035	178,210	141,825	8.76	26	1,406

No temporary trestle was driven during the month. Work on bridges and culverts was continued. At the end of the month there were 70,568 linear feet of 70-pound and 111,653 linear feet of 90-pound track, or a total of 182,221 linear feet. The force averaged 2,166 men.

Quartermaster's Department.

LABOR.

The force report of January 10, 1912, shows a combined force for the Isthmian Canal Commission, Panama Railroad, the Panama Railroad Relocation, and the Commissary Department of 38,505 men, the largest force since the inception of the work, with the single exception of March, 1910, when the force report showed a total of 38,676 employes. Owing to a reduction of force a number of European laborers were discharged during the month.

QUARTERS.

Due to the increase of force of gold employes of the Pacific Division, Fortification Division, and the McClintic-Marshall Company, there is a lack of bachelor quarters in the Corozal, Pedro Miguel and Gatun districts. Work authorized at Culebra will result in the demolition of 24 cottages, which will necessitate the transfer of 24 families to other quarters.

BUILDING CONSTRUCTION.

The additional construction authorized for the Tenth Infantry at Las Cascadas is nearly completed, and a number of the houses have been turned over and occupied. The addition to the Hotel Tivoli is nearing completion and it is expected that the two upper floors will be ready for occupancy before the end of the month. The lodge hall at Culebra has been demolished and is to be re-erected at Corozal as bachelor quarters. Ten cottages have been demolished at Culebra and a number remain which will have to be torn down during the month of February. The buildings which remained unsold at San Pablo, Tabernilla and Bohio have also been demolished; the greater part of these were small sheds of little value.

MATERIAL AND SUPPLIES.

The value of the material received during the month was greater than for any other month of the fiscal year to date, and greater than for the corresponding month of the preceding year. The material received included over one hundred thousand dollars worth, bought on "A" requisitions for the Panama Railroad Company. The shortage of lumber still continues and although over 2,000,000 feet were received during the month, approximately that amount was used in the work, and there is very little reserve stock in the yards. Large shipments of lumber and piling are expected during the month of February, which should relieve the situation. The value of material received from the United

States during the month was $1,073,117.25. Supplies during the month were delivered by 41 steamers, the total weight of cargo aggregating 46,582 tons, exclusive of 1,303,400 feet B. M. yellow pine lumber, 949,367 feet B. M. Douglas fir lumber, 141,877 feet B. M. white oak lumber, 754 pieces of piling, and 324 cross ties.

Subsistence Department.

The operation of European laborers' messes and the colored laborers' kitchens showed a net profit of $4,003.34, and the line hotels a net loss of $1,841.62. The operation of the Tivoli Hotel showed a net profit of $7,122.72, and there was a net profit on the restaurants, penitentiary, tugs and dredges of $95.12. The net profit in subsistence operations was $9,379.56.

Department of Civil Administration.

COURTS.

During the month one criminal case was disposed of in the Supreme Court, 10 civil and 55 criminal cases in the Circuit Courts, and 81 civil and 597 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for January amounted to $404,891.70, and the fees to $1,873.79. Receipts for stamp and card sales, and newspaper postage aggregated $7,217.84. The total collection of revenues made by the division was $16,196.32, and the collection on account of court fines, costs and fees, $3,021.25.

Twenty-five vessels entered at, and 26 vessels cleared from the port of Ancon; and 29 vessels entered at, and 23 cleared from the port of Cristobal. Three hundred and sixty-six passengers arrived at the port of Ancon, and 590 at the port of Cristobal; and 401 and 251 passengers, respectively, departed. Two estates were settled during the month, and on January 31 there were 12 estates of deceased American employes in course of settlement.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 572, of whom 527 were men and 45 women. Twenty-five nations, or 52 separate states and dependencies, were represented. Fourteen convicts were committed to the penitentiary, and 7 were discharged, leaving 152 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $3,292.58, and the value of their work on Canal Zone roads was $2,634.40. The total number of employes in the Division on January 31 was 263.

DIVISION OF FIRE PROTECTION.

Fifty-nine fires were reported in the Canal Zone during the month. This is an increase of forty-three over the previous month and is accounted for by the prolonged dry weather. The damage to Commission property was $430.00, and to private property $21.00.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,440,245 gallons, and in Colon 1,117,625 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The net enrollment in the white schools during the month was 1,190, and the average daily attendance 997.5, or 94.1 per cent of the enrollment. In the colored schools the net enrollment was 1,333, and the average daily attendance 776.3, or 84.1 per cent. Forty-six white and 28 colored teachers were employed in the division on January 31.

Department of Sanitation.

The total number of deaths from all causes among employes was 35. These were divided as follows: From disease, 21; and from violence, 14, giving the annual average per thousand of 4.86 and 3.24, respectively.

The annual average death rate per thousand among employes for the month of January in previous years since American occupation was as follows:

1905	15.40
1906	40.93
1907	25.62
1908	12.72
1909	10.98
1910	10.57
1911	10.14

The annual average death rate per thousand in the cities of Panama, Colon and the Canal Zone, including both employes and non-employes, was 17.67.

The annual average death rate per thousand for the month of January among the same class of population for previous years was as follows:

1905	46.50
1906	47.75
1907	35.12
1908	26.66
1909	22.86
1910	21.26
1911	21.05

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was, for whites 7.57; blacks, 3.98, giving a general average of 4.86. For the same month during 1910, the annual average death rate per thousand from disease was, whites, 1.95, blacks, 8.91, giving a general average of 7.21; and for the same month during 1911, whites, 1.89, and blacks, 6.23, giving a general average of 5.07.

Among employes during the month, deaths from the principal diseases were as follows: Chronic nephritis, 3; hœmoglobinuric fever, 1; lobar pneumonia, 3; malaria fever, E. A., 1; tuberculosis of the lungs, 3; typhoid fever, 1, leaving a balance of 9 deaths from all other diseases, and 14 deaths from external violence.

No cases of yellow fever, small pox, or plague originated on the Isthmus during the month. One case of yellow fever was removed from a vessel coming from Guayaquil and isolated at Culebra Island quarantine station.

Respectfully,
H. F. Hodges, *Acting Chairman.*

OFFICIAL CIRCULARS.

Employes Temporarily Obtained from Mechanical Division.

Culebra, C. Z., February 21, 1912.

Circular No. 357-c:

The information to be furnished division engineers in the case of employes temporarily obtained from the Mechanical Division under paragraph 4 of Circular No. 357 will hereafter be given on Form C. E. 333. One copy of the form for each employe will be mailed to the division engineer, the Examiner of Accounts, and the master mechanic or general forman of the shop, and one copy will be given to the employe, who will deliver it to the head of the shop when he reports for duty.

One or two days before employes temporarily obtained from the Mechanical Division, as provided for in Circular No. 357, are to be returned, the head of the shop will notify the Superintendent of the Mechanical Division and will obtain from him the number of the house and room therein in which each employe will be quartered upon his return to the Mechanical Division. The head of the shop will have four copies of the form made out for each employe returned, and will mail one copy thereof to the division engineer, the Examiner of Accounts, and the Superintendent of the Mechanical Division, and one copy to the employe, who will deliver it to the Superintendent of the Mechanical Division when reporting for duty.

The name of but one employe will be entered on the blank.

Until the supply of Form M. D. 20? shall have been exhausted it will be used by the Mechanical Division.

H. F. Hodges,
Acting Chairman, Isthmian Canal Commission.
Second Vice President, Panama Railroad Company.

Additional Ratings.

Culebra, C. Z., February 24, 1912.

Circular No. 229-w:

The following additional designations and rates of pay, applicable only to employes on dredges, which employes may be used interchangeably, are hereby authorized:

Designation.	Unit.	Rate of Pay.
Oilers	Mo.	$55.00
Watertenders	Mo.	55.00

H. F. Hodges,
Acting Chairman and Chief Engineer.

No Sight-seeing Train on Holidays.

Panama Railroad Company,
Office of General Superintendent,
Colon, R. P., February 27, 1912.

All Concerned:

Effective at once, the sight-seeing excursion train will not be operated on holidays.

J. A. Smith, *General Superintendent.*

Married.

LINDSAY-MARSHALL—At Christ Church, Colon, February 17, by the Rev. Edward Cooper, Olive Elizabeth Marshall of Whitewater, Wisconsin, to Courtenay T. Lindsay of Spartanburg, S. C. Canal Zone residence, Toro Point.

Lost—Between house 153 and railroad station, Empire, on Sunday morning, February 18, a plain gold bracelet, with inscription "Edgar to Floy, 1-1-11." Reward if returned to Y. M. C. A.

Found—A small roll of money was picked up on the floor of the Corozal branch commissary on Saturday morning, February 17, at 11.30 a. m. Loser will secure same by calling on storekeeper.

WEATHER CONDITIONS, CANAL ZONE, JANUARY, 1912.

Continued dry season weather prevailed during the month in all sections of the Canal Zone. The rainfall was below normal at all stations, the average fall over the Isthmus being the lightest of record for any month during the past six years. Practically no rain was recorded in the Pacific Section and very little over the greater part of the Central Section.

The average temperature and wind movement were above normal, the wind movement at each station being the highest or record for the month of January.

The mean relative humidity, atmospheric pressure and cloudiness were generally below the normal, and there was a marked decrease in night fogginess, compared with December conditions.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Thirty-one men took part in the first Pentathlon Athletic Meet held on the Canal Zone, which took place on February 22. Each contestant competed in the 100-yard dash, 12-pound shot put, running high jump, pole vault, and half-mile run. The scoring was based on 100 points as perfect in each event. This style of meet was given to encourage all-around proficiency. A summary or results follow:

Name.	Y. M. C. A. or club.	Points.	Medal.
Koperski	Empire	379	Silver
Robinson	Gorgona	347	Silver
Luttrell	Empire	337	Silver
Barcroft	Culebra	329	Silver
Mosier	Tenth Infantry	329	Silver
Miller	Empire	323	Silver
Chadbourne	Corozal	320	Silver
Koperski	Cristobal	315	Silver
Whittles	Crisbotal	312	Silver
Matthue	Cristobal	307	Silver
Myers	Camp Elliott	278	Bronze
Johnson	Gorgona	277	Bronze
Grim	Corozal	267	Bronze
Collier	Gorgona	265	Bronze
Burns	Tenth Infantry	263	Bronze
Simms	Corozal	254	Bronze
Wright	Gatun	246	Bronze
Bessey	Corozal	246	Bronze
Marshall	Camp Elliott	244	Bronze
Anderson	Camp Elliott	237	Bronze
Howard	Camp Elliott	236	Bronze
Mengel	Culebra	230	Bronze
Alley	Tenth Infantry	224	Bronze
McDonald	Tenth Infantry	221	Bronze
Chatfield	Gatun	214	Bronze
Cousineau	Cristobal	213	Bronze
Levy	Cristobal	170	....
Knapp	Camp Elliott	170	....
Calvert	Camp Elliott	91	....

The team trophy was won by the Cristobal Y. M. C. A., whose five high men made a total of 1,347 points. Camp Elliott was second, with a total of 1,183 points. The relay race was won by Cristobal. Messrs. Koperski, Whittles, Levy, and Matthue composed the team.

Officials assisting in the meet were as follows: Referee, Burrell; Starter, Geer; Announcer, Holt; Track Judges, Warr, Ross, Safford and Kramer; Clerks of Course, Dwelle, MacSparran, Smith, DeCora, Voltz, Robertson, and Diehl; Timers, Conn, Simms, Poindexter, Evans, Nellis, Montrey, and Hesdsen; Field Judges, Hopkins, Louden, Kuentz, Strothers, Hall, Decker, and Weiser; Inspectors; Simmons and Mennis.

CULEBRA.

A Spanish class has been organized and will meet on Saturday evening at 8 o'clock. Everyone who wishes to join this class may do so by making application at the desk. It is open to all.

The high scores in duckpins for the week are as follows: Hobart, 110, 101; Hill, 111; Brown, 101, 102; Sickler, 102, 111; Sterns, 106; Driscoll, 101.

EMPIRE.

It is expected that the Empire minstrel show will give its first performance on March 5, at Empire

The following high scores were bowled on the alleys during the past week: *Duckpins*—Dakin, 100; Pinney, 104, 101, 110, 109, 115; Giavolli, 108; Rodeighiro, 103, 113, 102; H. King, 101; Goolsby, 111, 101; Grant, 101. *Candle pins*—Pinney, 118; Grund, 106; Nelson, 107; H. King, 102; Grant, 105.

GORGONA.

A new Spaulding punching bag and latest model swirl have been placed on the front veranda by the gymnasium, and can be used at any time by those desiring

The Religious Work Committee met at the call of the chairman, Judge J. B. March, on Monday night February 26. The following men are on the committee: Messrs. March, Lister, Dougherty, Packard, and Otis. It was decided to start an "Every Day in the Year Club" next Friday night, March 1, at 7.15 p.m. All men are cordially invited to attend. The meeting will be in the secretary's room.

GATUN.

The Gatun Choral Club will give the "Holy City" in the near future. In addition there will be a miscellaneous program during the first half of the evening. The same program will be given at several different clubhouses. A. B. Dickson will act as musical director.

W. S. Mitchell led the meeting of the Discussion Club on Sunday evening, February 25. The subject was "A Sane and Practical Program for Christian Politics." Twenty-five men attended.

CRISTOBAL.

On Monday night a week ago a meeting of all of the men interested in bowling was held in the bowling alleys and it was decided to start a local duckpin league on Monday, February 26, 1912, the league to be known as the Cristobal Y. M. C. A. National Duckpin League.

BASEBALL.

The series of games between the New Orleans team and the Isthmian All-Star team was concluded on Sunday, February 25. New Orleans won 4 of the 5 games.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gatun, C. Z., Sunday, March 3, 1912 at 5.00 p. m.

The next concert will be given at Hotel Tivoli, Ancon, March 10 at 8.00 p. m.

Misdirected Letters.

ANCON, February 24, 1912.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts and may be secured upon request of the addressees:

Andrews, William B.
Adams, J. H.
Bethea, A. W.
Baughman, Rene
Briggs, Chas. B.
Barker, Chas.
Brown, Mr. and Mrs. Jack
Bataloa, Miss Minnie
Betterton, Dr. Ed.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending March 6, 1912. (75th meridian time):

DATE.	High	Low	High	Low
	A.M.	A.M.	P.M.	P.M.
February 29	12.09	6.42	1.00	7.19
March 1	1.27	7.50	2.06	8.20
March 2	2.30	8.47	3.02	9.16
March 3	3.23	9.38	3.50	10.04
March 4	4.11	10.25	4.35	10.50
March 5	4.55	11.08	5.17	11.33
March 6	5.40	11.57	5.58	......

The following vessels arrived at or departed from, the port of Balboa during the week ending February 24:

Arrivals—February 20, *Quilpue*, from Valparaiso; February 21, *Acapulco*, from San Francisco; February 23, *Ecuador*, from Guayaquil.

Departures—February 19, *Mantaro*, to Callao; February 20, *Navajo*, to San Francisco; February 20, *Aysen*, to Valparaiso; February 23, *Manga Reva*, to San Francisco; February 23, *Riverside*, to San Francisco; February 24, *City of Para*, to San Francisco.

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a.m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans via Limon, on Thursdays at 5 p. m.; ships for New York via Kingston on Tuesdays at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro on Mondays and Tuesdays at 5 p. m.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MARCH 6, 1912. No. 28.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Closing of Spillway at Gatun.

When the work of laying the ogee for the spillway dam at Gatun was resumed in January, all but four of the openings between the construction piers, which then formed the only obstructions across the spillway channel, were closed with heavy timber gates. In front of those closed places the concrete has been placed for the greater part of the toe and ogee, and the four other apertures have since been closed to allow the construction of the final, connecting section of ogee. No water is now flowing through the spillway and Gatun Lake is slowly rising. Arrangements have been made, however, by means of under sluices at elevation + 10 feet, to allow a discharge if it should be desired to keep the water from rising above any specified level. Since the abandonment of the old main line of the Panama railroad and the villages on it between Gatun and Gorgona, no construction work in the Gatun Lake area would be interfered with unless the water should rise to a height of 30 feet above scalevel. The surface of Gatun Lake was at elevation 16.2 feet on Saturday, March 2, and the height of the Chagres River at Bohio was 16.2 feet. Under the prevailing dry season flow, the lake is rising at the rate of .1 foot a day, with a differential of decrease due to extensions of the area affected as the lake spreads.

Foundation for Emergency Dam.

Concrete is being placed for the first of three piers which are to be the foundation for the emergency dam cantilever for the east chamber of Pedro Miguel Lock. Two of the piers, designated main piers, will be 40 by 24 feet in section and the third will be 40 by 11 feet. The depth of each will he approximately 12 feet, though subject to variation on account of the manner of construction, as it will rest directly on the backfill of earth and rock, without the support of piles; when the concrete has been laid to a level a few inches below the top of the side wall of the lock, several months will be allowed for the mass to settle. Then the finishing portions will be placed to make the top of the pier even with the side wall.

One of the main piers will be directly next the side wall, thin sheeting being interposed during the laying of concrete to prevent adhesion and interference with free settling. It will be on a line with the emergency dam sill at the bottom of the chamber and will support the axis on which the cantilever is to be swung. The other piers will be set in excavations in the backfill in the rear of the first, with their inner faces about 125 feet from the face of the side wall. They will be placed parallel, with their adjacent sides 8 feet apart, and will be connected with the side wall by a quadrant of track, over which one end of the cantilever will swing when the other is projected over the chamber. A description of corresponding preparation at Gatun Locks was published in THE CANAL RECORD of December 27, 1911.

The concrete for the piers will be heavily reinforced. At the bottom of the pier which is now under construction seven 70-pound rails have been laid transversely and over them are twelve rows of rails, lengthwise, on approximately 2-foot centers.

Power Riveters for Shops.

Two power riveters have been added to the equipment of the Mechanical Division. At present they are in use in the old shop at Cristobal where the cylinders for the caissons, on which the Panama railroad docks at Cristobal are being built, are being assembled. Later they will be erected in the permanent shop at Balboa. They have 75-inch jaws, and this enables them to do all the riveting on two cylinders, each five feet long, on the center band, and the end band, thus completing a cylinder 10 feet 6 inches over all. These long sections must be joined by hand riveters. Four times as many rivets can be driven in a day by the use of these machines as was possible under the hand process.

Piles Among Buried Cables.

In the construction of a portion of the emergency dam foundation on the backfill west of the upper lock at Gatun, it was planned to drive a number of piles to a depth of about 90 feet, within a square section, fifteen feet on the side, and then remove the earth within this section to the depth of 24 feet below the surface to allow the placing of concrete in the excavation. Eight buried electric cables, running to and under Gatun Locks, cross the section. Inasmuch as they would be in danger of injury by the piles, it was decided to do the excavation first and drive the piles when the cables had been exposed to view and could be avoided with certainty. None of them is lower then 24 feet below the surface. Each pile will be a 10-inch wrought iron pipe, protected at the ends while being driven down to rock and then filled with concrete, as in the construction of caissons.

The eight cables for which this care is necessary were laid in August and October, 1910, when the backfilling had hardly begun, and the subsequent settling of material has twisted them out of their former positions. They were meant for temporary use in construction work. One, of 600-volts tension, runs to the trolley wire which supplies current for moving the cableway tail towers along the east backfill; another, of 6,600 volts, transmits current to the substation at Cristobal. Of the others, which have 2,300 volts, one leads to the Gatun lighting system, two to the Agua Clara pumping plant, one to the shops of the Mechanical and First Divisions, east of the lower lock chamber, and two to the wires for the temporary lighting of the locks.

Culebra Cut Excavation—Steamshovel Records.

Excavation in Culebra Cut during the month of February amounted to 1,319,569, leaving to be excavated 13,175,577 cubic yards. Excavation in the Empire district amounted to 459,665 cubic yards, Culebra, to 827,560, and Pedro Miguel, 62,344. Excavation in February, 1911, in Culebra Cut amounted to 1,403,602 cubic yards. During the same month of this year 15 of the 42 steamshovels at work in the cut were excavating part of the time below elevation 40, and excavation below this level is not counted, because this is the bottom of the Canal.

The highest daily record ever made in the Cut was that of February 28, when 42 steamshovels excavated 65.797 cubic yards.

On March 1, steamshovel No. 124, working in the Culebra Construction District, Central Division, loaded 283 ten-yard Western Dump cars in a working day of eight hours, a total of 2,830 yards of earth excavated during that period. During this time, the shovel was actually at work six hours and 55 minutes, was waiting for cars 50 minutes and cleaning dipper 15 minutes. It is a 70-ton Bucyrus shovel and has a dipper of three yards capacity. This is the greatest amount of material excavated by a 70-ton shovel in one day in the Canal proper since the commencement of work.

Progress In Erection of Lock Gates.

A curved track, ending perpendicularly to the lock walls at the site of the recesses for the upper guard gates at Miraflores, has been laid on the east backfill of the upper lock to provide accommodation for the McClintic-Marshall Company in storing material and erecting gates. The first shipment of material for the Miraflores gates has been made but the work of erection will not begin until after the completion of erection at Pedro Miguel Lock. The two erection bridges now in use at Pedro Miguel will then be moved to Miraflores and may be supplemented by a third bridge in the lower chamber, if desirable. The work at Miraflores will be the last undertaken on the Canal by the company and it will endeavor to concentrate a large force and equipment

NOTES OF PROGRESS.

(Continued.)

there. The force of white structural-iron workers is being continually increased.

At Pedro Miguel the skeletons for the upper and lower main gates, of the east and west chambers, the latest to be undertaken, have been brought to full height. After the sheathing has been placed the erection bridges will be moved to the sites of the intermediate and lower guard gates.

The skeletons for the intermediate gates in both chambers of the upper lock at Gatun have been brought to full height and the bridge will shortly be moved to the sites of the lower main gates. The force at Gatun has been placing an average of four stories of gate skeletons a day, one story on each leaf. A story, or section, is about 65 feet long, from 3 feet to 5 feet in height, varying with the distance above the base, and contains, on an average, about 10,000 pounds of metal. A second double-span erection bridge, for use at Gatun in the lower lock, was shipped from Baltimore on February 27, and will probably be installed by April 1. During February, 3,186 tons of metal were placed in the gates under erection at Gatun and Pedro Miguel, making the total now in place about 10,000 tons, out of a total of 57,000 tons.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 81 per cent. completed, 186,549 cubic yards, out of a total of 225,000, having been placed at the close of work on March 2. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
February 26	504	16.00	2
February 27	477	16.00	2
February 28	392	16.00	2
February 29	384	16.00	2
March 1	412	16.00	2
March 2	312	16.00	2
Total	2,481	96.00	2
Previously reported	184,068		
Grand total	186,549		

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending March 2, follows:

DATE.	Hours worked.	Cubic Yards.
February 26	4.20	1,832
February 27	3.15	1,910
February 28	3.30	1,804
February 29	3.15	1,834
March 1	3.15	1,860
March 2	3.35	1,898
Total	21.10	11,138

Ancon Crusher.

DATE.	Hours worked.	Cubic Yards.
February 26	7.00	2,022
February 27	6.40	3,038
February 28	6.15	2,302
February 29	8.20	3,172
March 1	14.25	5,158
March 2	15.00	4,910
Total	57.40	20,602

Replacing Flues In Locomotives.

The American locomotives purchased in 1906 for the Canal work, and in continuous service since, are requiring renewal of their flues. Two hundred and two new flues were put in during the calendar year 1909, 1,636 in 1910, 11,744 in 1911. In the period November 1, 1911, to January 24, 1912, there were renewed 6,472 flues, or which 3,429 were renewed beween January 1 and 24.

Tourist Trade.

The quarantine officer at the port of Colon reports 4,249 persons landed at that port in February "in transit." In January 2,261 persons in this class were landed. In the year 1911 there were 18,577 transit passengers. This classification does not include passengers destined for the Pacific coast, but does include persons coming to Panama on business, such as commercial travelers. Almost all so classed are tourists.

CONCRETE WORK IN THE LOCKS.

Over 80 per cent of the concrete for the locks is in place, the amount at the close of work on March 2 being 3,364,015 cubic yards, out of a total of approximately 4,199,400. A total of 32,092½ cubic yards of concrete was laid in the locks during the week ending March 2.

GATUN LOCKS.

Over 91 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 2 being 1,830,151 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending March 2, and of the total follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

At the meeting of the Cristobal Woman's Club on Wednesday, February 21, the art and literature department presented a program, "An Afternoon with Grieg." Mrs. Frank Ullrich read a paper on the composer, illustrated with piano selections from the "Peer Gynt Suite" and others of his works; a quartette sang two numbers from his compositions, and Grieg's "Ave Maria Stella" and "Ich liebe Dich" were sung by Mrs. Diers.

The Paraiso Woman's Club will celebrate the centenary of Charles Dickens at its meeting on Wednesday, March 6. The program will consist of a paper on Dickens, and readings from his works.

The Gatun Woman's Club gave a tea and entertainment in the clubhouse on Thursday afternoon, February 29, for the benefit of the Federation blind boy fund. The concert hall was divided by screens into an attractive tea room and tables seating four were decorated with flowers. Tea, sandwiches, olives, and cake were served for twenty-five cents. During the afternoon the following program was rendered: Selection for piano, "Humoresque," Dvorak, by Miss Florence Neville; Japanese dance in costume by Miss Ritchie Teese; songs by Mrs. T. W. McFarland, recitation by Miss Miriam Stevens. This is the second in the series of entertainments by the federated clubs for this fund; the first having been a cake sale held by the Empire Woman's Club in February. The Empire club will hold a second sale, and the Paraiso and Cristobal clubs are planning entertainments. There have been generous responses to the efforts of the clubs in this behalf. The committee for the centralization of the effort, with Mrs. A. O. Herman as chairman, met at Gorgona on Monday afternoon, February 26, for the purpose of discussing ways and means and organizing a general plan for outside work. Several private subscriptions have been made. Three hundred dollars were pledged by the Federation at the annual meeting in January.

Church Work.

At a meeting of the Woman's Altar Guild of St. Luke's Hospital Chapel, Ancon, at the home of Mrs. Charles F. Mason on February 19, $50 was pledged as the Easter offering for the extension of mission work in the Canal Zone. The guild had as its guest Miss Anne Rhodes of the New York State Federation of Women's Clubs, who was a visitor to the Isthmus. The weekly meetings of the guild were begun on Tuesday morning, February 27, at the home of Mrs. J. P. Fyffe. In accordance with a custom established two years ago a regular tariff of fines will be imposed for tardiness and for absence from these meetings.

During Lent the regular schedule of services will be maintained at Christ Church, Colon. There will be service at St. Mary's Church, Empire, on Friday evenings at 7.30; services at St. Luke's Church, Ancon, will be on Sundays as usual and on Wednesday and Friday mornings. The Rev. W. H. Decker, priest in charge of St. Andrew's Church, Empire, and the adjacent missions, is on his annual visit to the mission at Darien in the interests of the Protestant Episcopal Church.

The Rev. R. H. Boyd of Nashville, Tenn., general secretary of the home missions board of the National Baptist Convention, was a visitor to the Isthmus last week in the interests of the mission here. During his visit he held services in the three churches located at Panama, Guachapali district, at Pedro Miguel and at Empire. The National Baptist Convention established work here in 1908. There are about 500 regular members of the mission.

Mr. James Hayter, agent for the American Bible Society for Central America and Panama, was a recent visitor to the Isthmus, his object being to look over the work being done by the local agents. The Rev. Charles W. Ports, of Panama has been the subagent for the society up to the present time, but Mr. Port's work as missionary in charge of the Spanish section of the work of the Methodist Episcopal Church, as well as his duties in connection with the Methodist college, made it impossible for him to give to the Bible work all the time necessary. To supply the special need, therefore, the Society appointed Mr. William Cocking, late of Honduras, in charge of Panama and the Canal Zone, and a certain section lying north of the mountains in Colombia. During the year 1910–1911, the American Bible Society circulated 4,335 books in Panama and the Canal Zone.

The Very Rev. Father Gorman, missioner of the St. Vincentian Fathers of Philadelphia, was on the Isthmus during February holding missions in Empire and in Gorgona. From February 3 to February 18, the missions were held daily at St. Ferdinand's Church, Empire, and the week following at St. Categan's Church, Gorgona. At the close of his mission in Gorgona, Father Gorman delivered a lecture on the attitude of the church toward socialism.

The Catholic Club of Gorgona, an organization of 70 members, will celebrate St. Patrick's Day on March 17 with a banquet at the Commission hotel. The Rev. Father McCarthy, one of the priests in charge of St. Categan's, will be the speaker.

Ladies' Auxiliary to Spanish War Veterans.

A Ladies' Auxiliary to Chagres Camp No. 2, United Spanish War Veterans, is being formed, and a meeting of the charter members will be held at the Empire lodge hall on Sunday, March 10, at 3 p. m., for the purpose of closing the charter list. All eligibles are requested to attend. All female relatives over 14 years of age of a veteran of the Spanish-American war, the Philippine insurrection, and the China relief expedition, who served between the outbreak of the war and July 4, 1902, whether the veteran is a member of any military organization or not, and any women who were connected with the Army, during the same period, as nurses, etc., are eligible to membership.

A. A. O. N. M. S.

The second annual banquet of the Panama Shriners' Club and their ladies will be held at the Washington Hotel, Colon, on Saturday evening, March 9.

A special train will be operated on the following schedule: Leave Panama 7.00 p. m., Corozal 7.05, Pedro Miguel 7.12, Culebra 7.23, Empire 7.27, Las Cascadas 7.31, Bas Obispo 7.35, Gorgona 7.44, Gatun 8.33, arriving at Colon at 8.47. Returning leave Colon, 12.30 a. m., making all of above stops.

I. B. E. W.

At the meeting of Local Union No. 677, Independent Brotherhood of Electrical Workers, to be held in the lodge hall at Gatun on Sunday afternoon, March 10 at 2.30 o'clock, J. J. Porter will lecture on "Transmission Line Calculation." Business of special importance will be given consideration. Refreshments will be served.

Obituary.

S. C. Cole died at Ancon Hospital on February 27 after a month's illness. He had been employed in the Central Division, was 54 years of age, and had lived on the Isthmus five years. He was unmarried.

F. R. Longtin, an American employe of the Isthmian Canal Commission, died at Ancon Hospital on March 1, of traumatism resulting from successive accidents, the last of which occurred on February 29. He was 29 years of age and unmarried.

Army and Navy Union.

The body of Simon C. Cole will be interred at Ancon on Sunday morning, March 10, after the arrival of the first train. He was a member of the Army and Navy Union, and all his comrades and his friends are invited to attend the interment ceremonies.

Missing Man.

His sister requests information about the present address of R. C. Cartwell or Cartmell of Decatur, Ill. Replies should be sent to the Director of Posts, Ancon.

Postage Stamps Commemorative of the Canal Opening.

The Post Office Department has decided to issue a series of postage stamps commemorative of the opening of the Panama Canal, and to this end has requested the assistance of the Commission in preparing suitable designs. The stamps will be in four denominations, one, two, five, and ten cents.

PERSONAL.

Mr. Joseph Pennell, the American artist, after spending several days on the Canal Zone in obtaining material for pictures of the Canal work to be published later in *The Century Magazine*, sailed for San Francisco on the *City of Sydney* on February 26.

Admiral Theodore F. Jewell and Mrs. Jewell, Admiral Thomas O. Selfridge, Admiral C. M. Chester, and Brig. Gen. Charles S. Smith arrived from New York on the *Cristobal* on February 22.

The second lecture in the second series of free illustrated lectures for the people of Colon was given in the conversorium on Thursday evening, February 29. The lecture was in Spanish, by Dr. da Costa Gomez, his subject being "The Fly as a Carrier of Disease." The lectures are given on the last Thursday evening in each month. They are in English and Spanish. Each lecture is illustrated with lantern slides.

The Orchid Chapter, No. 1, Order of the Eastern Star, has received its charter from the Grand Chapter. The meetings of the chapter are held in the lodge hall, Gorgona, on the second Saturday evening in each month. The chapter was organized on October 25, 1911, with 42 charter members. There is now a membership of 56.

Lost—Canal Medal No. 4,440, while owner was at work at Miraflores. Return to D. Morgan, Box No. 1, Pedro Miguel.

Lost—In washroom, second floor of Cristobal clubhouse, on the morning of February 22, man's gold ring, with reconstructed ruby. Reward for return to R. B. Irwin, House 116, Culebra.

TRACKS OF LOCK TOWING SYSTEM.

Placing of Rack Tracks and Conductor Rails.

Work is advancing upon the locomotive tracks at both the Gatun and the Pedro Miguel Locks. The tracks are to carry the electric locomotives which control the movement of vessels through the locks. It is necessary that each lock chamber be equipped with a towing track and return upon either side, which requires seven complete tracks at each of the locks—a towing and a return track upon each side wall, and a pair of towing tracks and a common return track upon the center wall. All tracks extend the entire length of the lock walls and are provided with crossovers at both ends. The lines of the towing locomotives (see descriptive article in THE CANAL RECORD of September 27, 1911), are fastened to the vessel in either the upper or lower forebay, and the locomotive then begins its travel, continuing at the rate of 2 miles an hour the entire length of the towing tracks. At the end of the run the locomotive is transferred over the crossovers to the return track, upon which the return trip is made at the rate of 5 miles an hour.

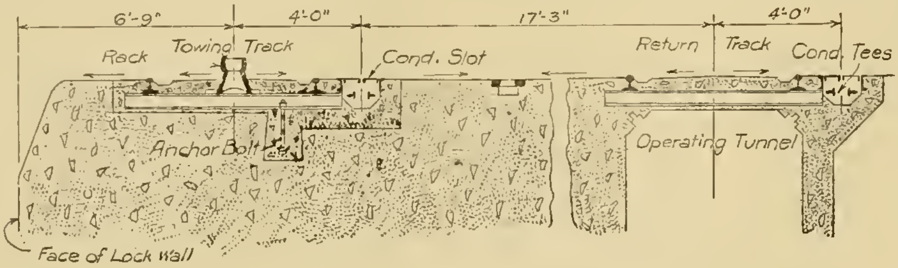

FIG 1.

SECTION OF LOCK SIDE WALL SHOWING GENERAL FEATURES OF TOWING AND RETURN TRACKS.

In comparison with ordinary first-class railway construction, the locomotive trackage of the locks is unique. In point of durability, the system has no superior. The foundation is of concrete; the ties are of steel; the rails are heavy-weight— 90 pounds to the yard; and, in addition, there is a rack for the towing track, a conductor slot housing a pair of electric rails for both the towing and the return track, and a complete drainage of surface, rack, rail gutters, and slot.

The installation of the track is adapted to the ever varying features of the masonry construction. The towing track, which is subjected to the heavier duty, is in general supported upon the massive concrete adjacent to the edge of the lock chamber, a continuous, wide groove, 12 inches deep being left in the initial masonry as space for the erection of the track. The towing track is provided with heavy anchor bolts at each tie (spaced on three-foot centers) imbedded two and one-half feet in the concrete. Such anchoring is essential in order to provide against an up-pull of the thrust wheels on the locomotive acting against the rack, the thrust being possible in case of extraordinary side-pull of the towing lines, tending to overturn the locomotive. The return track is of somewhat lighter construction and, in general, is supported directly above the operating tunnels of the lock walls. The typical tie spacing upon the return track is 3 feet 9 inches, instead of three feet, as for the towing track. The tracks contain both vertical curves between lock levels and horizontal curves at offsets, the former constructed on a 100-foot radius, and the latter on a 200-foot radius. Other special constructions are found at the cantilever decking over the indented recesses for miter gates, at the different crossovers, at the emergency dam inclines, at chain fender rooms, at intake and discharge valve rooms, and at a few manholes and cable shafts.

The accompanying illustration (Fig. 1) shows a typical cross-section of the towing and return track as installed. The towing track is situated 6 feet 9 inches to center line from the edge of the lock chamber and rests upon the solid masonry of the gravity section of the lock wall. In this masonry, a channel twelve inches deep and a dove-tailed groove are left until the track and anchors have been set, when the concrete is carried up to final elevation, and the track and anchors thoroughly imbedded.

The track material is furnished under contract; the ties, rack, and rails are drilled ready for connecting. In the field the ties are spaced out and the rails are spliced and bolted to the ties, as is also one side channel of the conductor slot; the rack is also bolted in position. The entire track is aligned and leveled, and the concrete cast, graded, and finished for proper drainage.

The surface of the concrete is sloped from the rack at the center of tracks to rail gutters on either side, which gutters are sloped longitudinally to frequent outlets. At every outlet a special cast-iron drain pipe, two inches in diameter, carries the water from each rail gutter and from underneath the rack to a sump situated at the bottom of the conductor slot on one side of the track. A four-inch drain pipe connects the conductor slot sump to a large drainage tunnel located underneath the duct space of the operating tunnel fourteen feet below the coping; other drains have a discharge at the conductor slot sump. This construction is varied to suit different requirements of center wall return track, as well as other conditions. The finished appearance of the track is very trim, a relatively small portion of the rail being exposed to view and to the action of the elements in a tropical climate.

A rack (Fig. 2) for supplying the requisite traction is placed upon the center-line of each towing track, as ordinary friction between wheels and rail is not sufficient for the maximum towing pull. The rack is of cast steel and of peculiar section, designed for the double purpose of engaging the driving cog of the locomotive and also a pair of horizontal thrust wheels, the function of which is to prevent overtipping of the locomotive in event of an excessive side-pull of the tow-line. The pitch of the rack teeth is 3.13 inches, and each rack section is cast in lengths of six feet, which is double tie-spacing. The sections are bolted together longitudinally and also bolted to each tie.

The ties are a rolled steel of modified I section, 5½ inches high with a top base of 8 inches and a lower base of 4½ inches. In railway work, it is common practice to install the larger base of the tie on the lower side to obtain a better bearing value. With a rail imbedded in the concrete, the bearing value is of smaller importance, and the ties for the towing track are installed with the larger base up in order to furnish more space for bolting the rack to the ties.

A conductor slot is provided on the off-tow side of each track as a means of supplying electrical energy to the locomotive, which operates on a 3-phase circuit at twenty-five cycles and 220 volts. Two of the phases are carried through the conductor slot, whereas the third phase is connected to the two running rails and grounded. The two conductors in the conductor slot are of T-section and supported by clamp insulators from malleable iron brackets. For the towing tracks, the T-conductors are manufactured from copper ingots by the extrusion process, as considerable current-carrying capacity is necessary; for the return track, rolled steel T's are used as conductors. The conductor slot proper is 14 inches wide by 11 inches to 14 inches deep, the depth varying in order to slope toward the drainage sumps. The upper corners of the conductor slot are protected by five-inch channels imbedded and anchored into the concrete. Rolled steel, checkered plates, in sections 30 feet long, cover the slot, resting upon frequently spaced brackets. A pair of contact plows, which bear against the flat side of each conductor rail and are attached to the locomotive, transmit the current from the conductors to the locomotive motors.

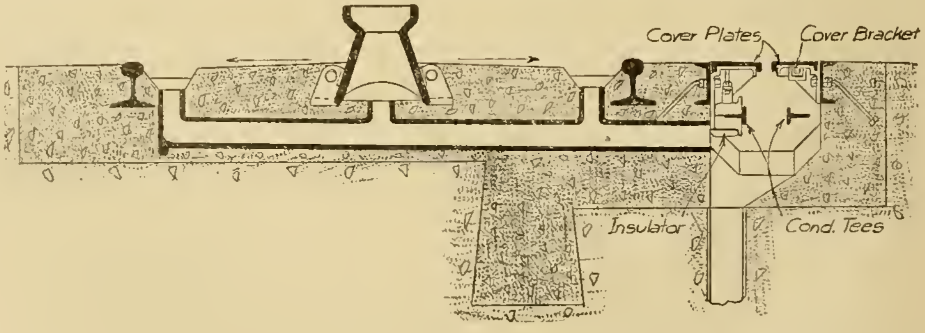

FIG 2.

LARGE SCALE SECTION OF TOWING TRACK SHOWING DETAILS OF RACK, CONDUCTOR SLOT AND DRAINS.

HEATED AREAS IN CULEBRA CUT.

Phenomenon Explained by the Commission Geologist.

Under date of February 12 the Division Engineer of the Central Division reported as follows regarding heated material on the west side of Culebra Cut at Culebra:

> A little less than three weeks ago I noticed that the material at the locality described, which consisted of stratified, sedimentary rock, among which there appeared some lignite of a low grade, was sending up in the early morning quite a thick cloud of white steam or vapor. I examined the spot a day or two afterwards and found that for a width of about 20 feet, length of about 100 feet and a depth of about 15 feet, the entire mass of material recently blasted appeared to be heated to a considerable temperature. Steam was escaping from numerous small openings and from four principal vents, or openings; the smallest of the four being about three inches in diameter and the largest about one foot. The temperature was so high that the hand could not be held at the mouth of the larger openings for more than a second or two, and when withdrawn was quite moist, showing quite unmistakably the presence of steam or heated vapor. The sides of two of the vents were encrusted both with white and yellow powdered material, the yellow appearing to be sulphur. What the white powder was I am unable to state.
>
> I have observed this locality almost daily for over two weeks, and within the past four or five days there has been quite a change in two important characteristics. The temperature has increased and a pale blue smoke, instead of steam, is now emerging from the vents. The odor of sulphuric acid, which was very marked when only steam was emerging, is fully as marked today. To give an idea of the temperature of the larger vent I took a nine-inch brown Manila envelope and held it at the mouth of the largest vent for three seconds, when it was totally destroyed although did not ignite in flame. I then took a piece of the white pine covering of a dynamite box and held it for three minutes within the mouth of the largest vent and on withdrawing it, it was completely charred, so that another three or four minutes exposure would probably have carbonized it completely. * * * * *
>
> I would respectfully recommend that the Commission Geologist be requested to make a careful examination and submit, as promptly as possible, a report on this matter, as it is one of great interest to the work and undoubtedly concerns the safety of our men who are handling dynamite. As you may recall, we have had premature explosions in the past on at least two occasions due to chemical heating of the rock, and I am convinced that the material which I have described was hot enough to have readily fired dynamite at any time within the past three weeks.

REPORT OF THE GEOLOGIST.

In accordance with the above recommendation the Commission Geologist, D. F. MacDonald, made an investigation and has submitted the following report:

The marl shales, through which Culebra Cut extends, in the region opposite the Culebra railway station, have, from time to time, on exposure to the atmosphere, become hot. The intensity of this heat has varied from noticeably warm to a temperature sufficient to readily char wood, without, however, causing it to burst into a flame. The duration of this heating has been from a few days to several weeks. These shales are dark, thin bedded, soft, and easily crumbled, and some of the layers are largely fine basic tuff, or volcanic ash, loosely cemented by lime. Other beds contain more carbonaceous material, with some local partings of lignite, an inch to a foot or more thick. The most easily weathered minerals of which these rocks are composed have been but little acted on by the atmosphere, and this, together with their composition, is evidence that they were derived from nearby volcanic mountains, and deposited as a succession of thin beds in a shallow estuary of the sea, which extended across the Isthmus at that time. That this material was originally deposited in water is known from its clearly stratified condition; that the water was shallow is evidenced by fragments of fossil plants and thin beds of lignitic shale, indicating swamp conditions, which are interbedded in it; and that the water was an arm of the sea is demonstrated by the fossilized marine animals, such as oysters, corals, pelecyods, and foraminifera, which it contains. The time when these conditions existed is known in geology as the early Tertiary or Oligocene period of earth history, and the fossilized animals of that period have certain specific marks, by which the specialist may distinguish them from animals of earlier and of later time.

After exposure to the atmosphere by drilling, or blasting, certain local areas of this formation become, in the course of a few days, warmed up, and as the heating goes on the carbonaceous matter in the shales is gradually oxidized off and they tend to assume a gray to dull reddish color. The first working hypothesis entertained, in looking toward a solution of this heating phenomenon, was that possibly the heavy blasting had furnished heat enough to break down the calcium carbonate present to the oxide form, and that ground water and atmospheric moisture reacted on this to slake it and thus probably generate sufficient heat to start the oxidation of the carbonaceous material. This hypothesis was, however, rendered untenable by three lines of evidence:

(1) The heating was much more local than the calcium carbonate, and the carbonaceous matter.

(2) The heating bore no definite relation to the lime and carbon content of particular beds.

(3) Colonel Gaillard has observed that in some instances the heating began in the holes some time after they had been drilled, but before the ground had been blasted at all.

Another line of inquiry was suggested by finding a small amount of pyrite in some of the beds which were heating. It was suspected that this, through its oxidation, was a factor in furnishing the initial heat of the action. In April, 1911, samples of the beds then heating were sent to the chemical laboratory of the United States Geological Survey with instruction to make qualitative tests for sulphur and other products that might serve, through oxidation, as the mainspring of the action. These tests revealed the presence of sulphuric acid to the amount of 1.92 per cent, also minute crystals of gypsum. This confirmed the hypothesis that pointed to the pyrite present as the substance acted on by atmospheric oxygen to develop the initial heat.

The most aggravated case of heating so far noted is now going on in Culebra Cut, about 350 yards north of the foot of the stairs at the observation tower near Culebra Station. The mass of heated ground here is about 500 feet long by 20 feet wide, and the action reaches a depth of perhaps 15 or 20 feet. Blue smoke, which contains a high percentage of sulphur dioxide, issues from vents in the mass, and fragments of wood inserted in these are readily charred and consumed. A small amount of steam may also be detected emanating from local moist spots, but this is mainly due to the vaporization of ground water. In the investigation of this heated mass samples were taken, and these were tested qualitatively for sulphuric acid and for sulphates of calcium, aluminium and magnesium. The tests were made by Mr. Jacob of the Hospital Laboratory Staff at Ancon, and they revealed the presence of all of the above substances, both in the shale and as the white coating on the moist spots and steam vents of the mass. The yellow deposit near the larger vents is sulphur. Sulphuric acid, especially, was shown to be present in considerable quantity. The origin of the sulphuric acid here was at first a puzzle, because the examination of many samples, with the naked eye and with the microscope, failed to reveal the presence of pyrite. Finally samples of eight to ten pounds were taken, ground with water in a large mortar for some minutes, and then concentrated to a few ounces by washing or "panning." This concentrate showed a high content of pyrite, much of which could scarcely be seen with the naked eye. Under the microscope very small crystals of pyrite were noted; also considerable magnetite, present as black sand, and some sub-angular to fairly rounded grains of quartz.

The mainspring of the action here, then, as in the other instances observed, has undoubtedly been the oxidation of the pyrite. The reasons why this oxidation has been so rapid and effective, seem to be as follows:

(*a*) The finely divided, almost microscopic, character of the pyrite gives maximum surface exposure to atmospheric agencies and greatly promotes oxidation.

(*b*) The very warm, moist atmosphere. The tropical sun shining directly on dark rock surfaces produces a temperature sufficiently high to greatly promote oxidation, especially in the presence of slight moisture.

(*c*) Once oxidation of the pyrite has been started the heat thus generated tends to accelerate chemical action and thus the heating increases in geometric progression.

(*d*) When the heat of pyrite oxidation reaches the comparatively low temperature of oxidation of the hydrocarbons present in the lignitic shale, they, too, become oxidized and still further add to the temperature. Finally the fixed carbon content tends to become oxidized, at least in part, and gives maximum intensity to the action.

(*e*) Some heat is also generated by the action of the free sulphuric acid on the calcium carbonate for the formation of gypsum. Other minor chemical actions added their quota to the total heat.

As the temperature rises all chemical activity is vastly stimulated and the heating increases to a maximum. After the most readily oxidizable substances are consumed the heat gradually dies down toward normal temperatures, which may be reached in a few weeks or months. The intensity and duration of the heat depend largely upon the percentage of finely divided pyrite, volatile matter, and fixed carbon in the rocks.

In order to alleviate the danger of premature explosion from loading dynamite in holes which have become hot, Colonel Gaillard has inaugurated the practice of testing holes in the vicinity of the heating areas, by dropping into them a small iron pipe longer than the hole. This is withdrawn at the end of ten minutes and quickly passed through the hand. In this way not only is heating detected but the location of the heated zone with respect to the depth of the hole is also made known; for the heating is at times only local and may be at, or well above, the bottom of the hole.

Certain geological considerations have been suggested by a study of this heating phenomenon, the chief of which are:

(*a*) Chemico-thermal springs. Whenever jointing, fissuring, or change of groundwater level gives free access of oxygen-bearing surface waters to beds which contain the necessary finely divided pyrite and carbonaceous matter, a heating up of such beds is likely to result. Groundwater flowing over such heated beds, and coming to the surface in the general vicinity of them, would constitute thermal, or hot, springs.

(*b*) The very fine pyrite sparingly disseminated through the carbonaceous shales, herein described, seems to have resulted from the action of sulphur from decaying animal and vegetable life on the ferro-magnesian silicate fragments which are abundant in these sediments.

D. F. MACDONALD,
Commission Geologist.

EXAMINATIONS AND EMPLOYMENT.

Privileges to Panama Railroad Employes—Notices of Examinations.

It was announced in THE CANAL RECORD of December 27, 1911, that the United States Civil Service Commission had ruled that any employe of the Isthmian Canal Commission who might wish to compete for positions in the Apportioned Service at Washington might be examined in his home state during his annual vacation, and that a special examination would be authorized if the regular examination were not scheduled to be held during the limited period of the applicant's leave of absence.

The United States Civil Service Commission has subsequently ruled that the same privilege may be extended to employes of the Panama Railroad Company.

It is to be noted that examinations held in the Canal Zone for appointment to the Departmental Service are for the nonapportioned service, *i. e.*, appointment, or station, in the United States outside of Washington, D. C., as under the law examinations can not be given in the Canal Zone for appointment in the apportioned service in Washington, D. C.

Civil Service Examinations.

The following named examinations will be held beginning probably about the second Sunday in April: Agricultural Inspector, Philippine Service; cadet engineer, cadet officer, Lighthouse Service; civil engineer, civil engineer and draftsman, Departmental Service; mechanical draftsman, topographic draftsman, Isthmian Canal Service; engineer, Indian Service; farmer, Indian Service; fish culturist, Departmental Service; junior engineer (civil), junior engineer (mechanical or electrical), Engineer Department at Large; pharmacist, Public Health and Marine-Hospital Service; scientific assistant, Departmental Service; surveyor, Philippine Service; teacher, Indian Service; and trained nurse, Indian, Isthmian Canal, and Philippine Services.

Women will be admitted to the examinations for teacher, Indian Service, and trained nurse, and women only will be admitted to the examination for trained nurse, Philippine Service.

A special announcement has been issued in regard to the scientific assistant, Department of Agriculture, examination, a copy of which will be sent on request. The announcement should be returned to this office as early as possible, as the supply is limited.

Applications for the above-named examinations will not be received in this office after the close of business on March 25; this date may be changed it it is deemed advisable to do so.

In requesting application blanks the exact title of the examination desired should be stated. In filing applications the date of examination should be *omitted*. In answering questions in regard to bona fide residence, such residence must be shown in a State or Territory of the United States, and county thereof, *up to the time of filing application.*

Note—"Departmental Service" refers to the nonapportioned Departmental Service, *i. e.*, for appointment in the United States outside of Washington, D. C.; examinations cannot be given in the Canal Zone for appointment in the apportioned Departmental Service, *i. e.*, for appointment in Washington, D. C.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.

Qualifications of Teachers.

The following, from a circular issued by the Division of Schools, is published for the information of persons intending to apply for a position as teacher in the Canal Zone schools: "Examinations for teachers are not required. No applicant will be considered who is not an American citizen, who is more than forty-five years of age, who has not completed a certified high-school course, who has not had two years' normal or college training, and two years' successful experience, certified to by at least two persons engaged in educational work. Letters of recommendation should be sent direct and not through the applicant."

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on March 13. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8.00 a. m. on March 13, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their capacity properly to operate an automobile, and must have the automobile with them.

Wood Car Repairers Needed.

About ten wood car repairers are needed in the Mechanical Division at Gorgona Shops. The pay of this position is fifty-six cents an hour. All persons who are competent wood car repairers and desire employment in or transfer to this position should apply at once to the Superintendent of the Mechanical Division, Gorgona Shops, Gorgona, Canal Zone.

WEATHER CONDITIONS, CANAL ZONE, FEBRUARY, 1912.

The weather for the month was characterized by a general deficiency in rainfall, atmospheric pressure and relative humidity, and an excess in air temperature and wind movement.

The rainfall was below normal at all stations except Gamboa and Colon, but was not the lightest of record for the month of February.

Steady north and northwest winds prevailed during the month, and the total movement was well above normal at all stations except Colon.

There was a further decrease in night fogginess.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

F. B. Shipp, Executive Secretary of the International Committee of the Young Men's Christian Association, made a four days' visit to the Isthmus last week. Mr. Shipp visited the clubhouses and conferred with secretaries and Isthmian Canal Commission officials concerning present and future Y. M. C. A. work on the Isthmus.

ISTHMIAN INDOOR BASEBALL LEAGUE.

The following is the standing of the teams of the Isthmian Indoor Baseball League on March 2, 1912.:

	Played.	Won.	Lost.	P. C.
Gorgona	1	1	0	1.000
Cristobal	1	1	0	1.000
Corozal	1	1	0	1.000
Empire	1	0	1	.000
Culebra	1	0	1	.000
Gatun	1	0	1	.000

Games played March 2, 1912: Corozal, 33, Empire 10; Gorgona 15, Culebra 6; Cristobal 19, Gatun 16.

Games to be played March 9, 1912: Cristobal at Empire, Gatun at Gorgona, Corozal at Culebra.

COROZAL

The standing of the seven high men in the local handicap pool tournament is as follows:

Name.	Won.	Lost.	P. C.
Logan	11	1	.917
Kent	8	1	.889
Lofgren	11	2	.846
Tribolet	7	2	.778
Roberts	9	4	.692
Taylor	8	4	.667
Thurgood	5	3	.625

An order for 31 new library books is now being filled in the States.

CULEBRA.

The duckpin bowling series, with 40 entries, closed this week with Silver's team winners, and Mr. Hill will receive a gold medal for the high score of the tournament, the score being 127. The members of the team are Silver, captain, Kleene, Palmer, Tragsdorf, Cornthwaite.

The following are the high duckpin scores for the week: Hobart, 114, 104; Sickler, 100; Dunfey, 111; Wheeler, 105; Tragsdorf, 101.

A Spanish class was organized on Saturday evening to meet Saturdays at 8 o'clock.

The Corozal boys played the Culebra boys at Culebra on Saturday, in the morning at outdoor baseball, and in the afternoon at indoor baseball. In both cases the Culebra boys won.

Cigars and candy at the clubhouse are sold for cash only.

EMPIRE.

One hundred and forty-four games have been bowled in the duck and candle pin bowling tournament now being rolled. In doubles Rodeighiro and Pinney are high with 1,144 pins, Rodeighiro and Gorham, second with 1,139. High single scores—Golsby, 127; Rodeighiro, 126; Gorham, 126. High averages are as follows: Rodeighiro, 144 games, average 93.42; Pinney, 135 games, average 90.51; Gorham, 96 games, average 90.34; Gustaveson, 96 games, average 90.12; Grund, 105 games, average 87.13.

The February handicap pool tournament was won by E. E. Barnes. The March tournament will be started at once.

GORGONA.

Cristobal and Gorgona played a match game of pool and billiards at Gorgona on Saturday night, March 2, with the following results: *Pool*—Cristobal—Pack, 100; Ford, 84; Schlager, 67. Gorgona—Orr, 60; Hill, 100; Montgomery, 100. *Billiards*—Cristobal—Rice, 100. Gorgona—Strong, 79. Total billiards and pool—Cristobal, 351; Gorgona, 339. Empire will send a pool and billiard and a duckpin team to Gorgona on March 9, and Gorgona will send teams to Cristobal on March 16.

The Executive Council of the Gorgona Y. M. C. A., Messrs. Smith, Loughery, Otis, Shady, and March, gave a dinner to the newly appointed committees and to F. B. Shipp, Executive Secretary of the International Committee of the Y. M. C. A., at the I. C. C. hotel on Tuesday night, February 27, at 6.30. Mr. Shipp made an address on the "World Wide Work of the Y. M. C. A."

At 8 o'clock on Tuesday night, February 27, there was a vaudeville smoker and moving picture show at which 315 men were present. Mr. Shipp addressed the men, talking of the work of the Y. M. C. A. on the Canal Zone. Messrs. Emery and Cogan gave a sketch, "On the Road." Messrs. Ross, Dickson, Case, and Kersey, "The Tropical Male Quartette," sang two numbers. Mr. Stapleton of Corozal was contortionist. The Tenth Infantry Orchestra furnished music and L. E. Jones gave several selections on the piano.

Senor Gomez is conducting a class in Spanish for men who work nights, and any others, Tuesday at 10.45 and Saturday at 1.30. There will be a class for ladies, Tuesday at 9.45 a. m., and Saturday at 2.30. Senor Gomez uses the Berlitz method.

GATUN.

The Gatun-Cristobal indoor baseball game scheduled to be played at Gatun on Saturday evening, March 2, was played at Culebra. Result: Cristobal 19, Gatun, 16.

The Gatun Y. M. C. A. Choral Club will give its first concert at Camp Otis, on Sunday evening, March 10. In addition to the chorus, several prominent soloists will sing.

The Discussion Club met on Sunday evening, March 3, under the leadership of Secretary Smith and discussed the subject, "Christian Men in Social Action." The subjects for the rest of this month will be: March 10, "Men and Religion Forward Movement;" March 17, "The Brotherhood Movement;" March 24, "The Young Men's Christian Association;" March 31, "Big Brothers."

Empire Minstrel Club will be at Gatun on or about March 20.

Geo. W. Huttlemire is the winner of the gold medal offered for the highest ten games of duckpins for the month of February. Huttlemire's games were: 117, 112, 111, 100, 109, 108, 107, 107, 106, total 1,094. G. E. Teall was second with 1,061, Barte third with 1,054, Green fourth with 1,043.

H. H. Hodges made a score of 243 in ten pins on Saturday evening, March 2.

CRISTOBAL.

At the session of the Debating Club on February 28, Wm. T. Lum, a Chinese merchant of Colon, gave a descriptive talk on "China, Old and New."

The standing of the Cristobal National Duckpin League was as follows on March 2:

Teams.	Played	Won.	Lost.	P. C.
Reds	6	5	1	.833
Pirates	6	4	2	.666
Phillies	6	4	2	.666
Cardinals	6	3	3	.500
Giants	6	3	3	.500
Dodgers	6	2	4	.333
Doves	6	2	4	.333
Cubs	6	1	5	.166

The following high scores were made on the local bowling alleys during the week ending March 2: Duckpins—Marquez, 107; Herrington, 115, 111; Orr, 105, 101; Barte, 116, 110; Whittles, 100; Jacques, 107; Barrett, 105; Smith, 100, 104; Herring, 100, 112; Russell, 108; Gibson, 103; Hess, 111; French, 101; Schofield, 108; Vandabergh, 101. Candle pins—Gilmore, 103.

§Sold only from cold storage and not from commissaries.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the two weeks ending February 24 and March 2:

Sixaola, February 17, from New York, with 91 cases copper bars, for Atlantic Division; 40 cases putty, 14 crates handles, 9 cases hardware, for stock.

Normannia, February 20, from Jacksonville, with 41,846 pieces cross ties, for stock.

Heredia, February 22, from New Orleans, with 28 pieces pipe, for Pacific Division; 1,713 pieces lumber, 388 tons pig iron, 46 barrels brake shoes, for Mechanical Division; 78 pieces piling, 3,038 pieces lumber, 600 kegs lead, 12 pieces castings, 75 bags dairy feed, 129 barrels fire clay, for stock.

Colon, February 24, from New York, with 5 cases incandescent lamps, 52 pieces iron pipe, for Atlantic Division; 8 pieces steel beams, for Pacific Division; 84 pieces lumber, for Mechanical Division; 5 coils steel cable, 577 pieces switch and signal material, 296 bundles switch and signal material, 72 cases switch and signal material, 22 crates switch and signal material, 4 barrels switch and signal material, 120 bundles steel bars, 51 crates floor tile, for Panama Railroad Company; 30 coils rope, 14 cases rubber hose, 37 reels wire rope, 50 pieces steel plates and angles, 20 barrels pitch, 15 cases but locks, 84 bales waste, 14 cases valves, 400 cases turpentine, 14 bales rubber hose, 50 cases lanterns, 115 kegs rivets, 22 bundles paper, 12 cases paper, 10 kegs paint, 11 cases fusees, 437 bags oats, 34 bundles car parts, for stock; and a miscellaneous cargo, the whole consisting of 3,282 packages, weighing 500 tons.

Cristobal, February 22, from New York, with 78,360 bags cement, for Atlantic and Pacific Divisions.

Meridian, February 23, from New York, with 116,900 bags cement, for Atlantic and Pacific Division.

Almirante, February 22, from New York, with 10 cases hardware, for stock.

Carrillo, February 24, from New York, with 13 bundles rakes, 31 crates stovepipe, for stock; 66 pieces lumber, for Mechanical Division; 88 packages derrick parts, for Fortifications; 79 pieces pipe, for Atlantic Division.

Thelma, February 26, from St. Marys, Ga, with 1,613 pieces piling, for stock.

Pleiades, February 27, from San Francisco, with 1,712 bales hay, for stock.

Santa Marta, February 29, from New York, with 15 cases washers, 8 bales packing, 194 pieces steel plates, 98 bundles steel bars, 12 coils steel wire, 6 cases hardware, 12 pieces steel plates, for stock.

Knutsford, February 29, from New York, with 127,531 bags cement, for Atlantic and Pacific Divisions; 5 cases benzine, 280 cases detonators, for stock.

Mathilda, March 1, from New York, with 4,561 pieces steel rails, for Panama Railroad Company.

Parismina, March 1, from New Orleans, with 10 pieces cutter blades, for Atlantic Division; 78 bundles spillway castings, 72 pieces spillway castings, for Pacific Division; 277 pieces white oak lumber, 2,172 pieces yellow pine lumber, for Mechanical Division; 1,198 pieces yellow pine lumber, 67 pieces piling, 320 bundles switches and rods, 25 cases yellow ochre, 145 barrels fire clay, for stock.

Advance, March 1, from New York, with 15 kegs manganese dioxide, 40 cases brake shoes, for Mechanical Division; 7 cases horse collars, 7 cases rubber packing, 25 cases paste, 100 coils manila rope, 9 cases asbestos packing, 10 cases neatsfoot oil, 65 kegs horse shoes, 40 cases rubber hose, 10 cases paper, 13 cases insulated wire, 62 bags handles, 14 crates handles, for stock; and a miscellaneous cargo, the whole consisting of 496 packages, weighing 80 tons.

MOVEMENT OF OCEAN VESSELS.

The following is a list of the sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prin August Wilhelm* and *Prin Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays at 10 a. m.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MARCH 13, 1912. No. 29.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Provisions for Drainage at Pedro Miguel.

The drainage of the portion of Culebra Cut on the Pacific side of the continental divide passes through a concrete-lined ditch in the east approach chamber at Pedro MiguelLock and into the center wall culvert and is discharged at the lower end into a ditch leading into the Rio Grande. In order to continue with the laying of floor in the east approach chamber, the sides of the ditch are being revetted with selected rock and the concrete floor will be laid over the rest of the chamber. The revetment rises about 10 feet from the present perpendicular sides of the concrete channel, the tops of which are 2½ feet above the bottom. For two feet it is vertical and the rest of the way it batters back, 1 on 2, the width at top being about 20 feet. The ditch passes through the sill for the floating caisson dam. When the work nears completion, this section of the sill will be filled with reinforced concrete but the revetted drain between the sill and the emergency dam sill will not be filled, except in time by sediment from the water in the approach. Such a problem of drainage is not encountered at Miraflores, where there is now an unobstructed flow and will later be a spillway, or at Gatun Locks, where there is a spillway.

Canal Work in February.

The grand total of Canal excavation to March 1 was 163,182,086 cubic yards, leaving to be excavated 32,141,293 cubic yards, or about one-sixth of the entire amount for the completed Canal.

The total for February was 2,643,410 cubic yards, as compared with 2,714,174 cubic yards, in February, 1911.

The dry excavation amounted to 1,589,353 cubic yards, and was principally by steamshovels. The dredges removed 993,142 cubic yards, and 60,915 yards were sluiced at Miraflores Locks, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 645,706 cubic yards. Of this total, 24,445 cubic yards were dry excavation.

The total excavation in the Central Division was 1,428,356 cubic yards, all of which was from the prism. The amount taken from Culebra Cut was 1,349,569 cubic yards.

In the Pacific Division, the total excavation was 569,348 cubic yards, 371,881 cubic yards of which were taken out by dredging at the Pacific entrance.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation	1,576,711	12,642	1,589,353
Wet excavation	1,014,195	39,862	1,054,057
Total	2 590,906	52,504	2 643,410

Mean rainfall along Canal (eleven stations), 1.01 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc.: that is, It represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*
Concrete laid in locks.	26,664	76,532	103 196
Concrete laid in dams and spillways	10,268	....	10,268
Fill placed in dams	356 620	61,628	418 248

Excavation Record in Culebra District.

On March 6th, 25 steamshovels working in the Culebra Construction District of the Central Division excavated a total of 41,254 cubic yards, car measurement, in a working day of eight hours. This is the greatest amount of material ever excavated in one day in the Culebra District since the commencement of operations by the United States.

Changes at Cold Storage Plant.

A concrete shipping platform, 20 by 20 feet in plan and of a height for the convenient transfer of materials to and from wagons, has been constructed at the raw material store of the Commissary cold storage plant. This supplants the old wooden platform and is in addition provided with an inclined ramp for the passage of trucks.

Two new ice cream freezers, to be supplemented by a third under shipment, have been installed to take the place of the four freezers formerly in use but now worn out. The capacity of each of the new freezers is 50 gallons an hour, in five 10-gallon batches. About 600 gallons of cream, in two grades and seven flavors, are sold every day through the commissary stores and hotels. In the construction of the new freezers, the vessel containing the cream is surrounded by a larger tank and calcium brine, kept at a temperature of plus 12 degrees Fahrenheit by means of an ammonia brine-cooler, is made to circulate through the space between vessels. It is not necessary for the cream to be handled with spoons, as it is poured in at the top and, when frozen, is drained out through the bottom. It is not frozen stiff but is stored in a temperature of 4 degrees Fahrenheit to harden. Besides being faster, more sanitary and reliable, the new freezers have allowed a reduction of one-third of the force at work on freezing. Each freezer is 6 feet high and is operated by a 3-horsepower direct current motor.

Upper Approach Wall at Gatun.

To further the construction of the upper approach wall at Gatun Locks the railway tracks leading from the Panama railroad, at a junction east of the Gatun station, to the dam, have been removed where they crossed the site of the wall and reinforced concrete piles have been driven to afford foundation for the final section of the wall. Work on the approach wall was begun on September 30, 1911, at the outer end and at the termination of the center wall, with two forces working

NOTES OF PROGRESS.

(*Continued.*)

toward one another. The railway tracks crossed the site of the wall between the scenes of operation. Access by rail to the dam is now afforded by tracks running along the west side of the locks and connecting with the railroad near Mindi.

The last piles for the foundation were driven on March 9, and on the same day the forms were erected for the base slab for this section, about 80 feet in length. The slab is to be between 4 and 5 feet thick, so that its surface will be at 32 feet above sealevel. It is to be 60 feet wide, projecting on either side a foot beyond the face of the cellular wall which will be erected on it. About 16,000 of the required 35,000 cubic yards of concrete for the cellular portion of the wall have been placed, so that it is now 46 per cent completed. The auxiliary mixing plant, east of the upper end of the locks proper, has been shut down and concrete is now supplied only from the construction plant on the west side of the locks The trestle beside the approach wall, on the west side, from which the concrete is placed by means of derricks and locomotive cranes, extends the length of the portions of the wall which are still unfinished. Dredge *No. 82* continues filling around the base with material pumped from the bottom of the lake.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 83 per cent completed, 188,541 cubic yards, out of a total of 225,000, having been placed at the close of work on March 9. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
March 4..............	336	15.30	2
March 5..............	360	16.00	2
March 6..............	268	12.00	2
March 7..............	320	12.00	2
March 8..............	340	16.00	2
March 9..............	368	16.00	2
Total..............	1,992	87.30	2
Previously reported...	186,549		
Grand total..........	188,541		

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending March 9, follows:

DATE.	Hours worked.	Cubic Yards.
March 4......................	4.00	1,818
March 5......................	4.10	1,848
March 6......................	4.20	1,804
March 7......................	3.45	1,836
March 8......................	4.25	1,830
March 9......................	4.30	1,375
Total......................	25.10	10,511

Ancon Crusher.

DATE.	Hours worked.	Cubic Yards.
March 4......................	13.25	4,333
March 5......................	16.15	4,734
March 6......................	13.30	3,923
March 7......................	13.25	3,784
March 8......................	13.50	5,001
March 9......................	10.20	3,437
Total......................	80.45	25,212

Warm Weather.

Unusually warm weather prevailed over the Isthmus on March 7, the temperature in the shade on this date reaching a maximum of 92°F. at Culebra, and 96.2°F. at Ancon.

The temperature at Ancon was a fractional part of one degree higher than the highest previously recorded at any station in the Canal Zone during the past six years, the previous maximum record being 96.0°F. at Ancon on March 20, 1908.

Colon-Gatun Shuttle Train.

A train service between Colon and Gatun was put into effect on Monday, March 11, on the following schedule:

Leave.	P. M.	Arrive.	P. M.
Colon..........	2.30	Gatun..........	2.50
Gatun..........	3.00	Colon..........	3.20
Colon..........	4.50	Gatun..........	5.10
Gatun..........	5.20	Colon..........	5.40

CONCRETE WORK IN THE LOCKS.

Over 80 per cent of the concrete for the locks is in place, the amount at the close of work on March 9 being 3,394,569 cubic yards, out of a total of approximately 4,199,400. A total of 30,554 cubic yards of concrete was laid in the locks during the week ending March 9.

GATUN LOCKS.

Over 91 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 9 being 1,837,896 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending March 9, and of the total, follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

Grand total..............	....	....	......	....	....	......	....	1,837,896

The 371 yards shown for the portable mixers are reinforced concrete, and were placed on the following days: March 4th, 97½; March 5th, 36; March 6th, 67; March 7th, 59½; March 8th, 63; March 9th, 48.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 98 per cent completed, 822,042 cubic yards, out of a total of 837,400, bucket measurement, having been placed at the close of work on March 9. The record for each of the six 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

STEAMSHOVEL RECORDS.

Work of Central Division and Panama Railroad Shovels.

During the month of February the total amount of material excavated in the Central Division was 1,428,356 cubic yards, of which 188,745 cubic yards were classified as earth, and 1,239,611 cubic yards as rock.

Of this quantity 1,392,455 cubic yards were removed by steamshovels, 23,860 cubic yards by cranes, 1,229 cubic yards by hand Contractors removed 10,812 cubic yards by hand.

The high record for the month was made by shovel No. 227, working 24 days in the Culebra District, which excavated 57,915 cubic yards of rock.

The second best record for the month was made by shovel No. 212. working 24 days in the Culebra District, which excavated 53,344 cubic yards of rock.

The best record for a shovel of the seventy-ton class was made by shovel No. 124, working 24 days in the Culebra District, which excavated 39,125 cubic yards of earth.

Shovel No. 231, working in the Pedro Miguel District made a high record for one day by excavating 3,040 cubic yards of rock on February 17.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown in the following table:

Relocated Line of Panama Railroad.

The total steamshovel excavation on the relocated line of the Panama railroad amounted to 153,210 cubic yards.

The best month's record was made by steamshovel No. 263, working near Paraiso, which excavated 43,260 cubic yards of earth and 2,000 cubic yards of rock, a total of 45,260 cubic yards.

In the 70-ton class, the best month's record was made by steamshovel No. 128, working near Empire, which excavated 19,920 cubic yards of earth and 2,000 cubic yards of rock, a total of 21,920 cubic yards.

The best day's record for shovels with a 5-yard dipper was made by steamshovel No. 257, which excavated 2,880 cubic yards of rock on February 10.

The best day's record for shovels with a 3-yard dipper was made by steamshovel No. 123, which excavated 1,750 cubic yards of earth on February 3.

Month's records are place measurement, and day's records are car measurement. All material was loaded in 10-yard Western Dump cars.

BEST RECORDS FOR THE MONTH.

LABOR FORCE AND QUARTERS IN FEBRUARY.

On February 28 there were 37,641 employes actually at work on the Canal and the Panama railroad, and of that number 30,845 were Canal employes. The gold force on the Canal work, composed almost entirely of white Americans, was 4,500. The total force at the close of February, 1911, was 35,955, and the Canal force, 28,755. The force report for February 28, 1912, follows:

QUARTERS.

On March 1, there were 24,962 occupants of Commission quarters. Of these 9,423 were white Americans of whom 5,455 were men, 2,059 were women, and 1,909 were children. There were 6,262 Europeans of the laborer class, of whom 5,605 were men, 266 women, and 391 children. There were 9,277 West Indian negroes, of whom 6,897 were men, 1 049 women, and 1,331 children. Included in the above were 300 Asiatics, and 90 Panamans.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

LOCK WORKING MODEL.

Section of One Chamber in Concrete With Gates and Other Mechanism.

A working model of a section of the locks embracing the intermediate gates of a summit level has been constructed at Gorgona shops by the model maker, Taylor T. Curran. It is on a scale of one-half inch to a foot (1 on 24), and shows not only the construction of the lock chambers but also the method of operating the gates and other machinery. It will be on exhibition at the International Navigation Congress in Philadelphia, May 23 to 28, and later will probably form part of the Canal exhibit at the exposition in San Francisco. The following description accompanies the model:

MITERING GATES.

These gates are of the straight horizontal by-framed type, consisting of horizontal girders spaced from 3 feet 8 inches to 5 feet apart, a vertical system of frames and intercostals, and a double sheathing. The lower half of the leaf forms an air chamber, sub-divided by three vertical partitions. The pressure of the leaves against each other and against the hollow quoins is transmitted by slightly curved metallic bearing plates of hard steel, which after accurate adjustment, are backed up by babbitt metal. The positons of the main girders, frames and intercostals, as well as the arrangement of rivets, doubling plates, etc., are indicated in the model gates, and two panels of the sheathing are omitted at the top of one of the leaves to permit the interior construction to be inspected.

MITER FORCING AND LOCKING MECHANISM.

When the gates are within 6 inches of the mitering position (¼-inch on the model) they may be drawn together, and securely locked by a miter forcing and locking device on the end of one gate leaf, consisting of powerful jaws which clasp a pin in the end of the other leaf, the power being transmitted by a toggle joint actuated by a motor driven screw.

MITER GATE OPERATING MECHANISM.

This device is so designed that the speed of the gate varies approximately on the ordinate of the sine curve. The machine gives a maximum force with a minimum gate movement at the ends and a minimum force and maximum speed at the middle of the path of the gate leaf in opening and closing. This desirable combination of speed and force, by this new device, can be obtained by the use of a constant speed motor.

As shown in the model, motion is given by a horizontal strut which takes hold of the leaf through the medium of a vertical pin attached to the top girder. A nest of helical springs is placed in the gate end of the strut, to absorb shock and prevent breakage. The shore end of the strut is pivoted to a crank pin attached near the outer circumferance of a large horizontal gear wheel, the pitch diameter of which is 19 feet 1 inch. This gear wheel is turned by a pinion actuated by the motor, through reducing gears.

CULVERT VALVES AND MACHINERY.

The main culverts at the locks are divided by a central pier into two branches, 8 feet by 18 inches in area. Each of these branches is closed by a lifting valve of the Stoney type, uncounterweighted. These valves are operated through stems which pass through a stuffing box in a watertight bulkhead and into the machinery well where connection is made to a crosshead which is actuated by two non-rising screws geared to an electric motor.

The lateral culverts leading from the main middle wall culverts are each controlled by a cylindrical valve operated by a vertical stem connected through a revolving screw and gears to an electric motor.

PROTECTIVE DEVICES.

The main protection against boats damaging the gates of the summit locks of the canal is a huge chain; which when protecting the gates is stretched across the lock just above the water line and is lowered to the bottom for boats to pass over. As shown in the model the chain passes over a train of sheaves, two of which are fastened to the outside of a set of telescoping hydraulic cylinders, thus reducing the cylinder movement to one-fourth the chain movement.

The system consists of one large fixed cylinder, one slightly smaller cylinder moving within this, and a fixed plunger upon which the smaller cylinder moves.

For ordinary operation the chain is raised or lowered by pumping water into the larger or smaller cylinder, respectively.

If a moving ship should strike the fender chain, the latter when stressed to 220,000 pounds will produce a hydraulic pressure of 750 pounds per square inch in the cylinder, which pressure automatically opens a resistance valve and permits water to flow out of the cylinder, thus maintaining a constant pressure in the cylinder and hence a constant stress on the chain while the latter is playing out and bringing the ship to rest.

THE MODEL.

The model is 6 feet 4 inches in length, and 8 feet 6 inches in width, and includes one lock chamber and enough of the center wall to show the relation of the twin chambers to one another. It is built up on six-inch "I" beams, three running laterally and two lengthwise. On this base is erected a frame of one-inch angle iron joined with inch band iron, over which is stretched heavy wire screen of ¾-inch mesh, the whole frame being from ½ to 1 inch under scale. Upon this framework is plastered a cement mortar varying from one-half inch to one inch thickness on the inside of the mesh, and from one to three inches on the outside, the whole being thus brought up to scale. The result is a model that looks exactly like the concrete walls of the locks, showing in addition, because it is in section, the method of stepping up the walls in the back from broad base to narrow top, the relation of the water supply culverts in the side and center walls, the machinery chambers and operating tunnels, towing tracks on top of the lock walls, decorative lamps along the coping, and even the ladder by means of which one may climb from the bottom to the top of the chamber, and the gage which indicates the depth of the water. In the forebay, part of the floor of the chamber is made so that it can be lifted out, showing the relation of the lateral culverts under the floor to the supply culverts in the side walls.

The section is taken in a chamber where the gates are 77 feet high, and those in the model are therefore 3 feet 2½ inches high. In the original they are built up of steel as indicated above. In the model a wooden frame takes the place of the steel girders, and upon this, to represent the steel sheathing of the gates, has been tacked sheet copper by means of escutcheon pins, one to represent every rivet, in all between 110,000 and 115,000 pins. On the lock walls are the gate operating machines, the large bull wheels, with strut or arm stretching out to open and close the gates. These wheels and the mechanism that run them are also to scale and in exact duplicate of the large machines, except that they are operated by a 1-15 horsepower motor. The motors are carefully rated so as to represent the motors in operating condition. They are synchronous in movement and, as indicating the probable results with the large motors and the large machines, it is noteworthy that they close and open the model gates in such unison that the gates come to miter, or to rest in their recesses, at practically the same time. The miter forcing machine is also on the model, run by a toy motor. In fact, the only detail in which the gate and mechanism are not duplicated in the model is that the handrail over the top of the gate, which is represented to scale, is not raised and lowered in the model as it will be in the locks to make way for the towing lines. In order to obviate the natural tendency of the frame of the gates to warp, the wood has been used so that the grain runs in six distinct directions.

On the coping of the model are shown the tracks, rack and conductor slots of the electric locomotives for towing ships through the locks as well as lamp posts, manholes, snubbing hooks and other small accessories to a large lock.

The chambers of the rising stem gate valve machines and of the cylindrical valve machines have been left open so that one may see the operation of the machinery. Each of the valves is run by a one-fifteenth horsepower motor, and the machines are equipped with the proper limit devices so that the operation is automatically controlled. The chain fender machine is built with the view of connecting it with a city water main.

Stenographer and Typewriter Examination.

Examination will be held at Culebra probably about the last Sunday in April for stenographer and typewriter, Isthmian Canal Service and Philippine Service, and typewriter, Isthmian Canal Service.

Attention is invited to the following preference in certification accorded to eligibles examined by this Board in the Canal Zone for appointment, that is, station, in the Canal Zone: "As a result of examinations for positions on the Isthmus of Panama two lists of eligibles will be established, one containing the names of persons examined on the Isthmus, the other containing the names of those examined at other places. Those examined on the Isthmus will be preferred for appointments in the Isthmian Canal Service."

Form No. 1,424 contains information in regard to the above-named examinations and should be requested by applicants; application form 304 is needed for the Isthmian Canal Service and form 2 for the Philippine Service.

Applications for the above-named examinations will not be received in this office after the close of business on April 13; this date may be changed by this office if it is deemed necessary to do so.

In filing applications the date of examination should be omitted. In answering questions as to bona fide residence, such residence must be shown in a State or Territory of the United States, and county thereof, *up to the time of filing application.*

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.
Culebra, C. Z., March 8, 1912.

Central Division Unloaders.

During the month of February the following numbers of trains and cars were unloaded by the Central Division:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	4	1,113	22,260
Miraflores	3	670	13,400

Miscellaneous	30	606
Total	2,693	48,389

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The Little Workers, the girls' club of Gorgona, held a cake sale on March 2 for the benefit of the fund of three hundred dollars pledged by the Canal Zone Federation for the education of a native blind boy, the receipts being $5. The club will hold a similar sale on April 6. The receipts of the cake sale held by the Empire Woman's Club in February were $15 and the same sum was raised by the Gatun Woman's Club at a tea and entertainment held on February 29.

The program of the Cristobal Woman's Club on Wednesday, March 6, consisted of an address on the art of nursing, by Miss MacCormack, superintendent of nurses at Colon Hospital. On March 13, the home department will have as its subject "The History of Furniture and Rugs;" on March 20, the art and literature department will present a program on "Folk Songs." The meeting of the executive board will be held on March 27 at 9 a. m.

The meeting of the Empire Woman's Club was held at the home of Mrs. M. E. Smith on Thursday, March 7. There was a discussion on current events, and music was rendered by members of the club. The club is planning a second sale for the federation fund.

Ancon Study Club.

The Ancon Study Club completed its first month's work with the meeting on March 6, which was held at the home of Mrs. J. C. Morley. The club was organized on January 24, at which time it was decided to take up the study of Panama for the first month. The schedule of meetings with the programs and speakers has been as follows: January 31, sketch of the history of Panama from the voyages of Columbus to the fall of Old Panama and the removal of the city to its present site, Miss Beattie; February 8, the French occupation and the two French Canal companies, Mrs. H. C. Shick; a supplementary paper on Fort San Lorenzo by Mrs. Harry Hunter; February 15, the American occupation, Mrs. Mark White, and the sanitation of Panama by Mrs. J. C. Crawford; February 23, visit to Culebra; February 29, no meeting; March 6, sketch of the history of the Panama railroad, Mrs. Hunter. The next study will be Italy, Rome, and Greece, as outlined in the Bay View Course. It is proposed to spend about three months on this course. The first class will be at the home of Mrs. A. O. Mason, House 95, Ancon. On March 13, the meeting will be held in Ancon Hall, when the loan exhibit of pictures belonging to the Canal Zone Federation of Women's Clubs will be on view.

Church Notes

The annual missionary meeting of the National Baptist mission in Panama and the Canal Zone will be held in the mission church in the Guachipali district, Panama, on March 17 and 18. The preachers at the various services will be as follows: On March 17, at 11 a. m., the Rev. Victor Kennedy, representative in Panama and the Canal Zone of the British and Foreign Bible Society; at 3 p. m., the Rev. Carl H. Elliott, pastor of the Union Church at Cristobal; at 7 p. m., the Rev. E. C. Cooke, pastor of the Wesleyan Methodist Church at Colon. On Monday evening, March 18, at 7.30 o'clock, there will be a public meeting when the speakers will be the Rev. Harry Compton, pastor of the Methodist Episcopal church at Panama, and the Rev. A. A. Nellis, pastor of the Union churches at Culebra and Empire.

The annual meeting of the Altar Society of St. Ferdinand's Church, Empire, was held in the parish house on Tuesday, February 13, when the following officers were chosen for the ensuing year; President, Mrs. Ergenzinger; Vice President, Mrs. Golden; Secretary and Treasurer, Mrs. Westberg. The Very Rev. Father Gorman, the visiting missioner, was the guest of the society. The guild now has 25 members. Meetings are held in the parish house on the second Tuesday in each month. During Lent services are held in St. Ferdinand's Church on Wednesday and Friday evenings at 7.30 p. m.

Steamshovel and Dredgemen.

Local No. 19, I. B. of S. S. and D. M., will hold its monthly meeting on March 17 at Empire lodge hall at 12.15 p. m. As business of importance is to be transacted all members are requested to attend.

Moose.

Panama Lodge No. 883, Order of Moose, was organized at Ancon Hall on Sunday afternoon, March 10, with 97 charter members. The order has leased rooms in the Hotel Normandie, Panama. It is proposed to organize a junior branch, composed of young men twenty years old and under. Following are the officers elected for the year: Dictator, E. L. Emery, of Gorgona; past dictator, F. G. Calvert, of Las Cascadas; vice dictator, Geno Gaul, of Gorgona; prelate, S. W. Newhard, of Gorgona; secretary, Joe M. Shurts, of Panama; treasurer, Albert Gutbertlet, of Panama; sergeant at arms, Winfield Landry, of Gorgona; inside guard, Lloyd McRae, of Culebra; outside guard, J. B. Christansen, of Gorgona. The trustees are E. W. Stolberg, L. E. Herman, and Roland McNish. Dr. H. V. Joahson and Dr. T. O. Luckett were appointed physicians.

School Holidays.

The Canal Zone public schools will be closed for the Easter Holidays from March 30 to April 7, inclusive. The schools will reconvene at the usual hour on Monday, April 8.

Yellow Fever in Quarantine.

Louis Paulete, mulatto, a sailor on the steamship *Chile*, died in quarantine in Panama harbor of yellow fever on March 4. On the way from Valparaiso he became ill and at Guayaquil he was treated for two days in the city hospital for malaria, being discharged with normal temperature. Reembarking on February 25, he reported ill again the second day out. The ship's surgeon suspected yellow fever and his diagnosis was confirmed at the Panama quarantine station, where Paulete arrived on March 2. The victim was 22 years of age and a native of California.

An American foreman and five West Indian laborers were injured at Miraflores on March 6 by the bursting of a water tank which had recently been erected and on which they were at work, preparing it for painting.

Missing Man.

Information as to the whereabouts of Robert Myers Jefferies, a machinist formerly of Philadelphia, should be sent to the Director of Posts, Ancon, who is holding a letter for him.

VACATION PAY IN ADVANCE.

Comptroller of Treasury Holds Commission May Make Such Payments.

The Comptroller of the Treasury was requested to give an opinion as to the legality of making payments under the terms of the following resolution, which it was proposed to submit to the Commission for action:

Resolved, That any employe of the Commission whose service terminates on or after October 1, 1912, whether by resignation or by discharge, at a time when he was on leave with pay due him under the regulations of the Commission, instead of being granted such leave of absence with pay shall, at the time of termination of his actual service, and in addition to his regular pay for such service, be paid an amount equal to the amount he would have been entitled to receive had he been granted leave under the regulations of the Commission; and that there shall be paid to the estate of an employe whose service is terminated by death at a time when leave is due him an amount equal to the amount he would have received had his service terminated by resignation or discharge.

The purpose of the proposed rule is to save the Commission the extra work required in computing pay and forwarding it to ex-employes after their leave period has expired, and they have resigned or been discharged, and to assist such employes, as otherwise would not have enough money to leave the Canal Zone and get a start elsewhere, by paying their leave pay in advance. The Comptroller holds as follows,:

By the present regulations of the Commission employes may be granted a certain number of days leave of absence with pay after they have been in the service of the Commission a specified period of time, and that leave may accumulate for a period not exceeding two years service; also where the service terminates while on a leave of absence by the acceptance of a resignation or by discharge on account of reduction of force, such employe may be paid for the full period of leave without returning to the Isthmus.

As I understand the proposed resolution it is your purpose, if not contrary to law, not to change in any way the amount of leave earned, but where an employe on or after the first of October next resigns or is discharged to pay him on the acceptance of his resignation the amount that would be due him as leave pay after the expiration of his leave period, or in case of his death to pay such amount to his estate.

The proposed regulation does not attempt to operate retroactively, but wholly *in futuro*. It is substantially a regulation to grant pay for leave instead of leave with pay as is now the case. Under the law you are authorized to fix and pay salaries out of your lump appropriation except as restricted by the provisions of the act of March 4, 1911 (36 Stat., 1,450), which reads:

> "Except in cases of emergency, or conditions arising subsequent to and unforeseen at the time of the passage of this Act, there shall not be employed at any time during the fiscal year nineteen hundred and twelve, under any of the foregoing appropriations for the Isthmian Canal, any greater number of persons than are specified in the notes submitted respectively in connection with the estimates for each of said appropriations in the annual book of estimates for said year, nor shall there be paid to any of such persons during that fiscal year any greater rate of compensation than was authorized to be paid to persons occupying the same or like positions on the first day of July, nineteen hundred and ten, and all employments made or compensation increased because of emergencies or conditions so arising shall be specifically set forth, with the reasons therefor, by the chairman of the commission in his report for the fiscal year nineteen hundred and twelve."

I do not understand that your proposed action in any way violates such provision by increasing the rate of pay or number of the employes as therein interdicted, nor do I understand that it is in violation of Section 3,648, Revised Statutes, prohibiting an advance of public moneys. It is no more an advance of public moneys to pay these amounts as pay for leave, than have been your payments to persons heretofore in the service of the Commission on leave with pay, who were discharged or resigned while on leave of absence. I see no distinction in principle between paying for the leave earned after October first next to a person who resigns, than to his estate where he dies. In neither case is any service contemplated during the period for which pay for leave is given.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

ISTHMIAN INDOOR BASEBALL LEAGUE.

The following is the standing of the teams of the Isthmian Indoor Baseball League on March 9, 1912:

	Played.	Won.	Lost.	P. C.
Gorgona	2	2	0	1.000
Empire	2	1	1	.500
Cristobal	2	1	1	.500
Corozal	2	1	1	.500
Culebra	2	1	1	.500
Gatun	2	0	2	.000

Games played March 9: Empire 22, Cristobal 14; Gorgona 26, Gatun 7; Culebra 14, Corozal 5.

Games to be played March 16: Culebra at Cristobal, Empire at Gatun.

CULEBRA.

The Spanish class which was organized on Saturday evening, March 4, will meet at 7 o'clock each Saturday instead of at 8.00.

A discussion club has been organized and will meet on Friday evening of each week at 8 o'clock.

The glee club meets on Tuesday evening every week, unless otherwise notified. The club is planning to give a musicale of classical music.

On Saturday evening a baseball game between Corozal and Culebra resulted in a score of 14 to 5 in favor of Culebra. The teams were: Culebra—Cushing, Hepler, Adams, Van Zandt, Dougherty, Baumer, and Tupper. Corozal—Bath, Russell, Saunder, Wiser, Lofgren, Sims, Roberts, and Ralley. Tupper of Culebra struck out 14 men, Wiser of Corozal struck out 9 men.

EMPIRE.

The Cristobal pool and billiard team played the Empire team Saturday evening with the following results: *Pool*—Empire—Hirsh 100, Pearson 98, McKeever 100, Huson 86, total 384. Cristobal—Ford 64, Schlager 100, Pack 89, Jackson 100, total 353. *Billiards*—Empire—Wood and Barnes 146; Cristobal—Rice and Gamble 150.

A preliminary meeting was held at Empire Saturday night to consider the forming of an inter-association pool and billiard tournament, and a committee was appointed to make arrangements and rules.

There was an attendance of over 400 at the initial performance of the Empire minstrel troupe at Empire on Tuesday night, March 5. The show will be given at the other clubhouses in the near future, and there is demand for a return engagement at Empire.

GORGONA.

On Saturday morning, March 9, the Gorgona Juniors played the Cristobal Juniors a game of baseball; score, Cristobal 7, Gorgona 3. That afternoon, the local juniors played a team from Paraiso; score, Paraiso 8, Gorgona 3.

Gorgona won the second game in the indoor baseball series from Gatun on Saturday night, March 9, score, Gatun 7, Gorgona 26. Ridge, Louden, Hilty, Emerson, Christensen, Kuentz, Carpenter, Hennen, and Simms played on the Gorgona team and Wiston, Dickson, Wright, Dalton, Atkinson, Kersaise, and Thompson on the Gatun team. The umpires were Cunningham and Stevens.

The following scores were made in a game of duckpins with Gatun on Saturday night, March 9:

Gatun.				Gorgona.			
Green	97	93	88	Humphrey	100	88	86
Vier	100	97	79	Simms	72	88	104
Severn	73	75	71	Otis	72	82	
Huttlemire	77	92	109	Robertson	84	90	88
Abernathy	81	79	76	Haggerty	78	103	95
				Davis			87
Totals	428	416	423	Totals	406	451	460

In a match game of pool with Gatun, the points made were, Gatun 342, Gorgona 205. Louis De Poorter, champion pool player of the Isthmus, gave an exhibition of fancy pool shots.

A musical entertainment will be given at the clubhouse by the school of Gorgona, Friday, March 22, consisting of songs, games, and recitations. Charles E. Jennings is the director. All are invited to attend and admission will be free.

GATUN.

The Gatun Choral Club gave its first concert at Las Cascadas on Sunday evening, March 10, for the benefit of the members of the Tenth Infantry and the citizens of Las Cascadas. The first part of the program consisted of a tenor solo by Mr. Ross, a bass solo by Mr. Case, a violin solo by Mrs. Decker, a contralto solo by Madame Faure, and a soprano solo by Mrs. Hughes. The second part of the program consisted of the oratorio, "The Holy City", by the chorusof 25 voices. An orchestra from the Tenth Infantry assisted. A. B. Dickson acted as director. There was an attendance of over 300.

An orchestra from the *Prinz August Wilhelm* gave a concert at the clubhouse onMonday evening, March 11.

The Drop-in Discussion Club discussed the subject, "The Men and Religion Forward Movement," on Sunday evening, March 10.

The Empire Minstrels will play at Gatun on March 19.

Empire will play baseball at Gatun on Saturday evening, March 16. The public is invited.

CRISTOBAL.

Four hundred and seven people attended the moving picture show and concert by the German band from the *Prinz August Wilhelm*, on Tuesday evening, March 5.

On Thursday evening, March 7, a banquet was tendered to the members of the basketball team which has won 24 consecutive games playedon the Isthmus during the past two years. Of this number sixteen were tournament games, thus bringing to this clubhouse trophies for two seasons. The banquet was given in honor of the teams unbroken successes, and was served at the I. C. C. hotel. Covers were laid for 11, and speeches were made by all present.

On Friday, March 22 there will be a members' "smoker" at which there will be entertainment, with plenty of "smoke" and refreshments for all.

On Saturday night, March 9, the Cristobal duckpin bowlers defeated the team from Culebra with scores as follows:

Culebra.				Cristobal.			
Silver	82	94	96	Herrington	80	92	86
Cornthwaite	80	89	89	Weston	112	118	108
Hill	95	85	104	Gibson	96	95	80
Mengel	89	84	78	Smith	94	92	101
Case	81	99	107	Herring	102	102	115
Total	427	451	474	Total	484	499	490

The following high scores were made during the week ending March 9, 1912: *Duckpins*—DeLong, 101; Louch 101, 104; Bullard, 110, 100; Herring, 101, 106, 105, 102, 102, 115; Herrington, 108, 101, 120, 104, 102; E. Cotton, 100; Schofield, 105; Weston, 104, 106, 112, 118, 108; Gibson, 104; C. Cotton, 107; Whittles, 118; Smith, 106, 101; W. Burn, 101.

Misdirected Letters.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prin Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans via Limon, on Thursdays at 5 p. m.; ships for New York via Kingston on Tuesdays at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro on Mondays and Tuesdays at 5 p. m.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MARCH 20, 1912. No. 30.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Acting Chairman's Report.

The report of the Acting Chariman of the Isthmian Canal Commisson for the month of February is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Borrow Pit Operations at Gatun Locks and Dam.

All of the dry filling now being placed at Gatun Dam and for backfill for the locks is supplied from borrow pits nearby, the use of material from Culebra Cut having been discontinued after February 14, simultaneously with the abandonment of the old double-tracked main line of the Panama railroad between the north end of the cut and Gatun. Since the completion of the work of steamshovels in the Atlantic entrance channel at Mindi, one of the shovels formerly there has been transferred to a borrow pit several hundred yards north of the seaward side of Gatun Dam. It began operations near the end of the old chute from which coal was loaded into lighters for the dredges at work in the lagoon west of the spillway discharge channel.

Another shovel is borrowing from the hill just north of the Atlantic Division offices, between the locks and the Panama railroad. This pit was begun on October 12, 1911, since which time 186,505 cubic yards of material have been taken from it. East of the lower end of the locks and advancing almost to New Gatun station, another shovel is loading cars with selected rock stored there two years ago for use in facing the lake side of the dam.

Most of the material, however, yet to be used will come from the pit in the hills at the west end of the dam. Four shovels are at work there now and the number will be increased. This pit was started at the end of a switchback track which ran up a 1 per cent grade from the spillway to the west end of the dam, and the rise in grade has been continued as the shovels advanced into the hills. The track now extends about 7,000 feet beyond the end of the dam and reaches elevation + 110. Having the material at such height and proximity effects considerable economy and expediency in placing it on the toes of the dam, which are well advanced to final height.

A part of the material from the west end pit goes on the south, or lake, toe of the west wing. Connection with it has been by means of track running down to the spillway, through the spillway channel, at elevation 50, and back up the other side of the wing, to an elevation which rises continually, being now about 85 feet above sealevel. In order to avoid these grades and distances a track is being built on a fill across the wing near the west end, where the toes of the dam enclose a row of small hills, the average elevation of which is about 95 feet above sealevel. The track passes over the tops of the knolls and on a trestle to the south toe. The trestle is being filled with puddled soft clay, which will form the watertight section instead of the wet material pumped in from the dredges. At various other points, particularly for the blanketing of the western ridge, puddled clay is to be substituted for the impervious hydraulic fill

Elevator for Cars of Concrete.

To facilitate the placing of concrete in the cellular approach wall at the upper end of Pedro Miguel Lock, an elevator has been erected at the outer end of the wall, on the axis of the center, to raise containers of concrete from the level of the ground as high as the final level of the wall. The elevator consists of a framework of heavy timbers, forming a shaft 6 feet by 7 feet 4 inches, and rising to a height of about 60 feet above ground, in which a platform is raised and lowered by a small steel cable, operating over a drum moved by a 20-horsepower, two-cylinder upright air driven engine, set on the ground about twelve feet from the side of the wall. The platform carries a ½-cubic yard Decauville dump car, running on an 18-inch track, and at a height of about twelve feet above the present levels of the cellular forms, a track is extended on trestle work from the elevator shaft, so that the cars may be wheeled along and dumped into chutes leading to the forms. The concrete is placed in the cars at the bottom of the shaft from a ½-cubic yard portable mixer, which is supplied from conveniently located stock piles of rock and sand and cars of cement. The mixer rested on the 30-foot solid section of wall at the outer end till that was raised to 24 feet above base, but above such a height it will be more feasible to use the elevator, than to of carry the ingredients up steep inclines to a mixer high above ground.

Record for 70-Ton Steamshovel.

On March 14, steamshovel No. 124, a 70-ton shovel of the Bucyrus make, loaded 290 small Western dump cars, containing a total of 2,900 cubic yards of material, in the working day of eight hours. During this period the shovel was delayed one hour and 50 minutes waiting for cars.

This is the highest daily output for a 70-ton shovel since the commencement of operations by the United States.

Concrete Work at Gatun Locks.

For carrying concrete from the auxiliary mixing plant east of the upper end of Gatun Locks to the sites of the cableways extending over the locks, a 3-foot gage railroad passed down the east chambers from the upper end. Passing over the sill of the caisson dam, at elevation + 37, the tracks went down an incline to the level of the floor at the emergency dam sill, through which it passed by means of a rectangular aperture, about 12 feet wide by 8 in height. This portion of the track has recently ben removed and relaid on a trestle running to the top of the emergency dam sill, instead of to the bottom, and the aperture has been filled with concrete, so that the sill is practically completed. The trestle is 250 feet long, with an up-grade from the caisson sill of 4 per cent, and is supported on trapezoidal bents, consisting of two upright timbers, 6 by 6 inches in section, and two similar timbers on the sides, battering in, 1 on 5. The bents are 10 feet apart and connected by two stringers, 8 by 16 inches in section. Crossties, 6 inches square, are spaced on 18-inch centers.

The end of the trestle will not be connected with the track on the floors of the chambers below, but may be used for carrying material for the finishing of the upper approach. The concrete remaining to be laid in the walls of the upper and middle locks will be placed by means of portable mixers, and that for the lower lock is placed directly by the cableways, which are supplied from the construction plant west of the locks. The track on the lock floors will remain for the present, for general convenience and for the passage of the two-car narrowgage train which is operated over it for the benefit of sightseers.

Cement Gun on Revetted Wall.

The coating of cement mortar applied by the pneumatic cement gun which was sent to the Isthmus a little less than a year ago for use in spraying the surface of certain rock faces in Culebra Cut, which disintegrated on exposure to air, was found not to prevent this disintegration. The concrete mixture sprayed on the smooth surfaces adhered uniformly, but was not sufficiently airtight to retard appreciably the progress of disintegration. The gun was used recently on the relocated line of the Panama railroad, in coating the surfaces of hand-laid revetment wall, made of hard Bas Obispo rock. In this case the concrete penetrated the interstices between the rocks as far as several feet and thus obtained a firm hold. Using a mixture of 1 part of cement to 3 of sand for the inner coating, and of 1 part of cement to 2 of sand for the final surfaces, it was practicable to

NOTES OF PROGRESS.

(Continued.)

lay a smooth, strong coat from 2 to 3 inches thick, over an area of about 25 feet square a day. The spraying was continuous. By the time the work had been carried from one end of the area under treatment to the other the first part was ready for another coat. In all, about 10,000 square feet of revetment was treated.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 84 per cent completed, 190,401 cubic yards, out of a total of 225,000, having been placed at the close of work on March 16. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
March 11	228	8.00	1
March 12	284	8.00	1
March 13	380	8.00	1
March 14	336	15.00	2
March 15	332	12.00	2
March 16	300	11.30	2
Total	1,860		
Previously reported	188,541		
Grand total	190,401		

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending March 16, follows:

DATE.	Hours worked.	Cubic Yards.
March 11	3.05	1,730
March 12	3.15	1,700
March 13	4.30	2,050
March 14	3.55	1,770
March 15	3.40	1,886
March 16	4.40	1,877
Total	23.05	11,013

Ancon Crusher.

DATE.	Hours worked.	Cubic Yards.
March 11	12.30	3,777
March 12	12.05	3,448
March 13	12.20	4,649
March 14	11.25	4,055
March 15	7.50	2,946
March 16	10.10	4,193
Total	66.20	23,068

First Month of Postal Savings Bank.

A statement of Postal Savings Bank transactions at Canal Zone post offices for the period of February 2, to March 2. follows:

Name of Office.	Postal Savings Certificate Issued	Postal Savings Certificates Paid.
Ancon	$5,046.00	$447.00
Balboa	14,333.00	2,001.00
Bas Obispo	1,415.00	
Corozal	7,972.00	1,050.00
Cristobal	10,424.00	675.00
Culebra	13,178.00	1,497.00
Empire	10,790.00	276.00
Gatun	13,251.00	2,260.00
Gorgona	28,260.00	1,430.00
Las Cascadas	12,885.00	964.00
Matachin	315.00	161.00
Miraflores	4,530.00	361.00
Paraiso	4,201.00	392.00
Pedro Miguel	17,135.00	1,119.00
Cristobal Station A	220.00	45.00
Cristobal Station B	992.00	180.00
Total	$144,947.00	$12,858.00

The Sabanas Road.

It has been decided to resurface the road running from the city of Panama to the Canal Zone boundary, known as the Sabanas Road. The material required is estimated as 2,127 cubic yards of crushed rock, 710 cubic yards of screenings. Half of the road will be laid by sprinkling it with water before rolling, and the other half by sprinkling with road oil.

Ancon Study Club.

Twenty-five books have been added to the library of the Ancon Study Club. Owing to lack of suitable facilities for the library in the office of the District Quartermaster the books will be placed for the present in the home of Mrs. Mark White, House 31, Tivoli district. Members may exchange books at any time, and non-members are cordially invited to become subscribers. The art exhibit will be on view at Ancon Hall on Wednesday afternoon, March 21, from 1 to 5 o'clock. Residents and others interested will be cordially welcomed at any time during the afternoon.

CONCRETE WORK IN THE LOCKS.

Over 81 per cent of the concrete for the locks is in place, the amount at the close of work on March 16 being 3,421,273 cubic yards, out of a total of approximately 4,199,400. A total of 26,704 cubic yards of concrete was laid in the locks during the week ending March 16.

GATUN LOCKS.

Over 92 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 16 being 1,843,645 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending March 16, and of the total, follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

EXECUTIVE ORDER.

Speed Law for Vehicles—Law of the Road.

By virtue of the authority vested in me, I hereby establish the following order for the Canal Zone:

Section 1. No automobile, motor cycle, or bicycle shall be driven or operated over the roads or streets of the Canal Zone at a speed exceeding fifteen (15) miles an hour on straight roads, or at a speeed exceeding eight (8) miles an hour when approaching or traversing curves, forks, or crossroads, or when traveling over the streets of any city, town, or village of the Canal Zone. The owner of an automobile, if within the car, shall be held responsible for its speed; in the absence of the owner, the person actually driving the automobile shall be held responsible. The person operating a motor cycle or bicycle shall be held responsible for its speed.

Section 2. In the operation or employment of automobiles, motor cycles, bicycles, carriages, wagons, and other vehicles over Canal Zone roads or streets, the following rules shall be observed, *viz:* All such vehicles, in meeting and passing other vehicles, or in being overtaken and passed by other vehicles, shall keep to the left of the road; and in overtaking and passing other vehicles they shall keep to the right. The owner of an automobile or other vehicle, if riding therein, shall be held responsible for the driving or operation thereof, agreeably to the provisions of this section; in the absence of the owner, the person driving or operating such vehicle shall be held responsible. In the case of any motor cycle or bicycle, the person operating same shall be held responsible.

Section 3. Any person violating any provision of this order shall be punished by a fine not exceeding One Hundred Dollars ($100.00) United States currency, or by imprisonment not exceeding thirty (30) days, or by both such fine and imprisonment, in the discretion of the court.

Section 4. The Executive Order of February 27, 1908, relative to the speed of automobiles on Canal Zone roads is hereby repealed.

Section 5. This order shall take effect thirty days from this date.

Wm. H. Taft.

The White House,
February 28, 1912.
[No. 1,489.]

Vacation Pay in Advance.

In The Canal Record of March 13, under the caption "Vacation Pay in Advance," the proposed resolution of the Commission is incorrectly made to read as follows:

> *Resolved,* That any employe of the Commission whose service terminates on or after October 1, 1912, whether by resignation or by discharge, at a time when he *was on* leave with pay due him under the regulations of the Commission, * * *

The resolution submitted by the Chairman to the Comptroller, and approved by him, reads:

> *Resolved,* That any employe of the Commission whose service terminates on or after October 1, 1912, whether by resignation or by discharge, at a time when he *has* leave with pay due him under the regulations of the Commission. * * * * * *

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Empire, C. Z., Sunday, March 24, 1912 at 6.00 p. m.

The next concert will be given at Corozal, March 31, 1912 at 5 p. m.

Lost—In Culebra on Friday, March 15, between the I. C. C. Hotel and the observation tower, gold open-faced Elgin watch. Finder will be rewarded on returning same to Y. M. C. A., Culebra.

CANAL WORK IN FEBRUARY.

Monthly Report of the Acting Chairman and Chief Engineer to the Secretary of War.

Culebra, C. Z., March 16, 1912.

The Honorable the Secretary of War,
Washington, D. C.

Sir: I have the honor to submit the following report of operations on the Isthmus for the month of February, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

Item.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	24,445	1,415,714	136,552	1,576,711
Work excavation, wet	Cubic yards	581,399	....	432,796	1,014,195
Total work excavation	Cubic yards	605,844	1,415,714	569,348	2,590,906
Plant excavation, dry	Cubic yards	....	12,642	....	12,642
Plant excavation, wet	Cubic yards	39,862	....	....	39,862
Total Canal Excavation	Cubic yards	645,706	1,428,356	569,348	2,643,410
Material placed in dams	Cubic yards	356,620	....	61,628	418,248
Concrete placed in locks and dams	Cubic yards	36,932	....	76,532	113,454
Explosives used	Tons (Gross)	102.91	205.10	30.91	338.92
Rock drilled	Feet	51,700	436,792	78,483	566,975
Tracks removed	Miles	....	9.21	....	9.21
New tracks laid	Miles	2.78	17.59	5.00	25.37
Rock crushed	Cubic yards	41,493	....	51,081	92,574
Cement used	Barrels	43,969	59	78,584	122,612
New roads built	Miles	0.31	....	....	0.31
Water mains laid	Feet	17,941	15,974	23,601	57,516
Sewers laid	Feet	2,652	431	1,938	5,021
Open drains and ditches dug	Feet	18,280	9,435	1,825	29,540
Average daily force	....	6,592	8,292	5,780	20,664
Average rainfall	Inches	2.10	0.91	0.20	1.01

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the Divison Engineers, the inspection being cared for by this subdivision. Work was continued on the grinding of fixed irons and preparing the valve chambers for the installation of the valves, which work is being done under supervision of this office. This subdivision is also charged with general inspection of the masonry work of all the locks.

LOCK GATES AND PROTECTIVE DEVICES.

Shop Work in the United States—Up to February 20, a total of 46 932 tons of structural steel had been accepted at the rolling mills, or about 92 per cent of the total, of which 1,505 tons were accepted between January 20 and February 20, and a total of 26,750 tons of riveted structural material was shipped from Rankin shops, or about 52 per cent of the total contract weight. Of this last item, 1,088 tons were shipped between January 20 and February 20. Over 3,000 tons of additional parts, finished up but not painted, remain in the yards of the contractors, the extreme cold making it undesirable to paint this material now. To replace the 1,490 tons of material lost on the steamship *Moldegaard*, about 278 tons have been shipped, this being in addition to the total quantity of material shipped, as given above.

The following are details of material shipped to February 20:

Gatun Locks—Upper guard gates, 4 leaves, 54 feet 8 inches high, Nos. 37 to 40, inclusive; all material shipped. Upper and middle gates, upper lock, 8 leaves, 77 feet high, Nos. 29 to 36, inclusive; all material shipped. Safety and lower gates, upper lock, 8 leaves, 77 feet high, Nos. 21 to 28, inclusive; completed and nearly all shipped. Middle and lower gates, middle lock, 8 leaves, 77 feet 10 inches high, Nos. 13 to 20, inclusive; about 18 per cent of the total has been shipped. Middle gates, lower lock, 4 leaves, 77 feet high, Nos. 9 to 12, inclusive; about 50 per cent built and about 10 per cent shipped. Lower guard gates, 5 leaves, 47 feet 4 inches high, Nos. 1 to 4, inclusive; about 55 per cent built, none shipped.

Pedro Miguel Lock—Upper guard gates, 4 leaves, 54 feet 8 inches high, Nos. 50 to 53, inclusive; all material shipped. Upper, safety, lower, and middle gates, 16 leaves, 79 feet high, Nos. 54 to 69, inclusive, and lower guard gates, 4 leaves, 47 feet 4 inches high, Nos. 70 to 73, inclusive; practically all manufactured and shipped.

Miraflores Locks—Practically none of this material has been manufactured or shipped. The manufacture of castings, handrailing and piping has proceeded satisfactorily.

LOCK GATE ERECTION.

Gatun—Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive: The riveting of these leaves is practically completed except that in the way of falsework and castings at ends, also the riveting of footwalk, fender angles, etc. During the month the castings at the quoin end of leaf No. 38 were fitted with wedges about 7 panels high out of a total of 13, on both the up and down stream faces, and the holes for the $1\frac{1}{2}$-inch bolts through the end of leaves for securing these castings were drilled and the bolts fitted 11 panels high. On leaf No. 37 the grinding of the quoin end was completed and the contractor began to attach castings on February 16. The miter ends of leaves Nos. 37 and 38 are being ground for the reception of end reaction castings.

Upper gates, upper lock, 77 feet high, leaves Nos. 33 to 36, inclusive: Very little work was done on these leaves during the month. The inside riveting was practically completed. The reaming of the holes through the sheathing plates has been completed between the falsework frames for the entire height of the leaves and the sheathing has been riveted about 3 panels high on both the up and downstream faces of leaves Nos. 35 and 36; no riveting has been done in the sheathing of leaves Nos. 33 and 34.

Middle gates, upper lock, 77 feet high, leaves Nos. 29 to 32, inclusive: The framing of these leaves has been erected up to but not including the top girder.

Pedro Miguel—Upper guard gates, 54 feet 8 inches high, Nos. 50 to 53, inclusive. Very little work was done on these leaves during the month. The riveting of the sheathing progressed slowly.

Upper gates, 79 feet high, Nos. 54 to 57, inclusive: These four leaves have their framing erected to the top panel, but no reaming or riveting has been done.

Safety gates, 79 feet high, leaves Nos. 62 to 65, inclusive: The skeleton has been erected to the girder next to the top in all leaves. A small part of the riveting of the skeleton has been completed. No sheathing, castings, etc. have been placed on any of these leaves.

The total tonnage of lock gates erected on the canal to March 1, 1912, without regard to its being riveted or fully fitted, is about 9,832 tons, out of a total of 58,000 tons, or 17 per cent. The total rivets driven were 426,000 out of a total of 5,500,000, or 8 per cent.

LOCK GATE RECESS COVERS.

The material for a total of 46 recess covers, excepting the cast iron plates, has been received on the Isthmus and unloaded at Gatun. Material for 4 covers was delivered to the contractors for erection at Gatun, and 8 at Pedro Miguel. At Gatun 8 covers were practically riveted up; 2 other covers were assembled and partially riveted. The grouting of covers will not be done until the rack sections and rails are attached and fully aligned and leveled. At Pedro Miguel 8 recess covers have been assembled and one has been riveted up complete. Three other covers have been partially riveted.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection as follows:

(*1*) *For the rising stem and cylindrical valve machines purchased under circular 614*—The two trial machines are now on the Isthmus and the installation practically completed. Machine No. 261 was operated preliminarily by motor, without the connection of the valve stem, and machine No. 260 by hand, also with the stem not connected, and both machines were found to be properly installed. It is proposed to test the machines out completely after the valves proper and stems are in place. The test of motors being conducted on the Isthmus was continued throughout the month. The test on cylindrical valve machine No. 559, made in January, was continued during the month of February. While the results of similar leakage tests on this valve were not found to be consistent, the cause has been located, and similar tests will be conducted later on other valves. The Wheeling Mold and Foundry Company have arranged to ship the first cylindrical valve machine ready to replace the machine lost on the steamship *Moldegaard*, wrecked.

(*2*) *For the rack railway and other material purchased under Circulars 619, 635, 635-D, 647, and 666*—Out of the 30 items under these contracts, 10 are 90 per cent or more completed. The work progressed satisfactorily.

(*3*) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, purchased under Circular 627*—No work was done on the installation of these machines, the same being held up owing to the work on miter gates not being completed. The completion of the second miter gate moving machine has been delayed twice on account of defects developing in a casting while being machined. On February 9, award was made to the Wheeling Mold and Foundry Company for 90 miter gate moving machines, to be delivered complete April 1, 1913.

The motors for the above machines are rapidly nearing completion and it is expected that they will go on official test during the coming month.

(*4*) Satisfactory progress was made on the gate and girder hoisting machinery for the Emergency Dams, purchased under Circular 616.

(*5*) *For the Gatun hydro-electric station, purchased under Circular 648*—Work progressed satisfactorily on various items of the three classes.

(*6*) *For electric towing locomotives purchased under Circular 650*—Working drawings are being prepared for Class 1, Item 1, one trial locomotive, at the works of the manufacturer; award has not been made for the balance of the locomotives.

(*7*) *For locomotive cranes, derricks and hoisting engines for erection plant of machinery and electrical equipment, purchased under Circular 662*—Two 15-ton locomotive cranes and auxiliary hooks and lines under Class 1, Items 1 and 2, were delivered on the Isthmus during the month. Contract has been made with the contractor for 4 additional cranes with auxiliary hooks and lines. All cranes to be delivered complete not later than April 25, 1912.

The force installing machinery and electrical equipment on the Isthmus during the month assembled 324 feet of towing track and 158 feet of track were "frozen" in place, consuming 30.1 cubic yards of concrete. This included the assembly of rack sections, channels, anchor bolts and bonding of "T" rails. There were 118.7 tons of locomotive track material distributed along the lock wall ready for assembly. For the return track a test section of conductor slot cover, a total length of 220 feet of straight track and 82 feet of curve, has been installed. Foundation bolts were set for 9 cylindrical valve machines, and 18 cubic yards of concrete were consumed in placing the same. The placing of bench marks and permanent center lines for the various machines throughout the locks progressed satisfactorily.

EMERGENCY DAMS.

The inspection work in the United States progressed satisfactorily during the month. Up to February 20, a total of 583 drawings of the turning and wedging machinery, and a large number of drawings covering structural parts were completed and approved. At the rolling mills and foundries, 74 tons of riveted nickle steel, 65 tons of riveted structural steel, 6 tons of forged steel castings, 71 tons of carbon steel castings, and about 50 tons of miscellaneous cast iron castings, vanadium wheels and vanadium steel castings, in all, about 266 tons of material, were fabricated and acepted during the month. Satisfactory progress has been made on the roller bearings, all the roller bearings for 4 complete dams having been manufactured and accepted to date.

AIDS TO NAVIGATION.

During the month, 6 acres of land were cleared in the Gatun Lake section for sites for beacons and reference buoys; 28,200 linear feet of trochas were cut, and the necessary land for making surveys was cleared and profile taken. The locations for 8 gas buoys were referenced during the month in the Gatun Lake section. Twenty-two acres of land were cleared in the Pacific Section.

Pacific Division. Range 9-11. The brass lantern frame and curved glass were placed in the front and rear towers.

Range 1-2. The spiral stairway in the rear tower was erected, thus completing the concrete work on that tower. The status of the front tower remains as reported last month.

Range 13-14. The entrance stairs, vestibule and spiral, and reinforced concrete stairways are erected, thus completing all the concrete work on both towers. The wooden doors and windows, except one window in the front and one in the rear tower, have been hung.

Atlantic Division. Range 5-6. The walls of the front tower were carried up to their final height of 74 feet to focal plane, and the rear walls to their final height of 48 feet to focal plane.

Range 21-22. The walls of the front tower were carried up to their final height of 30 feet 7 inches to focal plane, and the entrance steps and vestibule placed, thus completing all the concrete work in this tower.

Gatun Lake. Range 24-25. The foundation was placed and the tower walls were commenced for the front light. The foundations and base of the rear light tower were completed to a height of 7 feet above grade. All the material for these towers was delivered at the sites.

At the central plant at Balboa, 73 reinforced stair treads, 14 radial beams, 27 stair strings, 18 architrave moldings, 12 window lintels, and 13 window sills were cast during the month. The forms for the concrete beacons were constructed, and the casting of beacons will commence at once.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month two shovels were engaged on borrow pit excavation for the backfill, 77,361 cubic yards of material being removed.

Backfill—Backfilling behind the side walls of the middle and lower locks, and in the center wall of the middle lock, was continued. The backfilling in the center wall of the upper lock was completed. The quantity placed during the month aggregated 74,944 cubic yards, of which 18,775 cubic yards were placed in the center wall, increasing the total on March 1 to 1,274,542 cubic yards. A new estimate completed during February makes the total fill to be placed 1,748,475 cubic yards. The backfill on the basis of the new estimate was therefore 72.8 per cent completed on February 29.

Receiving and Issuing Material—The receipts of rock exceeded the consumption by 7,711 cubic yards, and the consumption of sand and cement exceeded the receipts by 6,620 subic yards and 3,065 barrels, respectively.

Mixing and Placing Plants—Both plants, and all portable mixers, were kept in satisfactory operation during the month.

Power Plant and Pumps—The operation of the power plant and pumps was satisfactory.

Iron and Steel Work—During the month 411.2 tons of fixed steel and 156,216 feet of reinforcing rods were placed; 26.9 tons of reenforcing rails and 34.4 tons of electric return track were laid.

Concrete Work—There was a decrease of 8,319 cubic yards in the amount of concrete laid as compared with the figures for the preceding month. The daily average for the 24 working days was 1,111 cubic yards, as compared with a daily average during January of

1,345 cubic yards. The working hours for all concrete mixing and placing plants were reduced on February 1 to a single shift. The total amount of concrete placed during the month was 26,664 cubic yards. The bucket measurement exceeded the place measurement by 754.5 cubic yards. Of the total concrete, 6,258 cubic yards were placed in the upper lock, 1,245 cubic yards in the middle lock, and 19,161 cubic yards in the lower lock. The concrete work for the entire lock system was 91.13 per cent completed at the end of February.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)..	8.57	8.50
Average number of hours per day worked, per strand of cableway, laying concrete and large rock (actual working time)......................	2.54	....
Average number of mixers per day......................	3.70	1.33
Average hourly output per mixer (actual working time), cu. yds.	60.87	75.22

Concrete laid, derricks, cu. yds...	....	5,152
Concrete laid, portable mixers...	....	1,220.5
Total amount of concrete and large stone laid, cu. yds.......	21,046	6,372.5

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 356,620 cubic yards, making the total amount in place, 18,080,353 cubic yards. On March 1 the dam was 84.25 per cent completed.

Hydraulic Fill—The dredges increased the hydraulic fill by 211,399 cubic yards. The total hydraulic fill in place February 29 was 9,152,594 cubic yards.

Dry Fill—The material received from the Central Division and steamshovels, amounting to 145,221 cubic yards, was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 8,927,759 cubic yards.

GATUN SPILLWAY.

Excavation—During the month 1,228 cubic yards of rock were excavated by hand in preparing foundations, increasing the total on February 29 to 1,588,854 cubic yards.

Backfill—Backfilling was not extended during the month, the total remaining at 16,236 cubic yards.

Concrete—The work of placing concrete was continued. The amount placed during the month aggregated 10,268 cubic yards, including 64 cubic yards of large stone, which increased the total to 186,672 cubic yards. The concrete work for the spillway was 83 per cent completed.

HARBOR AND CHANNEL SECTION.

Excavation below Sealevel at Mindi—During the month one steamshovel removed 4,566 cubic yards of earth and 18,651 cubic yards of rock from the canal prism, completing the dry excavation on February 24, 1912.

Dredging from Ocean to Mindi—Seven dredges removed 540,471 cubic yards of earth and 40,928 cubic yards of rock from the canal prism. In addition, dredge *No. 4* removed 39,862 cubic yards of earth from pit, for spoiling dredged rock, at lock site, and derrick barge *No.1* removed 7,143 cubic yards of earth and 872 cubic yards of rock from the East Diversion at Mount Hope. On February 29, 40 feet of water could be carried from zero to zero plus 2,800 feet; 35 feet to Mile 3 plus 2,600 feet; 30 feet to Mile 3 plus 3,700 feet; and 20 feet to Mile 5 plus 2,438.9 feet, the point of intersection with the French Canal.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day, hours............	8.00
Average number of hours worked per day...	3.42
Average number of cubic yards per hour of working day........................	216.11
Average number of cubic yards per working hour..............................	505.21
Maximum day's output (4 hours 50 minutes) cu. yards......................	2,234
Average day's output (24 days) cu yds......	1,728.88
Average hourly output (132 hours 15 minutes) cu. yds........................	313.75

SAND, STONE, AND CEMENT SERVICE.

In connection with this service plant steamed 3,555 miles, handled 471 barges, and carried 1,910 passengers.

WEST BREAKWATER, COLON.

Forty-two thousand nine hundred and twenty-seven cubic yards of material were excavated, all of which was dumped from the trestle. The double track trestle was extended 503 linear feet. On March 1 the trestle extended 9,568 linear feet from shore. During the month 8,393 cubic yards of Porto Bello rock were placed on the breakwater, making a total of 32,788 cubic yards used for that purpose to March 1. The total amount of rock dredged and dumped on the west breakwater to February 1, 1912, was 879,605 cubic yards. During the month 40,928 cubic yards of rock were dredged and dumped, increasing the total to 920,533 cubic yards. The amount of dry fill placed to March 1 was 661,845 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, roads and oil pipe lines were maintained and extended as required to facilitate construction work.

Work was contined on the Colon street improvements.

Central Division.

During the month of February the total amount of material excavated in the Central Division was 1,428,356 cubic yards, of which 188,745 cubic yards were classified as earth and 1,239,611 cubic yards as rock. Of this quantity, 1,392,455 cubic yards were removed by steamshovels, 23,860 cubic yards by ranes, and 1,229 cubic yards by hand. Contractors removed 10,812 cubic yards by hand. Of the total, 1,415,714 cubic yards consisted of primary excavation for the canal prism, and 12,642 cubic yards was gravel removed and incline excavation outside of the prism.

The daily average number of steamshovels at work during the month was 43.75, and the total number of shovel days was 1,050, as compared with 41.92 at work during the month of January, with 1,090 shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day
		Rock.	Earth.			
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
1911: Feb.....	1,600,597	1,150,353	450,244	48.43	23	1,436.80
1912: Feb ...	1,392,455	1,229,329	163,126	43.75	24	1,326.15

Rainfall at Empire: 1911, 0.55 ins.: 1912, 0.34 ins.

The above table shows the average output per shovel to be 7.70 per cent greater in February, 1911, than in the corresponding month of the present year.

The total amount of the material excavated from the prism in the Culebra Section of the Central Division in February, 1912, 1,349,569 cubic yards, was the highest record in that section for the month of February, except February, 1911, when 1,409,338 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division, according to the revised estimate of July 1, 1911, was 101,801,296, and up to March 1, 1912, 88,287,021 cubic yards had been removed, leaving 13,514,275 cubic yards to be removed in order to complete all excavation in the Central Division. From these figures it will be seen that 86.72 per cent of all excavation in the Central Division had been completed up to the close of the month of February, and 13.28 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of February operations were as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed.........................	76,268,428
To be completed.....................	13,175,577
CHAGRES SECTION.	*Cu. Yds.*
Completed.........................	12,018,593
To be completed.....................	338,698

From the above figures it will be seen that the Culebra Section, locally known as the "Culebra Cut," was 85.27 per cent completed, with 14.73 per cent to be completed; the Chagres Section was 97.26 per cent completed, with 2.74 per cent to be completed.

During the month no material was dumped in the embankment for the new roadbed for the relocation of the Panama railroad, the total amount furnished for this purpose remaining at 4,146,793 cubic yards. The Central Division delivered at Gatun 96,456 cubic yards of rock and earth for use in the construction of the dam, making the total for this purpose at the end of February, 5,373,851 cubic yards. During the month 10,822 cubic yards of rock and earth were furnished for the Colon breakwater, and 23,047 cubic yards to the Pacific Division for backfill at Pedro Miguel Locks.

The daily average number of laborers at work on the whole division during the month was 7,495, and the daily average number of gold employes was 797.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 136,552 cubic yards, of which 51,786 cubic yards were classified as earth, and 84,766 cubic yards as rock.

Filling and Embankment—During February, 35,153 cubic yards of dry filling were added to the prism of the west dam at Pedro Miguel, increasing the total amount of material in place at the close of the month to 392,118 cubic yards. The backfill at Pedro Miguel was increased by 33,175 cubic yards, the total amount in place at the end of the month amounting to 533,231 cubic yards.

At Miraflores, 26,475 cubic yards were added to the dry fill in the toes of the west dam, increasing the total amount in place at the end of the month to 1,121,772 cubic yards. The backfill was increased by 35,170 cubic yards, the total aggregating 425,584 cubic yards at the end of the month.

Pedro Miguel Lock—Excavation of the

canal prism between the Pedro Miguel and Miraflores locks was commenced early in the month. The sopil, which is principally clay, was used for filling in the core of the west dam at Pedro Miguel by continuing the west toe toward the center of the dam. The east rock toe of the dam is being completed mainly with Lidgerwood trains of rock from the Culebra Cut. The amount of iron placed in the masonry aggregated 151,440 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 12,639 cubic yards, as compared with 15,077 cubic yards during January. The concrete was placed as follows: 213 cubic yards in the northeast wing wall; 2,976 cubic yards in the north center guide wall; 1,541 cubic yards in the east wall; 817 cubic yards in the west wall; 3,746 cubic yards in the center wall; 375 cubic yards in the southeast wing wall; and 2,953 cubic yards in the floors.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	4.74
Average number of mixers per day	6.04
Average bourly output per mixer (actual working time), Cu. Yds	15.63
Large stone laid, cubic yards	
Concrete laid, Cu. Yds	12,639.00
Total concrete laid, Cu Yds	12,639.00

Plant consisted of two 2-cubic yard mixers, a daily average of 4.04 ⅓-cubic yard mixers, and a daily average of 4.62 locomotive cranes and derricks.

Miraflores Locks—The McClintic-Marshall Construction Company commenced the reerection of chamber crane No. 3 in the east chamber of the lower lock on February 17. The reerection of this crane will complete their contract for dismantling two berm cranes and four chamber cranes at Pedro Miguel, moving and reerecting same at Miraflores, and adding a cantilever arm to each of the two berm cranes originally erected at Miraflores by the Wellman-Seaver-Morgan Company. The double track incline trestle from the upper to lower lock was completed and the serving of concrete to chamber crane No. 1 for constructing the center wall of the lower lock was commenced about the middle of the month. The concrete work for the west wall of the lower lock was also commenced at this time. Dry excavation in the lower lock and canal prism with five steam shovels, filling of east and west toes of west dam, and backfilling behind east and west walls of the upper locks were continued during the month. The work of sinking concrete caisson foundations for north center guide wall was continued. During the month the amount of iron placed aggregated 332,499 pounds.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (bours)	8.00 & 12.00	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	5.85	5.88
Average number of mixers per day	7.83	5.96
	Cu. Yds.	*Cu Yds.*
Average hourly output per mixer (actual working time)	37.32	24.23
Average amount of concrete and large stone laid per hour, per berm, or chamber crane (actual working time)	59.11	
Large stone laid		
Concrete laid	49,139.00	14,754.00

Permanent plant consisted of two berm cranes working 12 hours per day and two working 8 hours per day, and three chamber cranes averaging 1.92 units daily.

Auxiliary plant consisted of two 2-cubic yard mixers, four ⅓-cubic yard mixers, and a daily average of 1.96 locomotive cranes and derricks.

Concrete Work—The total amount of concrete and large stone laid at Miraflores was 63,893 cubic yards, as compared with 48,416 cubic yards during January. The concrete was placed as follows: 881 cubic yards in the north center guide wall; 32,832 cubic yards in the east wall; 10,622 cubic yards in the center wall; 11,116 cubic yards in the west wall; and 8,442 cubic yards in the floors.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	
Cardenas	Dipper	22,887	4,359			27,246	Place measurement
Marmot	Ladder	20,776	5,530			26,306	Place measurement
Badger	Ladder	23,653	23,937			47,590	Place measurement
Mole	Ladder	500	18,096			18,596	Scow measurement
Culebra	Suction	252,143				252,143	Scow measurement
Total		319,959	51,922			371,881	
Hydraulic excavation		*60,915				60,915	Place measurement
Grand Total		380,874	54,922			432 796	

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 48,389 cubic yards of sand were excavated at Punta Chame and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work.

Work was continued on the Panama street improvements.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day, hours	8.00
Average number of bours per day (actual working time)	6.09
Average number of cubic yards crusbed per hour working day	266.00
Average number of cubic yards crusbed per working hour	349.70
Total output for the month, Cu. Yds	51,081.00

Relocation of Panama Railroad.

During the month 158,355 cubic yards of material were excavated, increasing the total excavation at the close of the month to 10,098,192 cubic yards, and 170,057 cubic yards of material were placed in embankment, increasing the total for this purpose to 16,315,931 cubic yards.

The daily average number of steamshovels at work was 4.16, and the total number of working days was 24.

For comparison with the work done by steamshovels during the preceding month, and during the corresponding month of the previous year, the following table has been prepared:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1911:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
Feb.	256,615	180,600	76,015	6.22	23	1,795
1912:						1,406
Jan.	320,035	178,210	141,8 5	8 76	26	
Feb.	153,210	76,165	77,045	4.16	24	1,536

No temporary trestle was driven during the month. Work on bridges and culverts was continued. At the end of the month there was 73,816 linear feet of 70-pound and 110,816 linear feet of 90-pound track. The force averaged 1,198 men.

Quartermaster's Department.

LABOR.

The force report for the week ending Wednesday, February 28, shows that no permanent reduction in force has obtained to date. Although an occasional reduction in European labor has been made at some points, it has been found possible to place the laborers on other sections of the work.

QUARTERS.

A congestion in bachelor quarters for gold employes still obtains at Gatun, Gorgona, Pedro Miguel, and Corozal. At Gatun and Gorgona arrangements have been made to return one type 5 building at each place from non-housekeeping quarters to gold bachelor quarters.

MATERIAL AND SUPPLIES.

The congestion in shipping continued, and it was difficult to procure tonnage for transportation of material, particularly lumber and piling to the Isthmus, either on the Atlantic or Pacific side, it being found necessary to charter a special steamer which brought forward 3,168 pieces of piling which was urgently needed. The value of material received from the United States during the month was $852,817.84. Supplies during the month were delivered by 39 steamers, the total weight of cargo aggregating 36,824 tons, exclusive of 1,542,521 feet B. M. Douglas fir lumber, 343,294 feet B. M. yellow pine lumber, 117,599 feet B. M. white oak lumber, 5,063 pieces of piling, and 44,704 cross ties.

Subsistence Department.

The operation of the European laborer's messes, the colored laborers' kitchens and the "line" hotels showed a net profit of $2,606.15 The operation of the Hotel Tivoli showed a net profit of $14,785.10, and there was a net profits on restaurants, penitentiary, tugs, and dredges of $193.27. The net profit on subsistence operations was $17,584.52.

Department of Civil Administration.

COURTS.

During the month 13 civil and 44 criminal cases were disposed of in the Circuit Courts, and 249 civil and 636 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for February amounted to $418,419.65, and the fees to $1,991.56. Receipts from stamp and card sales, and newspaper postage aggregated $7,839.62. The total collection of revenues made by the Division was $16,820.90, and the collection on account of court fines, costs and fees, $3,064.99.

In accordance with Executive Order of September 8, 1911, a postal savings system was put into effect on February 1 at all money order post offices in the Zone. During the month $144,946.00 was deposited, and $12-858.00 withdrawn.

Twenty-three vessels entered at and 25 vessels cleared from the port of Ancon; and 24 vessels entered at and 21 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 619, of whom 567 were men and 52 women. Twenty-four nations, or 49 separate states and dependencies were represented. The total number of arrests for the month showed an increase of 47 as compared with the month of January. Twelve convicts were committed to the penitentiary, and 14 were discharged, leaving 149 in confinement at the close of the month. One convict died while in custody. The cost of guarding and subsisteing the convicts was $2,935.83, and the value of their work on Canal Zone roads $2,432.80.

DIVISION OF FIRE PROTECTION.

Forty-eight fires were reported in the Canal Zone during the month, as compared with 59 in January. The damage to Commission property was $335.80, and to private property $617.00.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,417,607 gallons, and in Colon 1,133,645 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The net enrollment in the white schools during the month was 1,207, and the average daily attendance 971.8. or 93.6 per cent of the enrollment; and in the colored schools the net enrollment was 1,392, and the average daily attendance 745.4, or 80.5 per cent. Forty-six white and 28 colored teachers were employed in the division on February 29.

Department of Sanitation.

The total number of deaths from all causes among employes was 46. These were divided as follows: From disease, 29; and from violence, 17, giving the annual average per thousand of 6.66 and 3.91, respectively.

The annual average death rate per thousand among employes for the month of February in previous years since American occupation was as follows:

1905	14.05
1906	29.09
1907	30.74
1908	12.80
1909	9.42
1910	8.75
1911	9.88

The annual average death rate per thousand in the cities of Panama, Colon and the Canal Zone, including both employes and non-employes, was 16.33.

The annual average death rate per thousand for the month of February among the same class of population for previous years was as follows:

1905	42.07
1906	43.96
1907	36.07
1908	21.40
1909	18.59
1910	17.50
1911	18.60

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was, for whites, 4.61, blacks, 7.34, giving a general average of 6.66. For the same month during 1910, the annual average death reate per thousand from disease was, whites, 5.20, blacks, 4.59, giving a general average of 4.73, and for the same month during 1911, whites, 5.67, blacks, 6.47, giving a general average of 6.27.

Among employes during the month deaths from principal diseases were as follows: Nephritis, acute and chronic, 5; dysentery, clinical, 1; haemoglobinuric fever, 1; lobar pneumonia, 5; malaria fever, E. A., 1; tuberculosis, 4; typhoid fever, 1, leaving a balance of 11 deaths from all other diseases, and 17 deaths from external violence.

No cases of yellow fever, small pox, or plague originated on or were brought to the Isthmus during the month.

Respectfully,
H. F. HODGES,
Acting Chairman.

SOCIAL LIFE OF THE ZONE.

The Red Men of Empire will give a dance at Kangaroo Hall in that village on March 30.

United Spanish War Veterans.

The next regular meeting of the Chagres Camp No. 2 U. S. W. V.. will be held at Empire, on Sunday, March 31, at 2.30 p. m., in Kangaroo Hall. It will be a joint meeting of the U. S. W. V. and the Ladies Auxiliary.

All female nurses and all female relatives of men who served in the Spanish-American War, the Philippine insurrection, or the China expedition are eligible to membership in the auxiliary and are invited to attend this meeting and become charter members. Refreshments will be served.

Knights of Pythias.

On Sunday, March 24, the Canal Zone lodges, Knights of Pythias, will meet in Ancon. During the forenoon a baseball game, free to everybody, will be played between Ancon lodge No. 8 and Cruces lodge No. 9, and Ancon lodge will serve luncheon to all Knights and their families in the Ancon hall immediately after the game

Obituary.

Henry Vanderschmidt, aged 24 years, an enlisted man in the Marine Corps, stationed at Camp Elliott, died at Ancon Hospital on March 15, from typhoid fever. His home was at 323 East 24th street, New York City.

Joseph V. Sadler, a powder foreman, was killed on the night of March 17, by being thrown from the platform of a Panama railroad passenger train as it was rounding a curve north of Corozal. He was 43 years old, a native of New York City, and had been in the employ of the Commission since September 1, 1906. He is survived by his wife, living at Pedro Miguel.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on March 27. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8.00 a. m., on March 27, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their capacity properly to operate an automobile, and must have the automobile with them.

OFFICIAL CIRCULARS.

Admission to Taboga Sanitarium.

DEPARTMENT OF SANITATION,
ANCON, C. Z., March 16, 1912.

On and after this date, employes and members of their families wishing to go to Taboga Sanitarium for a few days, and who at the time are not patients in Ancon or Colon Hospital, are requested to make their applications to the district physician of their home station at least twenty-four hours before the sailing of the Taboga boat, which leaves its wharf at Balboa on Tuesdays, Thursdays, and Saturdays at 9 o'clock a. m.

Applications sent in after this time cannot be considered.

By direction of the Chief Sanitary Officer.

JOHN L. PHILLIPS,
Assistant Chief Sanitary Officer.

Express Service to San Francisco.

CULEBRA, C. Z., March 15, 1912.

ALL CONCERNED:

The Pacific Mail Steamship Company has inaugurated an express passenger and freight service between Balboa, Los Angles and San Francisco, making the run in from twelve to thirteen days. The steamships *City of Para*, *Pennsylvania*, and *Aztec* have been placed on this run, the two former carrying first-class passengers and freight, and the latter freight only. The passenger steamers will leave Balboa and San Francisco approximately once a month.

The regular cabin fare, Balboa to Los Angeles or San Francisco, will be $85.00. Commission employes will be granted the reduced rate of $60.00, which is now in force on the coastwise vessels. The coastwise service will be continued in connection with the express service.

By direction of the Acting Chairman.

Respectfully,
C. A. MCILVAINE, *Chief Clerk.*

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

A pool and billiard league has been organized and the following officers selected: F. L. Pack, president; Gus Gustavson, secretary. Each clubhouse will be represented by a four-man pool team and a two-man billiard team. The opening games will be played on March 30.

The Isthmian Y. M. C. A. Duckpin League for the year 1912, has been organized and the following officers chosen by delegates representing the clubhouses: A. H. Pinney, president; C. G. Wurster, secretary; G. A. Barte, scorer. The opening games will be played on Saturday, April 13.

CULEBRA.

Two hundred and seventy people attended the entertainment given by the Empire Minstrel Troupe on Friday evening, March 15.

Any who desire to take up the study of Spanish on Saturday evenings, either advance or beginners, can learn particulars by interviewing the secretary.

The Isthmian duckpin tournament will begin in the second week of April. All desiring to try for the team should come out and practice.

The Culebra boys went to Corozal on Saturday, March 16, and defeated the Corozal boys in a game of outdoor baseball, score 6 to 5.

EMPIRE.

The Empire Minstrel Show will play at Las Cascadas on Thursday night, March 21 and at Gorgona, Saturday. March 23.

Gymnasium classes have started and will meet twice weekly until further notice.

GORGONA.

There were 295 people present at the moving picture shown on Saturday, March 16.

The following games were bowled in a duckpin match game on Saturday night, March 16 between Gorgona and Camp Elliott.

Camp Elliott.				Gorgona.			
Weight	110	86	81	Rankin	74	77	87
Swartz	73	92	80	Berman	83	84	86
Synnott	80	80	75	Burmaster	69

Stock	74	91	67	Orr	102	71	70
				Demmy		86	77
				Halderman		76	86

The Empire Minstrels will appear at Gorgona on Saturday night, March 23. Reserved seats are on sale. Admission 50 cents, members free.

The school children of Gorgona will give an entertainment at the clubhouse on Friday night, March 22 at 7.30 o'clock. C. E. Jennings will have charge of the music and Miss Grace McRae of the general program.

GATUN.

The Gatun Bowling League was organized on Monday evening, March 11, with the following teams: Beavers—Barte (Capt.). Teall, Hodges, Carr, Delgado. Algonquins—Huttlemaier (Capt.), T. Smith, Jewell, C. R. Hughes, Wilson; Sure Shots—De Poorter (Capt.), Wells, Ourand, Abernathy, Hughes; Stars—Severn, (Capt.), Wurster, Gailliard, Crowell, Gamble, R.; Tigers—Dickson (Capt.), Vierbuchen, Walter, Coleman, Gayer. Lucky Strikes—DeMoll (Capt.), Green, Luckey, Ottman, Long; Ruf Nex—Galloway (Capt.), Bailey, Sisson, Dennis, Brown.

The first game of the tournament was played on Friday evening, March 15, when the "Algonquins" took three games from the "Lucky Strikes" with the following scores: "Lucky Strikes—411, 396, 421. Algonquins —413, 417, 451.

Gatun took two out of the three games from a team from Gorgona on Saturday evening, March 16. Following is the score:

Gorgona.... 432 427 403 Gatun...... 409 433 413

The indoor base ball game between Empire and Gatun, which was to have been played at Gatun on Saturday evening, March 16, was played at Camp Eliott in order that the base ball players might also participate in the athletic meet. Empire won from Gatun with a score of 24 to 7. The lineup was as follows: Empire—Alley, Greening, Giovelli, Doran, Adams, King, Koperski. Gatun—Dickson, Thompson, Dalton, Kerrnish Wright, Atkins, Whiston.

G. K. Weston of Cristobal sang and H. F. Bronson of Gatun played at the moving picture entertainment on Tuesday, March 12.

One hundred and twenty-five books were ordered from the States during the past week.

CRISTOBAL.

An audience of 311 saw the moving picture show on Monday, March 11.

On Saturday night the Culebra indoor baseball team defeated the Cristobal team by the following score, Culebra—Cushing, 6 runs; Adams, 6 runs; Hepler, B., 3 runs; Tupper, 1 run; Hepler, H., 2 runs; Mengel, 3 runs. Cristobal—Schwalenberg, 2 runs; Russell, 1 run; Bielaski, 1 run; MacSparran, 1 run; France, 1 run; Cleary (5 innings), Couseneau, Levy (4 innings). Score, Culebra 21, Cristobal 6.

The subject for discussion at the session of the Literary and Debating Club to be held March 27, will be resolved that "The Announcement of the Candidacy of Mr. Roosevelt is a Mistake."

The Empire Minstrels have been booked for an appearance on Saturday evening, March 30. A good program is assured. Admission, members free, others 50 cents.

On Friday night, March 22 there willl be a smoker to which all the men of Cristobal are cordially invited.

The following is the standing to March 16 in the local bowling contest:

	Won.	Lost.	P. C.
Pirates	14	4	.777

Orleanian	U. F. C.	Thursday	April	11

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prin Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans via Limon, on Thursdays at 5 p. m.; ships for New York via Kingston on Tuesdays at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro on Mondays and Tuesdays at 5 p. m.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MARCH 27, 1912. No. 31.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Dredge Corozal Arrives.

The twin screw ladder dredge *Corozal* arrived at Balboa at 10 o'clock on Wednesday morning, March 27, and will at once prepare for its work of under water excavation in the Pacific entrance of the Canal. The *Corozal* left Falmouth, England on December 29, and was thus 88 days in making the voyage of approximately 12,000 miles by way of the Strait of Magellan.

Inundation of Pit Through Mindi Hills.

When the steamshovels had finished excavation for the Canal channel through the hills at Mindi, the removal of the dike which separated the pit from the waters of the sea was undertaken as outlined in THE CANAL RECORD of January 10, 1912. The top of the dike was only a few feet above the water but rose about 45 feet above the bottom of the pit which it protected from inundation. Blasting began at the inner base, and as the rock was blasted to successive levels the water was allowed to enter through pipes which had previously been placed. On the morning of March 15, when the difference between water levels on the sides of the dike was about 20 feet, a channel about 8 feet wide and 2 feet deep was cut into the dike near its west end. By noon of March 17 the pit was filled. A considerable portion of the barrier above water remains to be blasted, after which the dredges will proceed to remove the rock and earth, which amount to about 400,000 cubic yards.

In all of the Atlantic entrance section, between deep water in Limon Bay and Gatun Locks, there remain approximately 10,000,000 cubic yards to be excavated.

Duplication of Compressors for Gate Erection.

In order to supply the air-driven tools, such as reamers, rivetters and calkers, to be used by the additional crew with which the McClintic-Marshall Company is doubling its forces on the locks at both the Atlantic and Pacific sides of the Isthmus, the compressor plants at Gatun and at Pedro Miguel are being augmented by the installation of new machinery of duplicate capacity. Each of the plants has now two units, capable each of compressing 550 cubic feet per minute to a pressure of 105 pounds to the square inch. The new machinery, having the same capacity, consists of two units of double-stage Ingersoll-Rand Imperial compressors, belt-driven by a 100-horsepower induction motor, supplied direct from the 2,200-volt transmission lines of the Commission. The 4-inch main lines by which the air is carried to the sites of gate erection are designed so that air will be delivered at the tools under a pressure not less than 85 pounds to the square inch.

Steamshovel Work in Culebra Cut.

On March 21st, 22 steamshovels working in the Culebra Construction District of the Central Division, excavated 40,305 cubic yards or earth and rock, principally the latter, during the working day of eight hours, an average of 1,832 cubic yards per shovel during the period in question. The shovels were under steam for an aggregate period of 176 hours; they were actually digging 117 hours and 5 minutes; waiting for cars 50 hours and 15 minutes; held up by mining 1 hour and 25 minutes; cleaning track 20 minutes; cleaning dipper 30 minutes; repairing shovel 2 hours and 35 minutes; moving back 40 minutes; derailment 10 minutes; slides 2 hours and 10 minutes.

Close of Auxiliary Mixing Plant at Gatun.

The auxiliary mixing plant, situated east of the upper end of the Gatun Locks, has been closed down and the machinery will be dismantled and transferred to the Division of Fortifications. The construction of this plant began in October, 1909 and it began to operate during the last days in December. Since that time it has supplied 410,594 cubic yards of concrete or about 22.52 per cent of the total amount placed in the locks since concreting operations began. It did its last work on March 11, when 152 cubic yards of concrete were mixed by it.

The plant consists of two 2-cubic yard mixers, direct-connected to a 60-horsepower induction motor. The motor replaced the original steam engine, which was put out of service by the impact of a car of sand which jumped the track above, leading to the hoppers, and broke through the roof of the engine house. The highest daily record made by the plant was 1,552 cubic yards, on November 16, 1910, and the highest weekly record was 7,884 cubic yards, for the week ending October 29, 1910. The highest monthly record was 30,639 cubic yards, for the month of October, 1910.

With the exception of the concrete supplied by ½-yard portable mixers for tunnel construction and for use in setting machinery and towing and return tracks, the remainder of the concrete to be used in the construction of the Gatun Locks will be supplied by the construction plant, which at present operates from three to five of its eight 2-yard mixers. The concrete for the completion of the spillway dam will be supplied by the spillway mixing plant.

Sale of Supplies.

Proposals have been invited for the purchase from the Commission of supplies which are no longer needed. These consist of obsolete and obsolescent equipment which has been collected in the storehouses of the Depot Quartermaster and some new goods of which there is an amount on hand in excess of the obvious needs of the Commission. They are divided into twenty-five classes and comprise hand tools, light and heavy hardware, hotel and household supplies, miscellaneous equipment, track material, shop tools and equipment, clubhouse, sanitary, printer's and surveyor's supplies, electrical and marine equipment, stationery supplies, plumber's and gasfitter's materials, rolling stock, including 24 old French locomotives, machinery, including crushers, drills, pumps, vertical and horizontal stationary engines, 48 boilers, old French surveying instruments, five 45-ton steamshovels; four 68-ton steamshovels, and parts for them, and all American steel and iron shop scrap from the Commission's and the Panama Railroad Company's shops which may be delivered to contractor within a period of three years from date of contract, to be bid for in anticipation by the long ton of 2,240 pounds.

Bids will be received at the office of the General Purchasing Officer in Washington, D. C., not later than April 24, 1912.

Emptying Lagoon South of Miraflores Locks.

The dike across the Pacific entrance channel, a mile south of the hydraulic pressure plant and a slightly greater distance north of the dock at Balboa, has been completed and the water in the lagoon formed between it and a dike thrown across the flats, about 800 yards south of the lower end of Miraflores Locks, will be pumped out so that the monitors may continue the excavation in that section of the channel. All the work done in this portion heretofore had been subaqueous excavation by dredges, which have been withdrawn toward the Pacific to complete the channel between the dike and the deep sea.

To accomplish the removal of the water, one of the centrifugal pumps used in connection with the sluicing by the monitors has been installed in a sump just north of the dike nearest the lock site, The base of the pump is about 20 feet below mean sealevel and a 20-inch intake pipe has been laid at this level, through a trench, since filled in, to the bottom of the lagoon within the dike. The water will be forced through about 1,500 feet of

NOTES OF PROGRESS.

(*Continued.*)

pipe to the diverted channel of the Rio Grande, passing beneath the sand track several hundred yards south of its junction with the Pacific Division dirt train tracks. No relay station will be required, as the pump is capable of forcing 10,000 gallons of water a minute through 1,200 feet of pipe to a height of 60 feet, while the rise in this case will not be over 30 feet. The pump is driven by a 655-horsepower induction motor, direct-connected and protected by a waterproof case. The motor is ventilated by a fan driven by a 4-horsepower induction motor.

The sump is so placed that after the water has been removed from the lagoon the pump will be in position to remove the material sluiced from the adjacent area by monitors, and the discharge pipe empties at a point from which, by the connection of a hundred feet of additional pipe, it will carry silt beyond the bulkhead confining the swamp area east of the Rio Grande next to be filled. Several weeks will be required for emptying the lagoon, which is approximately a mile long, five hundred feet wide and of a maximum depth of 23 feet.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 85 per cent completed, 192,117 cubic yards, out of a total of 225,000, having been placed at the close of work on March 23. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
March 18	284	9.00	2
March 19	304	14.00	2
March 20	288	14.00	2
March 21	288	16.00	2
March 22	292	16.00	2
March 23	260	8.00	1
Total	1,716		
Previously reported	190,401		
Grand total	192,117		

Porto Bello Crusher.

DATE.	Hours worked.	Cubic Yards.
March 18	4.30	1,850
March 19	4.10	1,896
March 20	4.40	1,882
March 21	4.15	1,862
March 22	4.15	1,872
March 23	3.50	1,904
Total	26.40	11,266

Ancon Crusher.

DATE.	Hours worked.	Cubic Yards.
March 18	11.40	4,145
March 19	11.25	4,417
March 20	10.50	4,140
March 21	11.55	4,277
March 22	12.50	4,378
March 23	9.35	4,336
Total	68.15	25,693

Progress on Washington Hotel Building.

Since the recent arrival of a considerable supply of material, work on the new Washington Hotel at Colon is being pushed. The foundation has been completed and columns to support the superstructure in the front part of the building are being erected. The materials last received consist mostly of reinforcing steel, lumber for concrete forms, floretyle, and metal lath. Concrete is supplied by a ½-yard portable mixer. Grading the esplanade along the sea front continues and all but about a hundred feet of the twenty-foot concrete pavement along the seawall, from opposite Christ Church-by-the-Sea to the swimming pool, has been laid.

Dry Season Fires.

One of the prevalent dry season forest fires completely destroyed over 15 acres of cacao and rubber trees on the Empire plantation of the Cascadas Estates Company Limited and set fire to patches in 18 acres of adjacent area during the night of March 16-17. A body of Canal employes, went to the assistance of the manager of the plantation, and the thirty laborers with whom he was cutting trochas and backfiring. The total loss was estimated at between $4,500 and $5,000.

CONCRETE WORK IN THE LOCKS.

Over 82 per cent of the concrete for the locks is in place, the amount at the close of work on March 23 being 3,448,881 cubic yards, out of a total of approximately 4,199,400. A total of 27,608 cubic yards of concrete was laid in the locks during the week ending March 23.

GATUN LOCKS.

Over 92 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 23 being 1,849,689 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending March 23, and of the total, follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

*The 378 yards shown for the portable mixers are reinforced concrete and were placed on the following days: March 18, 26; March 19, 117; March 20, 49.5; March 21, 61.5; March 22, 49; March 23, 75.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 98 per cent completed, 824,072 cubic yards, out of a total of 837,400, bucket measurement, having been placed at the close of work on March 16. The record for each of the six 8-hour working days of last week, follows:

DATE	AUXILIARY PLANT.						Large stone.	Total.

LARGEST LABOR TRAIN

Pacific Division Train Carries 2,000 Workers.

The labor train for the Pacific Division which leaves Panama at 5.45 in the morning and, returning, leaves Pedro Miguel at 5.15 p. m., is the largest labor train ever operated for the Canal work. It contains 15 cars and carries an average number of passengers estimated at about 2,000. Two cars, and half of another, are for "gold" employes, four and a half are for European laborers and eight are for negroes. Each of the cars for the "gold" employes carries about 60 to 70 men. These cars are seldom crowded but those for the "silver" employes are packed tightly. On one occasion the conductor, gathering data for estimates of carrying capacity, made a careful count of the number of negroes in a car and found it to be 164. The evening train is not so crowded as the one in the morning. Upon the arrival of the evening train at Panama, seven cars are detached and sent back to Pedro Miguel, bringing in the rest of the men to Panama about 7 p. m.; but in the morning there is only one train out. The seven cars of the late evening labor train are returned to the outer end as part of the one morning labor train and all of the men who occupied 22 cars in the evening go out in 15 cars in the morning.

The cars of this train are of two types. One is a flat car, covered with a corrugated metal roof supported on stanchions at about seven feet above the floor and provided with protecting timbers extending along sides and ends between the uprights. The other is a box car, with apertures for passage and windows cut in the sides and ends. Benches extend along the two sides and in the center of the car is a long double bench, or two benches, back to back, facing outward. By this arrangement the seating capacity of the car is doubled, as it has been found in regular passenger traffic that lengthwise benches afford greater seating room than cross-seats. The first class coaches of the Panama railroad, which are 61 feet in length, using cross-seats, seat 72 persons; the second class coaches, 45 feet long but using lengthwise seats, have a seating capacity of 87. With standing room utilized, a first class coach can carry without danger about 104 persons, a second class coach about 140. The cars of this labor train approximate 34 feet in length, outside measurement. They are among the largest labor cars in use on the Isthmus, though smaller kinds of old passenger and box cars are often assigned to labor use.

It is asserted by some of the railroad men on the Isthmus that this labor train is not only the largest labor train but that it carries more passengers than any other regularly operated train in the world. While such statements are generalities, no one on the Isthmus has been known convincingly to contradict them. It is no unusual thing for Sunday trains on the Panama railroad, with from 12 to 14 passenger cars, to carry between 1,000 and 1,400 passengers; and these are regarded as very large trains.

The labor train is drawn by a single locomotive of the Mogul type, weighing about 62 tons. Each of the six drivers is 54 inches in diameter; and the wheels of the pony truck, which carries 15,000 pounds, are 30 inches in diameter. The diameter of the cylinders is 19 inches and the piston stroke is 24 inches. Under its maximum steam pressure of 180 pounds to the square inch, the locomotive is capable of exerting a tractive power of 23,960 pounds at 10 miles an hour on a straight track. There are no severe grades on the run, the maximum being not greater than 1 per cent. The train makes the run of about 6½ miles, with 11 stops, in approximately 30 minutes.

Railway Mail Clerk Examination.

Examination will be held at Culebra probably the first Sunday in May for appointment to the position of railway mail clerk in the United States. Applicants should request from this office a copy of Form 1407, which contains all the information published in regard to this examination. Applications will not be received after the close of business on April 12; this date may be changed in the discretion of this office.

In this examination rigid requirements obtain in regard to age, height, and weight, and applicants should have the medical certificate executed by the district physician at Culebra or at Ancon or Colon hospitals, at which places are adequate facilities for proper physical examination.

This examination is given in two grades or degrees of difficulty of the subjects thereof, dependent upon the residence of the applicants as shown in answer to question 4 of the application. Such residence must therefore be shown in a State or Territory of the United States, and county thereof, up to the time of filing application. The date of examination should be *omitted* in the application form.

JOHN K. BAXTER,
Secretary, Isthmian Civil Service Board.
Culebra, C. Z., March 22, 1912.

Water Tank South of Miraflores Locks.

The water tank which was erected south of Miraflores Locks and burst on March 6, shortly after being filled, has been reerected. The bursting was due to the expansion of the timbers of the shell when wetted by the filling of the tank, and in the new construction fourteen ½-inch steel rods, spaced from four to twenty inches, in accord with the distance from the bottom, have been substituted for the former belts around the tank, which were about 3 inches wide and 1-5 of an inch in thickness. The tank, which has a capacity of 10,000 gallons, is supported with its bottom about 15 feet above the ground on 12 vertical foot-square timbers, resting on pyramidal concrete bases arranged in double rows of four, crossing at right angles and forming the outlines of a Greek cross.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the two weeks ending March 23:

Minnesota, March 11, from Bridgeton, Del, with 7,000 cases dynamite, for stock.

Allianca, March 12, from New York, with 12 cases stove polish, 64 cases sales books, 10 barrels compound 10 bales oakum, 52 pigs lead, 30 bundles sheet iron, 2,075 kegs nails, 18 reels wire rope, 66 pieces switches and frogs, 500 pieces steel bars, 100 cases soap, 10 cases food choppers, 11 cases mop handles, 60 cases lye, 15 cases packing, 16 cases crockery, for stock; and a miscellaneous cargo, the whole consisting of 2,117 packages weighing 215 tons.

Zacapa, March 14, from New York, with 40 cases hose, 18 bales life preservers, 500 cases linseed oil, for stock.

Atenas, March 14, from New Orleans, with 250 kegs red lead, 10 cases vermillion, 100 pieces piling, 2,785 pieces lumber, for stock; 1,344 pieces lumber, for Mechanical Division; 52 bundles spillway castings, 48 pieces spillway castings, for Pacific Division; 315 bags dairy feed, for stock.

Ancon, March 15, from New York, with 160,996 bags cement for Atlantic and Pacific Divisions; 218 pieces lock castings, 16 barrels lock castings, 6 bundles lock castings, for Atlantic Division; 436 pieces lock castings, 32 barrels lock castings, 12 bundles lock castings, for Pacific Division.

Student, March 16, from Liverpool, with 2 pieces chains, for Pacific Division.

Sixaola, March 16, from New York, with 500 bundles shovels, 41 kegs washers, 17 cases brass tubing, 63 crates wheelbarrows, 80 cases paint, 7 cases stationery, for stock; 400 pieces brake beams, for Mechanical Division; 76 cases copper bars, 50 crates anchor belts, 29 cases rods, for Pacific Division.

Prin Eitel Friederich, March 18, from New York, with 75 coils manila rope, 5 reels wire rope, for stock.

Mackinaw, March 19, from San Francisco, with 2,725 bales hay, 8 drums carbon bisulphide, for stock.

J. L. Luchenbach, March 18, from New York, with 114 cases blasting caps, for stock; 105,958 bags cement, for Atlantic and Pacific Divisions.

Colon, March 19, from New York, with 15 pieces valves, 14 cases electrical material, 8 cases hardware, for Atlantic Division; 53 cases brake shoes, 7 cases electrical material, 100 barrels sand, for Mechanical Division; 23 barrels starch, 12 cases drugs and sundries, for Sanitary Department; 32 cases bolts, 12 kegs washers, for Panama Railroad Company; 10 cases steel, 34 bundles sash cord, 25 crates chairs, 120 bundles steel bars, 10 cases lubricating oil, 50 coils manila rope, 229 packages wheelbarrows, 31 barrels rosin, 25 cases paint, 10 cases cardboard, 10 cases envelopes, 43 bundles bar iron, 24 packages hand cars, 24 cases wrapping paper, 25 bundles pipe, for stock; and a miscellaneous cargo, the whole consisting of 1,176 packages, weighing 160 tons.

Buckminster, March 20, from Baltimore with 45,836 pieces duct tile, 129 bundles rack castins, 68 cases valve machine parts, 9 pieces valve machine parts, 38 bundles valve machine parts, for Atlantic Division; 76 cases valve machine parts, 23 bundles valve machine parts, 17 pieces valve machine parts, 156 bundles rack castings, 153,982 pieces duct tile, for Pacific Division.

Tanhow, March 20, from New Orleans, with 150 barrels fire brick, for Panama Railroad Company; 400 kegs white lead, 2,932 pieces lumber, for stock; 859 pieces lumber, for Mechanical Division.

Parismina, March 21, from New Orleans, with 17 packages derricks and engines, for Fortifications; 26 bundles castings, 24 pieces castings, for Pacific Division; 1,307 pieces lumber, for Mechanical Division; 64 pieces piling, 2,891 pieces lumber, 60 pieces switch stands, 75 sacks sucrene feed, 10 cases paint, 22 crates plumbing supplies, 10 barrels wire clamps, for stock.

Almirante, March 21, from New York, with 21 cases files, 17 crates buckets, 60 cases varnish, 25 cases water coolers, for stock.

CLASSIFIED EXPENDITURES.

A statement of classified expenditures of the Isthmian Canal Commission to January 31, 1912, follows:

PERIODS.	Department of Civil Administration	Department of Law	Department of Sanitation.	Department of Construction and Engineering	General Items.	Fortifications.	Total
To June 30, 1909	3,427,090.29	....	9,673,539.28	69,622,561.42	78,022,606.10	....	160,745,797.09

NEW STEEL PLANT.

Converter Installed at Gorgona Foundry to Make Steel Castings.

A new steel casting plant has recently been added to the Mechanical Division equipment at the Gorgona Shops. The purpose of this installation, primarily, was for the manufacture of steel castings as they are required on the construction work, so as to prevent any accumulation of cast steel repair parts carried in stock by the Quartermaster's Department, as well as to avoid the usual delays on United States contracts.

An investigation of the amount of steel castings ordered, and other parts now being made of cast iron, wich, if made of steel, would be more economical, shows that with the skilled force employed the Commission can manufacture steel castings at no greater cost than is charged in the United States.

This new equipment consists mainly of a Tropenas steel converter, having a nominal capacity of two tons, complete with an electric tilting mechanism, a high pressure blower provided with a 75 horsepower motor, a double roller sand crusher and mixer, a 4-ton crane ladle, two 2-ton crane ladles, eight 150-pound hand ladles, and two fuel oil ladle-heaters together with necessary fire brick, and gannister, for the lining of the converter.

One of the two cupolas already installed is used for the melting of the charge before it is transferred to the converter; the other cupola, which is of 10-ton capacity, is still used for making iron castings. The new 25-ton overhead Niles crane, electrically driven, is used for handling all large molds and ladles in the new steel foundry, a recent extension to the old foundry building.

While the converter is of a nominally 2-ton capacity, three tons can be converted if necessary; four heats can be made, which will permit the pouring of a 12-ton casting. Three blows are made and set aside, while the fourth one is in progress; all four heats can then be poured into the same casting.

The converter is supported on trunnions, one of which is hollow and forms a duct for the air, connecting the wind box at the back of the converter. This enables the air to be kept on continuously while the position of the converter is being changed. The other trunnion is extended and carries a worm wheel, which through suitable gearing, is connected to a 4-horsepower motor; a hand wheel is also provided for making small movements of the vessel as required from time to time, and in cases of emergency when the motor is out of commission.

The blower is of the positive pressure type, and is capable of maintaining a constant pressure of from 3 to 5 pounds during the process of blowing the steel. An operating station is provided near by where the operator stands to watch the progress of the blow and to tilt the converter according to the different requirements of charging and pouring; the air pressure, which is regulated by means of a by-pass valve, can be read on a mercury gauge, which is attached to the blast main between the blower and the by-pass.

During the time the cupola has been charged and the iron melted, the converter has been heated to a high heat by means of an oil burner apparatus arranged through the tuyeres.

As soon as the iron is tapped out from the cupola, the oil burner is removed, the tuyeres cleaned out, and the converter tilted to receive the transfer of the metal. The converter is then tilted back until the top of the metal is level with the bottom of the tuyeres, and the vessel approximately in a vertical position. The plate is then clamped on the wind box, the blower started and the by-pass valve closed.

At the beginning, sparks and smoke come out of the mouth of the converter and go up the chimney with a large adjustable hood to allow the crane to handle the ladle from the cupola to the converter. In from 2½ to 5 minutes, the sparks change and a flame appears at the mouth of the converter; when this flame is well established the converter is advanced one turn of the hand wheel to again bring the metal to the bottom of the tuyeres after the slag has been blown off. During the next few minutes the flame increases in brightness and volume until what is known as the "boil" occurs. The flame changes in color until it becomes particularly bright and clear and dies down for the last time with an evolution of copious brown smoke. The operator then throws over his controller, turning down the vessel into a horizontal position, which now contains a bath of practically pure iron. The necessary elements for the desired quality of steel are then added and a new metal is ready for the molds. For large castings it is sometimes necessary to allow the metal to cool before pouring, while for small castings, the metal is immediately poured from the large ladle into smaller hand ladles and transferred directly to the moulds.

Samples of steel are then taken for analysis by the Testing Engineer. The various methods for the analysis of the steel, as well as the description of special apparatus to facilitate the performance of the analytical work are so widely distributed through transactions of societies, journals and reviews that no further comment is necessary.

M. J. J. Worn, Metallurgical Engineer, of the Tropenas Company, has been sent by that company to the Isthmus for three months to instruct the foundry foreman and see that satisfactory results are obtained in the manufacture of steel castings. Steel was first made on January 31, 1912, and the present demand for steel castings indicates that the output will be about twenty tons per month.

Excavation in Gatun Anchorage Basin.

Excavation of the fill across the anchorage basin at Gatun, on which the Panama railroad crossed the bottomland of the Gatun River before the relocated line was put in use, was begun on March 27, when the Central Division set one steamshovel at work. The fill will be dug down to elevation 35 feet above sea-level between the hill at Gatun and the Gatun River, and the material will be cast over into the lake. This will give 40 feet of water over the old fill, when the lake is at normal elevation.

Postal Business and Revenues.

The total value of money orders issued in Canal Zone postoffices during the month of February was $418,419.66 of which $346,660.28 was payable in the United States, which includes European orders, $70.527.50 in the Canal Zone, $1,037.10 in Martinique, and $183 in Costa Rica. The number of orders issued was 20,455, the average value being therefore about $20 each. The postage sales amounted to $7,826.21 gross and $4,695.73 net.

Internal revenue receipts amounted to $6,914.92 of which $46 were in bicycle and chauffeur licenses, $108.41 in insurance; $49 in motor cycle vehicle licenses, $506.90 steamboat inspection; $7.20 distillation taxes; and $6,197.41 in taxes, licenses, etc., under the deputy collectors of revenues.

Out-Patient Eye, Ear, Nose, and Throat Clinic.

Hours for the examination and treatment of cases not patients in Ancon and Colon hospitals, effective March 22, 1912:

All Week Days—2 p. m. to 4.30 p. m. Morning hours are reserved for hospital work and there will be no morning out-patient office hours except by appointment and for emergency cases.

Sundays and Holidays—9 a. m. to 10.30 a. m. These hours are for emergency cases and cases by appointment. Examination for glasses is not an emergency.

Misdirected Letters.

ANCON, C. Z., March 27, 1912.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts and may be secured upon request of the addressees:

Barrett, Harry S
Blessley, Samuel E
Brower, Joseph
Brown, Mrs. J. S.
Butcher, A. M. (2)
Calcote, T. L.
Carkett, S. C.
Carter, Chas.
Comstock, Miss Mabel
Conway, E.
Cooper, Mrs. Fred
Cottrell, B.
Cox, Wm.
Crawford, John D.
Croll, Harry
Feoley, W. H.
Fisk, Clinton
Folsom, Richard
Gannon, H. E.
Gause, Mrs. N. T.
Gayer, W. C.
Guinther, John H.
Hilder, James
Jarvis, Mrs. Grace
Keffer, Glen
Kernan, Mr. & Mrs. J. C.
Mitchel, Guy
Nohle, Mrs. F. C.
Pederesn, Anart H.
Phillips, Dr. B. A.
Plummer, E.
Prior, Benjamin F.
Reeves, John
Sargeant, John
Shaner, Mrs. G. E.
Smith, L. D.
Smith, Forrest L.
Swinehart, Miss Helen
Tate, Master Earl G.
Thirlwall, W. S.
Tilton, Ernest
Weir, J. E.
Westcott, F. M.

LETTERS UNCALLED FOR MARCH 20.

Barnett, James C.
Brooks, John

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending April 3, 1912. (75th meridian time):

DATE.	High	Low	High	Low
March 28	......	A.M. 5.08	A.M. 11.24	P.M. 5.52
March 29	Mid. 12.00	6.26	P.M. 12.45	7.05
March 30	A.M. 1.16	7.32	1.50	8.06
March 31	2.17	8.29	2.43	8.59
April 1	3.09	9.18	3.30	9.44
April 2	3.54	10.04	4.12	10.28
April 3	4.36	10.47	4.52	11.10

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Corozal, C. Z., Sunday, March 31, 1912, at 5.00 p. m. The program follows:

1. March—*Boys of the Militia*............Boehlein
2. Selection—*The Prince of Pilsen* (by request)..............Luders
3. Waltz—*The Druid's Prayer*.............Davson
4. Overture—*Guy Mannering*...............Bishop
5. A Melody—*Wild Rosebud*...............Tobani
6. (a)—*Indian Medicine Dance*..........Bellstedt
   (b)—*Chicken Reel*.........................Daly
7. Descriptive—*A Hunt in the Black Forest*...Voelker
   Synopsis—Break of day. The singing of birds. Huntsmen's call to arise and prepare for chase. Chimes in the distance. Call to assemble. They mount and start. Call to dismount as they arrive at the forest blacksmith shop. The smith at work. Call to assemble. They assemble, then drink and sing the drinking song. They remount and start again. The hounds scent the game, the chase starts in full cry, finally overhauling the game.
8. Medley Selection—Haviland's Hits.........Halle
9. March—*The Midshipman*...........Laurendeau

CHAS. L. JENNINGS, *Musical Director.*

The next concert will be given at Paraiso, April 7, at 2.00 p. m.

CANAL MEDAL LIST.

Below are published the names of American employees of the Isthmian Canal Commission, who have completed two years of continuous service on the Isthmus during the twelve months ending December 31, 1911 and are in consequence entitled to receive a Canal Medal. The date shown opposite each name is that from which medal service is completed.

The list is now published in order that it may be carefully checked by those interested.. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Office of the Chairman, at Culebra, for correction.

The Medal list covering employees of the Panama Railroad will appear in a later issue, as well as the bar lists for both I. C. C. and P. R. R. employees.

The Heads of divisions are requested carefully to check their lists of American employees on the silver roll, and to report any omissions on the medal or bar lists to the above office.

SOCIAL LIFE OF THE ZONE.

Church Notes

The quarterly meeting of the Isthmian Sunday School Association will be held in the Commission chapel at Gorgona on Sunday, April 7. Delegates from the several federated Sunday Schools will be present and questions concerning the work on the Isthmus and elsewhere will be discussed. The Isthmian Ministers Association will meet at Cristobal in the Cristobal church as the guest of the pastor, the Rev. Carl H. Elliott on Monday, April 1.

The Rev. W. H. Decker of the Protestant Episcopal Church returned from his annual visit to the Darien mining camp on Sunday, March 10. During his visit he held daily services, including celebrations of the Holy Communion, baptised 20 and married three couples. During the year services are maintained by a regularly appointed catechist.

The Woman's Foreign Missionary Society of the Methodist Episcopal Church, Panama, is in charge of the ceremony of unveiling the memorial windows recently placed in the church parlor, which will be held on April 4, at 3.30 p. m. A program of music and readings with devotional exercises is being arranged. The Ladies' Aid Society and the members of the Spanish section of the missionary society will be among the invited guests. Following the close of the study of the text book on comparative religions, the president of the society will conduct a series of programs dealing with missionary work in South America.

The Ladies' Auxiliary of the Empire Christian League held its regular meeting in the chapel on March 15. The work of the auxiliary thus far this year has been directed toward the decorating of the chapel and the payment of a scholarship in the Methodist College in Panama. The missionary meeting of the organization will be held at the home of Mrs. Philip Kelly on Friday, April 12.

The woman's Altar Guild of Christ Church by-the-sea, Colon, is holding weekly meetings at the homes of members during Lent. The members are rehearsing a play to be given for the benefit of the guild at Colon Hospital on Wednesday night, April 10. Tickets will cost 50 cents and home-made refreshments will be sold.

The last lenten meeting of the woman's Altar Guild of St. Luke's Hospital chapel, Ancon, will be held at the residence of Mrs. S. T. Darling, Ancon Hospital grounds at 3:30 p. m.

Women's Organizations.

The Gatun Woman's Club will hold a charity ball at the clubhouse on Saturday evening, April 13 the receipts to be given to the Federation $300-fund. The details of the entertainment are in the hands of a committee composed of Mrs. V. V. Sessions, chairman, and Mrs. C. H. Stoddard and Mrs. E. L. Waid, members. During the intermission homemade refreshments will be sold.

The Cristobal Woman's Club held a bridge party for the Federation fund in the government building on Cristobal point on Friday afternoon, March 15. The receipts were $40.

Sunday, March 24, was observed as Mission Sunday in the Union Church, Gatun. Special music was sung. The offering was presented to the woman's club for the Federation fund.

The Empire Woman's Club held the fourth in the series of home meetings on Thursday, March 21, at the residence of Mrs. T. J. Hanrahan, Las Cascadas. Since the establishment of the custom of holding meetings at the home of members the attendance has been good and interest in the club has been well sustained.

The Ladies Auxiliary of the Grand International Society of Locomotive Engineers celebrated its third anniversary on Friday afternoon, March 22, the occasion being also a farewell to Mrs. Arthur McGowan, past president, who is leaving the Isthmus for her home in the States. The auxiliary will hold a ball at the lodge hall Paraiso on April 13, for the benefit of the Highland Park Home near Chicago.

High School.

The Canal Zone High School has issued the fourth number of *The Zonian*. The school paper is in its usual form and has sixteen pages. The cover design, by John Loulan, class '15, is a combination of the coat of arms of the Republic of Panama and the shield of the Canal Zone. A new feature is "The San Blas Indian at Home" and the other "How Panama Got its Name."

The High School has an enrollment of 75, an increase of 14 over the enrollment in 1911; fifty-six students are in the Gatun section and fourteen constitute the freshman and sophomore classes at Ancon. The students will hold their annual reception at the Gatun school in April.

Two basket ball teams have been organized in the Ancon section. The field has ben laid out behind the baseball park and the teams are having daily practice.

Colon Humane Society.

The Colon Humane Society held its monthly meeting on Wednesday evening, March 20 in the municipal building, Colon, where a room has been recently assigned to the society for use as office and meeting place. The society's agent reported eleven cases of cruelty to animals for prosecution and relief. An ordinance is to be present to the municipal counsel imposing a tax of $500 on the promotors of bull fights for killing a bull in the ring. A committee of three members was appointed to draft a resolution regulating the hours for coach horses.

Benefit Ball.

A benefit ball will be held in Kangaroo Hall, Empire on the night of April 6 by the International Association of Machinists, No. 684.

Obituary.

Karl Kornfeld, an American employed in the Atlantic Division and residing at Cristobal, died at Colon hospital on March 19 from organic disease of the heart. He was born in Austria, was 42 years of age, and had been on the Isthmus two years. His wife, residing at 98 Hopkins street, Brooklyn, survives him.

Married.

WRIGHT-YARBROUGH—In Ancon on March 9, by the Rev. Henry A. Brown, Grace, daughter of William Leonard Yarbrough, to Daniel Edward Wright. Canal Zone residence, Empire.

PALM-CROSECUP—In Culebra on March 4 by the Rev. Henry A. Brown, Olive, daughter of Mr. and Mrs. Stephen Crosecup, to Frederick Wilhelm Palm. Canal Zone residence, Culebra.

BRONK-McDERMOTT—At Charlestown, Mass., on March 2, 1912, Eugenia McDermott of Charlestown to A. Earl Bronk of Schenectady, N. Y., the Rev. Philo W. Sprague officiating.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

ATHLETIC MEET.

An indoor athletic meet was held at Camp Elliott on Saturday evening, March 16, following a game of indoor baseball between the Gatun and Empire teams, won by the latter. Thirty-eight entries were made; 9 from Empire, 8 from Gorgona, 12 from Camp Elliott, 8 from Gatun, and 1 from Culebra. Events and winners were: *Twenty-yard dash*—1st, Collier of Gorgona, 2nd, Robinson of Gorgona; 3rd, Alley of Empire. *Twelve-pound Shot Put*—1st, MacDonald of Empire; 2nd, Anderson of Camp Elliott; 3rd, Gebhardt of Camp Elliott. *Running High Jump*—1st, Koperski of Empire; 2nd, Knapp of Camp Elliott; 3rd, Collier of Gorgona. *Running Broad Jump*—1st, Robinson of Gorgona; 2nd, Koperski of Empire; 3rd, Robertson of Gorgona. *Single Game of Ten Pins*—1st, Herrington of Culebra; 2nd, Dickson of Gatun; 3rd, Walters of Camp Elliott. *Eight Men Relay Race*—1st, Empire, 2nd, Gatun; 3rd, Gorgona.

GENERAL.

The schedule for moving picture entertainments for the week of April 1 to 6, is as follows: Monday, Cristobal; Tuesday, Gorgona; Wednesday, Corozal; Thursday, Gatun; Friday, Empire; Saturday, Culebra.

Capt. J. W. Crawford, the poet scout, has begun a series of entertainments in the Commission clubhouses. The following schedule is at present being followed, but is subject to change: Corozal, March 27, Culebra, 28th; Gorgona, 29th; Gatun, April 1; Empire, 3rd; Cristobal, 4th; Gorgona, 5th; Porto Bello, 6th; Ancon, 8th; Culebra, 9th; Corozal, 10th; Gatun, 11th; Empire, 12th. Details as to Captain Crawford's plans may be obtained from the office of the Superintendent of Clubhouses.

The standing of the Indoor Baseball League to March 23, follows:

	Won.	Lost.	P. C.
Gorgona	3	0	1.000
Culebra	3	1	.750
Corozal	2	1	.666
Empire	2	2	.500
Cristobal	1	3	.250
Gatun	0	4	.000

COROZAL.

The Debating Society held an open political convention at the Clubhouse last Friday night. Some of the nominating speeches brought forth considerable applause from the audience. The nominees were as follows: Roosevelt by Mr. Pinto; Taft by Mr. Sessums; LaFollette by Mr. Metzer; Harmon by Mr. LeMire: Debbs by Mr. Brown and DeLeon by Mr. Bennick. After the nomination speeches a vote was taken and LaFollette was the favorite candidate. Refreshments were served at the close of the program.

The handicap pool tournament scheduled to close on Saturday night resulted in a tie between Logan, Lofgren and Tribolet. A series of games will be arranged to decide the winner of the tournment.

The Empire Minstrel Troupe will appear at the Corozal Clubhouse on Saturday night, April 13.

CULEBRA.

The following are the scores of the men in the chess tournament:

Name.	Won.	Lost	Draw.
Bartlett	6	5	
Dubois	8	6	1
Goodnew	7	6	
Erickson	4	10	
Janney	7	6	1
Newman	2	11	1
Sterns	9	2	1
Warner	7	11	

The game of indoor baseball, played at Culebra between Culebra and Gatun, was won by Culebra; score 20 to 6. The following was the lineup: *Culebra*—Cushing, Hepler, Adams, Dougherty, Tupper, VanZandt, Hepler, Baumer. *Gatun*—Dalton, Kerrish, Dennis, Cole, Whiston, Atkins, Thompson, Gibson.

The Isthmian duckpin tournament will open on April 13.

EMPIRE

The following high scores were bowled on the alleys during the past week: *Duckpins*—Pinney, 106, 101; Giavolli, 108; Gorham, 116; Danielson, 101. *Candle Pins*—Nelson, 105; Goolsby, 105; Davis, 100. *Ten-Pins*—Snyder, 214.

The Empire Christian League bowled the Culebra League on Saturday, March 23, Empire winning two of three games. The scores were as follows:

Empire.				Culebra.			
Totals...	786	704	728	Totals....	718	716	725

A return game will be played at Culebra.

GORGONA.

Gorgona defeated Empire Saturday night, March 23 in a game of indoor baseball, the score being 22 to 4. Following is the lineup: *Empire*—Greening, King, Miller, Adams, Giavolli, Alley. *Gorgona*—Ridge, Louden, Hilty, Christenson, Emerson, Keuntz, Hennen, Carpenter.

Captain Jack Crawford will appear Friday night, March 29, at 7.30 p. m. Members will be admitted free while the general admission will be 50 cents.

Mr. Wm. Freeland of Empire led the "Sunset Sing" on Sunday night. On next Sunday, beginning at 7 p. m., the stereopticon will be used and illustrated hymns will be sung. Admission is free and all are invited to come and sing.

Mr. Jess T. Hopkins left for the States on Tuesday, March 26, accompanied by his wife and child. He has resigned his position as physical director of the Gorgona clubhouse and will take a similar position in Montevideo South America, with the International Committee of the Y. M. C. A.

GATUN

Instead of seven teams, as previously announced, there are now eight teams in the Gatun Y. M. C. A. local duckpin league. The new team is called the "All Malts" and is composed of Durand, Capt., Chris Severn, Gibson, Case, and H. Myers. The scores of games during the week ending March 23 were as follows: Beavers, 2, Stars 1; Tigers 2, Sure Shots 1; Algonquins 3, Ruf Nex 0; Stars 2, All Malts 1.

The Gatun Y. M. C. A. Choral Club gave a concert at the clubhouse on Friday evening, March 22. There was an audience of 320 people. The hall was decorated with palms, pennants and bunting. Mr. A. B. Dickson, director and accompanist, was assisted by the Tenth Infantry orchestra. The program was as follows:

Part 1.

Aderation (from Holy City), Orchestra; Piano Solo, Mr. Bronson; Soprano Solo, Mrs. Hughes; Tenor Solo, Mr. Ross; Violin Solo, Mrs. Decker (accompanied by Mrs. Dickson); Bass Solo, Mr. Case; Contralto Solo, Madame Faure.

Part 2.

Orotario, "Holy City", A. R. Gaul, by the Choral Club and Orchestra.

The members of the chorus are: *Sopranos*—Mrs. C. R. Hughes, Mrs. C. H. Harris, Mrs. W. T. MacFarlane, Mrs. E. G. Bath, Miss Eva Harris, Miss Mary Clark, Miss Margaret Stephenson, Miss Ruth Clark; *Altos*—Mrs. W. N. Windes, Mrs. Nat Johnson, Mrs. F. W. Cooper, Miss Cora Sessions, Miss Ruth Hanna, Miss Opal Adams; *Tenors*—A. C. Arthur, A. J. Coleman, J. A. Langston, Lyons Mussina, P. R. Shailer, V. V. Veenschoten; *Bassos*—Chas. Ourand, C. C. Carr, Wm. Duey, Henry Rohr, Lee Mitchell, F. M. Noble, F. G. Smith.

The Choral Club will give its next concert at Gorgona on Sunday evening, March 31, and will appear at Cristobal on Saturday evening, April 6.

Corozal will play indoor baseball at Gatun on Saturday, March 30. The public is invited to see the game.

The Hill Magical Company will give an entertainment at Gatun on Monday, April 8.

CRISTOBAL.

The second term of the Spanish class will begin on Monday evening, April 1, under the leaderchip of Senor J. Gomez of Gatun. The term consists of ten weeks and the cost of lessons is two dollars and fifty cents per term. The sessions are to begin at seven o'clock, instead of at eight o'clock, as in previous term A beginners' class will also be started, provided a sufficient enrollment can be secured. The beginners' class will begin at eight o'clock on Monday evenings

On Friday evening a smoker was given to the men of Cristobal, with an attendance of nearly three hundred. The program consisted of musical numbers by the I. C. C. Band; the Musical Trio of Culebra, Messrs. Ramsey, Arbuckle and Howard; a clown stunt by Mr. and Mrs. Oliver, from New York connected with the Hill Magical Company; heavy balancing act by F. W. Tudor of Culebra; and slack wire performance, with other acts by R. E. Chatfield of Gatun. Apples, cigars, peanuts and punch were served during the evening.

On Saturday evening Corozal indoor baseball team defeated the Cristobal team on the local floor by a score of 22 to 16.

On Saturday, March 30, the Empire minstrels will give an entertainment. Admission, members free others fifty cents.

On last saturday night the Cristobal bowlers defeated Empire in two games out of three on the local alleys, with the follwoing scores:

Cristobal.	Empire.
469 431 445	430 432 444

The following high scores were made on the local alleys during the week ending March 23: *Duck* pins—A. Farrell, 101; Orr, 104;, 105; Gilmore, 104; Whittles, 111, 100; Smith, 104, 104; Weston, 102, 102, 101; E. Cotton, 102; Herrington, 101; Barrett, 106; Bullard, 100, 101; Hess, 108; M. Cotton, 100, 103, 101; Herring 103, 100, 118, 110; Marquez, 102; Clausell, 109; Beck, 107; Jacques, 102; D. Carty, 101; Gibson, 107.—*Tenpins*—Buser, 205.

OFFICIAL CIRCULARS.

Invoice of Transferred Material.

CULEBRA, C. Z., March 16, 1912.

TO ALL CONCERNED:

Referring to circular issued by this office, dated May 19, 1911, advising that transfer of second hand rails, ties and fastenings between divisions of the Panama railroad, to be used as track material, be invoiced at 50 per cent of the original cost;

Please be advised that this circular applies to all transfers of material of this class.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Secrecy Regarding Fortifications.

CULEBRA, C. Z., March 19, 1912.

CIRCULAR No. 435:

With a view of preventing, as far as practicable, visitors from obtaining information relative to the military defenses under construction on the Canal Zone, which might be communicated to a foreign power, the following regulations governing visitors to such defense reservations are hereby published, in accordance with Paragraph 358, Army Regulations:

1. Persons who are not employed in connection with fortification work will not be permitted to visit military defense reservations on which active construction operations have begun, except as provided in Paragraphs 2 and 3 hereof.
2. Officers of the U. S. Army, Navy, and Marine Corps, who can conclusively prove their indentity as such, will be permitted to visit such reservations.
3. Other American citizens will be permitted to visit such reservations only when provided with passes, which will, under exceptional circumstances, be issued by the Chairman and Chief Engineer of the Isthmian Canal Commission, or by the Assistant Engineer in charge of the construction of fortifications.
4. Superintendents, Assistant Engineers, Supervisors, Foremen, and all other employes in charge of the several units and batteries under construction, are hereby directed to prevent the visits of all unauthorized persons and to treat such persons as trespassers.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Surcharge on Material and Labor for Churches, etc.

CULEBRA, C. Z., March 19, 1912.

CIRCULAR No. 169-L:

Effective this date, the same surcharge will apply on material and labor furnished churches, lodges, or charitable institutions, as on material and labor furnished the Government of the Canal Zone.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Removal of Persons in Classified Service.

CULEBRA, C. Z., March 19, 1912.

CIRCULAR No. 432-A:

The President's Executive Order of December 9, 1911, which was quoted in part in Circular No. 432, was amended February 8, 1912. The sections quoted now read as follows:

> 2. A person in the competitive service whose removal is proposed shall be furnished with a statement of reasons and be allowed a reasonable time for personally answering such reasons in writing; but no examination of witnesses nor any trial or hearing shall be required except in the discretion of the officer making the removal. Copy of such reasons, and answer, and of the order of removal, shall be made a part of the records of the proper department or office, and the Commission [U. S. Civil Service Commission] shall upon its request be furnished with a copy of the record in the case. The above procedure shall be followed in like manner in any reduction in grade or compensation for delinquency or misconduct, but the procedure may be limited to the filing of a statement of reasons with the order for reduction if the reduction is for administrative reasons only.
>
> 3. Pending action under Section 2 of this rule, or for disciplinary reasons, a person may be suspended or temporarily removed for a period not to exceed ninety days, but the reasons for such suspension or removal shall be furnished the employe and filed in the records of the proper department or office.

H. F. HODGES,
Acting Chairman.

Notice to Persons Not Enumerated in the Census.

CULEBRA, C. Z., March 26, 1912.

CIRCULAR No. 429-A:

All employes of the Isthmian Canal Commission and the Panama Railroad Company who were in the service on February 1, 1912, and who have not been enumerated in the census of the Canal Zone, which is being taken as of that date, are directed to so advise their immediate superiors before April 1, 1912, giving their names, metal check numbers, place of residence and where employed.

Employes having knowledge that any members of their families (residing in the Canal Zone) were not included in the census are directed to notify their superiors, stating the house number and location.

A list of the names of persons, with the information above requested, shall be forwarded by heads of departments to the Head of the Department of Civil Administration.

H. F. HODGES.
Acting Chairman, Isthmian Canal Commission.
Second Vice President, Panama Railroad Company.

Acting Chief Quarantine Officer, and Health Officer, Department of Sanitation.

DEPARTMENT OF SANITATION,
ANCON, C. Z., March 21, 1912.

SPECIAL ORDER:

During the absence of Dr. J. C. Perry, Dr. Fleetwood Gruver will act as Chief Quarantine Officer, signing all correspondence as "For and in the absence of Chief Quarantine Officer."

Dr. John J. McCormick in addition to his other duties, will act as Health Officer, Panama, signing all papers as "For and in the absence of Health Officer."

By direction of Chief Sanitary Officer.

JOHN L. PHILLIPS,
Assistant Chief Sanitary Officer.

GATUN, C. Z., March 25, 1912.

CIRCULAR:

Effective March 28, 1912, and during the leave period of Mr. Ben Jenkins, Chief Clerk, Mr. W. N. Windes, Assistant Chief Clerk, will act as Chief Clerk of the Atlantic Division.

WM. L. SIBERT,
Division Engineer.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans via Limon, on Thursdays at 5 p. m.; ships for New York via Kingston on Tuesdays at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro on Mondays and Tuesdays at 5 p. m.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, APRIL 3, 1912. No. 32.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Award for 246 Motors.

The Washington office of the Commission has been directed to enter into a contract with the General Electric Company for 246 motors —220-volt, 25 cycle, 3, phase, alternating current. Of this number 116 are to be of 50 horsepower for the rising stem gate valve machines and 130 of $7\frac{1}{2}$ horsepower for the cylindrical valve, and auxiliary culvert valve machines. The cost will be approximately $120,000. The award is made to the lowest satisfactory bidder.

Toes of Gatun Dam Together.

The inner sides of the north and south toes of the east wing of Gatun Dam have been brought together for a distance of about a hundred yards from the spillway toward the locks, and this portion of Gatun Dam is practically completed. Over the hydraulic fill, the top of which was at elevation 93 above sealevel and about 200 feet wide at the spillway end, clay has been dumped and puddled between the rock toes until the top of the dam is practically level for a width of a hundred feet at present elevation of 103.35 feet. Settling will decrease this slightly but it is probable that a coating of rock will be laid to make the final top 105 feet above sealevel.

Filling in that portion of the east wing in which the toes have not come together, over a distance of about 600 yards, is continued by means of clay from the borrow pit at the west end of the dam. On the west wing, hydraulic filling is still under way and has reached an elevation of about 83 feet.

Gold Hill Section of Relocated Line.

Work by steamshovels on the Gold Hill section of the relocated line of the Panama railroad, between Gamboa and Pedro Miguel, has been completed and the shovels which were engaged there during the last months have been transferred to Canal construction. This means that all grading for the relocated line has practically been completed, as the portions between Pedro Miguel and Panama and Gamboa and Colon are in use. The remainder of the work will consist principally of track laying and ballasting and the construction of telegraph, telephone and signal systems. The entire section is now under track, but about 6 miles are laid with 70-pound rail, which is being replaced by 90-pound rail. It will be ready for freight traffic about June 1, but passenger trains will continue to run over the present route until the Canal is practically completed, as all of the larger inland Canal Zone villages are situated on the present main route, across the Canal channel from the relocated line, which lies east of the Canal for its entire length.

For the greater part of the distance between Gamboa and Pedro Miguel the relocated line runs within $\frac{1}{2}$ mile of the Canal channel, but in passing around Gold Hill it swings about 2 miles east of the Canal. Crossing the continental divide, the track follows the valley of the Pedro Miguel River to Pedro Miguel station, where it is within 300 feet of the locks. The highest elevation reached by the track is 270 feet above mean sealevel, at a point opposite Las Cascadas. The Continental Divide is crossed at elevation 240 above mean sealevel, at a point about opposite Culebra. The maximum grade in the Gold Hill section, which is $9\frac{3}{4}$ miles long, is $1\frac{1}{4}$ per cent, between Gamboa and La Pita Divide, and the maximum curvature is on a radius of 819 feet.

New Track from Miraflores to Pedro Miguel.

Under the present arrangement the tracks of the Pacific Division between Miraflores and Pedro Miguel Locks lie to the east of the Canal channel, and spur tracks lead to the west side of the locks. At Miraflores the several spur tracks cross the sites of the upper approach wall and the northwest wing wall, and the main line crosses the site of the northeast wing wall, to which the concrete spillway will be joined. At Pedro Miguel the tracks run across the site of the lower approach wall. To allow the removal as necessary of these tracks and the continuation of work on the walls, a track connecting the two locks is being built along the west side of the Canal channel. At the southern, or Miraflores end, it will be connected with tracks which extend from the lower end of Miraflores Dam. A link is being built from the lower end of the dam skirting Cocoli Hill, to the track at the hydraulic station, which is joined to the sand track, east of the Canal, by a line running over the dike which separates the waters of the Pacific from the channel adjacent to the lower end of Miraflores Locks. A track over the same route, from the hydraulic station to Miraflores Dam, was formerly in use but its temporary removal was necessitated by the work of the monitors, which cut away the earth far up on the side of the hill.

The present main line tracks will be broken where they cross the site of the northeast wing wall at Miraflores Locks but otherwise they will be left intact for construction purposes. To facilitate transfers from them to the new through line west of the channel a spur track is being built just beyond the proposed end of the upper approach wall at Miraflores, crossing the lower end of the proposed lake at an angle and on a fill about six feet above the ground. The Rio Grande is crossed on a 125-foot trestle, supported on pile bents driven at intervals of 15 feet.

Selected Rock in Storage at Gatun.

The selected rock stored in a dump north of the New Gatun station, to be used in the Gatun Dam, is being excavated with a steamshovel. The rock came from the northern end of Culebra Cut and is known as Bas Obispo rock, on account of the proximity to the principal strata of the village of that name. The first of it was stored at New Gatun in June, 1909, and approximately a train a day, each containing about 450 cubic yards, was dumped there until the middle of February of the next year. Allowing for shrinkage, the pile contained at the time excavation for distribution was begun about 160 000 cubic yards. The most of the rock being taken out at present goes on the lake side of the Gatun Dam, above elevation 75 feet above sea level, though some is used for ballasting track at Mindi and for filling and revetment about the locks.

Bas Obispo rock, chosen because of its hardness and indifference to water and atmosphere, is a dark gray basaltic trap. of volcanic origin. The strata are of great thickness opposite Bas Obispo, where, with the exception of the portion through the continental divide at Gold Hill, the Cut is deepest; and the rock is of such strength and closegrained texture that the sides of the channel, over a considerable extent, are practically vertical and as even as the sides of a marble quarry. At the time the storage pile at Gatun was begun it was thought these strata contained all of this kind of rock that might be obtained from the Canal excavation but deeper excavation revealed later a considerable amount of the same kind in the channel near Empire. This was used mostly in the construction of the toes for Gatun and Pedro Miguel Dams.

Rio Grande-Panama Water Supply.

With the exception of a short section south of the Curundu River near Bridge 65 of the Panama railroad, the laying of which was delayed by a temporary shortage of pipe, the new 20-inch water main from the Rio Grande reservoir to Panama has been completed. The completed portion is undergoing pressure tests to try the joints and reveal cracks in the pipes but it will not be put into regular use until after the beginning of the wet season. However, about two thousand feet of the new main, including the 24-inch cast iron pipe.

NOTES OF PROGRESS.

(Continued.)

crossing the forebay of Pedro Miguel Lock within the concrete sills for the emergency dams and extending to the line of the Panama railroad at Pedro Miguel station, has been connected in, to allow the removal of the corresponding portion of the old 16-inch main.

The line from the Rio Grande reservoir to the filteration plant at Ancon is approximately 50,800 feet in length. The wet season level of the water in the reservoir (top of dam) is 238 feet above sealevel and with this head the new main will give a pressure in Panama of from 45 to 50 pounds to the square inch as an average, though it will fluctuate considerably in accord with the demands of the Canal construction work to which the main is tributary. The present level in the Rio Grande reservoir, near the end of the dry season, is about 218 feet above sealevel.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 85 per cent completed, 193,641 cubic yards, out of a total of 225,000, having been placed at the close of work on March 30. A statement of the amount laid each working day last week, and of the total in p'ace, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
March 25	260	9.30	2
March 26	300	9.30	2
March 27	236	8.00	1
March 28	236	8.00	2
March 29	232	8.00	1
March 30	260	10.00	2
Total	1,524	53.00	
Previously reported	192,117		
Grand total	193,641		

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending March 30, follows:

DATE.	Hours worked.	Cubic Yards.
March 25	13.35	4,943
March 26	2.55	1,676
March 27	4.00	1,393
March 28	12.00	4,880
March 29	10.55	4,349
March 30	13.45	4,986
Total	57.10	22,232

Porto Bello Crusher.

DATE.	Hours worked.	Cubic Yards.
March 25	3.40	1,706
March 26	4.30	1,512
March 27	4.00	1,950
March 28	3.30	1,702
March 29	3.45	1,920
March 30	4.00	1,945
Total	23.25	10,735

Construction of Baffle Piers at Gatun Spillway.

The closing of the dam of the spillway at Gatun, allowing no water to flow through the discharge channel, affords easy access to the sites of the baffle piers which are to be constructed at the foot of the ogee curve, and work was begun last week on cleaning out the pits in which reinforced concrete piers will be based. The floor of the discharge channel was completed on June 30, 1909, with spaces left for the construction of the piers. At these places pits were sunk to bedrock, which is at about 2 feet below sealevel, or 12 feet below the surface of the floor, and the baffle piers will be built up from rock to 8 feet above the floor. The piers will be in a double line, the lower row being 12 feet from the upper and with its piers opposite the intervals of the upper row. The row nearest the ogee is to occupy an arc of 150 degrees in a circle of a radius of 200 feet, with spaces of 12 feet between piers. In cross section the piers will be irregular hexagons, with the greatest faces upstream, and with greatest diameters of about 15 feet. There will be 12 piers in the upper row and 11 in the lower.

The upstream faces of these piers will be sheathed in heavy iron castings, to protect the concrete against the impact of heavy drift.

CONCRETE WORK IN THE LOCKS.

Over 82 per cent of the concrete for the locks is in place, the amount at the close of work on March 30 being 3,476,276 cubic yards, out of a total of approximately 4,199,400. A total of 27,395 cubic yards of concrete was laid in the locks during the week ending March 30.

GATUN LOCKS.

Over 92 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 30 being 1,854,665 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending March 30, and of the total, follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

SURVEY AT PACIFIC ENTRANCE.

Triangulation, Topography, Soundings, Wire Drag, and Magnetic Work.

The survey of the approaches to the Pacific entrance of the Canal by the Coast and Geodetic Survey is almost completed. The survey steamer *Patterson*, Capt. H W. Rhodes, which arrived at Panama from Alaska on January 15, will finish its work next week, and the wire drag party under Assistant N. H. Heck will be through with its part by the end of April.

The survey has developed the southern approach to the canal between 8 degrees 32 minutes and 9 degrees north latitude, a distance of 28 miles, and 79.25 and 79.45 west longitude, a distance of about 20 miles. Triangulation, topography of the shore line and islands, and deep water soundings have been carried on, and work in terrestrial magnetism has been done at Naos, Changarmi, and Taboga Islands and Chame Point. This part of the survey has been in charge of the officers and crew of the *Patterson*. The triangulation has been greatly hampered during the past six weeks by smoke from forest fires, and dry season clearings. The submerged rock off Tortola Island has also been located.

The work of the wire drag party has been to explore the harbor to a depth of 40 feet in the immediate vicinity of the entrance, in an area of about 150 square miles. This work has been done by six officers, and their employes, from three launches and a tender. The survey is directed principally towards discovering submerged obstructions, such as pinnacle rocks, which may have escaped the ordinary surveys by sounding; that is there are found in navigable waters rocks that stick up from the bottom in the shape of a pinnacle. A lead striking such a rock may come to rest, and in that event the location is determined. More frequently, however, it slides off the pinnacle and the depth registered is that at which it finally comes to rest, which may be many feet below the top of the rock. A chart with such a reference is a danger rather than an aid. The wire drag discovers all such obstructions. It consists of a long cable held above the water by buoys at regular intervals, from which hangs, at a predetermined depth, a parallel wire cable. In the south appraoch to the Canal this lower cable was fixed at 42 feet below the surface, and the longest drag used was a mile in length. The drag is towed slowly through the water by launches on which observers keep a lookout. When an obstruction is struck, the buoys in the vicinity tip over, the drag is stopped, and men in a boat then determine the exact locality of the obstruction. This work goes slowly, but it is thorough. The wire drag survey will have occupied about six months when it is concluded.

The results of the entire survey will be communicated to the Commission, and published in the Coast and Geodetic Survey chart of the Pacific approach to the Canal.

Coal Deposits on The Canal Zone.

By direction of the Assistant to the Chief Engineer the Commission Geologist has examined the so-called "coal deposits" on the Canal Zone and has made the following report:

"*Tabernilla Coal Deposit*—The present trail from the old Tabernilla pumping station to this ground is very dim, and the old shafts and holes are somewhat obscured by a growth of brush and vegetation, the lowest ones being partly filled with water from the backing up of the Frijoles River. At present the surface conditions reveal very little except to show the general geological relations and to supplement, to some extent, the study which was made of the cores obtained from this ground. The following are the general geological conditions that obtain at this so-called "coal deposit:"

"(*a*) An older series of basalt and gabbro flows and breccias. No coal could by any possible means occur in these rocks.

"(*b*) A younger series of bedded volcanic conglomerates tuffs and clays.

"(*c*) Between (a) and (b) and in the lower part of (b), local prehistoric swamps gave some carbonaceous material to certain local lenses of clay and shale. These carbonaceous clays and shales constitute the so-called "coal beds."

"There is really no coal here at all. The carbonaceous clay and shale beds which do occur are too low grade to be properly classed even as lignite. In only three holes, which are close together, (2, 8, and 9) were the carbonaceous shales and clays found. Regarding the other holes they were drilled from a few feet to 100 feet into volcanic rocks which could not by any chance contain coal.

Other deposits—It is certain that no coal of any commercial importance will ever be found within the Canal Zone, for the following reasons:

"(*a*) The rocks of the Zone are, to a considerable extent, igneous and marine. Igneous rocks never contain coal. Marine deposits seldom do, except as local lenses resulting from prehistoric flat-shore conditions or marine swamps.

"(*b*) The land-formed deposits of rock on the Zone are not of the kind in which coal ordinarily occurs.

"(*c*) The Canal Zone rocks are mostly all Tertiary in age, and, with a few exceptions, coal is not found in rocks as young as these. The local lignite shale beds of Culebra Cut, and at other points, have no commercial value whatever, because of their very high percentage of ash and high content of water.

"(*e*) All of the formations on the Canal Zone are known to contain lignitic shales and carbonaceous clays so friable and brittle that, even if they contained coal beds of value, such beds could not be mined except along surface outcrops, because the overlying or roof rocks could not be held up unless timbering of prohibitive cost were restored to."

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on April 10. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8.00 a. m., on April 10, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their capacity properly to operate an automobile, and must have the automobile with them.

PERSONAL.

Col. Geo. W. Goethals is a passenger on the *Allianca* which left New York for the Isthmus on April 1.

OFFICIAL CIRCULARS.

Invoice of Transferred Material. (Corrected).

CULEBRA, C. Z., March 16, 1912.

TO ALL CONCERNED:

Referring to circular issued by this office dated May 19, 1911, advising that transfer of second hand rails, ties and fastenings between Divisions and the Panama railroad, to be used as track material, be invoiced at 50 per cent of the original cost:

Please be advised that this circular applies to all transfers of material of this class.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Observance of Good Friday.

CULEBRA, C. Z., March 22, 1912.

So far as consistent with the transaction of public business, Friday, April 5 (Good Friday), will be observed as a holiday in the Canal Zone.

Good Friday is not included in the list of holidays for which gratuity pay is allowed, and pay for services performed on that day will be calculated the same as for Sundays.

Holy Thursday will be considered an ordinary working day and payment made accordingly.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Time Vouchers for Silver Employes.

CULEBRA, C. Z., March 30, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Complaint has been made that silver employes who resign on short notice and return to the West Indies are frequently unable to draw their pay before sailing. This is due to the fact that time voucher must be made out, forwarded to the Examiner of Accounts, checked, and forwarded through the Disbursing Officer to the paymaster at Cristobal. It does not seem practicable to change this system of handling time vouchers, but, in order to minimize the inconvenience complained of, it is directed that a notice be posted at each time office advising silver employes who may intend leaving the Isthmus to notify their time keepers two or three days in advance, in order that a time voucher may be prepared and reach the paymaster through the usual channels prior to the employe s departure.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Employes' Transportation Coupons to be Filled Out.

CULEBRA, C. Z., March 29, 1912.

Attention has been called to the fact that employes holding I. C. C. 24-trip tickets, and 120-trip tickets, are not complying with previous instructions that coupons be filled out and signed before entering train Employes must fill out and sign coupons before presentation at passenger gates at Colon and Panama, and before entering train at intermediate stations. The rule requiring the employe to sign coupons in the presence of collector was discontinued some months ago.

By direction of the Acting Chairman.

Respectfully,
C. A. MCILVAINE, *Chief Clerk.*

Steamship "Panama" Accommodations.

CULEBRA, C. Z., April 1, 1912.

TO ALL CONCERNED:

All available cabin accommodations having been reserved on the steamship *Panama*, scheduled to sail from Cristobal on Sunday, April 7, no further requests for this sailing should be submitted.

By direction of the Acting Chairman.

Respectfully,
C. A. MCILVAINE *Chief Clerk.*

United Fruit Company Stateroom Reservations.

CULEBRA, C. Z., April 1, 1912.

TO ALL CONCERNED:

In view of the large increase in passenger traffic on the steamers of the United Fruit Company to New Orleans and New York, the Company has decided to waive the rule limiting the reservation of staterooms to one week in advance of the schedule sailing, and hereafter, in order to secure accommodations, employes will be permitted to arrange reservations thirty days in advance of sailing date.

By direction of the Acting Chairman.

Respectfully,
C. A. MCILVAINE, *Chief Clerk.*

CANAL MEDAL LIST.

(Continued)

Below are published the names of American employees of the Isthmian Canal Commission, who have completed two years of continuous service on the Isthmus during the twelve months ending December 31, 1911 and are in consequence entitled to receive a Canal Medal. The date shown opposite each name is that from which medal service is completed.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Office of the Chairman, at Culebra, for correction.

The Medal list covering employees of the Panama Railroad will appear in a later issue, as well as the bar lists for both I. C. C. and P. R. R. employees.

The Heads of divisions are requested carefully to check their lists of American employees on the silver roll, and to report any omissions on the medal or bar lists to the above office.

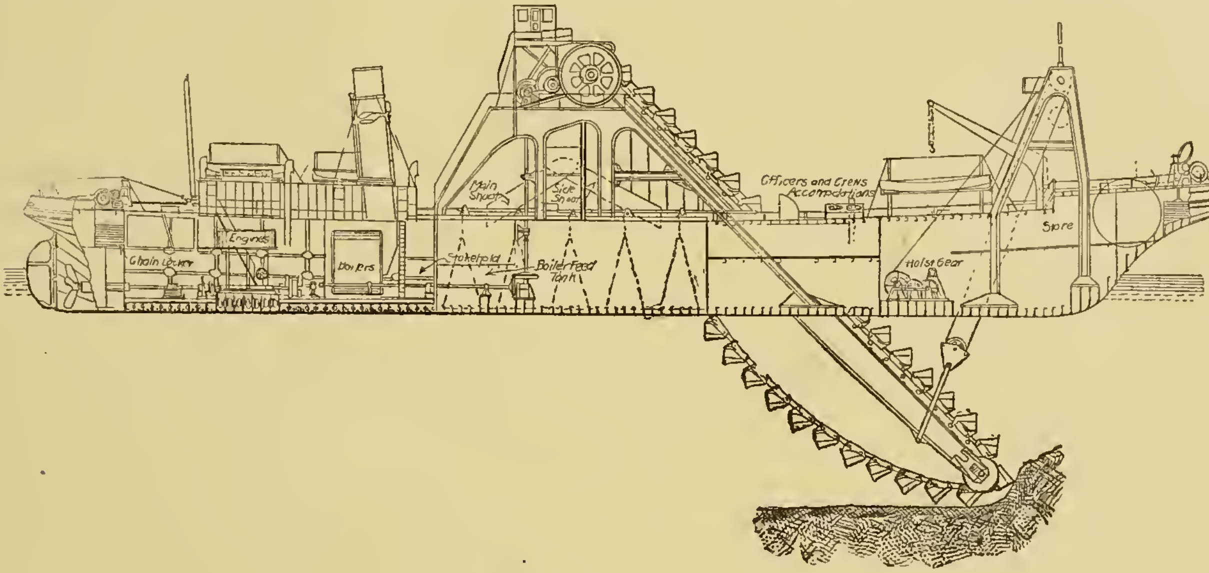
THE DREDGE COROZAL.

Voyage of the Sea-Going Ladder Dredge from Scotland.

The dredge *Corozal*, which arrived at Balboa on March 27, made its trip from the Clyde in 117 days without serious mishap. Its log shows a total of 12,064 miles, and actual sailing time of 96 days, an average of 125 miles a day. On leaving the Clyde on December 1, the ship struck heavy weather at once, and all through St. George's Channel and in the English Channel was buffetted about by heavy gales and seas. To see it alongside the wharf at Balboa one would think the dredge, with its ladder frame standing high above the deck, would be very top heavy and dangerous to handle in heavy seas. This proved not to be the case, and it rode so evenly that at no time were the dishes displaced on the officers' mess table.



SEA-GOING, TWIN SCREW, LADDER DREDGE COROZAL.

The heavy seas made it advisable to put into Falmouth on December 8, where the harbor was crowded with steamers that had taken refuge from the storm. The delay was improved by coaling, and by slight repairs to the frames in the forecastle, and the journey was resumed on December 29. From this point stops amounting to 15 days were made, one day at Funchal, one at St. Vincent, one at Bahia, two at Montevideo, four at Punta Arenas, two at Coronel, and four at Callao. The best run was 198 miles in 24 hours made on two successive days between Callao and Panama. Through the Strait of Magellan it was necessary to anchor at night, and the best run was 94 miles in 24 hours.

At Callao the ship's outside was painted, and the dredge looked on arrival at Balboa as though it had never been a day at sea. Except for the storm encountered during the first week, the voyage was without incident, all the machinery working satisfactorily, and no accidents occurring. The master, Capt. Wm. Rodick, who brought the *Corozal* to the Isthmus, has been in the service of the builders for thirty-seven years, and so far as he knows this is the longest voyage ever taken by a dredge with all her superstructure in place ready for digging.

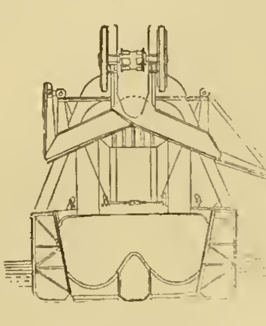
The *Corozal* is a twin-screw hopper dredge built of steel, 268 feet 9 inches overall length, 259 feet between perpendiculars, load water line length, 239 feet; molded breadth, 45 feet; depth, 19 feet; draft when light, 12 feet forward, 14 feet 4 inches aft, 13 feet 2 inches mean; draft when loaded with 1,200 tons of spoil, 14 feet 3 inches forward, 17 feet 4 inches, aft, 15 feet 9½ inches mean.

The boiler plant consists of two Scotch Marine boilers 14½ feet in diameter and 10½ feet long, heating surface 2,022 square feet each, grate area 66 square feet each. There are two main engines, which propel the ship or run the dredging gear. They are of the marine, triple expansion type, with cylinders 17, 27, and 43 inches in diameter, stroke 27 inches. With steam supplied at a pressure of 180 pounds per square inch, they develop 928 and 965 horsepower, a total of 1,893 horsepower. The air pumps, steam 10 inch diameter, air 18-inch, stroke, 10-inch; circulating pumps, 7-inch bore centrifugal; feed pump, steam 9½-inch, 7-inch, 18-inch stroke; are supplied from the main boilers but are not connected with the main engines. There are two condensers with a cooling surface of 1,564 square feet each. The propellors are of cast iron, 9 feet 3 inches in diameter, pitch 12 feet, The dredge is fitted with its own refrigerating and electric lighting plants.

The ladder upon which the continuous chain of buckets revolves is built up of structural steel girders, is 115 feet long and weighs 100 tons. With buckets upon it the total weight is 240 tons. The bull wheels, by means of which the turning power is applied to the chain, weigh 25 tons each, the top tumbler, 15 tons, the bottom 13 tons. Two sizes of buckets are provided, one of 54 cubic feet for excavation in soft material, and each of these weighs 2 tons 8 hundredweight, and a small 35 cubic feet strong bucket for digging in hard material, each weighing 2 tons 14 hundredweight the weights given are for buckets alone, when combined with links and pinions each weighs 4 tons. They are constructed of cast steel backs, pressed plates of mild steel for bodies, and tempered lips of manganese steel. There are 39 in a chain, and ten spares of each kind were brought over by the *Corozal.*

The work for which the dredge is to be used is the digging of about four million cubic yards of hard material, rock, clay, and boulders, from the Pacific entrance of the Canal between Balboa and Miraflores Locks, excavation that cannot be done by the ladder or dipper dredges now in the service, because of the character of the material and the depth at which it is found. The ladder dredges now in use are old French equipment, and the dipper dredge at the Pacific entrance, although a modern American dredge, cannot do the work required. The *Corozal* has a center well ladder so that it can make its own flotation, that is it can dig into a bank ahead, and when the ladder makes an angle of 45 degrees with the vertical, excavation can be carried on at a depth of 50 feet. At this depth the dredge is required to dig 1,200 cubic yards of soft material in an hour, and on the test referred to below a better showing than this was made. With her hopper containing 1,200 tons of spoil and her bunkers loaded with 100 tons of coal the ship must be able to make ten knots an hour, and this test also was successfully met.

The new dredge is equipped to deposit its dredgings in a hopper capable of holding 27,500 cubic feet, with a hydraulic dumping apparatus, or into barges tied alongside, the section amidships printed herewith showing the chutes by which the discharge overboard is made. The method of discharging into barges will be especially useful in excavation in Culebra Cut or at any other interior point where the distance from a suitable dumping ground is so great as to make trips by the dredge itself uneconomical.



SECTION AMIDSHIPS.

The only sea-going ladder dredge now in

the service is the *Gopher*, at the Pacific entrance. Compared with this the *Corozal* has buckets of about five times the capacity of those on the *Gopher*, is able to excavate three times as much in an hour, and to dump from its own bins, whereas the *Gopher* discharges only into barges. Including the *Gopher* there are now four rebuilt French ladder dredges in operation in the Pacific entrance, and the new dredge will have a capacity equal to that of all of them.

It was built by William Simons & Company, Ltd., of Renfrew Scotland. The contract was let on August 13, 1910, after the President had found the bid of an American firm excessive and therefore, was authorized to enter into a contract with a foreign builder. In response to the invitation for bids three had been received; that of the Union Iron Works of San Francisco was $874,146, delivery to be made in fourteen and one-half months; that of Lobnitz & Compant, Ltd. of Renfrew, Scotland was $449,000, delivery to be made in 365 days, and that of William Simons & Company, Ltd. also of Renfrew, was $399,340, delivery to be made in 365 days. The difference between the bid of the Union Iron Works and that of the lowest Renfrew firm was $474,806, an amount considerably greater than the whole bid of William Simons & Company, Ltd. In view of this fact the Chairman and Chief Engineer recommended that the contract be awarded to the lowest bidder, and the President acted upon this advice.

An inspector of the United States Government was present at the works during the entire construction period. Labor troubles caused a delay of several months, and the dredge was launched at the works of the builder on September 13, 1911. After completing successfully a series of tests at digging in hard and soft materials it set out upon its journey to Balboa on December 1, but was compelled to return to Falmouth on account of bad weather, which stove in five frames at the forecastle above the water line. After repairs had been made a second start was made on December 29.

The contract with the builder stipulates that he will deliver the dredge at Balboa after satisfactory tests, and will guarantee the maintenance for a period of six months after delivery, that is a survey made after six months will determine whether any parts have suffered undue wear, and such parts, if there are any, will be replaced without cost to the United States Government.

The test included digging in mud, digging in boulder clay, speed, and endurance, and the tabulated results as published in an article by Mr. W. G. Comber, the Resident Engineer at Balboa, in *The Engineering News* for January 25, show that the requirements were met.

Working in mud the dredge excavated 1,114 tons of material in 41 minutes at depths ranging from 40 to 50 feet, a rate of 1,482 cubic yards an hour; the average of three loads in this test was 1,320 cubic yards an hour at depths of from 33 feet 6 inches to 50 feet 3 inches. In the speed trials with 1,168 tons of spoil, 130 tons of coal, and all stores etc., on board, the average for three runs was 9.678 nautical miles an hour. The tests in boulder clay were made in Belfast harbor, three loads being taken. The weight of the material averaged 128, 127.8, and 133.3 pounds per cubic foot and the average excavation for the three loads was 515 cubic yards per hour by actual measurement, or, determined by the displacement of the dredge, 523 cubic yards. In the last load an actual dredging depth of 53 feet 2 inches below the surface was reached. The tests in boulder clay are typical of the work the *Corozal* must do at the Pacific entrance, and of them the article referred to above says:

> The formation of the bottom at the dredging site varied greatly Hard stiff red clay was encountered at depths under 38 feet, which averaged 126 pounds per cubic foot. Boulder clay was encountered at depths from 38 to 43 feet in which were gravel and stones varying in size from that of a walnut to a stone of a foot or more in diameter. The weight of the boulder clay averaged about 135 pounds per cubic foot. At depths from 43 to 48 feet a conglomerate mass of gravel and small stones mixed with boulder clay such as found above was encountered. Below a depth of 48 feet a hard compact red sand was encountered, in which were stones and gravel, weighing about 141 pounds per cubic foot, and it was very difficult material for the dredge to handle.
>
> While dredging in the boulder clay before reaching sandy material the buckets were well filled, and the dredge appeared to handle the material very well. During the last load the engine stalled repeatedly without showing any undue strain on the dredging machinery. All the dredging gears and bearings worked well with the exception of the forward bearing of the port driving gear shaft in the engine room, which heated slightly, requiring water service on it to be kept in use.

At present the *Corozal* is discharging its cargo of spare parts, coal, chain, etc., additional port holes are being cut so that bunks may be added to the present accomodations, and it is expected that dredging may be begun within two weeks.

New Home of The University Club.

The University Club of the Isthmus of Panama, seventy-five per cent of whose members are employes of the Isthmian Canal Commission and Panama Railroad Company, moved into its new clubhouse near Las Bovedas, the sea wall, in Panama on March 30. A housewarming in the form of a reception with dancing will take place on the night of Saturday, April 20.

The new clubhouse is in a modified Spanish style and fits in nicely with the old buildings about the sea wall, and the old fortress itself. It is of rubble masonry, two stories high, and 105 by 50 feet, with entrances on First and Second streets, and a view of the arm of the bay that lies between the peninsula on which the old city is built and Ancon Hill. On the ground floor are an office, game rooms, grill, kitchen, and men's dining room. On the second floor are the library and reading room, and dining room for women. The entrance to the second floor is by means of a stairway that runs up from the lobby, making it unnecessary to enter the lower floor, which is reserved for men, in order to reach the second floor. The second story has a floor of maple carefully polished, and on occasions when dances are held the library will be cleared, giving a polished floor of 2,800 square feet unobstructed by pillars.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Paraiso, C. Z., Sunday, April 7, 1912 at 2.00 p. m. The program follows:

1. March—*His Excellency*................Fillmore
2. Selection—*The Girl in the Train*.............Fall
3. Waltz—*The Druid's Prayer*............Davson
4. Overture—*Guy Mannering*..............Bishop
5. Mazurka—*La Czarine*...................Ganne
6. A Melody—*Wild Rosebud*..............Tobani
7. —*Pilgrims Chorus from Tannhauser*......Wagner
8. Medley Selection—*Popular Songs*..........Halle
9. March—*Under the Double Eagle*..........Wagner

CHARLES E. JENNINGS, *Musical Director.*

The next concert will be given at Hotel Tivoli, Ancon April 14, 1912 at 8 p. m.

SOCIAL LIFE OF THE ZONE.

Activities of Various Organizations.

The Cristobal Woman's Club has the following program scheduled for the month of April: Wednesday, April 3, general meeting paper on "The Poetry of Philanthropy," the Rev. Carl H. Elliott; April 10, under the home department, subject, "Modern Domestic Science; April 17, art and literature department, subject, "Folk Lore of Different Nations;" April 24, at 3 p. m., Annual meeting, with election of officers.

The pupils of the Gorgona public school entertained their friends with a musical at the Commission clubhouse on Friday evening, March 22. One hundred and forty-five children took part in the exercises. The children sang songs and played games; there were a trio in Spanish and a German solo; "The Wreck of the Hesperus" and "The Children's Hour" were recited by pupils of the third grade, who also gave an exhibition of reading short musical selections at sight. A piano solo and a cornet duet preceded the closing of the exercises with the singing of "The Salute to the Flag" and "The Star Spangled Banner" by the school.

The senior section of the Boys' Anti-Cigarette League, Gorgona, held a farewell reception in honor of Albert LaRock who is leaving for his home in the States, at the home of their directress on Monday evening, March 18. He was a charter member of the League and has been for three years recording secretary. The league has forwarded a box of books to the leper colony at Palo Seco and a box of magazines to Ancon Hospital. New books have been added to the library.

Plans are being made for the organization of the Girl Pioneers of America in Gorgona. The character of this organization is similar to that of the Boy Scouts. Girls between the ages of 12 and 16 will be eligible for membership and it is expected that the organization will begin with about 20 members. Mrs. J. L. Hackenberg and Mrs. George Puer are at the head of the movement.

Church Notes.

The Young People's Christian Endeavor Society of the Cristobal Union Church, held its first entertainment in the church on Friday evening, March 27. The program consisted of a series of living pictures depicting Bible scenes and characters, and musical numbers by Mrs. and Mr. Bennyhof, and Mr. and Mrs. George Butters. Mrs. Butters, Mrs. Harrison and Mrs. Putnam had charge of the entertainment. Since the opening of the new building in February the attendance both at the church services and the Sunday school has increased.

The Isthmian Sunday School Association will hold its next quarterly meeting in the Commission chapel at Gorgona on April 14 instead of on April 7 as previously announced.

Obituary.

John Hagan, an employe of the Panama Railroad Company, died at Colon Hospital on March 29. He was 45 years of age, and had been on the Isthmus seven years, coming here from the State of Iowa. He is survived by his wife who is living at Cristobal.

LOST—In Culebra or on train No. 5, March 30, small silver watch with monogram "Y. M. F." Return to Ad Faure, Chairman's Office, Culebra, and received reward.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the Indoor Baseball teams on March 31, 1912, was as follows:

Team.	Won.	Lost.	P. C.
Gorgona	4	0	1.000
Culebra	4	1	.800
Corozal	2	2	.500
Empire	2	3	.400
Cristobal	1	4	.200
Gatun	1	4	.200

The schedule of moving picture entertainments for the week April 8 to 13, is as follows: Monday, Corozal; Tuesday, Gatun; Wednesday, Gorgona; Thursday, Cristobal; Friday, Culebra; Saturday, Empire.

CULEBRA.

A Spanish class for women has been organized, and will meet on Wednesdays and Fridays. Any women who desire to take Spanish on Saturday evening from 8 to 9 o'clock should hand their names to the secretary.

A gymnasium class will be organized to meet from 5.15 to 6 o'clock on Mondays and Wednesdays, or such other times as may be desired by the class.

The following is the standing in the Chess Tournament:

Name.	Won.	Lost.	Draw
Bartlett	6	5	
Dubois	8	6	1
Goodnow	7	6	1
Erickson	4	10	
Janney	7	6	1
Newman	2	11	1
Sterns	9	3	1
Warner	8	4	

Capt. Jack Crawford will appear at Culebra on Tuesday, April 9. Seats will be reserved.

The Hill Magical Company will appear at Culebra on April 19.

EMPIRE.

The duck and candle pin tournament that has been running for the last two months closed on Saturday, March 30, with the following results: *Doubles, Duck and candle pins*—Won by Rodeghiero and Pinney, six games each, total pin fall, 1,144; 2nd, Rodeighiro and Gorham, 1,139; *High average*—Rodeighiro 93.36 average for 144 games; *Second high average*—Pinney 90.37 average for 144 games; *Single high score*—Goolsby 127.

The smoker held on Thursday, March 28 was attended by 350 men, the following program was given: Solo, Mr. Walsh; Monologue, Mr. Evans; Dancing, Mr. Stapleton; Dark Town Social Swells, Messrs. Emery and Cogan; Wrestling, Greening and Andrews, Tug of War, Disbursing Office *vs.* Examiner's Office, won by Disbursing Office; Tug of War, Gorgona *vs.* Empire Shops, won by Gorgona: Hill Magical Company.

The Culebra indoor baseball team played at Empire on Saturday, March 30, winning by the score of 13 to 7. Empire will play at Cirstobal on Saturday, April 6.

Messrs. DuBois, Stearns, and Janney of Culebra played several games of chess at Empire on Saturday evening, March 30. The games were about evenly divided.

GORGONA.

A farewell gymnasium class was held on Monday night, March 25, in honor of Jess T. Hopkins, whose resignation becomes effective at the expiration of his leave. Refreshments, speeches, and songs made the evening's entertainment. Mr. Hopkins will spend his vacation in Wichita, Kansas, and San Pedro, California, and about the middle of May will sail for Montevideo where he will have charge of the physical work in connection with the Y. M. C. A. and the city of Montevideo.

The Gatun Choral Club sang Gaul's "Holy City" on Sunday evening, March 31, with A. B. Dickson as director. The soloists were Mrs. Hughes, Mrs. Decker, and Mrs. Dickson, and Messrs. Case and Ross.

The fourth game in the series of the Indoor Baseball League was won by Gorgona from Cristobal on Saturday night, March 30, score 36 to 24. The following was the line-up: *Cristobal*—Russell, Blenker, Merrill, Simons, Duff, Mathews, France, Schwallenberg. *Gorgona*—Ridge, Louden, Hilty, Christensen, Kuentz, Emerson, Carpenter. Next Saturday night the team goes to Gatun.

Two hundred and eighty-seven people attended the moving picture show on March 26.

GATUN.

Bowling has become the most popular game in the Gatun clubhouse. The Local Duckpin League now consists of forty men. Wilson of the Algonquins has high score with 126, during the playing of which he made three consecutive strikes.

The standing of the three high teams is: Algonquins, 1,000; Beavers, .555; Stars, .555. On Friday evening, March 30, there were fifty five spectators present when two match games were played. A negro band furnished music.

"Open house" was observed at the clubhouse on Saturday evening, March 31. Teams from other clubhouses competed with Gatun teams in various events. Refreshments were served. The results of the games showed a clean sweep for Gatun as follows: *Baseball*—Gatun 12, Corozal 7. *Pool*— Gorgona—Ashman 53, Orr 95, Tanghor 86, Miller 27. Gatun—Hughes 100, Dalton 100, Galloway 100, DePoorter 100.

Bowling.

Culebra	430	402	459	Camp Elliott	411	412	418
Gatun (1st)	467	421	467	Gatun (2nd)	449	435	424

Checkers.

	Won.	Lost.	Draw.
Gatun (4 men)	33	20	7
Camp Elliott (4 men)	20	33	7
Gorgona (2 men)			

The Gatun Young Men's Christian Association Choral Club gave a sacred concert at Gorgona on Sunday evening, March 31.

W. C. Gayer led the Discussion Club on Sunday evening, March 31. The subject was "Big Brother Movement."

The Choral Club will sing at Cristobal on Saturday evening, April 6.

The Hill Magical Company will appear at Gatun on Monday evening, April 8.

Dr. Orenstein will give a talk on "Flies" on Tuesday evening, April 16.

CRISTOBAL.

On Saturday, April 6, the Gatun Choral Club will present a program appropriate to Easter. Admission free and by ticket. Reserved seats can be secured after Wednesday noon, April 3. The public is cordially invited.

The standing in the local duckpin tournament is as follows:

Team	Won.	Lost.	P.C.
Phillies	21	6	.777
Pirates	22	8	.733
Reds	20	10	.667
Giants	15	15	.500
Dodgers	12	15	.444
Cardinals	10	20	.333
Cubs	9	21	.308
Doves	8	22	.267

Four hundred and fifty-seven people attended the performance of the Empire Minstrels on Saturday evening, March 30.

Tuesday, April 4, Capt. J. W. Crawford will appear at the Cristobal clubhouse. Members free, others 50 cents.

PORTO BELLO CHESS CLUB.

Name.	Played.	Won.	Lost.	Draw.	P. C.
Tuttle	10	9	1		.900
Hanbury	8	7	1		.875
Morgan, C. D.	10	6	3	1	.650

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending March 30:

Magdalena, March 24, from New York, with 17 cases horse shoes, 40 kegs nails, 70 kegs bolts, for stock; 10 cases rail bonds, for Atlantic Division; 15 cases rail bonds, for Pacific Division.

Cuban, March 25, from Liverpool, with 9 pieces castings, for Pacific Division.

Prinz Sigismund, March 26, from New York, with 34 bundles scoop shovels, for stock; 20 barrels castings for Mechanical Division.

Duart, March 26, from New York, with 96,258 bags cement, for Atlantic and Pacific Divisions.

Stanley Dollar, March 26, from Colombia River, with lumber, for stock.

Lucy Neff, March 25, from St. Marys, Ga., with 1,066 pieces piling, for stock.

Ocland, March 27, from New York, with 101,546 bags cement, for Atlantic and Pacific Divisions.

Karen, March 27, from New Orleans, with 268 tons pig iron, 2,462 pieces lumber, for Mechanical Division; 1,715 pieces lumber, 78 pieces piling, 3,000 pieces cross arms, for sotck; 5 pieces lumber, for Pacific Division; 2,122 barrels brick, for Panama Railroad Company.

Abangarez, March 28, from New Orleans, with 600 cases grease, 8 cases water closets, 66 cases cotton duck, 10 reels wire rope, 1,411 pieces lumber, 77 pieces piling, for stock; 1,536 pieces lumber, 75 tons pig iron, for Mechanical Division; 7 cases hoist engines, for Fortifications.

Santa Marta, March 28, from New York, with 11 cases copper tacks, 10 cases packing, 201 pieces pipe, 1,375 bundles wire rope, 10 pieces castings, 4 cases machinery, 6 cases linen tags, for stock; 25 bundles splice bars, 8 barrels vault lights, for Atlantic Division; 35 bundles splice bars, 14 barrels vault lights, for Pacific Division; 40 cases incandescent lamps, 200 barrels clay, for Mechanical Division; 39 barrels compound, 61 bundles felt, for Fortifications.

The following vessels arrived, or departed from, the port of Balboa during the week ending March 30:

Arrivals—March 25, *Pachitea*, from Callao; March 26, *Chile*, from Guayaquil; March 26, *Palena*, from Valparaiso; March 27, *Stanley Dollar*, from San Francisco; March 27, *Newport*, from San Francisco; March 29, *Barracouta*, from Central America; March 30, *Manavi*, from Buenaventura, March 30, *Norajo*, from San Francisco.

Departures—March 25, *Mexico*, to Valparaiso; March 25, *Ecuador*, to Guayaquil; March 26, *Trinculo*, to Port Harford; March 26, *Leelanaw*, to San Francisco; March 26, *Babcock*, to San Francisco; March 30, *Chile*, to Guayaquil.

MOVEMENT OF OCEAN VESSELS.

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Highest Excavation Record.

On Tuesday, April 2nd, 43 steamshovels working in the Pedro Miguel, Culebra, and Empire Districts of the Central Division excavated 67,230 cubic yards of material, car measurement, during the working day of eight hours. This is the highest daily record of excavation in Culebra Cut proper.

Change at Mount Zion Reservoir.

To supplant the concrete reservoir on Mount Zion Hill, which has been put out of service by cracks in the sides and bottom, two 50,000-gallon cylindrical timber tanks have been constructed at a slight elevation below the reservoir. The latter will be repaired and used as a retainer for the overflow from the tanks. The Mount Zion reservoir is at an elevation of 550 feet above sealevel, and supplies water for the villages of Enterprise and Culebra. The water comes from the Rio Grande reservoir and is pumped into the Mount Zion reservoir from the Cucaracha pump station, at an elevation of about 200 feet, located at the base of the hill, directly across a ravine from the Rio Grande air compressor. Approximately 250,000 gallons of water are pumped to Mount Zion daily. The concrete reservoir was erected in 1906, and has a capacity of 528,000 gallons.

Canal Work in March.

The grand total of Canal excavation to April 1 was 165,877,209 cubic yards, leaving to be excavated 29,446,170 cubic yards, or about one-sixth of the entire amount for the completed Canal.

The total for March was 2,803,015 cubic yards, as compared with 3,327,443 cubic yards, in March, 1911.

The dry excavation amounted to 1,886,110 cubic yards, and was principally by steamshovels. The dredges removed 842,649 cubic yards, and 74,256 yards were sluiced at Miraflores Locks, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division. the total excavation was 428,880 cubic yards. Of this total, 254 cubic yards were dry excavation.

The total excavation in the Central Division was 1,736,777 cubic yards, all of which was from the prism. The amount taken from Culebra Cut was 1,539,618 cubic yards.

In the Pacific Division, the total excavation was 637,358 cubic yards, 414,023 cubic yards of which was taken out by dredging at the Pacific Entrance and 74,256 by sluicing.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (ten stations), 0.15 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Relocation of Diversion Channel.

In connection with a small slide on the east bank of Culebra Cut, opposite the southern end of Empire, cracks have appeared in the earth beyond the east diversion, though the channel of the diversion itself is undisturbed. In anticipation of an extension of the slide which would carry away this portion of the channel, allowing the waters in the diversion to drain into the Cut, the channel will be relocated several hundred feet east of the line of the break. Beginning near the concrete powder house, about a hundred and fifty yards south of the east end of the suspension bridge, it will swing out from the present channel to the east and in a curve over 700 yards long return to intersect the diversion beyond the area affected by the slide. The channel is to be thirty feet wide, with a maximum cut of 22 feet, where it will pass through a low saddle. A steamshovel began cutting the trench on April 6 and the work will be rushed to completion, another shovel being cut-in on April 10.

Removal of Old Line of Panama Railroad.

Following the abandonment of the old line of the Panama railroad between Gatun and Gorgona on February 15, work was begun on removing the track, signal system and telephone and telegraph lines between Bohio, 9 miles south of Gatun, and Bridge 15, which crosses the Gatun River, about half a mile east of Gatun station. One track was cut a short distance south of Bohio, and taken up by two independent gangs, one working north towards Bridge 15, and the other south towards Frijoles. As soon as one track was taken up the two gangs started at Ahorca Lagarto and, working away from each other, tore up the remaining track in this district. All track is now out between Bohio and Bridge 15 and one gang is working from Bohio, south. The track between Frijoles and Gorgona, with the exception of Barbacoas Bridge, crosssing the Chagres River just north of San Pablo, was left for the use of the Central Division in making Canal excavation at Tabernilla and San Pablo. The Barbacoas Bridge was dismantled and 3 of the 103-foot girders were transferred to Monte Lirio, to be used in the construction of the bascule bridge over the Gatun River, where it is crossed by the relocated line of the Panama railroad. The 3 other girders were sent to the storage yards of the Depot Quartermaster at Mount Hope.

In disposing of the recovered material, the

NOTES OF PROGRESS.

(Continued.)

serviceability of the rail and crossties was determined on the ground. Unserviceable ties were burned and those in good condition were shipped to Empire, for storage by the Quartermaster's Department. The rail was separated into carload lots, the serviceable painted white on the ends and the unserviceable painted yellow. The unserviceable rail was shipped to Empire and the disposition of the serviceable rail is determined from time to time by the Chief Quartermaster. In crediting the value of recovered material serviceable rail is reckoned at $15.50 per ton of 2,240 pounds; scrap is valued at $5.00 per ton; bridge steel at $10.00 per ton and bridge timber at $10.00 per thousand feet, board measure. Other serviceable material is counted as worth fifty per cent of book prices. Approximately 50 per cent of the total number of ties were in good condition. Telephone and telegraph wires, of which the total number of lines in this section was 48, aggregated in length 480 miles.

The old line between Gatun and Bohio followed the original survey of the Panama railroad, over which the first track was built in 1851–5 by an American company of which John L. Stephens was president, with John C. Trautwine as the first chief engineer. The Canal construction, especially in the building of Gatun Dam, has necessitated some slight alterations of the right of way but for the greater part the track remained in the original course.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 86 per cent completed, 194,537 cubic yards, out of a total of 225,000, having been placed at the close of work on April 6. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
April 1	176	7.00	1
April 2	204	6.45	2
April 3	160	6.30	1

Admission to Examinations.

Attention in invited to the fact that a card of admission will be sent by the Chairman's office to each applicant for civil service examination found to be eligible to be admitted to the examination for which application may be made, immediately upon the receipt of the examination questions, when the exact date can be known. No person should report at Culebra for examination before receiving such a card of admission, or, in case no card of admission has been received, before having previously ascertained by telephone or otherwise the date on which the desired examination is scheduled to be held; such a request should not be made, however, except on the day before the date on which it is understood an examination is to be held.

CONCRETE WORK IN THE LOCKS.

Over 83 per cent of the concrete for the locks is in place, the amount at the close of work on April 6 being 3,500,072½ cubic yards, out of a total of approximately 4,199,400. A total of 23,796½ cubic yards of concrete was laid in the locks during the week ending April 6.

GATUN LOCKS.

Over 92 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 6 being 1,857,460½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending April 6, and of the total, follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

STEAMSHOVEL RECORDS.

Work of Central Division Shovels in March.

During the month of March the total amount of material excavated in the Central Division was 1,736,777 cubic yards, of which 374,100 cubic yards were classified as earth, and 1,362,677 cubic yards as rock.

Of this quantity 1,702,125 cubic yards were removed by steamshovels, 24,496 cubic yards by cranes, and 100 cubic yards by hand. Contractors removed 8,016 cubic yards by hand and 2,040 cubic yards by steamshovel.

The high record for the month was made by shovel No. 227, working 26 days in the Culebra District, which excavated 57,266 cubic yards of rock.

The second best record for the month was made by shovel No. 256, working 23 days in the Culebra District and 3 days in the Empire District, which excavated 53,362 cubic yards of rock.

The best record for a shovel of the seventy-ton class was made by shovel No. 124, working 26 days in the Culebra District, which excavated 41,014 cubic yards of earth.

Shovel No. 227, working in the Culebra District, made a high record for one day by excavating 3,040 cubic yards of rock on March 30.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement.

The best record for the month and for one day are shown in the following table:

CANAL MEDAL LIST.

(*Continued*)

Below are published the names of American employes of the Isthmian Canal Commission, who have completed two years of continuous service on the Isthmus during the twelve months ending December 31, 1911, and are in consequence entitled to receive a Canal Medal. The date shown opposite each name is that from which medal service is completed.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Office of the Chairman, at Culebra, for correction.

The Medal list covering employes of the Panama Railroad will appear in a later issue, as well as the bar lists for both I. C. C. and P. R. R. employes.

The Heads of divisions are requested carefully to check their lists of American employes on the silver roll, and to report any omissions on the medal or bar lists to the above office.

TRANSFORMER EQUIPMENT.

Features of Distribution of Electric Current through Lock Walls.

The Washington office of the Isthmian Canal Commission is soon to request bids upon electrical equipment for installation in the various transformer rooms distributed throughout all the lock walls. An effort will be made to purchase the large number of small items required, such as switches, instruments, copper buses, overload devices, panel boards, and other devices, all built up into large and complete group units, so that the installation work to be performed by the Commission will be at a minimum, consisting chiefly of assembling the units in place and joining the cable connections.

Articles have appeared in The Canal Record at various times describing the manifold uses of electrical motive power applied to drive lock machinery, such as non-rising stem valve machines, miter gate machines, miter forcing machines, cylindrical valve machines, towing locomotives, spillway machinery, motor-driven pumps, and others, and the intricate, but nevertheless simple and commanding, control of the motors has also been described in detail. It will be remembered that the permanent source of electrical energy is to be the hydro-electric station at Gatun spillway, where three 2,000-kilowatt units are soon to be installed. Energy is generated at a potential of approximately 2,200 volts; the motors require electrical service at 240 volts; consequently, there are required transformer units possessing a 9 to 1 ratio, to link the power circuits from the hydro-electric station to the mains feeding the motors. It is the transformers with auxiliary equipment which are about to be purchased.

Duplicate Equipment—Extensive provision has been made to secure continuity of electrical service at the lock motors by installing all equipment, including cables and buses, in duplicate. Three units at the hydro-electric station, two of which are ample to carry the immediate peak load, insure a conservative reserve in generating capacity. Each generator is provided with double-throw switches connecting to either of the duplicate buses. From the station, duplicate circuits are carried through isolated duct lines across the dam to the lock walls. One set of feeders enters the lock walls from the upper end and another set enters the lock walls from the lower end. The feeders entering the lock at either extremity are equipped with transfer switches to permit isolating the feeders so as to provide either separate service to the machinery of either of the lock chambers or separate service to any of the lock walls. In each of the lock walls duplicate feeders are run to the different transformer rooms. The high tension buses of each transformer room are looped into the feeders and are provided with sectionalizing switches to enable the cutting out of all high voltage conductors from a seat of trouble between any two transformer rooms. In the transformer rooms, the transformers are in duplicate and the buses—both high voltage and low voltage—are also in duplicate. This description of the duplicate electrical features applies more particularly to the Gatun Locks; similar provisions are made at both the Pedro Miguel and the Miraflores Locks.

Transformer Rooms—Each of the transformer rooms is practically a self-contained sub-station. In all the locks there is a total of thirty-six rooms—sixteen at Gatun, eight at Pedro Miguel, and twelve at Miraflores. At Gatun, for instance, there are four rooms in each of the side walls and eight in the center wall, the center wall rooms being arranged so as to separate the equipment required for one lock chamber from that of the other lock chamber. In each of the walls, the transformer rooms are grouped near the centers of power distribution at each end of a lock near the miter gates, providing thereby for minimum energy losses in the low-tension mains. The equipment of a transformer room may be divided in four groups, viz., (1) duplicate power transformers, each of approximately 200 kilowatts capacity; (2) a single lighting transformer of 25 kilowatts capcity; (3) an oil switch bank, containing ten single-throw oil switches; and (4) a seven-panel distribution switchboard, containing twelve power switches and a panel of lighting equipment. In addition, there will be required a miscellaneous assortment of materials and auxiliary equipment to complete the installation. The arrangement of the transformer room is shown in plan and elevation in Figure I.

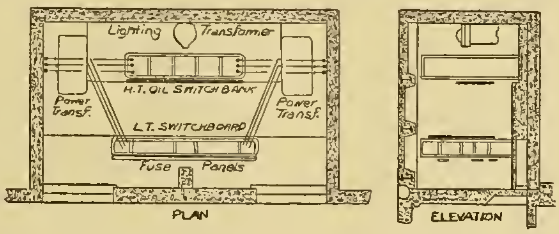

Fig. 1—Layout of Transformer Room.

Provisions against Humidity—In order to obviate, as far as practicable, certain operating difficulties occasioned by rapid deterioration of electrical apparatus in a tropical climate, the equipment is to be of the best grade only, with particular attention given to the deleterious effect of Isthmian humidity. Moisture in the air results in a rapid corrosion of metallic parts—particularly of iron and steel. Where it is absolutely necessary to use iron, as in framework for oil switches and switchboard panels, the pipe supports are to be heavily galvanized (or sherardized), and, after installation, are to be well painted or varnished. In instruments and other delicate electrical contrivances, the use of iron and steel is eliminated and either brass or copper substituted, except where soft iron is absolutely necessary to carry magnetic fluxes, in which case the iron cores are specially impregnated. In a few cases the use of sheet and cast iron is permitted whenever these parts can be protected easily by future painting.

Another deteriorating effect of tropical humidity is to be found in the rapid destruction of ordinary electrical insulation. The destructive influence of excessive moisture has been demonstrated in actual local tests. A transformer is a particularly dangerous piece of equipment when poorly insulated. There is always a possibility of a break-down which passes a high potential into close proximity to an attendant, with consequent jeopardy of human life. A transformer may show perfect insulation when new, and yet go out of commission in a very few years, even under the best of operating conditions. Upon the Isthmus, the transformers will of necessity operate under adverse circumstances, and, to meet this probable condition, the insulation specified for all the transformer room equipment is to be of a very superior quality, strongly guarded against failure.

Transformers—The power transformer is to be of the air-cooled, oil-insulated type designed to operate upon a three-phase, 25-cycle circuit and furnishing a normal pressure transformation of 2,200 volts to 240 volts. The case of the transformer is to be of corrugated sheet steel with cast iron base, top rim, and cover. The core and windings are immersed in a freely circulating oil. The design, construction, and appurtenances of the transformer are to be most modern in every respect. The rating of the transformer is to be such that either one of the units is capable of sustaining the entire load on the transformer room, the second transformer being a duplicate and in reserve; normal operation, however, will probably be such that the mains connected to the locomotive track will be loaded upon one transformer, and the mains to the machinery motors will be connected to the second transformer. In event of a break-down of either transformer or feeder the mains can be quickly transferred to the alternate transformer.

The lighting transformer is to be very similar to the power transformer, but of smaller capacity (25 kw.) and single-phase instead of three-phase. The function of this transformer is to take single-phase energy of the primary feeders at 2,200 volts between wires and transform it to energy at 220-110 volts, for three-wire Edison service to about 7,000 lamps distributed throughout the locks.

Oil Switches—The oil switch bank consists of ten single-throw oil switches mounted upon a rigid pipe framework. The oil switches are connected to the transformers and to the feeders. Three-pole switches are required for power purposes, and two-pole for lighting. Double-throw switches on the transformers are obtained by connecting a common lead of two adjacent studs of single-throw switches. Overload protection is provided for by means of current transformers, inverse time-limit relays and tripping coils. In order to furnish all attendants with ample protection against accidental contact with dangerous potentials, great pains have been taken to make the equipment safe and "fool-proof." All conductors are to be especially well insulated, and screens are to surround the buses and conductors as a protection against mechanical injury.

In order to overcome one particularly dangerous operating feature, a special design has been resorted to. In the maintenance of oil switches, it is necessary to clean out the oil and inspect the contacts at periodic intervals, and, owing to methods of connections, it is often possible that the contact studs are charged to an unsafe potential. The usual practice is to insert knife-blade disconnecting links in each of the leads to the oil switches.

These knife blades are satisfactory where the installation is isolated and where the inspection and repairs are at rare intervals, but, in the limited space of the transformer rooms, the necessary large number of knife blades assumes very cumbersome dimensions. The proposed design is simple in the extreme, contemplating a one-link lever arrangement to drop and disconnect the entire switch—can, insulators, studs, slate, and handle—away from stationary contacts rigidly secured to the pipe framework. A proper development of this device will solve a knotty problem for many a central station designer and engineer.

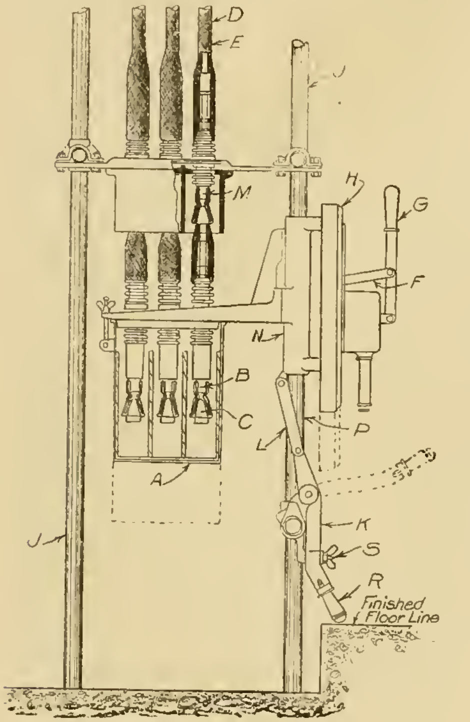

Fig. 2—Detail of Disconnecting Device.

Figure 2 is a sketch to illustrate the manner in which the disconnecting device operates. An oil switch is a mechanism which breaks the contacts of a high voltage circuit under oil, the oil acting both as an insulating medium and as a disruptive fluid to quench the arc formed at the break. Referring to the figure, which shows a manually controlled oil switch, (*a*) is a pot containing oil, in which pot are immersed the contact studs (*b*) and the contact blade. (*c*) The electric current ordinarily passes from one external conductor (*d*) through the contact studs and blade and out the other conductor (*e*). To interrupt the flow of current the blade (*c*) is lowered by means of the operating levers (*f*) controlled by the handle (*g*) which is mounted upon a slate panel (*h*) in front of the switch. The entire unit is supported upon a pipe framework (*j*).

When necessary to inspect the switch, the pot (*a*) is dropped and the contacts are exposed. If these contacts are "alive," an attendant is unable to make repairs safely, and, in order to become assured that the contacts are "dead," the disconnecting device is provided. This particular device contemplates dropping the entire switch by means of the lever (*k*), connected through the link (*l*) to the bracket which carries all parts of the oil switch. Stationary contact studs are provided on the conductors at (*m*), and the oil switch studs are made double-ended so as to make contact at both the lower and the upper ends. The oil switch bracket is bolted to a cross-head (*n*) which rides vertically upon brass guides (*p*). By raising the handle (*r*) the entire oil switch and operating mechanism are lowered bodily away from the stationary studs (*m*), thereby breaking the circuit at (*m*). An attendant once having dropped the switch is able to repair and renew any part of the oil switch without danger to personal safety.

The opening of the blade (*c*) under oil is a frequent operation, whereas the dropping of the entire can is rather infrequent; hence there is little liability of a necessity of renewals at the stationary contacts (*m*). Adjustments for alignment are provided in the brass guides, in the plate supporting the stationary studs, and in the individual switch contact studs. The disconnecting lever (*k*), when in disuse is maintained in position by a wing nut (*s*), the handle being removable.

The oil switches total 372 in number for all locks. The rating will be 300 amperes at 2,200 volts and 25 cycles. The oil to be used in both the transformers and the oil switches is to be of an especially high grade. The specifications covering the oil rigidly stipulate the general composition and requirements. As the oil is to serve as an insulating medium and is to quench arcing at contacts, the requirements of break-down voltage are rather severe, and the method of testing the oil is exceptionally rigorous and exhaustive.

Distributing Switchboard—The distributing switchboard consists of seven panels of 2-inch slate, six panels being used for mounting twelve power switches and one panel for lighting switches and circuit breakers. The power switches are of a three-pole, double-throw, double-blade, back-connected lever type rated at 600 amperes. The switchboard is built upon a pipe framework, which is assembled in the shops of the manufacturer ready for erection. Each switch is fused upon small panels mounted upon the framework in rear of the board proper. From the fuses, copper bar connections are to be provided to the cable terminals. The distributing mains will consist principally of No. 0000, B. & S. gage, three-conductor, lead-covered cable.

Features of Special Interest—The points of special interest in the transformer rooms are the installation of built-up units of smaller apparatus, the careful insulation of the transformers and other electrical conductors, the painstaking effort made to prevent corrosion of metal parts, the absolute protection assured by the design of equipment—both personal and operating safety—and the unique adaptation of a disconnecting device to suit local requirements.

Canal Zone Rifle Club.

A qualification shoot for the marksman's course was held at the Gamboa range on Sunday, April 7, by the Canal Zone Rifle Club, with the following results:

Name.	200 Yds.	300 Yds.	500 Yds.	600 Yds.	Total
Gill	43	44	45	45	177
Ferris	40	42	46	43	171
Taylor	40	41	48	39	168
Greene	37	39	40	44	160
Walraven	39	34	45	41	159
Bernson	30	40	41	37	148
Haynes	39	40	30	38	147
Johns	29	39	44	26	138
Rogers	34	37	22	25	118

The sharpshooter's course will be shot in the near future, including the skirmish run and rapid fire.

SOCIAL LIFE OF THE ZONE.

Church Notes.

On Thursday afternoon, April 4, under the auspices of the Woman's Foreign Missionary Society of the Methodist Episcopal Church, Panama, two memorial windows were unveiled in the church parlors. One window is to the memory of Mrs. A. H. Stewart, who died in March, 1910, the other, the so-called missionary window, commemorates the founding of the society on November 12, 1902. The plate below the colored glass bears the names of the organizers and charter members, who were Mrs. J. Leon Webster, Mrs. E. M. Keyser, Mrs. W. W. Gray, Mrs. A. R. Stroup, Mrs. J. I. Veen, Mrs. W. F. Bennyhof and Mrs. A. H. Stewart. The money for these windows was raised by donations from the Ancon Woman's Club and the Ladies Aid Society of the Methodist church. There are now three memorial windows in the sea-wall building, the first having been placed in the church to the memory of their daughter by Bishop Frank M. and Mrs. Bristol in 1909. Those taking part in the services of unveiling were Mrs. E. M. Keyser, Mrs. Bossemaier, Miss Williams, and Mrs. Taylor. Letters were read from Mrs. Webster and Mrs. Gray in Texas. The collection taken up was voted to the Canal Zone Federation of Women's Clubs for their fund for the schooling of a blind boy.

The monthly meeting of the Woman's Auxiliary of the Empire Christian League was held at the home of Mrs. Philip Kelly on Wednesday, April 3. The lesson subject was "the democracy of religion." Mrs. A. A. Nellis was the leader and papers were read by Mrs. Soule, Mrs. Wright, Mrs. Myers, Mrs. Goolsby, Mrs. Catto and the president, Mrs. Beck. The auxiliary will hold a "Box Social" at the monthly meeting of the Empire Christian League on April 24, at the home of Mr. and Mrs. E. P. Beck. The proceeds from the sale of the boxes will be devoted to the work of the auxiliary.

The entertainment to be held by the Woman's Altar Guild of Christ Church, Colon, will be on April 19, instead of April 10 as previously announced. The program will consist of a French farce entitled "*Ici on Parle Francais.*" There will also be music and the evening will close with an informal dance.

Easter Sunday was marked by special choral services in the Zone churches. In the Cristobal Union church the Sunday school had special exercises and the Easter sermon was preached in the evening by the pastor, the Rev. C. H. Elliott; at Gatun there were two services, the Sunday school sharing in the 10.30 service. There were two sermons on the resurrection by the pastor, the Rev. C. O. Purdy. Special exercises were held by the Culebra Sunday school and each child received an Easter egg. The pupils of the Methodist Sunday school sang Easter hymns in Spanish and in English at the morning service.

At Christ Church by-the-Sea, Colon, there were services at 5.30, 7 and 10 a. m., children's service and evening prayer at 7.30. The Rev. Edward J. Cooper, the rector, returned from his leave of absence on Thursday, April 4, and was present at all the services. Special music was rendered by a quartet of men at St. Mary's church, Empire, at the 10.45 service. The Rev. Harvey Walter preached.

At St. Luke's Hospital chapel, Ancon, an augmented choir sang portions of Gounod's St. Cecelia Mass. The Rev. Henry A. Brown preached. The congregations in all instances were very large.

Memorial Day Committee Meeting.

A meeting of the Memorial Day Committee will be held in the clubhouse at Gorgona on Sunday, April 14, at 2.30 p. m.

Representatives of the various military and civic organizations on the Isthmus are requested to attend and assist in completing arrangements to hold suitable memorial services on May 30.

W. H. KROMER, *Secretary*.

Reception to Capt. Jack Crawford.

The April camp fire of the American Veterans of Foreign Service will be made the occasion of a reception to Capt. Jack Crawford, the scout. It will be held in the I. C. C. Lodge Hall, Empire, on Saturday, April 13, at 8.30 p. m. All veterans on the Isthmus are invited to be present.

Red Cross Finances.

A financial statement of the Canal Zone Chapter, American National Red Cross, for the months of February and March, follows:

MONTH OF FEBRUARY.

RECEIPTS.

February 1. On hand	$3,077.26	
February 15. Received from Mr. Dickson, account of sale of Christmas Seals	34.15	
February 17. Interest credited at Bank	3.99	
February 29. Membership dues received during the month	4.00	
Total receipts		$3,119.40

DISBURSEMENTS.

February 1. To disbursing officer for supplies as per vouchers attached.	$28.09	
February 13. Relief of destitute family at Empire.	20.00	
February 15. Postage, money orders, etc	8.81	
February 16. To Treasurer, American National Red Cross, 12½ per cent of amount received for sale of Christmas Seals	54.46	
February 19. To Disbursing Officer for printing badges for reception	2.31	
February 28. Relief of Destitute American at Cristobal	25.00	
Total disbursements		$138.67
February 29. Balance on hand		$2,980.73

MONTH OF MARCH.

RECEIPTS.

March 1.. On hand	$2,980.73	
March 14.. Membership dues	5.00	
Total receipts		$2,985.73

DISBURSEMENTS.

March 3.. Postage, as per receipt attached	$2.00	
March 25.. Relief of destitute American at Cristobal	10.00	
Total disbursements		$12.00
March 31.. Balance on hand		$2,973.73

JOHN L. PHILLIPS, *Treasurer*.

Approved:
C. A. DEVOL, *Chairman*.

LOST—Between House No. 66, Empire, and railroad station, a lady's silver mesh bag containing some money and a receipt for an Ancon postal money order. Finder will receive reward by returning the same to Ancon post office.

LOST—On train No. 20, Sunday, April 7, a gold filled watch hunting case, Waltham movement, with fob, in forward first-class coach between Gorgona and Colon. Finder please notify John A. Erickson, Gorgona, C. Z.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments for the week April 15 to 20, is as follows: Culebra, Monday; Gorgona, Tuesday; Corozal, Wednesday; Gatun, Thursday; Cristobal, Friday; Empire, Saturday.

The standing of the teams in the indoor base-ball league on April 6, was as follows:

Team.	Played.	Won.	Lost.	P. C.
Gorgona	5	5	0	1.000
Culebra	6	5	1	.833
Empire	6	3	3	.500
Corozal	5	2	3	.400
Cristobal	6	1	5	.166
Gatun	6	1	5	.166

Games played on April 6, 1912: Empire, 18; Cristobal, 14. Gorgona, 21; Gatun, 6. Culebra, 11; Corozal, 7. Games to be played on April 13, 1912—Cristobal at Culebra; Gatun at Empire; Corozal at Gorgona.

COROZAL.

The tie in the handicap pool tournament was played off last week. Tribolett won the first, Lofgren the second and Logan the third prize. Eight men have signed for the billiard tournament. Entries will close on Friday night. A set of new billiard balls have been ordered from the States.

Ed. Roberts has been appointed manager of the pool room in place of A. H. Roberts, resigned. Arrangements have been made to enter a team from Corozal in the Isthmian Pool and Billiard League. The first games will be played on Saturday night.

CULEBRA.

A Spanish class for ladies has been organized to meet on Tuesday and Friday forenoons from 10.00 to 11.00 o'clock.

The medals for the winning team, in the eight-team local duckpin league, have arrived. The men that were the winners are as follows: Messrs. Cornthwaite, Palmer, Hill, Tragsdorf, Keene, and Silver.

Cristobal will play indoor baseball at Culebra on Saturday evening at 8.15 o'clock.

EMPIRE.

At a meeting of the bowlers held on Thursday, April 4, Mr. Pinney was elected captain of the Empire duckpin tournament team.

The results of the pool and billiard tournament games played at Empire with Cristobal on Saturday, April 16 were as follows: *Pool—Empire*—Hirsh 100, Pearson 100, McCoullough 100, MacKeever 100; *Cristobal*—Ford 56, Burness 90, Montgomery 79, Jacques 80. *Billiards—Empire*—Barnes 100, Wood 100; *Cristobal*—Rice 79, Pack 93.

GORGONA.

The following scores were made in the pool tournament between Gorgona and Gatun on Saturday night, April 6: *Gorgona*—Orr 100, Tougher 65, Hill 52, Ashman 82; *Gatun*—Dalton 91, Gallaway 100, DePoorter 100, Hughes 100.

The following scores were made on Saturday night, April 6, in games of duckpins with Camp Elliott—C. Elliott... 444 436 441 Gorgona.... 417 435 429

A Spanish class for ladies was started on Saturday afternoon. The teacher is J. Gomez, a graduate of the University of Seville. The class will meet every Saturday at 1.30 p. m.

GATUN.

The two advanced Spanish classes for men started a third course of ten lessons on Friday, April 5. Although there is a demand for a class for beginners, Prof. Gomez announces that for the present, on account of the lack of time he will be unable to start any new classes.

Beginning April 9, two afternoons, Tuesdays and Thursdays, will be set aside on which the ladies of Gatun are invited to make use of the privileges of the clubhouse. If there are enough interested, a bowling league will be started among the women.

Mrs. M. E. McLeod played two violin solos at the moving picture entertainment on Thursday, April 4. Mr. Bronson acted as accompanist.

Two games of indoor baseball were played at Gatun on Saturday, April 6. The results were: Cristobal 14, Empire 18; Gorgona 20, Gatun 6. Batteries, Gorgona, Christiansen and Jack; Gatun, Thompson and Atkins.

CRISTOBAL.

The Gatun Choral Club rendered a musical program, appropriate to the Easter season on Saturday evening, April 6.

The Cristobal indoor baseball team plays at Culebra on Saturday night, April 13.

There will be a game of simultaneous checkers on Thursday evening, April 18, when F. L. Bernsee, champion checker player of the Isthmus, will meet all comers from Cristobal and as many from outside as he may choose to invite. The game will begin at 8.15 p. m.

PANAMA CANAL BASEBALL LEAGUE.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., Sunday, April 14, 1912, at 8.00 p. m. The program follows:

1. March—*Boys of the Militia*.............Boehlein
2. Selection—*The Prince of Pilsen*...........Luders
3. Mazurka—*La Czarine*...................Ganne
4. Overture—*William Tell* (by request)......Rossini
5. Cornet Solo—*Infammatus from Stabat Mater*................Rossini
6. Polish Dance—*Kuyawiak*............Wieniawski
7. Descriptive—*The Racket at Gilligan's*.....De Witt

   Synopsis—The guests gather at Gilligan's; after their arrival Gilligan sings a song, which is followed by a country dance; the star singer then renders a touching ballad, after which the bagpipes strike up. "Are ye's all ready?" shouts Gilligan. "Yis." "Then fire away." A regular "welt the floor" and "slip time" follows, a sand jig comes next, and the festivities close with all singing "Saint Patrick's Day in the Morning."
8. Medley Selection—*Popular Hits*...........Halle
9. March—*Everybody's Doing It Now*........Berlin

CHAS. E. JENNINGS, *Musical Director*.

The next concert will be given at Cristobal on April 21, at 4.30. p. m.

Misdirected Letters.

ANCON, C. Z., April 10, 1912.

The following insufficiently addressed mail, originating in the United States and its possessions, has been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Ashcroft, R. W.
Bailey, Oliver (2nd Class)
Dierkes, John
Fahey, M. J.
Flint, F. B.
Gibbs, Webb L.
Hall, Mrs. P. A.
Heinrich, Mrs. Amondus
Hobbs, H. C.
Lamont, Mrs. W. S.
Lester, Charles
Lodge, Alfred
Pacheo, Francisco
Powell, T. L.
Rohan, Tom
Rose, Burnes
Smith, Harris C.
Stewart, J. A.
Terreyros, Mrs.
Vaughan, J. J.
Wilson, Mrs. Sarah

The following vessels arrived at or departed from the port of Balboa during the week ending April 6:

Arrivals—March 31, *Peru*, from San Francisco, April 1, *Quito*, from Guayaquil; April 1, *Ucayoli*, from Callao; April 2, *Guatemala*, from Paita; April 6, *Peru* (P. S. N.), from Guayaquil.

Departures—April 1, *Pachitea*, for Callao; April 1, *Newport*, for San Francisco; April 2, *Palena*, to Valparaiso; April 6, *Rupanco*, to Buenaventura; April 6, *Ucayoli*, to Callao.

OFFICIAL CIRCULARS.

Hand Oilers and Oil Containers.

CULEBRA, C. Z., April 2, 1912.

CIRCULAR No. 338-C. (Superseding Circulars Nos. 338, 338-A and 338-B.)

Hereafter the following hand oilers and oil containers only shall be used, and shall be considered as the I. C. C. and P. R. R. standard. Any other hand oilers or oil containers that may be in stock or on order may, however, be used until the supply is exhausted. All replenishment of same shall be in accordance with the following list:

No.	Description.	Capacity.
40.	24-inch Spring Hand Oiler For use on standard gage locomotives only.	2 pints
41.	Locomotive Tallow Pot For use on locomotives, steamshovels, pumps, portable and stationary plants, and at power plants for filling lubricators, etc.	2 quarts
42.	Stationary Engine Oilers For general use around stationary power plants, on air compressors, and marine engines, etc.	2 pints
43.	Standard Squirt Oiler (length of nozzle 4¾ inches, diameter 4 and 3-32 inches) For use on floating equipment, on portable and stationary plants, and on machinery in general.	1 pint
44.	Oil Can with Screw Cover and Spout For use on locomotives and small equipment.	1 gallon
45.	Oil Can with Screw Cover and Spout For use on locomotives and small equipment where one-gallon can is not suitable.	2 gallons
46.	Oil Can with Screw Cover For use on steamshovels and floating equipment.	5 gallons
47.	18-inch Spring Hand Oiler (same type as No 40) For use on dredges, cranes, cableways, steamshovels, narrow-gage locomotives and smaller equipment.	2 pints

All hand oilers and oil containers shall be plainly marked with the I. C. C. and P. R. R. standard number given in above list and with the name of the oil contained. They shall be kept clean and in good repair. They may be specified on requisition either by number or by name.

Requisitions for the above will be honored by storekeepers only after approval by the traveling engineers or inspector of lubricant consumption on equipment other than locomotives.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission,
Second Vice President, Panama Railroad Company.

Information from Colon Wireless Station.

CULEBRA, C. Z., April 3, 1912.

Circular No. 437:

I am in receipt of the following letter from Major S. D. Butler, U. S. Marine Corps, Commandant, Wireless Stations:

> Owing to the interference caused by the general public in asking the Colon wireless station for information about incoming ships, it is requested that the employes of the Isthmian Canal Commission be directed to ask the Colon telephone exchange for information desired of the wireless station.
>
> The wireless station will keep the telephone exchange constantly informed as to movements of ships. It is further requested that the Colon exchange be directed to comply with such arrangements.
>
> The Colon wireless station has received instructions not to give out any information to the general public, excepting only members of the Canal Commission and the Superintendent of the Panama Railroad.

Major Butler's recommendations are approved, and employes of the Isthmian Canal Commission and of the Panama Railroad Company will govern themselves accordingly.

H. F. HOOGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice President, Panama Railroad Company.

Form for Reduced Rate Requests for Shipments.

CULEBRA, C. Z., April 3, 1912.

CIRCULAR No. 186-D:

Hereafter Form C. E. 339 will be used by employes requesting reduced rate on shipments of household goods and personal effects between the various stations of the Panama Railroad and to New York City.

H. F. HOOGES, *Acting Chairman.*

Acting Chief Clerk, Department of Construction and Engineering.

CULEBRA, C. Z., April 9, 1912.

CIRCULAR No. 438:

Effective April 10, 1912, Mr. Wm. H. May will, in addition to his duties as Secretary to the Chairman, assume the duties of the Chief Clerk during the absence on leave of Mr. C. A. McIlvaine.

GEO. W. GOETHALS, *Chairman.*

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending April 6:

Turrialba, March 30, from New York, with 396 pieces yellow pine lumber, for Mechanical Division; 122 cases copper bars, for Pacific Division; 12 cases zinc plates, for stock.

Navajo, March 30, from San Francisco, with 750 cases blasting powder, 849 bales hay, for stock; 157 pieces redwood, for Mechanical Divison.

Cristobal, March 31, from New York, with 120,210 bags cement, for Atlantic and Pacific Divisions; 36 pieces locomotive tires, for Mechanical Division; 12 barrels creosoting oil, 10 cases belt dressing, 16 kegs rivets, 8 cases mining machinery, for stock.

Joseph J. Cuneo, March 31, from Bridgetown, with 15,000 cases dynamite, for stock.

Prinz August Wilhelm, April 1, from New York, with 10 reels wire, for Atlantic Division; 15 kegs nails, for Mechanical Division; 393 pieces lumber, for Panama Railroad Company; 203 cases window glass, 55 kegs nuts, 520 kegs nails, 850 pieces steel bars, 50 bundles steel bars, for stock.

Panama, April 1, from New York, with 6 crates stoves, 17 reels copper wire, 29 cases lock material, for Atlantic Division; 21 cases lock material, 5 cases pumps and motors, 25 cases rubber boots, 14 kegs bolts, 13 cases bolts, 13 cases lock castings, for Pacific Division; 1,000 bundles bolts, 118 crates silica bricks, 11 cases fire brick tile, for Mechanical Division; 5 pieces dredge buckets, for Division of Fortifications; 25 cases drugs and sundries, for Sanitary Department; 50 cases paper napkins, 15 cases range parts, 50 crates ranges, 25 crates paste, 30 cases wrenches, 15 bundles straw boards, 20 crates emery cloth, 8 barrels sulphate copper, 10 cases belt dressing, 500 cases garbage cans, 60 pieces pipe and fitting, 40 kegs wire nails, 28 bundles toe calks, 15 cases insulated wire, 600 rolls roofing paper, 59 crates galvanized buckets, 42 cases ink, 25 cases metal polish, 20 bales packing, 10 bundles shovels, for stock; 105 pieces snubbing posts, for Atlantic Division; and a miscellaneous cargo, the whole consisting of 3,245 packages, weighing 365 tons.

Lewis Luckenbach, April 3, from New York, with 116,352 bags cement for Atlantic and Pacific Divisions.

Metapan, April 4, from New York, with 7,200 pieces tiling, for Panama Railroad Company; 15 pieces castings, for Atlantic Division; 17 packages hardware, 12 cases gaskets, 21 cases tape fuse, 6 cases insulated tape, for stock.

Atenas, April 4, from New Orleans, with 92 cases sledge handles, 71 packages hand cars, 8 cases cotter pins, 6 crates water closets, 1,071 pieces lumber, 112 pieces piling, for stock; 2,698 pieces lumber, for Mechanical Division; 418 pieces lumber, for Atlantic Division; 142 barrels brick, for Panama Railroad Company.

Tivives, April 6, from New York, with 75 cases copper bars, for Pacific Division; 18,800 pieces tiling, for Panama Railroad Company; 20 crates pipe, 132 pieces lumber, for stock.

Stages of the Chagres.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, APRIL 17, 1912. No. 34.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of March is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Operations in Collecting Scrap.

Following the receipt of two locomotive cranes, which are being assembled on the track through the yard at Dock No. 14, Cristobal, the sorting and loading of the French scrap will be expedited, to make room for the greater amount of material which will be sent to the yard as the result of extended operations along the line of the Panama railroad. Forces of men are now gathering the scrap at Gorgona, San Pablo, Empire and Paraiso, and near Bohio a force has started to dismantle the big ladder dredges abandoned there, which were the largest pieces of equipment which the French canal construction company used.

Two wooden scows, of 30-tons capacity each, are building at Gatun for hauling material out of the lake district. A considerable quantity is in reach now, at Bohio, Frijoles (on the old line of the Panama railroad), Tabernilla and Vamos-vamos, bordering the old French channel. The scows will be towed by a gasoline launch, 35 feet long and of 9-foot beam, equipped with a 35-horsepower engine.

Records for 70- and 45-Ton Shovels.

Steamshovel No. 120 (T. P. Kelleher, engineer, and L. P. Bonnell, craneman), working in the west borrow pit for Gatun Dam, loaded on April 2nd 195 large dump cars containing a total of 3,315 cubic yards of material, in the working day of eight hours.

This is the highest daily output for a 70-ton shovel since the commencement of operations by the Commission. The previous highest daily output was 2,900 cubic yards, made by steamshovel No. 124 on March 14, 1912. The crew now working on steamshovel No. 120 and making the above record have also the daily record for a 45-ton shovel. On December 6, 1910, with steamshovel No. 51, they loaded 2,448 cubic yards at Gatun Spillway. For the month of March the place measurement for Shovel No. 120 exceeded the car measurement by 7 per cent.

March Borrow Pit Excavation for Gatun Dam.

The six steamshovels (five 70-ton and one 91-ton), working in borrow pits for the Gatun Dam, excavated a total of 271,715 cubic yards, place measurement, in 147 shovel days, or an average of 1,848 cubic yards a day per shovel.

Four of these shovels worked in the west borrow pit and one in the red clay borrow pit the entire month of 26 working days. The sixth shovel worked 17 days, from March 12 to 30, inclusive, in the New Gatun hard rock storage dump.

The following table classifies the material excavated and indicates the yardage of each shovel by place measurement:

Steamshovel.	Earth.	Rock.	Total.
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*
116	4,545	40,907	45,452
117	10,014	26,402	36,416
120	14,163	37,337	51,500
132	49,794	2,621	52,415
134	13,142	13,200	26,342
257	8,939	50,651	59,590
	100,597	171,118	271,715

For the month of March, the place measurement exceeded the car measurement by over 2⅓ per cent.

Upper Approach Wall at Miraflores Locks.

The placing of concrete for the superstructure of the cellular approach wall at the upper, or north end of Miraflores Locks was begun on April 15, when two portable mixers began supplying material to the forms for the lateral and longitudinal girders which will support the solid portion, 39 feet 9 inches in length, at the outer end. This part of the wall is to be supported on three transverse girders, 59 feet long by 3 feet 10 inches wide by 7 feet high, resting on 14 piers of solid concrete, 7½ feet in diameter and based on solid rock. The first and third of these girders, counting from the outer end, will each contain 6,780 pounds of high carbon reinforcing steel in the shape of deformed rectangular bars from ⅞ to 1¼ inches in diameter, and the second or center girder under the solid part will contain 7,160 pounds. The ordinary cross girders, on which will rest the counterforts at intervals of 15 feet, are to contain 6,150 pounds of steel. These have the same length and depth but are 3 feet thick.

The structure of this wall, described in THE CANAL RECORD of October 18, 1911, is essentially the same as that of the upper approach wall at Pedro Miguel, with the exception that the latter rests directly on rock, without the use of piers or girders. Not all of the piers have been sunk and filled on account of railroad tracks across the site of the wall but the removal of the tracks and the placing of the remaining caissons will be carried on simultaneously with the construction of the superstructure.

Record for Culebra Cut Excavation.

On Thursday, April 11th, 44 steamshovels working in the Pedro Miguel, Culebra and Empire Districts of the Central Division excavated 68,505 cubic yards of material, car measurement, during the working day of eight hours. This is the highest daily record of excavation in the Culebra Cut proper.

Progress in Erection of Lock Gates.

The west leaf of the upper guard gate in the east chamber of the upper level at Gatun Lock was hung in its final position on April 15. The operation consisted of moving the leaf horizontally 4 feet and lowering it about 8 inches from the foundation on which it had been erected, until a hemispherical cavity in the heel of the leaf fit over the pintle, which is a corresponding solid hemisphere of nickel steel, 16 inches in diameter, set in the floor of the chamber at the base of the wall. At the top of the gate a pin, 10 inches in diameter, engages a yoke casting, with its bearings anchored in the concrete wall, completing the hinge. The leaf swings about 9 inches above the floor of the lock and the sill against which the bottoms of the leaves will rest when the gate is closed rises 4 feet above the floor. Each of the upper guard gate leaves is 54 feet 8 inches high.

When hung the leaves are swung back against the wall, fitting in a recess so made that when the gate is open the outer sides of the leaves are one foot back of the faces of the walls, between which is a clearance of 110 feet. The hanging is practically the end of the contractor's work, as the installation and adjustment of the machinery for closing and opening the gates is to be done by the First Division of the Chief Engineer's Office. The first set of machinery for the operation of gates was completed on January 13, 1912, except the strut connection, which should not be installed until the gate is completed. The second set of machinery has been shipped and will be installed and tested on the other leaf of the upper guard gate.

A new double-span bridge, for simultaneous operations in erecting corresponding gates in the two chambers, has been erected over the site of the intermediate gates of the lower lock at Gatun and the erection of the skeletons for these gates will begin at once. The other, or original, bridge in use at Gatun Locks is over the site of the safety gates at the lower end of the upper lock, the skeletons for which are now about one-third completed. In the erection of the intermediate gates for this level, the completion of the skeleton and the

NOTES OF PROGRESS

(Continued.)

moving of the bridge to the lower safety gates occupied 54 working days.

At Pedro Miguel, where the second bridge, with accessory equipment, has been in use since the middle of December, one bridge has just been moved from the site of the lower safety gates, the skeletons for which are completed, to the site of the lower main gates. The only gates not under way at Pedro Miguel are the intermediate gates, to which the bridge will be moved from the upper main gates within a few weeks, and the lower guard gate in the west lock. No work will be done at Miraflores until all erection, with the exception of the riveting, has been completed at Pedro Miguel.

The force of the McClintic-Marshall Company on the Canal work numbers now approximately 1,000 men, evenly divided between the two Divisions.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 86 per cent completed, 195,413 cubic yards, out of a total of 225,000, having been placed at the close of work on April 13. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
April 8	64	3.30	1
April 9	188	8.00	2
April 10	180	8.00	2
April 11	172	7.30	1
April 12	148	7.00	1
April 13	124	7.00	2
Total	876	41.00	1.5
Previously reported	194,537		
Grand total	195,413		

Ancon Crusher

A statement of the rock crushed at Ancon quarry during the week ending April 13, follows:

DATE.	Hours worked.	Cubic Yards.
April 8	6.25	2,458
April 9	7.00	2,835
April 10	7.40	2,872
April 11	8.05	2,696
April 12	5.50	2,443
April 13	6.05	2,728
Total	40.05	16,032

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending April 13, follows:

DATE.	Hours worked.	Cubic Yards.
April 8	3.45	1,880
April 9	4.00	1,504
April 10	3.15	1,330
April 11	4.25	1,930
April 12	3.40	1,872
April 13	3.05	1,886
Total	22.10	10,402

Erection of Dynamite Wharf at Mindi.

All of the foundation piles for the dynamite wharf at Mindi have been driven and the superstructure is to be completed within the next ten days. The piles are arranged in rectangular rows, spacing 8 feet each way and those next the channel were driven by floating piledriver *No. 1*, the others, beyond the reach of this equipment, being forced down with a swinging hammer. Extending over each row of piles is a 12-inch by 12-inch cap, and the flooring, 3 inches thick, will rest on the stringers, 3 by 12 inches, which in turn will rest on the caps.

The quarantine report for the port of Colon during the month of March shows the number of persons admitted to the Isthmus "in transit" as 3,836, practically all of whom are tourists.

PERSONAL.

Maj. Robert E. Noble is a passenger on the United Fruit Company ship from New Orleans scheduled to arrive at Colon on April 18.

CONCRETE WORK IN THE LOCKS

Over 83 per cent of the concrete for the locks is in place, the amount at the close of work on April 13 being 3,527,062½ cubic yards, out of a total of approximately 4,199,400. A total of 26,990 cubic yards of concrete was laid in the locks during the week ending April 13.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 13 being 1,860,768½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending April 13, and of the total, follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

Grand total	....	....	.....	....	....	.....	....	1,860,768½

The 262 yards shown for the two portable mixers are reinforced concrete, and were placed on the following days: April 8th, 32; April 9th, 33½; April 10th, 29; April 11th, 51, April 12th, 44½; April 13th, 72.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 99 per cent completed, 832,115 cubic yards, out of a total of 837,400, bucket measurement, having been placed at the close of work on April 13. The record for each of the six 8-hour working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.

MIRAFLORES LOCKS.

Over 61 per cent of the concrete for the system of two twin locks at Miraflores was in place on April 13, the total amount on that date being 834,179 cubic yards, bucket measurement, out of a total of approximately 1,362,000. The record for each of the six 8-hour working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Large stone.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The Gatun Woman's Club held an election of officers at the meeting on Thursday, April 11, when the following were chosen: President, Mrs. E. G. Neville; vice president, Mrs. A. F. Gabler; secretary, Mrs. W. J. Allen; treasurer, Mrs. J. B. Hanna. Capt. Jack Crawford entertained the members with an informal reading of several of his poems. The Gatun Woman's Club was organized on October 4, 1907, with Mrs. Chester Harding as president. Its activities have been mainly civic and social. Programs of varied interest have been carried out at the meetings during each year, and several entertainments have been given at the clubhouse. In 1909, the club organized and maintained a kindergarten, and the following year, it took the initiative steps in raising the money for the establishment of a public playground. It has arranged and carried out Christmas treats for the children of the Spanish laborers in New Gatun.

The Pedro Miguel Club held a card party at the social hall in that village on the night of April 6 to mark the occasion of the club's disbanding. This was the third of the women's clubs to be organized on the Canal Zone, the date being October 2, 1907. In 1908 a library was started. In 1910 the club joined with the Paraiso club in entertaining the president and second vice president of the General Federation, and in 1911 these two clubs entertained the Canal Zone Federation at the mid-winter meeting at the Hotel Tivoli. In 1911 the club withdrew from the Federation, and became a card club.

International Brotherhood of Steam Shovel and Dredge Men.

Local No. 19, I. B. of S. S. & D. M., will hold its regular meeting on Sunday, April 21, at 12.15 p. m. in Empire lodge hall. All members are requested to attend as business of importance is to be transacted.

Civil Service Board.

Hereafter all mail for the Isthmian Civil Service Board should be addressed as follows: Isthmian Civil Service Board, Culebra, Canal Zone.

In communications by telephone the Chairman's office should be requested from Empire exchange and the branch exchange operator in the Chairman's office should be asked to make connection with the Civil Service Board.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on April 24. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8.00 a. m., on April 24, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their capacity properly to operate an automobile, and must have the automobile with them.

The ladder dredge *Corozal*, which arrived at Balboa from Scotland on March 27, began work in the Pacific entrance on April 15.

CANAL WORK IN MARCH.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z. April 15, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of March, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	254	1,712,225	149 079	1,861,558
Work excavation, wet	Cubic yards	428,626	....	404,939	833,565
Total work excavation	Cubic yards	428,880	1,712,225	554,018	2,695,123
Plant excavation, dry	Cubic yards	....	24,552	....	24,552
Plant excavation, wet	Cubic yards	....	....	83,340	83,340
Total Plant excavation	Cubic yards	....	24,552	83 340	107,892
Total Canal Excavation	Cubic yards	428,880	1,736,777	637,358	2 803,015
Material placed in dams	Cubic yards	471,933	....	110,822	582,755
Concrete placed in locks and dams	Cubic yards	35 338	....	93,037	128,375
Explosives used	Tons (Gross)	154.99	238.91	34.15	428.05
Rock drilled	Feet	33,362	459,351	64,847	557,560
Tracks removed	Miles	....	15.73	....	15.73
New tracks laid	Miles	2.65	21.50	4 48	28.63
Rock crushed	Cubic yards	47 282	....	98,500	145,782
Cement used	Barrels	45,201	80	95,125	140,406
New roads built	Miles	0.19	....	....	0.19
Water mains laid	Feet	23,689	2,663	15,879	42,231
Sewers laid	Feet	985	....	....	986
Open drains and ditches dug	Feet	24,086	56,876	9,226	90,188
Average daily force	....	6 595	8,352	6,206	21,153
Average rainfall	Inches	0 61	0.05	0.01	0.15

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the Division Engineers, the inspection being cared for by this subdivision. Work was continued on the grinding of fixed irons and preparing the valve chambers for the installation of the valves, which work is being done under supervision of this office. This subdivision is also charged with general inspection of the masonry work of all the locks.

LOCK GATES AND PROTECTIVE DEVICES.

Shop Work in the United States—Up to March 20, a total of 49,030 tons of structural steel had been accepted at the rolling mills, or about 95 per cent of the total, of which 2,098 tons were accepted between February 20 and March 20; and a total of 28,923 tons of riveted structural material was shipped from the Rankin shops, or about 56 per cent of the total contract weight. Of this last item, 2,172 tons were shipped between February 20 and March 20. In addition to these quantities, a total of 1,054 tons of riveted work was shipped to replace in part the 1,419 tons lost on the steamship *Moldegaard.* On March 20, about 3,000 tons of riveted material remained in the yard at Rankin ready for shipment.

The following are details of material shipped up to March 20, 1912:

Gatun Locks—Practically all material for the 20 leaves in the upper chambers was shipped; also about two-thirds of the material in the intermediate gates, and one-third in the lower guard gates of the lower chamber. About 20 per cent of the gates in the intermediate lock was also shipped. As the gates in the upper and lower chambers are identical, it is proposed to use, for erection in the lower chamber, a part of the material originally intended for the upper lock.

Pedro Miguel Locks—Practically all of the material for the gates in these locks was shipped.

Miraflores Locks—Practically none of the material for the gates in these locks was shipped.

The shipment of miscellaneous parts, castings, handrailings, piping, etc., proceeded satisfactorily.

LOCK GATE ERECTION.

Gatun—Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive: The work on these gates during the month consisted mainly in fitting and securing the end reaction castings at the ends and the jaw plates at the top of the gates, also in hanging some of the manhole covers. At the end of the month the reaction castings and the wedge fillers between them and the skin plates were adjusted and bolted up on the quoin ends of leaves Nos. 37 and 38. The rivets through the castings, the wedges and other rivets adjacent thereto were riveted up in 11 vertical panels out of 13 in leaf 38, and one panel in leaf 37. On leaves 39 and 40, the castings were attached to the quoin ends and were being adjusted. At the miter ends of leaves 37 and 38, the end plates were ground off for attaching the castings. In leaves 39 and 40, this work was still in progress.

Upper gates, upper lock, 77 feet high, leaves 33 to 36, inclusive: During the month the work consisted in bolting, reaming and riveting the sheathing plates. About five-sixths of the reaming was completed. but only one-quarter of the riveting was done.

Middle gates, upper lock, 77 feet high, leaves 29 to 32, inclusive: All material was in place, except footwalks, etc., and castings. The skeleton was practically riveted up, but not the sheathing plates. The bridges in the upper lock were moved March 26 into position for erecting the safety gates, and the erection of a new set of bridges was started in the lower lock.

Pedro Miguel—Upper guard gates, 54 feet 8 inches high, leaves 50 to 53, inclusive: The end plates, etc., on these leaves were riveted during the month; very little other riveting was done. The riveting was about three-quarters completed, considering the four leaves as a whole. A small part of the end plates at the quoin ends of two of the leaves were ground for the reception of the reaction castings. Two sheathing plates were still missing. but the remainder of the material was in place, except for the footwalks, various fittings, and the castings.

Upper gates, 79 feet high, leaves 54 to 57, inclusive: The skeleton for these leaves was erected before March 1. Since then very little work was done on thm. No sheathing plates were attached, but a part of the bent end plates were erected and riveted. About one-third of the holes for the rivets connecting the girders to the vertical frames were reamed out and a small part of these rivets driven.

Safety gates, 79 feet high, leaves 62 to 65. inclusive: The skeleton in these four leaves was practically erected prior to March 1, since which time about one-half the sheathing plates were attached, but none of the rivet holes in them were reamed out or rivets driven. The rivet holes connecting the skeleton to the vertical framing were practically all reamed and about three-fourths of the rivets driven.

The total tonnage of the lock gates erected on the Canal to April 1, 1912, without regard to its being fully riveted, was about 11,216 tons, out of a total of 58,000 tons, or about 20 per cent. Of this, 1,384 tons, or 2½ per cent, was erected during the month. The total number of field rivets driven was 533,172, or 9.3 per cent of the total, of which 107,439 or 1.9 per cent were driven during the month of March.

The tonnage erected was much less than during February. This reduction was due, in part, to the fact that during the month plates were mainly erected, while in February the heavier girders were put in place. The main reason for the slow progress made, however, was the fact that at Pedro Miguel the compressor plant could not furnish sufficient air for reaming and riveting on more than four leaves at any one time; hence, some of them remained practically at a standstill. The air plant at both Pedro Miguel and Gatun is being doubled in size, almost all of the extra plant having been placed, although some important parts had not yet arrived. Arrangements were also made to use the large electric reamers at Pedro Miguel.

LOCK GATE RECESS COVERS.

The material for all recess covers (80 in all) excepting the castings was shipped from the works at Trenton, N. J., and 56 of them were received on the Isthmus. Eighteen covers were put in place over the recesses at Gatun, of which 16 were riveted up and 8 fully aligned and grouted in. At Pedro Miguel, 12 were put in place and 11 riveted up, but none adjusted for alignment.

CHAIN FENDERS.

All shop drawings, including piping plans, were approved. Up to March 20, about 28 tons of structural material was inspected and released for shipment to the American Bridge Company. No shipments were made to the Isthmus. The test of the resistance valve will not be started until April 15, on account of the difficulties the contractors have experienced in getting steel castings for flanges, etc.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection as follows:

(1) *For the rising stem and cylindrical valve machines, purchased under Circular 614*—The two trial rising stem gate valve machines are now on the Isthmus, and the installation was nearly completed. They were practically ready for test preliminary to connecting valve stem to cross-head. These tests will be made during the month of April, and the machines will probably be erected complete with roller train and gate ready for complete test of valve. The parts of rising stem gate valve machines lost on the steamship *Moldegaard* were shipped during the month. Foundation bolts were being delivered for the 114 rising stem gate valve machines; also bulkhead bed plates. Castings and parts for these machines were being produced satisfactorily, and the work progressed rapidly.

Cylindrical valve machine No. 540, complete, except foundation material, previously shipped, was received during the month. and will replace the valve machine lost in the wreck of the steamship *Moldegaard*. Factory tests of cylindrical valve machine No. 559 were satisfactory, and machine was shipped. When received, this will be the first machine to apply on order for 118 cylindrical valve machines. Foundation material for the cylindrical valve machines was completed. Two more of these machines were erected at the works of the contractor the latter part of the month, and will undergo tests at once.

Foundation bolts and washers for the two 36-inch auxiliary culvert valve machines and two 60-inch auxiliary culvert valve machines were received during the month.

The insulation test of motors which was conducted on the Isthmus was concluded during the month, and on March 18 the General Purchasing Officer was authorized to make award to the General Electric Company for Items 2, Classes 3 and 4 (first alternative), 232 motors, at a total cost of $117,281. In addition to Class 4, Item 2, was added 12 motors for auxiliary culvert valve machines, at a total cost of $4,380. All motors are to be delivered complete by April 1, 1913.

On March 18, the General Purchasing Officer was authorized to make award to the Cutler-Hammer Mfg. Co., for Items 2 and 4, Class 5 of this circular, 232 limit switches, at a total cost of $11,368.

(2) *For the rack railway and other material purchased under Circulars 619, 635, 636-D, 647, 666, and 688*—Out of the 58 items under these contracts, 18 were 90 per cent or more completed. The work progressed satisfactorily.

(3) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, purchased under Circular 627*—No work was done on the installation of these machines, the same being held up owing to the work on any miter gates not being completed. The second miter gate moving machine, No. 37, and ratchet, was shipped from the United States on March 14. On February 9, award was made to the Wheeling Mold and Foundry Company for 90 miter gate moving machines, to be delivered complete by April 1, 1913.

The shipment of the two motors for the sample miter gate moving machines was delayed on account of defect in two gears.

Casting operations were in progress, and completed approved drawings were received from the contractor covering the 90 miter gate moving machines.

(4) *For the gate and girder hoisting machinery for the emergency dams, purchased under Circular 616*—Satisfactory progress was made on this machinery during the month.

(5) *For the Gatun hydro-electric station, purchased under Circular 648*—The status remains the same as reported last month. Work progressed satisfactorily on various items of the three classes under this circular.

(6) *For electric towing locomotives, purchased under Circular 650*—Working drawings were being prepared for Class 1, Item 1, one trial locomotive, at the works of the contractor. Award was not made for the remaining 39 locomotives.

(7) *For locomotive cranes, derricks and hoisting engines for erection plant of machinery and electrical equipment, purchased under Circular 662*—Two 15-ton locomotive cranes were received on the Isthmus on February 3 and two more were received on March 9, leaving four of these cranes to be delivered. All cranes are to be delivered complete on or before April 25, 1912.

The following is a summary on the work accomplished in the field by the erecting forces:

ATLANTIC DIVISION LOCKS.

The force installing machinery and electrical equipment on the Isthmus assembled 1,320 feet of towing track, including the assembly of rack sections, channels, anchor bolts, "T" rails, and bonding of same. (This does not include installation of conductor rails, conductor slot covers and brackets.) A total of 1,908 feet of towing track were assembled to date; 216 feet of track were "frozen" in place, making a total of 420 feet to date. A test truck having the essentials similar to the truck of the locomotive was completed and a test of the rack sections installed will be made with the same. The lining of movable seals and fixed irons on the rising stem valve chambers, Nos. 256, 257, 260 and 261 was carried forward, and similar work was commenced on the intake valves.

During the month 278.7 cubic yards of concrete were placed; 191.8 for locomotive track, and the remainder, 86.9, in decking of valves Nos. 260 and 261 and miscellaneous places.

Temporary light standards, consisting of piling, were installed on the middle and side walls at Gatun for the purpose of studying the requirements for lock illumination and the testing of reflectors of regular and special types.

PACIFIC DIVISION LOCKS.

Most of the work in the Pacific Division Locks was of a preparatory nature. Some miter gate recess covers were installed, which permitted the towing locomotive track construction to commence.

EMERGENCY DAMS.

The inspection work in the United States progressed satisfactorily during the month. Up to March 20 a total of 753 drawings, large and small, covering turning and wedging machinery, structural material, etc., were completed and approved. The general condition of the work was as follows:

At the Ambridge plant of the American Bridge Company, for the first dam, 12 wicket girders and the horizontal truss were completed. The vertical trusses for the first dam were 75 per cent punched, 25 per cent assembled, 15 per cent riveted, and 5 per cent finished. For the second dam, one horizontal truss was completed; 12 wicket girders were 50 per cent punched, 25 per cent assembled, and 15 per cent riveted; none were finished. Both vertical trusses for the second dam were

75 per cent punched, 25 per cent assembled, 15 per cent riveted, and 5 per cent finished.

At the Pencoyd plant of the American Bridge Company, all the structural steel for the gates of the first two dams was completely punched and 75 per cent painted, and the other 25 per cent was being sand-blasted preparatory to painting. Eighty-five per cent of the wheel castings for four dams was machined and was ready for assembling. All axles for the four dams were ground and ready to be forced into the wheels. Four manganese bronze discs were received and one completely machined. All castings for the turning and wedging machinery were 97 per cent completed for two dams, and 75 per cent completed for the third and fourth dams. Rack and track segments and all forgings for the first two dams were completed.

Up to the 20th of March, no material under this contract was shipped from the United States.

An inspector was sent from the United States to investigate the general conditions at the emergency dam sites and to do all field work necessary before erection begins. Contractors' engineers who will have charge of the erection were also on the ground awaiting the first shipment of material, which is expected to arrive the early part of April.

AIDS TO NAVIGATION.

Surveys—Levels were taken at all gas buoys from Mamei, P. I., to Bas Obispo, P. I., the center line of Range No. 1-2, Gatun Lake Section, was prolonged and the front tower located in the south middle approach wall. All gas buoy locations from Gatun to Mamei were checked. The latitude and longitude of the towers forming Range 5-6, Atlantic Division, and Range 13-14, Pacific Division, were determined. Field notes were being plotted.

Construction—Pacific Division. Range 9-11. Same status as when last reported.

Pacific Division. Range 1-2. The door and windows were hung, and the brass lantern frame and curved glass were placed in rear tower. Otherwise, status of range is same as reported last month.

Pacific Division. Range 13-14. All windows and doors of towers in place, and the brass lantern frames and curved glass were placed in both towers.

Atlantic Division. Range 5-6. The spiral reinforced concrete stairway of the rear tower was completed, and the hanging of the door and windows commenced. The concrete newel post in the front tower was carried up to its full height of 53 feet, and the entrance stairs and vestibule were completed. Drain tile was laid around the footing of the tower.

Gatun Lake Section. Range 21-22. Same status as when last reported.

Gatun Lake Section. Range 24-25. Front Tower. The walls were carried up to their final height of 28 feet 10 inches to focal plane, and the entrance steps and vestibule were completed. *Rear Tower.* The concrete walls were carried up the final height of 26 feet [illegible] inches to focal plane.

Gatun Lake Section. Range 1-2. Front Tower. Two reinforced beams, 8 feet deep and 38 feet span, were built in the south middle approach wall of the Gatun Locks, upon which the front tower will be founded.

General plant of lighthouse subdivision at Balboa—Forty reinforced concrete stair treads, 15 radial beams, 9 stair strings, 8 architrave moldings, 8 window sills and 8 lintels were cast at this plant during the month. Nineteen reinforced concrete beacons were also cast. The forms for the reinforced concrete roof for above were finished, and the casting of those units was commenced. The structural steel for five concrete steel beacons for the Pacific Division was delivered by the Gorgona shops.

Two wooden lighters, 30 feet long and 12 feet 6 inches beam, were under construction on the lake shore at Gatun.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month two shovels were engaged on borrow pit excavation for the locks backfill and for construction tracks, 62,663 cubic yards of material being removed.

Backfill—Backfilling behind the side and center walls of the middle and lower locks was continued. The quantity placed during the month aggregated 60,817 cubic yards, distributed as follows: East wall, 15,529 cubic yards; west wall, 40,616 cubic yards; and the center wall, 4,672 cubic yards, which was 73.9 per cent of the entire backfill.

Receiving and Issuing Material—The receipts of rock exceeded the consumption by 17,123 cubic yards, and the consumption of sand and cement exceeded the receipts by 7,685 cubic yards and 7,419 barrels, respectively.

Mixing and Placing Plants—Plant No. 1 and all portable mixers were kept in satisfactory operation during the month. Plant No. 2 was shut down on March 11, and the work of dismantling commenced on March 12.

Power Plant and Pumps—The operation of the power plant and pumps was satisfactory.

Iron and Steel Work—During the month 325 tons of fixed steel and 151,528 feet of reinforcing rods were placed; 17 tons of reinforcing rails and 30.1 tons of electric return track were laid.

Concrete Work—There was an increase of 868 cubic yards in the amount of concrete laid as compared with the figures for the preceding month. The daily average for the 26 working days was 1,059 cubic yards, as compared with a daily average during February of 1,111 cubic yards. The total amount of concrete placed during the month was 27,532 cubic yards. The place measurement exceeded the bucket measurement by 40 cubic yards. Of the total concrete, 4,622 cubic yards were placed in the upper lock, 1,842 cubic yards in the middle lock, and 21,068 cubic yards in the lower lock. The concrete work for the entire lock system was 92.51 per cent completed at the end of March.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)..	9.00	8.50
Average number of hours per day worked, per strand of cableway, laying concrete and large stone (actual working time)	2.48	....
Average number of mixers per day	4.00	1 00
Average hourly output per mixer (actual working time), cu. yds.	57.31	62.92
Average amount of concrete and large stone laid per hour, per strand of cableway (actual working time) cu. yds.	36.57	....
Large stone laid, cu. yds	....	....
Concrete laid, cableways, cu. yds.	21.512.00	....
Concrete laid, crane and derrick cu. yds.	3.572.00	....
Concrete laid, derricks, cu. yds..	....	1,008.00
Concrete laid, portable mixers..	....	1,400.00
Total amount of concrete and large stone laid, cu. yds.	25,084	2,408

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 471,933 cubic yards, making the total amount in place 18,522,286 cubic yards. On April 1 the dam was 86.4 per cent completed.

Hydraulic Fill—The dredges increased the hydraulic fill by 242,874 cubic yards. The total hydraulic fill in place March 31 was 9,395,468 cubic yards.

Dry Fill—The material received from the steamshovels, amounting to 229,059 cubic yards, was placed on the north and south toes of the dam, east and west of the Spillway, making the total dry fill in place 9,156,818 cubic yards.

GATUN SPILLWAY.

Excavation—During the month 254 cubic yards of rock were excavated by hand in preparing foundations, increasing the total on March 31 to 1,589,108 cubic yards.

Backfill—Backfilling was not extended during the month, the total remaining at 16,236 cubic yards.

Concrete—The work of placing concrete was continued. The amount placed during the month aggregated 7,806 cubic yards, which increased the total to 194,478 cubic yards. The concrete work for the spillway was 86.43 per cent completed.

HARBOR AND CHANNEL SECTION.

Dredging from Ocean to Mindi—Five dredges removed 144,265 cubic yards of earth and 40,343 cubic yards of rock from the canal prism. In addition, the dredge *Chagres* removed 511 cubic yards of earth and 2,181 cubic yards of rock for the dynamite dock, and 2,785 cubic yards of earth from the fortification rock and sand dock. On March 31, 40 feet of water could be carried from zero to zero plus 2,800 feet; 35 feet to Mile 3 plus 3,650 feet; 30 feet to Mile 3 plus 3,700 feet; 20 feet to Mile 5 plus 2,438.9 feet, the point of intersection with the French canal.

Approach to Gatun Locks—Two dredges removed 236,380 cubic yards of earth and 7,638 cubic yards of rock from the canal prism.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day, hours	8.00
Average number of hours worked per day..	3.97
Average number of cubic yards per hour of working day	227.32
Average number of cubic yards per working hour	458.25
Maximum day's output (4 hrs. 30 min.) Cu. Yds	2,050.00
Average day's output (26 days) Cu. Yds...	1,818.54
Average hourly output (164 hrs. 35 min.) Cu. Yds	287.22
Total output for the month, Cu. Yds	47,282.00

SAND, STONE, AND CEMENT SERVICE.

In connection with this service plant steamed 3,550 miles, handled 515 barges, and carried 2,645 passengers.

WEST BREAKWATER, COLON.

During the month 48,401 cubic yards of material were excavated and dumped from the trestle. The double track trestle was extended 596 linear feet. On April 1 the trestle extended 10,164 linear feet from shore. Nine thousand and sixty-eight cubic yards of Porto Bello rock were placed on the breakwater, making a total of 41,856 cubic yards used for that purpose to April 1. The total amount of rock dredged and dumped on the West Breakwater to March 1, 1912, was 920,533 cubic yards. During the month 50,162 cubic yards of rock were dredged and dumped, increasing the total to 970,695 cubic yards.

The amount of dry fill placed to April 1 was 710,246 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work.

Work was continued on the Colon street improvements.

Central Division.

During the month of March the total amount of material excavated in the Central Division was 1,736,777 cubic yards, of which 374,100 cubic yards were classified as earth and 1,363,677 cubic yards as rock. Of this quantitiy, 1,702,125 cubic yards were removed by steamshovels, 24,496 cubic yards by cranes, and 100 cubic yards by hand. Contractors removed 8,016 cubic yards by hand and 2,040 cubic yards by steamshovel. Of the total, 1,712,225 cubic yards consisted of primary excavation for the canal prism, and 24,552 cubic yards were gravel removed and incline excavation outside of the prism.

The daily average number of steamshovels at work during the month was 46.27, and the total number of shovel days was 1,203, as compared with 43.75 at work during the month of February, with 1,050 shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material		Av. No. of shovels at work	W'kg days.	Av. yards per shovel day
		Rock.	Earth.			
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*			*C. Y*
1911: March .	1,961,204	1,478,558	482,646	50 63	27	1,434.70
1912: March .	1,702,125	1,355,061	347,064	46 27	26	1,414.90

Rainfall at Empire: 1911, 0.20 ins.; 1912, 0.01 ins.

The above table shows the average output per shovel to be 1.38 per cent greater in March 1911, than in the corresponding month of the present year.

The total amount of the material excavated from the prism in the Culebra Section of the Central Division in March, 1912, 1,539,618 cubic yards, was the highest record in that section for the month of March, except March, 1911, when 1,728,738 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division, according to the revised estimate of July 1, 1911, was 101,801,296, and up to April 1, 1912, 89,999,246 cubic yards had been removed, leaving 11,802,050 cubic yards to be removed in order to complete all excavation in the Central Division. From these figures it will be seen that 88.40 per cent of all excavation in the Central Division had been completed up to the close of the month of March, and 11.60 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of March operations was as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	77,808,046
To be completed	11,635,959

CHAGRES SECTION.	*Cu. Yds.*
Completed	12,191,200
To be completed	166,091

From the above figures it will be seen that the Culebra Section, locally known as the "Culebra Cut," was 86.99 per cent completed, with 13.01 per cent to be completed; the Chagres Section was 98.66 per cent completed, with 1.34 per cent to be completed.

During the month 7,650 cubic yards of material were dumped in the embankment for the new roadbed for the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,154,443 cubic yards. During the month 1,377 cubic yards of rock and earth were furnished for the Colon breakwater, and 39,007 cubic yards to the Pacific Division for backfill at Pedro Miguel locks.

The daily average number of laborers at work on the whole Division during the month was 7,541 and the daily average number of gold employes was 811.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 149,079 cubic yards, of which 67,419 cubic yards were classified as earth, and 81,660 cubic yards as rock.

Filling and Embankment—During March, 86,252 cubic yards of dry filling were added to the prism of the west dam at Pedro Miguel, increasing the total amount of material in place at the close of the month to 478,370 cubic yards. The backfill at Pedro Miguel was increased by 18,207 cubic yards, the total amount in place at the end of the month amounting to 551,438 cubic yards.

At Miraflores, 24,570 cubic yards were added to the dry fill in the toes of the west dam, increasing the total amount in place at the end of the month to 1,146,342 cubic yards. The backfill was increased by 48,160 cubic yards, the total aggregating 473,744 cubic yards at the end of the month.

Pedro Miguel Lock—Excavation of the canal prism between the Pedro Miguel and Miraflores Locks was continued, the spoil being used for filling the core of the west dam. The east rock toe of the dam was continued toward the core with Lidgerwood trains of rock from the Culebra Cut. The amount of iron placed in the masonry aggregated 188,872 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 9,459 cubic yards, as compared with 12,639 cubic yards during February. The concrete was placed as follows: 50 cubic yards in the northeast wing wall; 3,834 cubic yards in the north center guide wall; 845 cubic yards in the west wall; 950 cubic yards in the east wall; 1,552 cubic yards in the center wall; 80 cubic yards in the southeast wing wall; and 2,020 cubic yards in the floors.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	3.75
Average number of mixers per day	5.15
Average hourly output per mixer (actual working time) Cu. Yds	16.07
Large stone laid, Cu. Yds	
Concrete laid, Cu. Yds	9,459.00
Total concrete laid, Cu. Yds	9,459.00

Average number of mixers, 5.15, consisted of two 2-cubic yard and five ½-cubic yard mixers. Placing plant consisted of locomotive cranes and derricks, averaging 4.23 units per day.

Miraflores Locks—The McClintic-Marshall Construction Company finished the re-erection of the fourth and final chamber crane, which completed their contract in connection with the moving from Pedro Miguel, and re-erecting at Miraflores, of two berm and four chamber cranes. Dry excavation in the lower lock and canal prism immediately south of the same, also filling on the east and west toes of the west dam were continued during the month. Work was continued in connection with backfilling behind the east and west lock walls. The sinking and filling of concrete caisson foundations for the north center guide wall was continued. During the month the amount of iron placed aggregated 587,922 pounds.

Concrete Work—The total amount of concrete and large stone laid at Miraflores was 83,722 cubic yards, as compared with 63,893 cubic yards during February. The concrete was placedas follows: 2,428 cubic yards in the north center guide wall; 30,044 cubic yards in the east wall; 23,420 cubic yards in the center wall; 23,137 cubic yards in the west wall; and 4,677 cubic yards in the floors.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxillary Plant.
Length of working day (hours)	8.00 & 12.00	8 & 12
Average number of hours per day worked laying concrete and large stone (actual working time)	6.12	6.12
Average number of mixers per day	7.92	9.50
	Cu. Yds.	*Cu. Yds.*
Average hourly output per mixer (actual working time)	37.67	23.74
Average amount of concrete and large stone laid per hour, per berm, or chamber crane (actual working time)	63.72	....
Large stone laid	....	....
Concrete laid	61,078.00	22,644.00

Two berm cranes, one chamber crane, and two 2-cubic yard auxiliary mixers worked 12 hours per day.

Permanent plant consisted of four berm cranes, daily average 4, and a daily average of 3.2 chamber cranes.

Auxiliary plant consisted of two 2-cubic yard mixers, daily average 2; nine ½-cubic yard mixers, daily average 7.5, and three locomotive cranes and derricks, daily average 1.54.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT		Total	Remarks.
		Earth	Rock	Earth.	Rock		
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 51,138 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, roads and oil pipe lines wete maintained and extended as required to facilitate construction work.

Work was continued on the Panama street improvements.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours)	18.00
Average number of hours per day (actual working time)	11.67
Average number of cubic yards crushed per hour working day	210.50
Average number of cubic yards crushed per working hour	424.50
Total output for the month, cubic yards	98,500.00

Relocation of Panama Railroad.

During the month 63,035 cubic yards of material were excavated, increasing the total excavation at the close of the month to 10,161,227 cubic yards, and 68,025 cubic yards of material were placed in embankment, increasing the total for this purpose to 16,384,136 cubic yards.

No temporary trestle was driven during the month. Work on bridges and culverts was continued. At the end of the month there were 64,512 linear feet of 70-pound and 134,290 linear feet of 90-pound track. The force averaged 597 men.

Quartermaster's Department.

LABOR.

The force reports show practically no change in the number of laborers employed.

QUARTERS.

The quarters situation remains practically the same as reported last month.

MATERIAL AND SUPPLIES.

The value of material received from the United States during the month was $1,643,621.59. Supplies during the month were delivered by 45 steamers, the total weight of cargo aggregating 42,984 tons, exclusive of 1,919,952 feet B. M. yellow pine lumber, 2,772,691 feet B. M. Douglas fir lumber, 22,835 feet B. M. white oak lumber, and 1,649 pieces of piling.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens and the line hotels showed a net profit of $4,061.79. The operation of the Hotel Tivoli showed a net profit of $13,876.32, and there was a net profit on restaurants, penitentiary, tugs and dredges of $308.00. The net profit on subsistence operations was $18,246.11.

Department of Civil Administration.

COURTS.

During the month two civil cases were disposed of in the Supreme Court, 40 civil and 44 criminal cases in the Circuit Courts, and 102 civil and 614 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for March amounted to $375,605.68, and the fees to $1,790.31. Receipts from stamp and card sales, and newspaper postage aggregated $8,289.38. The total collection of revenues made by the Division was $25,458.98, and the collection on account of court fines, costs and fees, $3,332.93.

Twenty-seven vessels entered at and 24 vessels cleared from the port of Ancon; and 22 vessels entered at and 25 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 639, of whom 597 were men and 42 women. Twenty-two nations, or 45 separate states and dependencies, were represented. The total number of arrests for the month was an increase of 20 as compared with the month of February. Eight convicts were committed to the penitentiary, and 12 were discharged, leaving 145 in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,900.09, and the value of their work on Canal Zone roads $2,652.80.

DIVISION OF FIRE PROTECTION.

Sixty-five fires were reported in the Canal Zone during the month, as compared with 48 in February. The damage to Commission property was $470.00, and to private property $2,147.00.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average daily consumption of water was 1,420,868 gallons and in Colon 1,230,415 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The net enrollment in the white schools during the month was 1,223 and the average daily attendance 977.4, or 94.4 per cent of the enrollment; and in the colored schools the net enrollment was 1,445, and the average daily attendance 783.6, or 82.9 per cent. Forty-six white and 29 colored teachers were employed in the Division on March 31.

Department of Sanitation.

The total number of deaths from all causes among employes was 36. These were divided as follows: From disease, 28, and from violence, 8, giving the annual average per thousand of 6 57 and 1.88, respectively.

The annual average death rate per thousand among employes for the month of March in previous years since American occupation was as follows:

1905	12.27
1906	37.44
1907	40.23
1908	12.47
1909	8.76
1910	8.91
1911	10.76

The annual average death rate per thousand in the cities of Panama, Colon, and the Canal Zone, including both employes and non-employes, was 14.67.

The annual average death rate per thousand for the month of March among the same class of population for previous years was as follows:

1905	36.51
1906	46.72
1907	32.32
1908	20.67
1909	17.07
1910	18.33
1911	22.22

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was, for whites, 2.75, blacks, 7.90, giving a general average of 6.57. For the same month during 1910, the annual average death rate per thousand from disease was, whites, 3.89, blacks, 5.87, giving a general average of 5.39, and for the same month during 1911, whites, 3.88, blacks, 7.76, giving a general average of 6.76.

Among employes during this month deaths from the principal diseases were as follows: Chronic nephritis, 3; dysentery, clinical, 2; lobar pneumonia, 3; measles, 2; tuberculosis, 6; typhoid fever, 1, leaving a balance of 11 deaths from all other diseases, and 8 deaths from external violence.

One case of yellow fever from Guayaquil was taken from the steamship *Chile* at the Culebra Island Quarantine Station on March 2, which resulted fatally on March 4. With this exception, no cases of yellow fever, small pox, or plague originated on or were brought to the Isthmus during the month.

Respectfully,
GEO. W. GOETHALS, *Chairman.*

PANAMA CANAL BASEBALL LEAGUE.

RESULT OF GAMES, APRIL 14.

At Ancon—Com.-Sub , 5; Ancon, 4.

Hit by pitcher—by Mosher (Lindberg), by Davis (Pearman), by Murray (Mosher). Hits—off Mosher 11 in 8 innings, off Davis 1 in 1 inning. Left on bases—C.-S. 10, Ancon 11. Double plays—Smith to Herring. Passed balls—Sterner, Hodnot. Umpire—Scull. Time of game—2.15. Scorer—Hoffman.

The game scheduled at Empire, April 14, between Empire and 10th Infantry was called on account of rain.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon, during the week ending April 13:

Albanian, April 6, from Liverpool, with 200 barrels carbolic acid, for stock.

Albenga, April 8, from New York, with 137,404 bags cement, for Atlantic and Pacific Divisions.

Allianca, April 8, from New York, with 90 cases machinery, for Atlantic Division; 44 cases caskets, 42 cases sherry wine, 25 cases drugs and sundries, for Sanitary Department; 23 packages castings, 412 pieces castings, for Mechanical Division; 79 cases signal material, 80 cases transil oil, for Panama Railroad Company; 25 cases stationery, 59 reels sash cord, 75 cases caustic soda, 139 kegs bolts, 31 barrels rosin, 14 cases manila tags, 26 bales packing, 100 cases sal. soda, 19 cases steamshovel parts, 16 casks chain, 20 cases belt dressing, 249 pieces iron pipe, 14 bundles baskets, for stock; and a miscellaneous cargo, the whole consisting of 1,720 packages, weighing 300 tons.

Tinhow, April 9, from New Orleans, with 2,493 pieces lumber, for Mechanical Division; 2,224 barrels paving brick, for Panama Railroad Company; 2,366 pieces lumber, 170 pieces piling, 12 pieces chains, for stock.

Zacapa, April 11, from New York, with 50 bundles baskets, 15 cases hardware, for stock; 14,000 pieces hollow tile, for Panama Railroad Company.

Parismina, April 11, from New Orleans, with 2,263 pieces lumber, for Mechanical Division; 6,110 pieces lumber, 54 pieces piling, 413 sacks dairy feed, 135 barrels fire clay, 50 crates paste, for stock; 4 cases motors, for Atlantic Division.

Sixaola, April 13, from New York, with 72 cases tin, 20 cases packing, for stock; 200 pieces lumber, for Mechanical Division; 104 cases copper bars, for Pacific Division; 17,833 pieces hollow tile, for Panama Railroad Company.

Misdirected Letters.

ANCON, C. Z., April 10, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Dierctor of Posts, and may be secured upon request of the addressees:

Allen, George B
Brown, Jacob
De vours, J. C
Doyle, William
Duncan, Arthur
Ellis, David E.
Finch, E. H.
Gaston, J.
Godfrey, Miss Mary Jane
Hall, Wm. T
Jay, William C
Kiehle, Fred E
Love, William
Marsden, Mrs. M. W.

Wurster, Charles C.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving picture shows for the week ending April 27, is as follows: Monday, Gorgona; Tuesday, Corozal; Wednesday, Empire; Thursday, Culebra; Friday, Gatun; Saturday, Cristobal.

ISTHMIAN INDOOR BASEBALL LEAGUE.

The standing of the teams in the indoor baseball league on April 13, was as follows:

Team.	Played.	Won.	Lost.	P. C.
Gorgona	6	6	0	1.000
Gorgona	6	6	0	1.000
Culebra	7	6	1	.857
Corozal	6	3	3	.500
Empire	7	3	4	.428
Gatun	7	2	5	.285
Cristobal	7	1	6	.142

Results of games played April 13 were as follows: Gorgona, 22; Corozal, 12. Culebra, 32; Cristobal, 11. Gatun, 15; Empire, 14.

Games are to be played on April 20, as follows: Culebra at Gatun, Gorgona at Cristobal.

CULEBRA.

Capt. Jack Crawford gave his entertainment on Tuesday evening. Because of the entertainment on Tuesday the glee club met on Thursday. It is planning a concert for the last week of May.

The game of billiards between Empire and Culebra resulted as follows: *Empire*—Wood 88 points, Barns 96 points. *Culebra*—Tragsdorf 100 points, Conlon 100 points.

The Hill Magical Company will be in Culebra on Friday, April 19, at 8.15 o'clock. Members free, non-members 50 cents, and children 25 cents.

EMPIRE.

The following men bowled games of over one hundred in duckpins during the past week: Pinney, 132, Grund, 103; Rodeighiro, 110, 100, 114; Bayne, 108; Goolsby, 106.

The indoor baseball game played at Empire between Empire and Gatun was won by Gatun by the score of 15 to 14.

The Empire minstrel troupe will give a return engagement at Empire on April 30 and play at Ancon on April 27, and at Camp Elliott on April 18.

GORGONA.

There were 245 people at the moving picture show on Wednesday night, April 10. There was a show for the night men at one o'clock Thursday morning after the night force stopped work. Coffee and sandwiches were served.

The first game in the Duckpin League series in Gorgona was played on Saturday night, April 13, the results of the games between Gorgona and Empire being:

Gorgona.				Empire.			
Simms	101	82		Pinney	96	96	95
Otis	76	90	101	Giavolli	90	83	122
Humphrey	80	87	81	King	89	88	81
Robinson	85	90	90	Grund	75		99
Dunlop	91	103	71	Rodeighiro	101	94	97
Powell			76	Sawtelle		77	
Total	433	452	419		451	438	494

The following scores were made by Corozal and Gorgona in the Inter-Association pool tournament:

Pool. Gorgona—Hill, 100; Hill, 100; Orr, 100; Orr; 69; Tougher, 55; Tougher, 88; Ashman, 100; Ashman, 85. *Corozal*—Baker, 49; Baker, 49; Lofgren 89 Tribolet, 100; Roberts, 100; Roberts, 100; Jones 94; Jones, 100. *Billiards. Gorgona*—Bermann, 51; Berman 71. *Corozal*—White, 100; White, 100.

GATUN.

Capt. Jack Crawford, the poet scout, gave his return engagement on Thursday, April 11. A farewell reception was given the Captain after the entertainment by about 40 members of the association, when he recited original verse and humorous anecdotes. Refreshments and cigars were served.

Dr. Orenstein gave a lecture on "Flies and Diseases" at the clubhouse on Tuesday evening, April 17.

Assistant Secretary Dwelle led the discussion club on Sunday evening, April 14, the subject being "The Woman in the Home."

The Isthmian Duckpin League series opened at Gatun with Cristobal as opponents, Saturday night, April 13. Cristobal won all three games with the following scores:

Cristobal	472	442	458
Gatun	461	415	445

CRISTOBAL.

The next in the series of moving picture shows will be on Friday evening, April 19. Messrs. Clause and Weston will provide vocal and instrumental music between films.

On Saturday evening, April 20, the Gorgona baseball team will play Cristobal on the local floor.

On Tuesday evening, April 23, the Hill Magical Co. will give a program in necromancy and hypnotism.

At the session of the debating club to be held on Wednesday evening, April 24, the following subject will be discussed: Resolved: "That the United States Should Intervene in Mexico to Protect her National Interests." All men are invited.

Notice to Mariners.

BALBOA, C. Z., April 13, 1912.

A pinnacle rock with a least depth of 14 feet at mean lower low water lies about 300 yards southeasterly from San Jose Rock. This is about 20 yards in diameter and is surrounded by depths of 36 feet or more. Vessels rounding San Jose Rock should keep not less than ½ mile from the rock for safety.

An extensive rocky area extends from the rock just described to the southeast to a point ⅜ mile from San Jose Rock. The least depth is 32 feet. It will be noted that on several of these pinnacle rocks less depth is found than the proposed published depth for the Canal prism, and for that reason I include them in this report.

A rocky area was found about 1½ statute miles southeasterly from San Jose Rock. An area ½ mile long and ⅜ mile wide is continuously rocky. The least depth is 32 feet at the mean lower low water, and this was found on several small rocks. Vessels should not anchor on this area as the rocks are ragged.

This information will duly appear on charts of the U. S. Coast and Geodetic Survey.

Due to heavy blasting at Flamenco Island vessels are warned against approaching close to the island at all times, and more especially during the noon hour and after 5.00 p. m.

J. ST. C. HUNT, *Port Captain.*

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, April 13, 1912. All heights are in feet above mean sealevel.

DAY AND DATE.	STATION.				
	Vigia.	Alhajuela	Gamboa.	Bohio.	Gatun Lake.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending April 24, 1912 (75th meridian time):

DATE.	Low.	High.	Low.	High.	Low.
	A.M.	A.M.	A.M.	P.M.	P.M.
April 18	......	4.07	10.20	4.21	10.43
April 19	......	4.45	10.59	4.58	11.22
April 20	......	5.25	11.38	5.38	......
			P.M.		
April 21	12.04	6.06	12.21	6.21	......
April 22	12.48	6.51	1.08	7.08	......
April 23	1.37	7.42	2.00	8.00	......
April 24	2.33	8.40	3.05	9.05	......

The following vessels arrived, or departed from, the port of Balboa during the week ending April 13:

Arrivals—April 8, *Mantaro*, from Callao; April 8, *Aysen*, from Valparaiso; April 11, *U. S. S. Vicksburg*, from Corinto; April 12, *U. S. S. Prometheus*, from south; April 13, *U. S. S. Yorktown*, from south; April 12, *Santa Maria*, from Port Harford; April 12, *San Jose*, from San Francisco.

Departures—April 8, *Barracouta*, to Central America; April 8, *Stanley Dollar*, to San Francisco; April 8, *Quito*, to Guayaquil; April 8, *Guatemala*, to Paita; April 10, *Peru*, to San Francisco; April 12, *Navajo*, to San Francisco; April 13, *Peru*, to Guayaquil.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Cristobal, C.Z., Sunday, April 21, 1912, at 4.30 p. m.

The next concert will be given at Culebra, April 28 at 5.45 p. m.

LOST—On Thursday, April 11, in Empire, a small gold brooch in the form of a treble clef. Finder please return to House 108-C, Empire.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

CANAL RECORD

Volume V ANCON, CANAL ZONE, WEDNESDAY, APRIL 24, 1912. No. 35.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Concrete in Pacific Division Locks.

The total amount of concrete required for the construction of the Pedro Miguel and Miraflores Locks as it has been given weekly in THE CANAL RECORD was based on estimates prepared July 1, 1910. Various causes have worked during the construction to increase the amount actually to be placed, and the total yardage is now estimated as follows:

	New Estimate. *Cu. Yds.*	Old Estimate. *Cu. Yds.*
Pedro Miguel Lock...	890,750	837,400
Miraflores Locks.....	1,412,736	1,362,000

Lighters for Sale.

The Washington office of the Isthmian Canal Commission has been directed to advertise for sale six lighters used up to the present time in hauling cement from the ships at Cristobal to Gatun for use in the making of concrete for the locks and spillway. These lighters were put in service in 1908, cost $20,628.82 each, and are in good condition. They are built of steel, are 110 feet long, 24 feet 6 inches beam, 7 feet 10 inches depth, gross tonnage 300, capacity 300 tons, quarters for one man on stern of each lighter. The lighters were built in the United States by the Maryland Steel Company and shipped knocked down to the Isthmus where they were erected at the Cristobal marine shops.

Timber in Gatun Lake Area.

Elsewhere in this issue of THE CANAL RECORD will be found an advertisement asking for bids for the privilege of cutting timber in the area within the Canal Zone that will be covered by Gatun Lake. The conditions governing the proposed contract are as follows:

(1) The privilege consists of a right to cut timber within the defined area until such time as the timber may be required by the Government, in which event the privilege would cease as of date of due notification to that effect to the contractor.

(2) The privilege would under no circumstances extend beyond January 1, 1915.

(3) Bidders will submit bid in one lump sum for the privilege.

(4) Payment of the full amount of bid will be due and payable within thirty days from notification by the Chief Quartermaster that bid has been accepted.

(5) Upon payment of full amount of bid, the successful bidder may proceed at once to cut and remove timber within the area designated and may continue to cut and remove same until notified by the Government that the privilege is recalled, or until the first day of January, 1915.

(6) The successful bidder will be required to remove all timber cut by him and to make disposition by burning or otherwise, of all brush and limbs resulting from such cutting.

It is not known how much desirable timber there may be in the area to be flooded within the Canal Zone. It is probable there is only a small amount of hard woods, because the land along the Chagres River has been occupied to some extent for three hundred and fifty years, and most of the original wood has been cut, while much of the area has been burned over many times. So little desirable timber was found along the route of the Panama railroad at the time of its construction, 1850-55, that most of the ties were brought from Colombia. During the dry season of 1910 about 842 acres of land in the ship channel through the lake were cleared by contract, and on this area there were found only a few hardwood sticks, and a small number of espeve trees, a wood with little grain, from which 17 native canoes were made. The contractor obtained about 4,000 bags of charcoal at 40 pounds to the bag, and this was the most valuable by-product of his work. Among the cabinet woods found in the lake region, a few sticks here and there, are cocobolo, guayacan, Panama mahogany, Spanish cedar, and several light colored woods that are very hard and take a high polish. Many of these woods are too heavy to float.

Permanent Headquarters.

A committee has been appointed to recommend sites for the permanent administrative headquarters and offices of the Canal, and a permanent settlement for Canal employes in the vicinity of the Pacific terminus. The site for the office headquarters will be on Sosa Hill or at some other place nearby.

East Dam at Gatun Locks.

The construction of Gatun Locks, at the foot of the outermost of the hills which border the Chagres valley on the east as it narrows to the point selected for the dam and locks, has left between the east side wall of the locks and the hill, as it breaks back from the toe, a space which is lower than the proposed surface of Gatun Lake. This break in the rim of the basin will have to be filled with a dam. The filling necessitates the removal of several railway tracks passing through the dip at an elevation of from 45 to 75 feet above sea-level, extending to the auxiliary concrete mixing plant, the garage for the division motor car and the main line of the Panama railroad. The mixing plant has been dismantled, the garage has been moved and the connection with the Panama railroad will be effected by means of a new track, swinging from the rear of Gatun station around the hill from elevation 92 to a point beyond the nearest approach of the hill to the locks, from which it will dip with a heavy grade to the present tracks along the lower locks. A spur on the down hill side of the new track will afford a base for the dumping for the dam.

In anticipation of this work a concrete core wall, 4 feet thick and reaching from bedrock to the surface of the earth and backfill, was built from the east side wall of the lock to a point on the hill opposite at elevation 88 feet. The space between the core wall and the lake will be filled with selected clay, and on the seaward side of the core wall a miscellaneous rock fill will extend for several hundred feet, joining the point of the hill. The final height of the fill will be at elevation 92 feet, level with the present east backfill for the upper lock. A steamshovel cut away the knoll in the rear of the station, supplying spoil which was used in filling for the new track and in the dam, and when the knoll was reduced to the surrounding level the garage was moved to a point near the station.

Slight Earthquake Shock.

An earthquake shock of sufficient intensity to be felt at various points along the Canal Zone was registered on the seismographs at Ancon and Gatun on the night of April 16. The maximum amplitude was 68 millimeters on the north-south component, the approximate distance of the epicenter of the disturbance 200 miles, and the probable direction as registered by the seismoscope, northeast. The intensity was Force III (very feeble shock) on the Rossi-Forel scale. Shocks of similar magnitude were recorded on the Canal Zone on August 30, 1909, December 21, 1910, and April 10, 1911.

Steamshovel Damaged by Fire.

Fire which consumed a crib work composed of five layers of railroad ties, on which the 70-ton steamshovel No. 107 was temporarily supported in a stage of its work in the channel through the proposed Miraflores Lake, caused such injury to the shovel that it has been retired from service. The 6-inch solid steel axle, connecting the hind wheels of the truck under the rear end of the shovel, was so softened by the heat that it bent to an angle of about ninety degrees and the rear end of the shovel sagged down until the 15-inch car body "I" beams rested on the forward wheels of the truck and were distorted with dents 3 or 4 inches deep. The cast steel wheels were not distorted though the heat so expanded them that their junctures with the axle, on which they were originally forced by heavy hydraulic pressure, were loosened. The rear end of the car body, where the heavier part of the locomotive-type boiler projects beyond the rear truck, sags about 6 inches below the normal level. The car body bolster under the boiler sags at both ends, making an arch about 5

NOTES OF PROGRESS.

(Continued.)

inches high. The heat was most intense at the rear end, where the cribbing was higher, but the babbitt metal was melted out of every journal box on the shovel. The only wood used in the construction of the shovel, for the engineer's seat, for the block under his operating levers and for a guard over one of the engines, was consumed. The coal on hand caught fire and assisted in the distortion of the 6-ton sheet steel bunkers.

It has been decided, after an inspection at the Empire Shops, to which the shovel was taken after being jacked on new trucks, that it would be practicable to repair it but that in the present state of the construction work, with an excess of shovels on hand, it would be better to use the available parts for repairs to other shovels.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 81 per cent completed, 196,225 cubic yards, out of a total of 225,000, having been placed at the close of work on April 20. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
April 15	148	7.30	2
April 16	132	6.00	1
April 17	115	6.30	2
April 18	148	6.30	1
April 19	108	6.00	2
April 20	160	8.30	2
Total	812	41.00	1.6
*Previously reported	195,413		
Grand total	196,225		

Porto Bello Crusher.

A statement of the work done at the Porto Bello crusher, by days, for the week ending April 20, follows:

DATE.	Hours worked.	Cubic Yards.
April 15	3.30	1,872
April 16	3.50	1,980
April 17	3.30	1,792
April 18	4.35	2,090
April 19	3.55	1,816
April 20	5.15	2,176
Total	24.35	11,726

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending April 20, follows:

DATE.	Hours worked.	Cubic Yards.
April 15	8.05	2,973
April 16	6.55	2,348
April 17	14.45	5,606
April 18	11.50	4,206
April 19	12.35	4,288
April 20	8.25	3,081
Total	61.15	22,502

Bascule Bridge on Relocated Line.

The contract for furnishing material for the bascule span of the railroad bridge at Monte Lirio, including reinforcing trusses, counterweight and motors, has been awarded to the Penn Bridge Company of Beaver Falls, Pennsylvania, for $25,390. Delivery is to be complete within 120 days.

The work of installing the north shore span of the bridge will commence next week. A force of men has been engaged in grading the space between the two channel piers, clearing the ground of debris and smoothing the channel under the bascule span to an even level of 40 feet above the sea, which will afford a depth of 45 feet when the surface of Gatun Lake is at the proposed normal level.

PERSONAL.

Capt. R. E. Wood returned to the Isthmus on April 18, on the *Ancon*, from his leave in the States.

Sailing of the Ancon.

The steamship *Ancon* will sail from Pier No. 11, Cristobal, on Sunday, April 28, at 3.00 p. m.

CONCRETE WORK IN THE LOCKS.

Over 82 per cent of the concrete for the locks is in place, the amount at the close of work on April 20 being 3,553,446 cubic yards, out of a total of approximately 4,303,486. A total of 26,383½ cubic yards of concrete was laid in the locks during the week ending April 20.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 20 being 1,863,020 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending April 20, and of the total follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

CANAL MEDAL BAR LIST.

The attached list contains the names of employes and ex-employes of the Isthmian Canal Commission, who at some time during the past year completed their fourth year of continuous service on the Isthmus and are now entitled to their first service bar. The date shown opposite each name is that on which the bar service was completed.

All changes or corrections should be reported to the Office of the Chairman, at Culebra, at an early date.

As soon as the list is revised, numbers will be assigned by lot, on both medal and bar lists and the lists will be forwarded to the Washington Office where final arrangements will be made for the proper engraving. Distribution will be made about September 1 of the present year.

CARGO HANDLING.

Report on Method to be Used at Canal Terminals.

The committee on cargo handling facilities at the Atlantic and Pacific entrances to the Canal has made the report published below. The report is based upon projects already approved for wharves and piers at the two entrances.

At the Atlantic entrance the project provides for two docks or quay walls on Cristobal Point, and a number of piers jutting out into the ship basin from a mole now in process of construction. It is intended to build at present only the two docks, a part of the mole and one pier, leaving the remainder of the work to be executed as the need for it shall develop. All the docks are of reinforced concrete built upon caissons, and work is in progress on those that are to be constructed at once, Docks 15 and 16 and Pier 17. Dock 15 runs along the south side of Cristobal Point, and joins with Dock 16, which runs along the west side. Pier 17 juts out from the mole parallel with Dock 16, and 400 feet west or towards the Canal entrance, which, at the angle they are to one another, gives a least space between the dock and the pier of 300 feet for the berthing of ships. Dock 15 will be 500 feet long, and Dock 16 and Pier 17 1,100 feet long. The project for Pier 17, on which work has been advancing, provided for a width of 155 feet, which has been changed to 209 feet.

At the Pacific entrance the project is for a quay wall or wharf in two sections, a total length of 3,235 feet extending along the channel of the Rio Grande from a point near the present Marine Shops at Balboa, In addition to 1,860 feet at the dry dock. Construction is in progress on this quay, and a section 656 feet long is already completed. It is 56 feet wide and built of reinforced concrete on caissons. Dredging is in progress on a basin in front of the wharf. A project for a series of piers similar to those at the Atlantic entrance is under consideration.

The report follows:

From its understanding of the necessities and of the general practice elsewhere, the committee believes that it will be advisable to increase the width of piers, which was first tentatively fixed at about 150 feet, by about one-third, and recommends:

(1) That the width of the new piers at the Atlantic entrance of the Canal, including Pier 17, shall be increased by two spans, giving them a total out-width of 209 feet more or less, and the committee further recommends that the width of the new piers to be built at the Pacific terminal shall be as nearly the same as of those on the Atlantic side as the details of design will permit. It is recommended that each pier be provided with four railroad tracks running full length, two of the tracks to be sunken, or depressed, tracks in the center of the pier, and the other two tracks to be apron tracks, at the floor-level, one along each face of the pier.

So far as Dock 16 at Cristobal is concerned, the construction of which has already started, the committee recommends:

(2) That there be no change in the width already fixed of 75 feet 6 inches over-all, exclusive of the depressed tracks. The committee recommends one apron track at floor-level along the face of Dock 16.

SUPERSTRUCTURE.

The committee recommends:

(3) That the pier sheds shall cover the entire width of piers less not less than 18 feet along each face and at the end of the pier; the ends of buildings to be parallel to the ends of the piers; the pier-sheds to be one story with a clear height of not less than 25 feet from the floor of the pier to the bottom chord of the roof truss; the pier sheds to be provided with a horizontal, longitudinal girder on each side of the building, elevated to the proper height above the eaves, for attaching blocks to be used in unloading cargo; the pier-sheds to be of fire-proof construction—either reinforced concrete or steel completely incased in concrete.

The foregoing is intended to apply to pier-sheds at both termini of the Canal. For Dock 16 at Cristobal, the committee recommends:

(4) That the distance from the outside face of the dock to the outside of the dock shed shall be not less than 18 feet, shed to span the two depressed tracks, which will give a width out to out of dock shed of from 80 to 84 feet; the dock shed to be one-story having clear height of not less than 25 feet with a longitudinal girder along the water face the same as the pier sheds. The number of interior columns in the pier and dock sheds to be the minimum consistent with proper economy and the materials of construction used.

At Balboa, it is recommended:

(5) That the quay wall adjacent to the shops and dry dock be not provided with sheds.

CARGO HANDLING APPLIANCES.

In regard to the matter of furnishing piers and docks with dock cranes and similar cargo handling appliances, the committee understands the present situation to be as follows:

(*a*) Upon the completion of the Canal, the freight received for distribution to various points on the Isthmus will be very small.

(*b*) The amount of freight which will break bulk at either terminus of the Canal for transhipment across the Isthmus by rail can resonably be expected to be almost negligible from economical considerations.

(*c*) The amount of freight which will break bulk at either terminus of the Canal for rehandling aboard other vessels is an unknown item and cannot be forecast at the present time with any reasonable degree of accuracy.

(*d*) The furnishing of a large number of cargo handling cranes and other appliances, costly not only to install but also to operate, should be avoided if possible, and especially if there is any doubt as to the future necessity and usefulness of the same.

(*e*) It is understood that the present time the construction at Cristobal and Balboa of one pier only at each place is contemplated.

Wherefore, the committee considers that it will be more conservative and economical to proceed with the construction of Pier 17 and Docks 15 and 16 at Cristobal and the one pier at Balboa together with docks adjacent to the shops, without making provision for any special cargo handling appliances, but adopting such design for the pier sheds as will leave sufficient width along the face of each pier to permit of the installation of tracks for any cranes the need of which may develop in the future. The committee further believes that if this policy, which it recommends, is adopted for the one pier at each terminal which it is proposed to construct, when the time comes when further construction is needed, the experience then at hand will indicate whether any change in this policy is advisable. The recommendations of the committee, if approved, would require all freight to be handled by the vessels' cargo booms, supplemented by the blocks attached to the longitudinal girders above the eaves of the sheds. Single pieces too heavy to be handled by the vessels' cargo booms, *i. e.*, over about 10 tons in weight, would be handled by floating crane boats. At Balboa, the situation is somewhat different on account of the greater range of tides and the type of vessels entering this port at present. The committee believes that this difference will be compensated for by the six new electric cranes under contract for the old French wharf at Balboa, supplemented by such of the present cranes as are serviceable, which the committee recommends shall be continued in service until further notice. The committee recommends that all transfer of freight in the pier sheds be made by either hand trucks or electric trucks depending upon the distance and other conditions, and the committee believes that if any transfers of freight between piers are necessary the same can be made either in standard-gauge cars or by electric trucks.

Very respectfully,

(Sgd.) H. F. HODGES, *Chairman.*
H. H. ROUSSEAU,
S. B. WILLIAMSON,
J. A. SMITH,
Members of Committee.

Money Order Business with Chihuahua, Mexico.

The Post Office Department in the United States has advised all postmasters of the suspension of postal money order business with the State of Chihuahua, Mexico, and has directed that no orders be issued payable at that place, nor orders paid which were issued there on and after February 14. This suspension of the postal money order business with the State of Chihuahua will apply to the issue of money orders in the Canal Zone for payment in that State, and to the payment of orders issued there and drawn on the Canal Zone.

Levelman and Transitman.

An examination of candidates for promotion to the positions of Levelman, and Transitman will be held at Culebra on Sunday, May 12, at 9 a. m.

Employes who desire to take the examination will please make application through the head of the department or division in which they are serving, to A. B. Nichols, Chairman of the Examining Board, Culebra.

Candidates attending the examination should bring with them tables of the circular functions, and triangles.

Pacific Division Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of March, 1912, follows:

DESTINATION.	Number Cars.	Cubic Yards.
Pacific Division	2,366	39,858
Atlantic Division	440	9,090
Central Division	25	375
Civil Administration	1	25
Sanitary Department	2	50
Quartermaster's Department	5	125
Fortifications	47	1,081
Panama Railroad Company	8	184
Miscellaneous	14	350
Total	2,908	51,138

SOCIAL LIFE OF THE ZONE.

Memorial Day Committee.

Representatives of the following organizations were present at the meeting of the Memorial Day committee, held at Gorgona on Sunday afternoon, April 14: Army and Navy Union, United Spanish War Veterans, American Veterans of Foreign Service, Knights of Pythias, Uniform Rank, Odd Fellows, Rebekah Lodge No. 1, Red Men, Degree of Pocahontas, Royal Order of Moose, Pacific Masonic Club, and the Department of Police and Prisons.

It was decided to hold Memorial Services at both Mount Hope and Ancon on May 30. The arrangement of the entire program for the day was turned over to the five representatives of the military organizations present, who at once drew up a program, details of which will be made known later.

Rifle Match.

The Canal Zone Rifle Club held an informal shoot with the Marines stationed at Gamboa range on Sunday, April 14, in which the Marines were victors with a score of 1,472 to 1,408. It is planned to invite a team from the Marines to shoot a match at 200, 300, and 600 yards on the home range of the club at Pedro Miguel. The following scores were made in the match:

U. S. Marines.		C. Z. Rifle Club.	
Gormerly	174	Gill	170
Hadlow	170	Greene	165
Hasenbuler	168	John	161
Gebhart	166	Haynes	159
Powers	165	Walraven	158
Tripple	162	Bernson	157
Eaton	157	Ferris	153
Suthard	156	Rogers	144
Schmitt	154	Phoenix	141
Total	1,472	Total	1,408

United Spanish War Veterans.

The next meeting of Chagres Camp No. 2 will be held at Empire Lodge Hall on Sunday, April 28, at 3 p. m All veterans of the Spanish War are invited to attend.

Empire Minstrels at Ancon.

The Empire Minstrels, who have been giving entertainments at the various Commission Clubhouses during the past few weeks, will give an entertainment at the Ancon Lodge Hall on Saturday evening, April 27, under the auspices of the joint lodges of Ancon.

Magazines for Lepers.

Those desiring to send old magazines for the patients at the Palo Seco Leper Asylum, by whom they would be much appreciated, can do so by placing them on the hospital car on train No. 7 from Colon, addressed to Palo Seco Leper Asylum, care of Sanitary Inspector, Balboa, C. Z.

Women's Organizations.

The Gatun Woman's Club is raising money for the Federation fund by providing home made cakes to the restaurant of the Commission clubhouse. The cakes are given by the members, Saturday being special club cake day, and are sold over the counter in the restaurant.

The semi-monthly meetings of the Woman's Guild of St. Luke's Hospital Chapel, Ancon will be resumed on Tuesday, May 7. The meeting on the first Tuesday in each month will be held in Ancon Hall at 9.30 a. m., on the second Tuesday in each month at the home of a member, by invitation, at 3.30 p. m. Owing to the Easter week, the dates of the April meeting were changed. On Tuesday, April 9, the meeting was held at the home of Mrs. Darling at 3.30 p. m., and the second meeting was at Ancon Hall on April 23, at 9.30 a. m.

The Little Workers, Gorgona's girls' club, held an Easter sale on Saturday afternoon, April 6. They made about $10, which will be donated to the Federation fund.

The Ancon Study Club expects to complete its review of Greek life and history at its meeting on May 2. Following this the club has in view the study of the American novel, and later will take up a short course on the drama. Books may be taken from the library at any time, and persons outside of the club may draw books upon the payment of $1 gold, which will be returned upon discontinuance of the use of the library.

Church Work.

The Rev. Mr. Harvey, who has been in charge of the work at St. Paul's and the mission of St Mary at Empire, has been recalled to his parish in Reading, Pa. His place here will be taken by the Rev. Mr. Carson, who comes from Louisiana. He arrived on the Isthmus to hold his first services on April 21.

New pews have been installed in St. Paul's church, Panama, and a new organ, which was consecrated on Sunday evening, April 7. The additions to church furnishings represent the efforts of the congregation for the past year.

Obituary.

Nelson Kenison, an employe of the Mechanical Division, died at Ancon Hospital on April 15 as the result of injuries received in the car repair shop at Gorgona on April 13. He was working at a circular saw table upon which a piece of wood was being cut. After receiving the cut piece of wood, his helper attempted to return it to him when it was caught by the saw, jerked from the helper's hands, and thrown against Mr. Kenison striking him in the abdomen. Mr. Kenison, was sixty years of age and had been on the Isthmus four years. He is survived by his wife living at Empire.

Warm Weather.

The warmest weather of record on the Canal Zone since the American occupation has occurred during April. At Ancon on April 7 the thermometer registered 97 degrees Fahrenheit, at Culebra on April 17th 96 degrees, on April 18th 95.7 degrees. The previous high record was on March 7, 1912 at Ancon, 96.2 degrees; on April 15, 1909 at Culebra 94 degrees.

LABOR FORCE AND QUARTERS IN MARCH.

On March 27 there were 36,057 employes actually at work on the Canal and the Panama railroad, and of the number 30,084 were Canal employes. The gold force on the Canal work, composed almost entirely of white Americans, was 4,338. The total force at the close of March, 1911, was 35,806, and the Canal force, 28,850. The force report for March 27, follows:

QUARTERS.

On April 1, there were 25,810 occupants of Commission quarters. Of these 9,411 were white Americans of whom 5,428 were men 2,061 were women, and 1,922 were children. There were 6,062 Europeans of the laborer class, of whom 5,424 were men, 267 women, and 371 children. There were 9,337 West Indian negroes, of whom 6,924 were men, 1,065 women, and 1,348 children. Included in the above were 300 Asiatics, and 134 Panamans.

OFFICIAL CIRCULARS.

Hot Bearings on Locomotives.

CULEBRA, C. Z., April 18, 1912.

CIRCULAR No. 439:

The following rules concerning hot bearings on locomotives are approved and issued for the guidance of all concerned:

1. When a hot bearing occurs on a locomotive the engineer in charge will report the fact in writing —at the first telegraph office if on the Panama Railroad, or the first yardmaster's office if on Commission tracks. This report will be transmitted at once by wire to the transportation official under whose jurisdiction the engine comes, and he, in turn, will notify a traveling engineer, who will make a prompt investigation of the reported hot bearing, with a view to determining and reporting the cause thereof.

2. In case it is found that the hot bearing is due to lack of proper care by the engineer the latter will be subject to the following discipline:

   (*a*) If the hot bearing has caused neither damage to equipment nor appreciable delay the engineer will be given a letter of reprimand.

   (*b*) If the hot bearing has caused damage to equipment or delay to the work, the engineer will be suspended for from one to five days, depending upon the amount of damage or delay.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Half-rate Mileage Books.

CULEBRA, C. Z., April 19, 1912.

CIRCULAR No. 420-C:

First-class half-rate mileage books will hereafter be sold to American negro employes on the silver roll. This modifies Paragraph 7 of Circular No. 420-A, dated December 18, 1911.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Ratings and Rates of Pay.

CULEBRA, C. Z., April 19, 1912.

CIRCULAR No. 229-A:

The following ratings are hereby established for "Engineer (Stationary)" employed as pumpmen, in addition to the rates of $40.00, $45.00 and $50.00 per month, at present prescribed by Circular No. 229:

$30.00 per month.
$35.00 per month.
$55.00 per month.
$60.00 per month.

These new rates are established with the understanding that the maximum rate of pay for West Indians shall be $50.00 per month.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Selling Price of Coal.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT.

The selling figures of coal effective April 1, 1912, are as follows:

At Colon.

I. C. C., on cars, lighters, tugs, barges, etc	$4.34
U. S. Warships and Warships of the Republic of Panama, on cars	5.94
U. S. Warships and Warships of R. of P., alongside in lighters	6.94
Other Warships and steamers, delivered on cars	6.69
Other Warships and steamers, delivered alongside in lighters	7.69
Parties taking carload lots	6.29
Parties taking small quantities for cars in bins	$7.69

At Panama.

U. S. and Panaman Warships, alongside in lighters	8.44
P.M.S.S. Co., delivered to their lighters from cars	7.44
P.M.S.S. Co., on cars on dock	7.44
C.A.S.S. Co., on cars on dock	7.44
C.A.S.S. Co., lightered on P.R.R. lighters	8.44
P.S.N. Co., delivered to their lighters from cars	7.44
P.S.N. Co., on cars on dock	7.44
C.S.A. de V., on cars on dock	7.44
C.S.A. de V., lightered on P.R.R. lighters	8.44
Kosmos Line, on cars on dock	8.19
Kosmos Line, lightered on P.R.R. lighters	9.19
Other Warships and irregular steamers, alongside in lighters	9.19
Parties taking carload lots	7.64
Parties taking less than one carload at a time on cars	9.19
Santo Tomas Hospital, Panama	6.29

Miscellaneous.

U. S. Marine Corps (Camp Elliott)	7.19

SUPPLEMENT NO. 1 TO COAL TARIFF EFFECTIVE APRIL 1, 1912.

The following prices will be charged on 27,000 tons of coal in order to reimburse this company for extra cost of this amount of coal over and above contract prices as per tariff in effect April 1, 1912:

At Colon.

I.C.C. on cars, lighters, tugs, barges, stc	$5.27
U.S. and R. of P. Warships, on cars	6.87
U.S. and R. of P. Warships, alongside in lighters	7.87
Other Warships and steamers, delivered on cars	7.62
Other Warships and steamers, delivered alongside in lighters	8.62
Parties taking carload lots	7.22
Parties taking small quantities from cars or bins	8.62

At Panama.

U.S. and Panaman Warships, alongside in lighters	9.37
P.M.S.S. Co., delivered to their lighters from cars	8.37
P.M.S.S. Co., on cars on dock	8.37
C.A.S.S. Co., on cars on dock	8.37
C.A.S.S. Co., lightered on P.R.R. lighters	9.37
P.S.N. Co., delivered to their lighters from cars	8.37
P.S.N. Co., on cars on dock	8.37
C.S.A. de V., on cars on dock	8.37
C.S.A. de V., lightered on P.R.R. lighters	9.37
Kosmos Line, on cars on dock	9.12
Kosmos Line, lightered on P.R.R. lighters	10.12
Other Warships and irregular steamers, along-in lighters	10.12
Parties taking carload lots	8.57
Parties taking less than one carload at a time on cars	10.12
Santo Tomas Hospital, Panama	7.22

Miscellaneous.

U. S. Marine Corps (Camp Elliott)	8.12

J. A. SMITH, *General Superintendent.*

Privilege of Cutting Timber.

OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., April 13, 1912.

Sealed proposals will be received at this office until 3 p. m., Tuesday, April 30, 1912, and then opened, for the privilege of cutting and removing timber from the area within the Canal Zone that will be flooded by the Gatun Lake. Conditions governing privilege can be had upon application to this office or at the office of any District Quartermaster. Bids should be marked "Proposal for Cutting Timber", and addressed to Col. C. A. DEVOL, Chief Quartermaster, Culebra, C. Z.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending April 20:

Colon, April 14, from New York, with 16 cases electrical material, 13 crates rubber hose, 28 cases pulley blocks, for Atlantic Division; 30 kegs brake shoe pins, 95 bundles car springs, 21 bundles car castings, for Mechanical Division; 43 bundles crane parts, for Panama Railroad Company; 16 packages concrete mixers, for Superintendent of Erection; 56 cases drugs and sundries, 40 cases wrapping paper, for Sanitary Department; 24 cases rubber hose, 42 cases ink, 11 cases lead bends, 125 cases air brake material, 10 cases brass tubes and hose, 7 cases leather, 10 cases paint, 84 cases lanterns, 36 cases lantern globes, 15 cases chisels, 10 cases hammers, 34 cases paper, 10 cases bushings, 322 cases rivets, 90 coils manila rope, 30 cases shellac, 28 hales excelsior, 50 packages range parts, for stock; and a miscellaneous cargo, the whole consisting of 1,500 packages, weighing 200 tons.

Prinz Joachim, April 15, from New York, with 50 bundles bars and angles, 297 pieces bars and angles, for Mechanical Division; 258 pieces beams and angles, 30 bales oakum, for stock.

Karen, April 16, from New Orleans, with 60 pieces piling, 16,175 pieces lumber, 2,290 pieces lumber, for stock; 1,382 pieces lumber, for Mechanical Division.

Almirante, April 18, from New York, with 12,400 pieces hollow tile, for Panama Railroad Company; 4,468 pieces lumber, for Mechanical Division; 26 rolls mesh wire, for Pacific Division; 12 pieces steel beams, 175 cases water coolers, for stock.

Riverside, April 18, from Portland, Ore., with 77,495 pieces lumber, for stock.

Ancon, April 18, from New York, with 123,232 bags cement, for Atlantic and Pacific Divisions; 125 pieces car couplers, 50 pieces lumber, for Mechanical Division, 12 cases hardware, for stock.

Abangarez, April 18, from New Orleans, with 3,213 pieces lumber, for Mechanical Division; 77 pieces piling, 1,959 pieces lumber, 33 rolls cotton duck, 6 cases paste, for stock.

Tricolor, April 19, from Seattle, with 2,000 sacks oats, 197 pieces piling, 4,558 pieces lumber, for stock; 4 pieces spud timbers, for Atlantic Division.

Whitefield, April 19, from Baltimore, with 16 barrels paint, 40 cases paint, 700 kegs bolts, for stock; 1,453 pieces steel plates, for Panama Railroad Company; 143,947 pieces vitrified tile, for Atlantic Division; 55,009 pieces vitrified tile, 4,855 bundles steel bars, 3,120 pieces steel bars, for Pacific Division; 300 tons pig iron, for Mechanical Division.

Jacob Bright, April 19, from Fernandina, with 41,236 pieces cross ties, for stock.

Advance, April 20, from New York, with 6 cases dredging sleeves, for Atlantic Division; 14,330 pieces hollow tile, for Panama Railroad Company; 50 pieces castings, 10 cases brake shoes, for Mechanical Division; 34 cases lamp chimneys, 10 cases stationery, 33 cases pipe fittings, 50 cases varnish, 13 cases mining machinery, 24 cases picks, 200 coils soft steel wire, 100 cases paint, 54 cases salt water soap, 17 cases candles, 24 bundles steamshovel parts, 11 crates butcher blocks, 9 cases enamel ware, for stock; and a miscellaneous cargo, the whole consisting of 1,562 packages, weighing 235 tons.

Misdirected Letters.

ANCON, C. Z., April 22, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Briggs, Frank
Crist, Clement
Cody, M. J.
Conlan, Miss Lillian
Cook, H. T.
Corwin, Dexte
Cotter, John A.
Cousins, William
Duncan, F. R.

The following billiard games were played on Saturday night, April 20 with Culebra: *Culebra*—Conlon, 100; Tragsdorf, 100. *Gorgono*—Berman, 55; Berman, 71.

The Gorgona Discussion Club has elected the following officers: Chairman, H. O. Levering; Vice Chairman, W. L. Robinson; Secretary, C. Patterson. A program committee of three was appointed, Messrs. Morrison, Boyer, Hosden. The debate for Monday, April 22, was "Resolved, That Mr. Taft is Entitled to a Second Nomination by the Republican Party;" Affirmative, Messrs. Swanson, Carruthers; Negative, Messrs. Morrison, Grossberg. The next discussion, Monday, April 29, will be "Resolved, That the United States Government Should Interfere in the Mexican Situation."

GATUN.

The Sunday evening discussion club discussed on April 21 "Woman and the Home."

Following are the results of the games of Isthmian Pool and Billiard Tournament played at Gatun on Saturday evening, April 20: *Pool*—Gatun—DePoorter 100; Galloway, 100; Dalton, 100; Hughes, 100. *Cristobol*—Bernsee, 45; Ford, 73; Montgomery, 77; Louch, 47. *Billiords—Gotun*—Townsley, 100; Wurster, 98. *Cristobal*—Rice, 91; Pack, 100. High runs in pool were made by Hughes, 26; DePoorter, 21.

Gatun lost two out of three games of bowling with Camp Elliott on Saturday evening, April 20. The result:

Gatun	459	442	411	C. Elliott	417	449	431

Professor Gomez announces that if there are at least five women interested, he will start a beginners' class in Spanish on Tuesdays and Thursdays of each week from 1.30 to 2.30 p. m.

Mrs. McLeod will play two violin solos on Friday, April 26 at the moving picture entertainment.

Culebra won the indoor baseball game from Gatun on Friday evening, April 19, by the score of 33 to 7.

The results of the bowling games in the local bowling tournament for the week ending April 20 are as follows:

Stars	2	Lucky Strikes	1
Sure Shots	2	All Malts	1
Algonquins	2	Beavers	1

Empire will play pool and billiards at Gatun, on April 27. Empire bowls at Gatun on the same evening.

A German orchestra will give a concert at Gatun on Monday, April 29. If the weather permits the concert will be outside in the band stand.

A handsome cue will be given the man who obtains the ten highest runs in pool during the month of April.

Tuesday and Thursday afternoons have been set aside on which the ladies of Gatun are invited to use the privileges of the clubhouse.

CRISTOBAL.

The indoor baseball team of Gorgona defeated the Cristobal team on the local floor on Saturday evening, April 20, by a score of 14 to 6.

The next session of the debating club will be held on Wednesday evening, May 1. The topic for discussion will be announced by bulletin.

The Cristobal duckpin team won all three games from the Gorgona team on the local alleys on Saturday evening, April 20. The Cristobal team which went to Gorgona secured two out of three games.

Fifty-one new books have been added to the library.

On Saturday evening, April 27, the duckpin bowling team from Camp Elliott will bowl the Cristobal team on the local alleys.

Mr. F. L. Bernsee, the champion checker player of the Isthmus, met nineteen players on Thursday evening, April 18, in simultaneous checkers, winning 49 games, losing one and making three draws. Mr. Burns drew one game and Mr. Gartell two. Mr. Putnam won one game.

FOUND—In the reception room at the nurses' home, Colon Hospital, on Monday evening, a scarf pin which may be had on application to the Superintendent's office, Colon Hospital, upon proper identification.

PANAMA CANAL BASEBALL LEAGUE.

RESULT OF GAMES, APRIL 21.

At Ancon—Ancon, 10; Empire, 0.

At Empire—Com.-Sub., 15; 10th Infantry, 1.

STANDING OF CLUBS.

	P.	W.	L.	P.C.		P.	W.	L.	P.C.
Com.-Sub.	15	11	4	.733	Empire	14	7	7	.500
Ancon	16	10	6	.625	10th In'ty.	15	3	12	.200

The games played on April 21, have been declared the last of the league season, although games are scheduled up to June 30. The pennant has been awarded to the Commissary-Subsistence team.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Culebra, C. Z., Sunday, April 28, 1912, at 5.45 p. m. The program follows:

1. March—*Boys of the Militia*............Boehnlein
2. Selection—*The Girl in the Train*............Fall
3. Polish Dance—*Kuyowiok*...........Wieniawski
4. Overture—*William Tell*.................Rossini
5. A Melody—*Wild Rosebud*...............Tobani
6. Mazurka—*La Czarine*..................Canne
7. Descriptive—*The Rocket at Gilligan's*......DeWitt

   Synopsis—The guests gather at Gilligan's: after their arrival Gilligan sings a song, which is followed by a country dance; the star singer then renders a touching ballad, after which the bagpipes strike up. "Are ye's all ready?" shouts Gilligan. "Yis." "Then fire away." A regular "welt the floor" and "slip time" follows, a sand jig comes next, and the festivities close with all singing "Saint Patrick's Day in the Morning."
8. Medley Selection—*Popular Hits*.........Schultz
9. March—*Everybody's Doing It Now*........Berlin

The next concert will be given at Pedro Miguel, May 4, at 4.30 p. m.

Family Quarters.

Applications for married quarters on file for April 1, were as follows:

DISTRICT.	List No 1.	List No. 2.
Ancon	8 (2)	63 (15)
Ancon Hospital	....	5 (1)
Balboa	....	33 (8)
Bas Obispo	....	40

Toro Point	1 (1)	5 (2)
Totals	24 (5)	762(149)

NOTE—The figures in parenthesis show the number of applicants already occupying regular or non-housekeeping family quarters at stations other than those at which applications are filed.

Married.

FARRAR-SWAB—On March 30, at the home of the bride's parents in Empire, Miss Mora A. Swab to Mr. Oliver S. Farrar of Balboa, the Rev. A. A. Nellis officiating. Canal Zone residence, Balboa.

WILLIS-WERTZ—On April 21, at the home of the bride's parents in Empire, Miss Nellie Louise Wertz to Mr. Willard G. Willis, the Rev. A. A. Nellis officiating. Canal Zone residence, Empire.

LOST—At the University Club, Panama, on the night of April 20, a French lace shawl. Finder is requested to communicate with Ad. Faure, Culebra.

WEATHER CONDITIONS, CANAL ZONE, MARCH, 1912.

The weather for the month as a whole continued unusually warm, dry and windy. There was a marked deficiency in rainfall at all stations, the average fall over the Isthmus being about 15 per cent of the March normal, and the lightest of record for any month during the past six years.

The average temperature and wind movement were the highest of record for the month of March, the maximum temperature of 96.2° F. at Ancon on the 7th being a fractional part of one degree higher than the highest previously recorded at any station in the Canal Zone.

The mean relative humidity was uniform over the Isthmus but slightly below normal, while normal conditions of cloudiness prevailed.

Weather conditions were again favorable for a high rate of evaporation.

Fogs—The few fogs observed during the month were of short duration and light density; 77 per cent were dissipated by 6.30 a. m., 96 per cent by 7.30 a. m., and 100 per cent by 8.30 a. m.

The Leyland Line steamship *Alexandrian* will sail for Port Limon and Mobile on or about May 1.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

United Fruit Company's ships for New Orleans direct leave on Thursdays at 3 p. m.; for New Orleans via Limon, on Thursdays at 2 p. m.; ships for New York via Kingston on Tuesdays at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro on Mondays and Tuesdays at 5 p. m.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MAY 1, 1912. No. 36.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS

Pedro Miguel Dam.

In the construction of the dam at the upper end of Pedro Miguel Lock, on the west side, the principle of which is the enclosure of an impervious core of clay between two parallel toes of heavy rock, the toes have not been extended the entire distance from Cerro Luisa to the lock on account of the railway tracks which crossed the site of the dam in making connections with the mixing plants at the upper approach to the lock. These tracks have recently been removed, following the completion of connections along the west side and north end of the dam, and the extension of the toes to full length is under way. The portion yet to be built is about 150 yards long.

The dumping of clay between the portions of the toes already completed has brought the inner edges of the masses dumped from opposite sides together and the core will soon be built up until the top is about a hundred and five feet above sealevel. The clay is supplied by the four steamshovels which are excavating the Canal channel through the proposed Miraflores Lake. The material is dumped in the daytime and through the night it is sprayed with jets of water until it becomes mud and settles into an impermeable mass. The five jets are supplied from a $4\frac{1}{2}$-inch main, into which an air-driven pump forces water from a depression at the foot of the west backfill for the lock. The pump is kept in continuous operation and when the jets are not in use the water flows out at the upper end of the main, into the depression between the converging sides of the core, and furthers the work of solidification. About 478,000 cubic yards of filling have been placed in the dam up to this time.

Proposed Wireless Communication.

The Navy Department has determined upon a site for the high power wireless telegraph station to be maintained on the Canal Zone at a point half a mile northwest of Caimeto Junction and an equal distance east from the old site of the village of San Pablo. The site is from 60 to 110 feet above the normal level of Gatun Lake, accessible by means of the Panama railroad, and near to the electric transmission, and telegraph and telephone lines which will follow the right of way of the railroad. In addition to this high power station, which will be capable of communicating with points at a distance of three thousand miles, there will be stations of less power at Porto Bello, and Colon, where the Navy now maintains stations, and one at Balboa near the Pacific entrance to the Canal. The status of wireless telegraph communication on the Isthmus has been fixed by the President in accordance with the following recommendation of the Joint Board of the Army and Navy appointed for that purpose:

> That no private or commercial wireless installations be permitted in the Canal Zone.
>
> That an understanding be reached with Panama to prevent the establishment of private and commercial wireless installations in its territory.
>
> That the Navy Department shall have authority to install, maintain, and operate under its jurisdiction a high power wireless station in the Canal Zone to be used in connection with its other stations in the Atlantic and Pacific, and for controlling the movements of its fleets in waters adjacent to the Panama Canal.
>
> That wireless stations under the jurisdiction of the Navy Department shall be opened to the public service and shall transmit commercial business under such regulations as the President of the United States may prescribe.

A request upon the Congress for an appropriation of one million dollars for the purpose of establishing high power wireless stations, one in the Canal Zone, one on the California coast, one in the Hawaiian Islands, one in American Samoa, one on the Island of Guam, and one in the Philippines, was made by the Secretary of the Navy on March 12.

Excavation of Gravel from Chagres River.

Because of the danger of inundation of railway tracks by a rise of the Chagres River, the Central Division has discontinued dredging gravel from the bed of the river near Gamboa bridge, and has removed all track lying at an elevation of less than 50 feet above sealevel. Former practice has been to forego operations while the river was at its rainy season height, resuming when it had dropped to dry season flow. But as the height of the river at Gamboa. at low water, is 44 feet above sealevel and it is expected that the surface of Gatun Lake will be 50 feet above sealevel before the end of the coming rainy season the tracks could not have been recovered if the water had risen and covered them.

During the past dry season the Central Division operated 3 cranes equipped with orange peel buckets on this work and excavated 91,300 cubic yards of gravel. One of the cranes has been transferred to the Division of Fortifications, another has been engaged in the removal of track in the Chagres station, and the third has been put at work on drainage ditches in the Empire district of Culebra Cut. Most of the gravel excavated at this point during the past dry season has been deposited in a storage pile in the rear of the site of the new town of Gamboa, on the relocated line of the Panama railroad. It is to be used principally for ballasting tracks. though the proportion of sand in it is such that by combining 4 parts of it with one of cement an excellent concrete is obtained.

The Panama railroad is still operating two cranes, with orange peel buckets, in two pits along the edge of the river, half a mile and a mile and a half above Gamboa bridge. Gravel from these pits has been stored in a pile lying across the river from the Gamboa gauging station. About 115,000 cubic yards have been excavated from the two pits during the past season.

Atlantic Terminal Docks.

In the construction of the Cristobal terminal docks, the temporary trestle for the mole, from which the piers will extend toward the anchorage basin, has been built to its full length of 1,720 feet. The mole proper will consist of a fill 250 feet wide, rising to 10 feet above mean sealevel. The material for the fill is rock secured from borrow pits near Mount Hope. Docks 15 and 16 come together at an angle, enclosing Cristobal Point, Dock 15 being practically an extension of Dock 11.

The work of driving steel caissons for Dock 16, is 70 per cent complete; that is, 10,500 lineal feet are in place. It is expected that all caissons will be in place on this dock in three weeks' time. No attempt will be made to place caissons on Dock 15 on account of interfering with the work at the cement dock—Dock 11 extension. The work of placing caissons for Pier 17 is 35 per cent complete, with 6,000 lineal feet of caissons in place. The extension of this pier into deep water has been delayed on account of shortage of long piling.

The dredge *Mindi* started work excavating the slip between Dock 16 and Pier 17 on April 22. It is intended to have this dredge take one cut along the face line of Dock 16 to elevation 41 feet below mean sealevel. This first cut is largely a construction measure and will involve moving about 41,000 cubic yards. If the services of the dredge can be spared, the entire slip will be dredged to 41 feet, which involves moving 310,000 cubic yards.

Removal of Narrow Gage Track at Gatun Locks.

Following the dismantling of the auxiliary concrete mixing plant east of the upper end of Gatun Locks, and in anticipation of the removal of the railway tracks leading to the east approach at the upper end, on account of the construction of the east dam, the 3-foot gage tracks extending from the site of the mixing plant to the east forebay and to the cellular approach wall have been removed, and after a quantity of debris is

NOTES OF PROGRESS.

(Continued.)

cleared away the forebay will be ready for the inundation consequent upon the rise of Gatun Lake. After May 1 the service for carrying visitors through the locks on a sightseeing train traversing the east chambers will be discontinued. This track has no connections beyond the ends of the lock chambers and all of the material in it, as well as the cars and the 18-ton locomotive, will be recovered by the use of a wrecking crane, operating from the top of the east side wall. A portion of the track will be shifted from the center of the chamber to the base of the wall and, beginning at the ends, the track will be torn up and the material hauled on the train to a point convenient to the crane. When no track is left except the last bit at the base of the wall, the locomotive and cars will be drawn up, and clearing away the train-length of track on which they stood will complete the removal. Narrow gage track will still be used on the west side of the locks, where two locomotives are engaged in hauling concrete from the permanent mixing plant to the trestle beside the upper approach wall, and at the spillway, in the construction of the spillway dam and for the permanent hydro-electric plant.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 87 per cent completed, 196,937 cubic yards, out of a total of 225,000, having been placed at the close of work on April 27. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
April 22	188	5.30	2
April 23	116	5.45	1
April 24	132	7.30	1
April 25	108	5.30	1
April 26	84	5.00	2
April 27	84	5.00	1
Total	712	34.15	1.3
Previously reported	196,225		
Grand total	196,937		

Ancon Crusher.

A statement of the rock crushed at Ancon quarry during the week ending April 27, follows:

Date.	Hours worked.	Cubic Yards.
April 22	12.55	4,679
April 23	10.45	4,523
April 24	10.10	3,992
April 25	10.55	3,371
April 26	13.05	4,747
April 27	13.05	4,150
Total	70.55	25,462

Porto Bello Crusher.

Date.	Hours worked.	Cubic Yards.
April 22	4.05	1,676
April 23	4.10	1,914
April 24	3.25	1,786
April 25	4.05	1,920
April 26	4.30	1,944
April 27	3.50	1,926
	24.05	11,166

New Tug Schedule—Dock 13.

Effective May 2, tugs will leave Dock 13 for Toro Point at 6.15 a. m., and will arrive at Dock 13 on return trip at 9 a. m. Tugs for Toro Point and Porto Bello leave at 5 p. m., and arrive at Dock 13 on return trip at 5 a. m. The Saturday passenger tug for Porto Bello will run on the same schedule as heretofore.

PERSONAL.

Mr. John M. G. Watt returned on April 25 on the steamship *Atenas*, from his annual leave, which he spent in Honduras and Florida.

Col. W. C. Gorgas sailed for the States on the *Ancon* on April 28 on his annual leave.

Missing Men.

Any one having information regarding the whereabouts of John Bonner Boyle of Pittsburgh, Pa., who is supposed to be on the Isthmus of Panama, is requested to communicate with THE CANAL RECORD.

CONCRETE WORK IN THE LOCKS.

Over 83 per cent of the concrete for the locks is in place, the amount at the close of work on April 27 being 3,582,767½ cubic yards, out of a total of approximately 4,303,486. A total of 29,321½ cubic yards of concrete was laid in the locks during the week ending April 27.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 27 being 1,865,382½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending April 27, and of the total follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

CANAL MEDAL BAR LIST.

(Continued)

The attached list contains the names of employes and ex-employes of the Isthmian Canal Commission, who at some time during the past year completed their fourth year of continuous service on the Isthmus and are now entitled to their first service bar. The date shown opposite each name is that on which the bar service was completed. This completes the list of those entitled to the first bar. The list of those entitled to a second bar and the P. R. R. medal and bar lists will be published in a future issue.

All changes or corrections should be reported to the Office of the Chairman, at Culebra, at an early date.

As soon as the list is revised, numbers will be assigned by lot, on both medal and bar lists and the lists will be forwarded to the Washington Office where final arrangements will be made for the proper engraving. Distribution will be made about September 1 of the present year.

SOCIAL LIFE OF THE ZONE

Women's Clubs.

There will be a meeting of the executive board of the Canal Zone Federation of Women's Clubs at Cristobal on Saturday, May 18. Presidents of the federated clubs are requested to advise with members concerning questions that will come up. All questions relating to the library, traveling art gallery, and the work of special committees will be reported upon at this meeting. If any president cannot attend, she may send a representative, provided the name of such representative be forwarded to the Recording Secretary, Mrs. C. H. Elliott, Cristobal, not later than May 11. Federation officers may not send representatives. This meeting is the last that will be held until October and it is necessary that all business be settled at this time.

Owing to the illness of the president, the annual meeting of the Cristobal Woman's Club which should have been held on April 24, has been deferred until May 1. The business meeting will be preceded by a meeting of the executive board of the club.

The benefit dance given by the Gatun Woman's Club on April 13 netted over $50, which will go to the Federation fund. The club will probably give a similar entertainment on May 11.

The day of meeting for the Ancon Study club has been changed from Thursday to Friday. The meetings will be held at the homes of members, unless otherwise arranged. On May 3, the meeting will be at the home of Mrs. Mason, House 36, and the subject, "The Greek Renaissance."

Church Work.

The Rev. H. Page Dyer, of the Church of the Ascension, Philadelphia, will arrive on the Isthmus on Friday, May 3, for the purpose of holding a month's mission in the Episcopal churches and missions in the Canal Zone. The mission will begin with a conference of the clergy and lay workers at Christ Church on Saturday, May 4, and throughout the week following, special preaching services will be held daily. Every evening there will be a service at 7.30 preceded by a short service of song. From May 12 to May 19, Father Dyer will hold a mission at St. Paul's Church, Panama; from May 19 to May 26, the mission will be at St. Mark's, Culebra; from May 26 to June 2, at St. James', Empire.

The Rev. Henry A. Brown, chaplain at Ancon Hospital, will leave for the States on his annual vacation on May 3. During his absence the services at St. Luke's Hospital Chapel will be maintained as usual. On Sunday, May 5, the Rev. Edward J. Cooper will take the ten o'clock service, and on May 19, the Rev. Father Dyer. The pulpit will be occupied on the following Sundays according to arrangements to be made later.

On Sunday, April 28, the new mortuary chapel at Colon Hospital was blessed, the service being held in the afternoon at 4 o'clock. The hospital chaplains, the Rev. Father Cooper and the Rev. Father Volk, officiated. The service was attended by the doctors and nurses of the hospital staff.

The next meeting of the Woman's Altar Guild of St. Luke's Hospital Chapel, Ancon, will be held at Ancon Hall on Tuesday morning, May 7. For its Easter offering the Guild presented $50 to the general missionary fund for church extension work in the Canal Zone.

The Ladies' Auxiliary of the Gatun Christian League has inaugurated a course of missionary study under the direction of Mrs. Stephen Witt. Meetings of the auxiliary are held in the Commission chapel on the first and third Thursdays in each month. Mrs. Hanna is the president, and Mrs. Windes is secretary-treasurer.

The corner stone of the new church building erected by the United Methodist Church, West Indian, at Guachapali, Panama, will laid on Sunday afternoon, May 19. Delegations of fraternal orders, and representatives of the Salvation Army will be present.

The Southern Baptist Convention, represented on the Isthmus by the Rev. Stephen Witt, is erecting a church building for its services in New Gatun. The expenses of this building will be borne by the local members, assisted by the Missions board.

Odd Fellows' Anniversary.

On Friday, April 26, the different lodges of the Independent Order of Odd Fellows in the Canal Zone celebrated the 93rd anniversary of the founding of the Order. The first Zone lodge was organized on November 10, 1906, and was granted a charter the following year. This was at Gorgona; the second lodge was formed at Cristobal in May, 1908, the third at Ancon in 1910, and the fourth at Gatun in 1911. The auxiliary Order of the Daughters of Rebekah was organized in 1908.

Lawn Tennis Tournaments.

The singles and doubles tennis tournaments scheduled to be played on May 30 for the championship of the Isthmus for the year 1912 have been changed as follows:

May 5, singles preliminaries, Tivoli and Ancon Club courts; May 12, singles finals, Tivoli and Ancon Club courts; May 30, doubles preliminaries, courts to be announced later; June 2, doubles finals, courts to be announced later.

These tournaments are open to all comers upon the payment of one dollar entrance fee, the same to accompany the name of person desiring to enter, to B. C. Poole, Secretary and Treasurer, Isthmian Tennis Association, Ancon.

Booklet on First Aid to the Injured.

Concise directions for rendering first aid to the injured are given in a pocket pamphlet, three by five inches in size and containing 14 pages, which the Department of Sanitation has published and is distributing to employes through the heads of departments. Outlines are given of orderly movements in assisting victims of cuts, scalds and burns, drowning, and electric shock, and six diagrams, adapted from the "First Aid" of Maj. Charles Lynch, U. S. A., show the use of tourniquets and bandages and the points at which to apply pressure to stop bleeding in various parts of the body.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on May 8. All applicants for license as chauffeur must secure from the Department of Civil Administration, Executive office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8.00 a. m. on May 8, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their capacity properly to operate an automobile, and must have the automobile with them.

Postal Business and Canal Zone Revenues.

The total value of money orders issued in the Canal Zone during the month of March was $375,605.68, of which $311,604.49 was issued payable in the United States, which includes European orders, $63,173.94 in the Canal Zone, $568.25 in Martinique and $259.00 in Cost Rica. The number of orders issued was 18,447, the average value being, therefore, about $20 each. Money order fees amounted to $1,790.31. The postage sales amounted to $5,157.60, and newspaper postage to $16.38.

Revenue collections during the month of March were as follows:

Bicycle and chauffeur licenses	61.00
Insurance collections	143.10
Motor vehicle licenses	70.00
Steamboat inspection	657.50
Taxes and licenses	13,747.62
Total	$14,679.22

Postal Savings Bank.

A statement of Postal Savings Bank transactions at Canal Zone post offices for the period of March 3 to March 31. follows:

Name of Office.	Postal Savings Certificates Issued	Postal Savings Certificates Paid.
Ancon	$5,242.00	$1,426.00
Balboa	7,796.00	3,149.00
Bas Obispo	345.00	20.00
Corozal	10,037.00	2,705.00
Cristobal	5,755.00	990.00
Culebra	7,232.00	2,768.00
Empire	4,161.00	2,121.00
Gatun	9,680.00	2,357.00
Gorgona	22,143.00	4,661.00
Las Cascadas	11,545.00	2,672.00
Matachin	924.00	30.00
Miraflores	3,054.00	871.00
Paraiso	4,191.00	1,183.00
Pedro Miguel	15,703.00	4,110.00
Cristobal Station "A"	920.00	190.00
Cristobal Station "B"	645.00	365.00
Total	$109,373.00	$29,618.00

Married.

BAYNE-ELDREDGE—At Cristobal on April 11, Evelyn Clara Eldredge of Manchester, Mass., to Clarence W. Bayne of Silver City, N. M. Canal Zone residence, Empire.

JACKSON-NORRIS—On April 25, Miss Grace Isabelle Norris of Oakwood, Okla., to John James Jackson of Boston, Mass., at the Union Church, Cristobal, the Rev. Carl H. Elliott officiating. Canal Zone residence, Cristobal.

LOCK-BUILDING EQUIPMENT.

Forms for Concrete, and Porto Bello Crusher Plant Machinery for Sale.

Concrete work at Gatun Locks is so near completion that the steel back, side and culvert forms, which have been used in the construction of the walls of the locks proper, have been offered for sale; and the rock-crushing plant at Porto Bello, which has supplied the broken stone for the concrete, was closed down on April 30 and the equipment is offered for sale. The heavy masonry for the walls of the chambers has been completed, and the remaining concrete, 7 per cent of the total amount required for the locks, will be laid in finishing the chamber walls and in the construction of the approach and wing walls at each end of the locks. At the upper end the wing walls have been completed, except for smoothing the surfaces and grouting in equipment requisite for handling vessels in the forebays; and 12,000 of the 35,000 cubic yards of concrete in the cellular portion of the approach wall are yet to be placed. The solid part of this wall is practically completed. The greater portion of the remaining concrete construction work is to be done at the lower end of the locks, where none of the 130,000 cubic yards for the approach and wing walls has been laid. The sites of these walls are now under water and excavation for the foundations is being made by pipeline suction dredge.

The steel forms, bids for the purchase of which are to be opened in the Washington office of the Isthmian Canal Conmissiom on May 8, have been in use since the first concrete was laid at Gatun, on August 24, 1909, for the upper lock. A description of them and of the mode of erecting and aligning them was published in THE CANAL RECORD of September 1, 1909. They consist of 72 center-wall side forms, which are girders, 6 feet wide by 36 feet long and 6 inches deep, 3 center-wall back forms, 13 vertical section back forms, 13 center wall horizontal section back forms, 79 center-wall back-form angles, 205 side-wall side forms, 6 side-wall back forms, 17 side-wall vertical section back forms, 69 side-wall back-form angles, 40 collapsible culvert forms, 8 feet in horizontal diameter and 6 feet 6 inches in vertical diameter, and 23 collapsible tunnel culvert forms, 18 feet in diameter.

Throughout the erection of the three twin locks these forms have been used in the construction of the center and side walls; of the culverts extending through the length of the walls, with the exception of the portions at the dips between lock levels, for which wooden curved forms were constructed. Their use has been satisfactory.

For instance, in the construction of a wall, the steel face plates, or forms for a section of wall 36 feet long and 78 feet high could be moved on the towers designed to support them and be aligned for the placing of the concrete, to the full height of the wall, within a working day. And since there was no necessity, as in the use of forms made of portable wooden sections, for waiting until the concrete placed within the forms hardened before erecting those for the next section of wall above, the concrete could be placed within the complete steel forms as fast as it could be supplied by the mixing and handling plants. In practice, a 36-foot length of center wall was ordinarily built in 8 days, rising at the rate of about 10 feet a day.

The tower used to support the forms consists of a steel framework with a vertical side upon which the flat metal plates were aligned to form a continous face to the height required, and a system of struts in the rear, reinforcing the front part and providing against the lateral stress set up by the pressure of the concrete. A cross-section of a tower is a right triangle, with the right angle at the base of the wall for which the forms were placed. Moving the tower to successive locations was done by means of railway trucks at its base. Tracks were laid along the lock floor as required: and when it was desired to transfer a tower from one lock level to another trestles inclined on a grade of 10 per cent were used. Each of the trestles was about 290 feet long and built in sections 72 feet in length. After its first erection a trestle was preserved and if required at another place it was moved in sections by means of the cableways above the locks. The twelve towers are not offered for sale, but three have been dismantled and all of them will be put in storage at Mount Hope.

PORTO BELLO PLANT.

The cessation of rock-crushing at Porto Bello is due to the fact that there is now in the storage piles at the permanent and spillway mixing plants at Gatun sufficient rock for the concrete required for the completion of the work at the Atlantic end of Gatun Lake. The locks will require about 143,000 cubic yards more and the spillway about 28,000, or a total of about 171,000 cubic yards. Approximately eighty per cent of the remaining concrete is to be made with 24 cubic feet of rock in each cubic yard of concrete, which has been the standard proportion for heavy masonry at Gatun; and the other 20 per cent, which is to be reinforced concrete, will be mixed with cement, sand and rock in the proportion of 1:2:4. In the first case rock forms eight-ninths of the concrete; in the reinforced concrete it is four-sevenths of the whole. The total amount of rock in storage at Gatun is now about 170,000 cubic yards, enough to supply the estimated requirements and leave several thousands yards for contigencies.

In round numbers, 2,000,000 cubic yards of rock have been crushed by the plant at Porto Bello since it began operations in the latter part of 1907. It has supplied rock for use, in addition to its principal consumption at Gatun, in the concrete construction for the filtration plant at Agua Clara reservoir, for the sewers, gutters and curbs in Colon, for macadam roads, including the highway from Gatun to Colon, and for general use in the work of the Atlantic Division. The first load of stone from it was unloaded at Gatun in May, 1909.

The closing of the crushing plant will not be followed by the discontinuance of work in the quarries from which it was supplied. Operations in them will continue, with a slight reduction of force, in order to furnish large rocks for the fill at the Toro Point breakwater. It is calculated to haul a maxium of four 400-cubic yard barges of heavy rock to the breakwater each day. Nine or ten barges will be used in this service, and another will be used for hauling coal to Porto Bello from Cristobal. At the beginning of 1912 the Atlantic Division had 18 barges in service; three of them are being towed around South America, for use in the Pacific entrance, and two have been transferred to the Division of Fortifications. The two or three of the remainder, which will not be in use in connection with the Porto Bello operations, will be used in varied service. The present railway equipment in the quarries, built on a 42-inch gage, is to be supplanted by 5-foot, or Isthmian standard, gage equipment in order better to handle the heavy rocks. The new rolling stock will consist of 32 Lidgerwood cars, released by the Central Division, seven 400-class Rogers locomotives, and a dump car for general utility. As a result of this change the 42-inch gage rolling stock, including ten 40-ton Porter locomotives, has been reported available for sale.

The rolling stock is not to be sold, however, in connection with the crusher plant. Bids on the latter were to have been opened at the Washington office of the Commission on May 21, but as the original advertisement did not include the spare parts a supplementary circular is being prepared and new bids will be invited. The principal parts of the equipment for the plant, a description of which was published in THE CANAL RECORD of September 2, 1908, are two No. 9 and six No. 6 McCully rock crushers, and one No. 21 Gates crusher; one rock-conveying system, complete, with sprockets, gearing, T-rails, framing and so forth, for a pivotal conveyor of total length of approximately 394 lineal feet, with pivotal buckets of ¼-inch steel plates, 36 inches wide, 21 inches long and 11 inches deep, inside dimensions, carried by chain bars on 6-inch rollers set 24 inches from center to center; also, two cross conveyors, with approximately 122 feet between centers of end sprockets, with corresponding buckets, chain bars and rollers; two Sterling water-tube boilers of 185 horsepower; one Worthington surface condenser, with 2,255 square feet of tube surface, and air and circulating pumps; one Hamilton-Corliss cross-compound condensing engine, with indicated horsepower of 350 at ½ cut-off, 420 at ⅓ cut-off; one tandem compound Ball engine, of 250 indicated horsepower at normal speed of 160 to 170 revolutions per minute; and one tandem compound Ball engine of 400 indicated horsepower at 150 revolutions per minute.

Extension of Steamship Service to Colombia.

Commencing April 24, and until further notice, the steamships *Santa Marta*, *Metapan*, *Almirante* and *Zacapa*, in the United Fruit Company's New York–Jamaica–Panama–Colombia Service, will make Cartagena and Puerto Colombia ports of call. Vessels sail from Colon on Thursday at 8 p. m.; arrive at Cartagena on Saturday at 6 a. m. and leave at 5 p. m.; arrive at Puerto Colombia on Sunday at 6 a. m. and leave at 5 p. m.: arrive at Santa Marta at 6 a. m., Monday, and leave at 6 p. m., Tuesday; call at Cartgena in the forenoon of Wednesday; arrive at Colon on Thursday at 9 a. m. and leave at 11 a. m. for New York, by way of Kingston.

Public Health Lectures.

On Thursday evening, April 25, a lecture on the fly as a carrier of disease was given in the conversorium, Colon, the second in the series of free health lectures for the people. There was an attendance of about 200, this being one of the largest audiences that has attended any of the lectures. New slides were exhibited and the feature part of the program was an informal talk on Guatemala, illustrated with lantern slides.

The next lecture will be on oral hygiene on Thursday evening, May 23. The lecture will be in English.

DYNAMITE.

Explosive and Blasting Materials Required for the Coming Year.

It is estimated that only 3,986,500 pounds of dynamite will be required for the Canal work during the year beginning July 1, 1912, and the request for bids to be opened in Washington this week is based upon this amount, with the privilege of increasing or decreasing it by 20 per cent or less. The bidder must also state prices if awarded the whole amount specified, or 75, 50, or 25 per cent of it. Saltpeter dynamite is specified, but bids will be received on Trojan or similar dynamite that can meet the requirements of the work. The comparatively small amount of dynamite estimated for the forthcoming year is due to the approaching completion of the excavation work, and every precaution is being taken to avoid an overstock. The amounts purchased in past years, the amount delivered this year and to be delivered before July 1, as compared with the estimate for the forthcoming year, are as follows:

Year.	*Pounds.*	*Year.*	*Pounds.*
1904*........	500,000	1910.........	10,403,800
1906.........	1,400,000	1911.........	9,501,850
1907.........	5,087,000	1912.........	8,533,000
1908.........	6,822,000	1913†........	3,986,500
1909.........	8,270,000		

*Amount purchased for 1904 lasted during 1905.
†Estimate.

Of the dynamite estimated for the coming year, 2,680,000 pounds are 45 per cent in cartridges 1¼ by 8 inches, 1,072,000 pounds 60 per cent in cartridges 1¼ by 8 inches, and 234,500 pounds 60 per cent in cartridges 2 by 8 inches. The estimate for the various divisions shows that about 70 per cent of the total is for use in Culebra Cut, ten per cent each in the Atlantic and Pacific Divisions, and the balance for the Panama railroad, fortifications, and Balboa docks.

The estimate for blasting materials follows:

Blasting caps, number..................	328,000
Tape fuse, feet	877,000
Insulating tape, rolls, ½-pound..........	3,680
Connecting wire, feet..................	10,000
Lead wire, feet........................	555,300
Electric fuses, feet....................	627,100
Triple tape fuse, feet..................	36,000
Blasting powder, pounds..............	20,000
Leadwire, feet.........................	25,000

Concrete Work at Pedro Miguel Lock.

The heavy masonry for Pedro Miguel Lock proper is practically completed, with the exception of 2,840 cubic yards in the west side wall, immediately below the intake for the culvert. The greater portion of the wall at this point was built up by means of portable mixers but since it was brought almost to the level of the adjacent backfill concrete has been supplied by Decauville cars running over a trestle from a stiff-legged derrick mounted on the completed wall on a line with the site of the emergency dam. The derrick lifts 2-cubic yard buckets from narrow-gage trains at the bottom of the west approach chamber, supplied by the nearby permanent mixing plant, and dumps them into a hopper from which the Decauville cars are supplied.

The remainder of the heavy work will be on the approach and wing walls at both ends of the lock. At the upper end, 937 cubic yards have been laid in the west wing wall, raising it to an elevation of about 25 feet for a distance of 30 feet from its juncture with the buttress at the intake culvert. For the opposite wing wall a steamshovel has cut into the side of the hill to prepare a bedrock site, and the laying of concrete will begin shortly. The approach wall has been brought to a height of 30 feet, above the reach of the locomotive cranes which have been lifting buckets to the forms, and an additional elevator for Decauville cars, similar to the one at the upper end, described in THE CANAL RECORD of March 20, 1912, has been erected on the west side of the center of the wall to place concrete from the permanent mixing plant.

At the lower end of the lock, the east and west wing walls are 99 and 76 per cent completed, respectively. New forms have been erected for the west wall and concrete will be supplied from a portable mixer mounted on the lower end of the side wall proper. The lower approach will is to be extended 250 feet beyond its present length of 950 feet, requiring the placing of approximately 30,000 cubic yards of concrete.

OFFICIAL CIRCULARS.

Use of Water Restricted in Colon.

CULEBRA, C. Z., April 27, 1912.

CIRCULAR No. 365-D:

The utmost necessity exists for conserving the water supply from the Brazos Brook Reservoir, which has reached a low stage. The use of water should be restricted to actual necessities. All employes of the Isthmian Canal Commission and Panama Railroad Company residing in Cristobal and Colon are instructed to co-operate to this end. GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Overhauling of Rolling Equipment.

CULEBRA, C. Z., April 27, 1912.

CIRCULAR No. 323-B:

1. Before any piece of rolling equipment in use by any division or department is given a general overhauling or other repairs, it should be first ascertained whether economy would not result by substituting a surplus piece of equipment of similar class and capacity, and, if so, it is desired that this exchange be made by making the necessary transfers in the regular manner without plant charge.

2. In order to effect this in the simplest manner, the following general procedure is outlined: When any piece of rolling equipment (locomotive, car, locomotive crane, unloader, spreader, plow, track shifter or pile driver) becomes surplus and is turned over to the Quartermaster's Department as prescribed in Circular No. 323-Revised, the Quartermaster's Department will advise the Superintendent of the Mechanical Division accordingly, and the latter will make an approximate estimate of the cost of repairs required to put it in a serviceable condition.

3. Before any piece of rolling equipment is given heavy repairs, the Superintendent of the Mechanical Division will ascertain and report to the head of the division or department concerned whether there is any surplus equipment of the same or similar class and capacity that can be made ready for use at less cost. Upon the receipt of this information the head of the division or department concerned will arrange the transfers to effect the necessary substitution, which transfers will be without plant charge, and will issue the necessary orders for the repairs to the substituted equipment.

4. The foregoing provisions will also apply to steamshovels and rock drills, except that the Superintendent of Steamshovel Repairs will perform the duties in matters affecting this equipment prescribed hereinabove for the Superintendent of the Mechanical Division.

5. In order to effect the greatest economy and to obtain the greatest use for surplus equipment of the foregoing classes, the exchange of equipment of the same class, but of different capacities and costs, may be likewise made in accordance with the foregoing procedure, with the exception that in case of substitution of this kind the transfers will be made with a plant charge, which will be fixed by the Surveying Officer.

GEO. W. GOETHALS, *Chairman.*

Canal Zone Liquor Licenses.

ANCON, C. Z., April 29, 1912.

The Isthmian Canal Commission, at its meeting held at Culebra on April 26, has authorized the issuance of liquor licenses in the Canal Zone for the year commencing July 1, 1912, at Culebra, Empire, Matachin, Gorgona, and Gatun.

The areas within which saloons may be located are as follows:

Culebra—Lots 11 to 19, inclusive, block 1; lots 12 to 20, inclusive, block 2; lots 1 to 9, inclusive, block 4; lots 2 to 10, inclusive, block 5, West Culebra.

Empire—The area bounded by Second Avenue, Main Street, Seventh Avenue and Front Street, *Provided, however*, That no saloons in addition to the total number now being conducted on Front Street shall be licensed.

Matachin—On the main street of the town, on the north side of the Panama railroad, in line with the buildings in which saloons are now located.

Gorgona—Area bounded by Second Street, Avenue "E," Fifth Street and Central Avenue (or Avenue "A"); but no saloons will be permitted to face on Central Avenue.

Gatun—All of blocks 7 and 8; lots 1 to 5, inclusive, block 2; lots 1 to 5, inclusive, block 4; and lots 1 to 4, inclusive, block 6, of the new town laid out by the Panama Railroad Company.

All of the areas described are more particularly indicated on maps which may be seen in the office of the Collector of Revenues, Ancon, or in the offices of the Deputy Collectors of Revenues at Empire, Gorgona, and Cristobal.

The designation of the areas hereinbefore made, however, shall not be construed as prohibiting the renewal of the licenses of dealers now engaged in the retail sale of liquor, under proper license, in any of the towns mentioned, outside of the areas designated—the places of business of all such dealers outside of the areas described being shown on the maps hereinbefore referred to.

The number of saloons to be located in each town within the area designated shall not be restricted, except as indicated on Front Street, Empire, but each reliable and responsible applicant shall be granted a license for the sale of liquor within any such described area, in conformity with the Regulations, upon the payment of the necessary fee.

Applicants for licenses are invited to submit their applications prior to June 1, 1912, in conformity with the regulations adopted by the Isthmian Canal Commission, April 27, 1907, and amendments.

Tom M. Cooke, *Collector of Revenues.*

Acting General Foreman of Car Department.

Panama Railroad Company,
Office of General Superintendent.
Colon, R. P., April 26, 1912.

To all Concerned:

During the absence of Mr. J. Belt, General Foreman; Car Department, on 42 days' leave of absence effective May 3, 1912, Mr. C. O. Simonson is appointed Acting General Foreman of the Car Department.

J. A. Smith, *General Superintendent.*

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending April 27:

Trent, April 21, from New York, with 4 cases paper; for stock.

Nordpol, April 21, from Baltimore, with 2,032 bundles steel bars, 1,725 pieces steel angles, 10,000 bundles tie plates, 132 cases nuts, 184 drums gasoline, 5 pieces car wheels, for stock; 500 pieces car wheels, 30 bundles crane parts, 187 pieces oak lumber, for Mechanical Division; 1,600 bundles tie plates, 150 pieces structural steel, 13 bundles structural steel, 9 bundles car parts, for Panama Railroad Company; 32 cases valve machines, 177 cases valve parts, 16 crates valve parts, 43 bundles valve parts, 115 pieces valve parts, 8 barrels linseed oil, 1,070 pieces structural material, 392 bundles structural material, 120 cases structural material, 63 kegs bolts and nuts, 30 pieces machinery, for Superintendent of Erection; 8 bundles castings, for Atlantic Division; 1,720 bundles steel bars, 2,021 pieces steel bars, for Pacific Division; 150 bags creosoted pins, for stock.

Assyria, April 22, from Hamburg, with 6 cases thrust screws, for Superintendent of erection.

Aldershot, April 22, from Jacksonville, with 259 pieces creosoted piling, for Atlantic Division; 1,929 pieces lumber, for Mechanical Division; 461 pieces piling, 513 pieces lumber, for stock.

Pleiades, April 23, from San Francisco, with 1,074 bales hay, 750 cases dynamite, for stock.

Lord Downshire, April 23, from New York, with 135,903 bags cement, for Atlantic and Pacific Divisions.

Aztec, April 24, from San Francisco, with 47 coils manila rope, 4,994 pieces pine lumber, for stock.

Atenas, April 25, from New Orleans, with 1 motor fire engine, for Department of Civil Administration; 3,198 pieces lumber, for Mechanical Division; 2,431 pieces lumber, 30 pieces piling, 7 crates castings, 380 drums kerosene, 250 kegs white lead, 5 cases hardware, 135 barrels fire clay, for stock.

Santa Marta, April 25, from New York, with 158 bundles lumber, 60 pieces lumber, 5 cases chemicals, for Mechanical Division; 27 pieces steel ties, for Superintendent of Erection; 14,600 pieces hollow tile, 16 pieces steel ties, for Panama Railroad Company; 25 bales mops, 14 cases handles, for stock.

Thelma, April 25, from St. Mary's, Ga., with 1,656 pieces piling, for stock.

Panama, April 26, from New York, with 401 bundles steel bars, 8 cases electrical material, 84 crates brick, for Atlantic Division; 74 barrels sand, 22 cases brake shoes, 110 cases castings, 150 bundles car springs, for Mechanical Division; 30 cases cartridges, for Department of Civil Administration; 112 pieces signal material, 30 cases signal material, 22 pieces crane parts, for Panama Railroad Company; 1 launch, for Department of Civil Administration; 70 cases drugs and sundries, for Sanitary Department; 48 cases bolts, 4 cases electrical material, for Superintendent of Erection; 12 pieces wagon tongues, 10 pieces castings, 8 cases car seals, 25 barrels flour, 229 kegs bolts and rivets, 32 cases rubber hose, 50 cases candles, 32 cases air brake material, 10 cases leather belting, 10 cases cardboard, 167 bundles binder boards, 8 cases valves, 20 cases lubricating oil, 116 bundles steel bars, for stock; and a miscellaneous cargo, the whole consisting of 1,985 packages, weighing 275 tons.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving picture entertainments for the week May 6 to 11, is as follows: Monday, Cristobal; Tuesday, Gorgona; Wednesday, Gatun; Thursday, Empire; Friday, Corozal; Saturday, Culebra.

COROZAL.

Corozal defeated the Gatun indoor baseball team last Saturday night, 46 to 16. Gorgona is scheduled to play at Corozal on May 4.

The Culebra billiard team won four games from the Corozal team on Saturday night. Scores—Conlan of Culebra, 100,100; Thompson of Corozal, 90, 92; Tragsdorf of Culebra, 100, 100; Fulton, 41, 98.

CULEBRA.

Following are the bowling scores of Saturday evening, Gorgona and Culebra, at Culebra:

Culebra.				Gorgona.			
Hill	91	90	84	Davis	99	89	103
Corn'waite	85	98	91	Anderson	98	94	68
Bartlett	78	87	101	Deihl	78	85	98
Gier	93	76	110	Sims	82	82	89
Palmer	82	95	85	Haggerty	102	94	73
Total	429	446	471		439	421	429

A handball tournament will be started this week; all men interested in exercise of this kind may join.

Empire chess players played the Culebra men at Culebra on Wednesday evening.

The Cristobal duckpin bowling team will bowl against Culebra at Culebra on Saturday evening.

The Culebra Glee Club is planning a concert for the last week of May.

EMPIRE.

The following high scores were bowled in duckpins during the past week—Rodeighiro 105; Grund, 114; Gustaveson, 117, 118; Goolsby, 106; Barnes, 105; Pinney, 111,111; N. Giavolli, 105.

Empire won two of three games from Gatun on Saturday, April 27; the scores:

Empire.				Gatun.			
Goolsby	75	75		Mohen	84	87	82
Dainel'on	90	85	100	Vier	88	102	90
L. Giavolli	98	87	90	Smith	77	89	98
N. Giavolli	82	78	80	Swallow	95	90	99
Rodeighiro	96	90	103	Barte	70	82	85
Dakin			84				
Total	440	415	457		414	450	454

The Spanish classes meet on Tuesday and Thursday evenings.

GORGONA.

The following games of duckpins were rolled at Gorgona on Saturday night, April 27, between Gorgona and Culebra:

Culebra.				Gorgona.			
Sterns	81	83	84	Morrison	89	91	80
Baumer	84	90	75	Dunlop	109	90	92
Crain	90	81	95	Robertson	82	85	92
Mengel	83	101	78	Miner	87	78	70
Silver	71	83	88	Otis	82	88	83
Total	409	438	420		449	432	417

Empire forfeited the game of indoor baseball to Gorgona on Saturday night, April 27. Gorgona has won eight games and leads the league with 100 per cent. The next game is with Corozal at Corozal on Saturday night, May 4. The team defeated the Company A team from Camp Elliott on Thursday night, April 25, at Gorgona, 33 to 12, and it plays at Camp Elliott on Tuesday, April 30.

At the next sunset song service on Sunday night, May 5, colored slides will be used with some of the songs.

There were 321 present at the moving picture show Wednesday, April 24 and 256 present at the entertainment given by the Hill Magical Company on Saturday, April 27.

The affirmative won the debate at the discussion club on Monday night, April 22, when Messrs. Swanson and Carruthers spoke in favor of a second nomination by the Republican party of Mr. Taft. Messrs. Morrison and Grossberg spoke on the negative.

GATUN.

Gatun broke even with Empire in the pool and billiard match played at Gatun on Saturday evening, April 27. 'DePoorter and Hughes, who did not play, will play two games at Empire on Saturday night, May 4. The results were: *Pool—Gatun*—Dalton, 100; Galloway, 59. *Empire*—McKeever, 78; Pearson, 100. *Billiards—Gatun*—Townsley, 100; Wurster, 57. *Empire*—Fullman, 57; Wood, 100.

The bowling results of Saturday night, April 27, at Gatun were:

Gatun...... 409 429 467 Empire.... 460 450 414

Captain Huttelmaier of Gatun made an average of 102 for his three games.

Although the local duckpin tournament is not quite finished, the Algonquins, Huttelmaier, captain, have enough games to their credit to make it impossible for them to lose first place. The other members of the team are Hughes, C. R., Jewell, Wilson, and Smith. Each will receive a gold medal. Several teams are trying for second place.

At the meeting of the Executive Council on Friday, April 26, W. C. Gayer was elected vice-chairman in the place of Dan St. Clair, resigned.

A pianola with 60 records has been placed in the lobby of the clubhouse.

Mrs. M. E. McLeod played two violin solos at the moving picture show on Friday night, April 26.

Two new Spanish classes are being organized this week, a beginners' class for men and a beginners' class for women. The former will meet at 9.30 Wednesdays and Fridays and the latter at 1.30 p. m., Tuesdays and Thursdays. There are now six classes studying Spanish with thirty-four students. The charge for a ten-lesson course is $2.50.

The Hill Magical Company will appear at the Gatun clubhouse on Friday, May 3.

On Saturday evening, May 4, Gatun plays baseball at Cristobal, bowls Gorgona at home and abroad, and plays pool and billiards with Empire.

The following additional newspapers have been ordered from the states: *Memphis Commercial Appeal*, *Chicago Record Herald*, *Houston Post*, and *Pittsburgh Dispatch*.

The Discussion Club met on Sunday evening, April 28. The subject was "Woman and the Ideal Home." The Secretary acted as leader.

CRISTOBAL.

An audience of 221 people witnessed the performance by the Hill Magical Company on Tuesday, April 21.

Two hundred and ninety-seven people attended the moving picture show on Saturday evening, April 27. The next in the series will be on Monday evening, May 5.

On Saturday evening, April 27, the Cristobal duckpin team won all three games over the Camp Elliott team on the local alleys.

On Saturday evening, May 4, the Culebra duckpin team will roll the Cristobal team on the local alleys.

The Gatun indoor baseball team will play the Cristobal team on the local floor on Saturday evening, May 4.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Pedro Miguel, C. Z., Sunday, May 5, 1912, at 4.30 p. m. The program follows:

1. March—*Under the Double Eagle*..........Wagner
2. Selection—*The Prince of Pilsen*...........Luders
3. —*Chicken Reel*...........................Daly
4. Overture—*William Tell*.................Rossini
5. Mazurka—*La Czarine*....................Ganne
6. Potpourri—*The Sunny South*..............Lampe
7. Descriptive—*The Racket at Gilligan's*....De Witt

   Synopsis—The guests gather at Gilligan's; after their arrival Gilligan sings a song, which is followed by a country dance; the star singer then renders a touching ballad, after which the bagpipes strike up. "Are ye's all ready?" shouts Gilligan. "Yis." "Then fire away." A regular "welt the floor" and "slip time" follows, a sand jig comes next, and the festivities close with all singing "Saint Patrick's Day in the Morning."

8. Medley Selection—*Popular Songs*...........Halle
9. March—*Everybody's Doing It Now*........Berlin

Charles E. Jennings, *Musical Director.*

The next concert will be given at the Hotel Tivoli, Ancon, May 12, at 8 p. m.

Rainfall from April 1 to 27, 1912, Inclusive.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

High Record for Concrete Placement in Locks.

During the month of April 107,211 cubic yards of concrete were placed in the Pacific locks, of which 97,751 cubic yards were placed at Miraflores, and 9,460 cubic yards at Pedro Miguel. This surpasses the previous highest monthly record of concrete placed in the locks, during March, 1912, which amounted to 93,037 cubic yards, of which 83,706 cubic yards were placed at Miraflores, and 9,331 cubic yards at Pedro Miguel. The highest lock record prior to that of March was 89,401 cubic yards, laid at Gatun Locks in the month of June, 1910.

Canal Work in April.

The grand total of Canal excavation to May 1 was 168,486,884 cubic yards, leaving to be excavated 26,836,495 cubic yards, or less than one-sixth of the entire amount for the completed Canal.

The total for April was 2,754,383 cubic yards, as compared with 2,691,753 cubic yards, in April, 1911.

The dry excavation amounted to 1,849,592 cubic yards, and was principally by steamshovels. The dredges removed 787,611 cubic yards, and 117,180 yards were sluiced at Miraflores Locks, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 403,616 cubic yards. There was no dry excavation in this division during the month.

The total excavation in the Central Division was 1,654,475 cubic yards, 1,620,555 cubic yards from the prism, and 33,920 cubic yards from the Obispo Diversion.

In the Pacific Division, the total excavation was 696,292 cubic yards, 383,995 cubic yards of which was taken out by dredging at the Pacific entrance and 117,180 by sluicing.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation—	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*

TOTAL CANAL EXCAVATION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation	1,822,064	27,528	1,849,592
Wet excavation	787,611	117,180	904,791
Total	2,609,675	144,708	2,754,383

Mean rainfall along Canal (ten stations), 2.35 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL	Atlantic.	Pacific.	Total.
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*
Concrete laid in locks	11,600	107,195	118,795
Concrete laid in dams and spillways	3,392		3,392
Fill placed in dams	491,145	93,677	584,822

First Lock Gate Operating Machinery Complete.

The miter gate moving machinery for the west leaf of the upper guard gate in the east chamber of Gatun Locks has been installed complete and will be tried as soon as the rivets still required in the sheathing of the gate have been driven. The operation of the machine proper, without strut connection with the leaf, has been tested satisfactorily and on May 2 it was ready for use. Electricity for the driving motors is supplied from a bank of transformers with temporary leads, put in for tests. The miter gate moving machinery is the third of the lock operating devices to be completed.

Highest Steamshovel Records.

Steamshovel No. 257 (Samuel T. Lyons, engineer and Edw. E. Austin, craneman), working in the west borrow pit, Gatun Dam, excavated:

DATE.	Large Oliver Cars.	Car Measurement.
April 30	254	4,318
May 1	264	4,488
May 2	308	5,236

The place measurement exceeded the car measurement on May 2 by 318 cubic yards, making 5,554 cubic yards for the working day of eight hours. This is the highest daily record for a shovel of any class since the beginning of operations by the Commission.

Steamshovel No. 120 (T. P. Kelleher, engineer, and L. P. Bonnell, craneman), working in the west borrow pit, Gatun Dam, excavated a total of 64,978 cubic yards in the month of April (25 working days).

This is the highest monthly record for a 70-ton steamshovel since the beginning of operations by the Commission.

Rise of Gatun Lake.

The steel sluice gates controlling the flow of water through the Spillway Dam at Gatun, which are now embodied in the ogee, were closed on April 30 and it is purposed to keep them closed, unless excessive floods require them to be opened, so that the water will back up until it begins to flow over the crest of the ogee, which is 50 feet above sea-level. When the sluice gates were closed Gatun Lake was at elevation + 16.6 feet. From calculations made from the data of rainy season flow into the Gatun Lake watershed it is estimated that the surface of the lake will rise approximately thirty-three feet by the early part of August, 1912.

With the completion of steamshovel work at San Pablo and of contractor's task work at Bohio, dry excavation in the Canal channel through the proposed lake is finished, except for a small piece, let by contract, near Juan Grande. The two pipe line suction dredges at work on the lake side of Gatun Dam will be moved, after the water is beyond their depth at the dam, to portions of the channel between Gorgona and Gamboa to do finishing work in the removal of deposits of gravel left by floods and of other irregularities in the bottom. The dike across the channel at Gamboa to prevent the flooding

NOTES OF PROGRESS.

(*Continued.*)

of Culebra Cut marks the southern end of the lake channel.

The anticipated rise of the lake required that the south approach wall under construction at Gatun Locks be brought to an elevation of at least 61 feet above sealevel. Concrete placed on May 4 brought the last section of the wall to the required height. The wall will be pushed to its final elevation of 99 feet above sealevel, or 14 feet above the final normal level of the lake.

To prevent flooding the chambers of the locks the upper guard gates are to be completed and closed. Both leaves in the east chamber have been hung, and, upon the completion of riveting of plates and adjustment of the struts from the miter gate moving machinery, which is installed, they will be ready for use. In the west chamber a considerable amount of riveting remains to be done, for which increased equipment and forces will be concentrated on the two leaves. The tops of the sills for the upper guard gates are at elevation 37 feet 4 inches above sealevel.

The culverts in center and side walls, through which the water from the lake is to be passed in the operation of the locks, are being closed at the upper ends with steel bulkheads. In the operation of the locks the intakes will be controlled by Stoney gate valves but, as it is not desirable to use them for estoppel through the long period until the Canal is ready for use, the bulkheads will afford protection from flooding. Each bulkhead consists of a series of 10-inch, 30-pound "I" beams, 14 feet long, laid flat, transversely across the culvert. The bottoms of the culverts for the side walls, at the intakes, are at elevation 24.2 feet above sealevel.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 87 per cent completed, 197,343 cubic yards, out of a total of 225,000, having been placed at the close of work on May 4. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
April 29	132	6.30	1
April 30	28	1.15	1
May 1	112	6.00	1
May 2	48	3.00	1
May 3	48	3.00	1
May 4	38	1.45	1
Total	406	21.30	1
Previously reported	196,937		
Grand total	197,343		

Concrete Work at Miraflores.

The east side wall for the lower lock at Miraflores is from thirty to sixty feet high for its entire length of 1,000 feet, and the foundation for the wing wall flaring from the lower end has been laid over a distance of about a hundred feet. Concrete has been placed by two berm cranes, supplying since February a daily average of over 600 cubic yards. The west side and center walls have been extended about 500 feet from the juncture with the upper lock and are from twenty to forty feet in height. The center wall is being built by three chamber cranes which place concrete brought to the site in 2-cubic yard buckets by narrow gage trains from the auxiliary mixing plant in the east side wall of the upper lock. One berm crane and four ½-yard portable mixers are supplying concrete for the west side wall. Slides in the embankment adjacent to the site of the wall have made it necessary to erect the wall to a height of about twenty feet with portable mixers, and dump backfill of rock and earth against it, to afford safe foundation for the cranes. The other berm crane on the west side is placing concrete in the lower end of the upper lock. Over 91 per cent of the concrete for the upper lock proper is in place

CONCRETE WORK IN THE LOCKS.

About 84 per cent of the concrete for the locks is in place, the amount at the close of work on May 4 being 3,612,306½ cubic yards, out of a total of approximately 4,303,486. A total of 29,539 cubic yards of concrete was laid in the locks during the week ending May 4.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 4 being 1,868,100½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending May 4, and of the total follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
	Cu. Yds.			*Cu. Yds.*			*Cu. Yds.*	*Cu. Yds.*
April 29	708	13.50	5					737
April 30	416	13.56	4					492
May 1	458	6.24	4					469½
May 2	228	3.49	2					241½
May 3	458	8.04	4					470
May 4	292	4.50	4					308
*Portable mixer				158				
Total	2,560	50.53	3.8	158				2,718
Previously reported								1,865,382½
Grand total								1,868,100½

The 158 yards shown for the portable mixer are reinforced concrete, and were placed on the following days: April 29th, 29; April 30th, 76; May 1st, 11.5; May 2nd, 13.5; May 3rd, 12; May 4th, 16.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 93 per cent completed, 838,974 cubic yards, out of a total of 890,750, bucket measurement, having been placed at the close of work on May 4. The record for each of the six working days of last week, follows:

Date.	Auxiliary Plant.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

MIRAFLORES LOCKS.

Over 64 per cent of the concrete for the system of two twin locks at Miraflores was in place on May 4, the total amount on that date being 905,232 cubic yards, bucket measurement, out of a total of approximately 1,412,736. The record for each of the six working days of last week, follows:

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant.							Total.
				2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Large stone.

STEAMSHOVEL RECORDS.

Work of Central Division Shovels in April.

During the month of April the total amount of material excavated in the Central Division was 1,654,475 cubic yards, of which 362,615 cubic yards were classified as earth, and 1,291,860 cubic yards as rock.

Of this quantity 1,624,947 cubic yards were removed by steamshovels, and 19,776 cubic yards by cranes. Contractors removed 6,496 cubic yards by hand and 3,256 cubic yards by steamshovel.

The high record for the month was made by steamshovel No. 227, working 25 days in the Culebra District, which excavated 62,453 cubic yards of rock.

The second best record for the month was made by steamshovel No. 230, working 25 days in the Culebra District, which excavated 51,661 cubic yards of rock and earth.

The best record for a shovel of the seventy-ton class was made by shovel No. 121, working 12 days in the Chagres District, which excavated 26,568 cubic yards of earth.

Shovel No. 227, working in the Culebra District, made a high record for one day by excavating 3,401 cubic yards of rock on April 11.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best record for the month and for one day are shown in the following table:

BEST RECORDS FOR THE MONTH.

Steamshovel No. 225, Cristobal Terminal Docks.

The following statement shows the performance of Steamshovel No. 225, for the month of April, 1912. This steamshovel is working in the borrow pit at Folks River, excavating rock for filling the mole at the Cristobal Terminal Docks:

QUANTITIES OF EXCAVATION (64% ROCK, 36% EARTH.)

	Cubic Yards.
By car measurement	59,560
By cross section	53,050
By cross section, rock	33,520
By cross section, earth	19,530
Average per car	8.91

OPERATION REPORT.

Days worked	26
Hours under steam	200.00
Hours worked	138.00
Per cent of time under steam that shovel worked	69.0
Average daily output, cross section measurement	2,122

DELAYS.

Cause.	Hours and minutes.	P. C. of time under Steam
Mining	4.30	2.2
Cleaning track	2.30	1.3
Repairs	5.05	2.5
Waiting for cars	12.30	6.3
Switching	13.35	6.8
Derailments	1.30	0.7
Moving up shovel	18.55	9.5
Cutting out (once)	0.30	0.2
Waiting for steam	1.50	0.9
Cleaning slide from shovel	1.15	0.6
Total	62.00	31.0

Borrow Pit Excavation for Gatun Dam.

The six steamshovels (two 91-ton and four 70-ton), working in borrow pits for Gatun Dam, excavated a total of 341,994 cubic yards, place measurement, in 25 working days in April or an average of 2,280 cubic yards per shovel per day for the month.

The following table classifies the material excavated and indicates the yardage of each shovel by place measurement:

Steam Shovel	Cubic Yards. Earth	Rock	Total
Shovels No. 116 & 263	19,871	46,683	66,554
Shovels No. 117 & 116	35,222	12,128	47,350
Shovel No. 120	39,987	24,991	64,978
Shovel No. 132	49,202	2,590	51,792
Shovel No. 134	38,748	6,879	45,627
Shovel No. 257	25,636	40,057	65,693
Total	208,666	133,328	341,994

Central Division Unloaders for April.

The following statement shows the number of trains and lidgerwood cars unloaded by the Central Division during the month of April:

Location.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	4	1,202	24,040
Miraflores	3	731	14,620
Gamboa	*4	1,100	23,088
Totals	*11	3,033	61,748

*One unloader worked but 14 days.

Ancon Crusher.

A statement of the rock crushed at Ancon quarry for the week ending May 4, follows:

Date.	Hours worked.	Cubic Yards.
April 29	11.05	4,736
April 30	13.40	4,761
May 1	11.55	5,386
May 2	12.30	4,793
May 3	12.40	4,772
May 4	12.00	4,901
Total	73.50	29,349

Porto Bello Crusher.

A statement of the work done at the Porto Bello quarry on April 29 and 30, the two last days of crusher operation, follows:

Date.	Hours worked.	Cubic Yards.
April 29	3.55	1,910
April 30	2.25	1,226
Total	6.20	3,166

Sailing of the Colon.

Owing to necessary repairs, the steamship *Colon* did not sail from New York until Saturday, May 4, instead of on May 2 as previously scheduled.

EXECUTIVE ORDER.

To Prevent Trespassing Upon Reservations.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. Every person who shall go into or upon any reservation or other place belonging to or under the control of the United States of America, the Canal Zone Government, or the Panama Railroad Company, after such reservation or place has been posted as hereinafter prescribed in this Order, and without the permission of the person in charge of such reservation or place, shall be deemed guilty of trespassing; and upon conviction shall be punished by a fine not to exceed $25.00, or by imprisonment in jail not to exceed 30 days, or by both such fine and imprisonment in the discretion of the court.

Section 2. The posting required by this Order shall consist of printed or painted signs, conspicuously placed, by the authority of the Chairman of the Commission, at or near the reservation or place from which the public are to be excluded, and shall in plain and simple words warn all persons against trespassing upon the reservation or place.

Section 3. Every person who wilfully injures, destroys, or removes any sign placed or erected under the provisions of this Order shall be punished by a fine not to exceed $100.00, or by imprisonment in jail not to exceed 3 months, or by both such fine and imprisonment in the discretion of the court.

Section 4. This Order shall take effect 60 days from and after this date.

WM. H. TAFT.

THE WHITE HOUSE,
April 17, 1912.

Water Station at Frijoles.

The Panama railroad has installed a permanent water station at the new town of Frijoles on the relocated line. Water is pumped from the Frijolito River and stored in a reinforced concrete tank of 50,000 gallons capacity. The old Sheffield crane formerly at Matachin has been erected for supplying southbound trains and a new one is to be installed for the northbound trains.

Obituary.

John P. Golden, employed as a foreman at Ancon Quarry, was instantly killed on May 2 by a large stone, which fell through the roof of the quarry storehouse, striking him on the head. The stone was thrown from a blast of dynamite. Mr. Golden was twenty-four years old, born in Marion Center, Kansas, and had been on the Isthmus nearly four years. He was a widower, and is survived by his father, Deury Golden, living at Flora, Ill.

Public Health Lectures.

The Public Health Committee, which was recently organized in the Canal Zone, has, at the request of the central committee in connection with the American Medical Association, made arrangements for a series of free lectures to be given in the principal Canal Zone towns. The lectures will be on popular topics, illustrated with stereopticon views.

A party of tourists, numbering about 200, arrived at Balboa on Sunday, May 5, on the steamship *Sonoma* of the Spreckels Line, from San Francisco, San Diego, and other Pacific Coast cities. They spent Monday and Tuesday in sight-seeing along the Canal and left on their return trip on Wednesday.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

EIGHT YEARS OF CANAL WORK.

Summary of Accomplishment during the Eighth Year of American Occupation.

The United States Government took charge of the Canal work on the Isthmus on May 4, 1904, eight years ago. The first three years of occupation were devoted largely to organizing a working force, providing a healthful living place for canal workers, developing plans for the excavation and construction, and assembling a plant. What was accomplished during the years of preparation is set forth in detail in a series of articles published in issues of The Canal Record of May and June, 1908. The work of each year since then has been related in The Canal Record at the close of that year.

The record of excavation accomplished, concrete placed, and dams constructed will be found in the table on the opposite page. The cost of construction in its various branches since the beginning up to the close of March will be found in the statement of construction expenditures, which forms a part of this issue of The Canal Record. The general decrease in unit costs as indicated therein is attributable to the constantly increasing efficiency of the whole force.

Such work as that of civil government, public health, housing and feeding the workers, contracting for and receiving supplies, and the conduct of the Panama railroad, was carried on during the past year according to the established routine, without changes of importance. In the Canal construction, work on the locks was greatly advanced, excavation was brought within 86 per cent of completion, plans for terminal facilities were decided upon and construction begun, the erection of fortifications at the Canal entrances was started, and a system of lighting for the Canal was decided upon and its institution begun.

LOCK BUILDING.

It will be seen from the statement of the amount of concrete placed in the locks that the concrete work at Gatun and Pedro Miguel Locks is almost completed, while that at Miraflores is about 65 per cent completed and is advancing at the rate of considerably over twenty thousand cubic yards a week. Further information about the work at Miraflores will be found also in this issue. Following closely upon the completion of the concrete work the task of erecting gates, building emergency dams, placing the valves that will control the flow of water, and installing the machinery required for operating the various parts, has been begun.

Gates—The manufacture of the gates was begun in October, 1910, and erection in June, 1911, when work on the upper guard gates at Gatun was started. In all the locks there are 46 of these gates, each composed of two leaves, and each leaf is a built-up structure, 7 feet thick, 65 feet long, and from 47 to 82 feet high. All the material comes knocked down from the contractor's plant in Pittsburgh, and must be put together in the locks. This part of the work entails the driving of about 6,000,000 rivets in the field. Of the total of 58,000 tons of steel for the gates about 25 per cent had been put in place though not all riveted on May 1, and about two-thirds of the total had been manufactured in the States. Gate erection is in progress at Gatun and Pedro Miguel, but it will not begin at Miraflores until it has been completed at Pedro Miguel.

The contract for the machinery that will open and close the gates was let in June, 1911, and the erection was begun at Gatun in January, 1912.

Water Control Valves—The contract for the rising stem valves that will control the flow of water into the lock chambers was let in September. Two of these valves had previously undergone tests, and the machine which operates them had also been tested. After undergoing further tests at the works of the maker, the first machines were brought to the Isthmus and the installation was begun in December, 1911. There are 134 valves of this type to be installed, a total of 1,876 tons of metal. One hundred and thirty-four of them are 10 feet 8 inches wide and 18 feet 10 inches high. Only two of these valves are in place; 43 of them have been shipped from the States, ready for erection. Contracts for the 120 cylindrical valves that will control the flow of water from the center culverts into the lock chambers were let previous to the year just closed, and the installation was completed, except of the few to be placed in the lower lock at Miraflores. Each of the rising stem gate valves and cylindrical valves is operated by a motor-driven machine built especially for the purpose. Contracts for the machines and the motors to drive them were made during the past year, and the machines were tested both in the States and at Gatun Locks.

Emergency Dams—The contract for the six emergency dams that will guard the upper levels of the locks, for use in case of accident to the gates, was let in May, 1911, and the erection of the first of the dams at Gatun has been begun. These dams are steel truss bridges of the cantilever type pivoted on the lock wall in such a way that they may be swung across the channel, and rested on the wall, parallel with the channel. From the bridges are suspended six steel girders which are raised when the bridge is not in use and lowered when it is desired to close the channel. Upon these girders are lowered panels of steel which make a complete closure of the channel. The total weight of the six bridges is 12,000 tons. They are 263 feet long, and of this length the arm which extends over the channel is 163 feet. They are 93 feet in width. The designing engineer of the dams, who has been inspecting the work in the contractor's shops, is now on the Isthmus and will supervise the erection.

Fender Chains, Approach Wall Fenders—The contract for fender chains and for the machines to raise and lower them was let during the year. These chains are to be stretched across the locks in front of certain gates to prevent ramming by ships that might become uncontrollable. The chains are to be manufactured at the Boston Navy Yard and one of them recently passed a successful test and is now on its way to the Isthmus. The fenders on the approach walls will be stringers of hardwood, bearing on helical springs. The contract for springs and bearing boxes was let during the past year. Contracts were also let for sump pumps to keep dry various sumps in gates, and in machinery pits.

Electrical Appliances—Practically all the lock machinery will be operated, directly or otherwise, by motors electrically driven. The only exceptions are the fender chains, which will be actuated by hydraulic power, but the pumps to supply water will be driven by electricity. During the year the plans for central control of all machines, except the emergency dams, were approved and the contract for the equipment has been let. Bids for equipment of 36 transformer rooms, three switchboards in control houses at each series of locks, and equipment for six cable rooms will be opened at Washington on May 22.

The contract for one trial locomotive, representative of forty towing locomotives, by means of which ships will be towed through the locks, was also let during the year, and it is in process of construction. In all there will be required a total of 944 motors to drive the operating machinery, all, of the 220-volt, 25-cycle, 3-phase, alternating current type. Contract has been entered into for 803 of these motors, leaving the contract of 135 miter gate and miter forcing machines still unawarded.

DAMS.

Gatun—The hydraulic fill of the east section of the Gatun Dam was completed during the year, and the work of placing dry fill to bring the dam to its final height, about 107 feet above sealevel, is now in progress, while the placing of rock along the south toe, against which the lake will wash, is also being carried on. Three suction dredges are working on the hydraulic fill of the west section of the dam and the dry fill is advancing, material being supplied from borrow pits.

Miraflores—The hydraulic fill of the west dam at Miraflores was completed during the year, and the dry fill is practically finished. The east dam is to be a concrete wing wall reaching from the locks to the hills, and work on this has not been begun.

Pedro Miguel—Work on the west dam at Pedro Miguel Locks has been resumed, and the dam has been raised almost to full height for the greater part of its length.

The statement on the opposite page gives the total amount of fill placed in the various dams.

GATUN SPILLWAY AND HYDRO-ELECTRIC PLANT.

The construction of the concrete portion of the dam across the Spillway at Gatun was carried on throughout the dry season, and has reached such a stage that it may be concluded during the approaching wet season.

The contract for the regulating gates in this and the spillway at Miraflores was let during the year, and work on the gates is advancing, although erection on the Isthmus has not begun.

The contract for the hydro-electric plant was made during the year and the manufacture is in progress. This includes: (1) Three water turbines of 2,250 k. w. capacity, with three governors, three headgates, three penstocks, and one lubricating system; (2) Three electric generators of 2,000 k. w. capacity, 3 exciters of 50 k. w. capacity, 2 motor-driven exciter sets of 100 k. w. capacity; and (3) one 20-ton, 3-motor, traveling crane. The building for the station will be erected by the Commission alongside the Spillway at Gatun. This plant will generate electricity for all of the operating machinery and lights on the Canal. Specifications are about to be sent to the States, covering the purchase of the additional equipment required for the hydro-electric station.

EXCAVATION.

During the year ending May 1 the excavation in the Lake region between Gatun and Gamboa was practically completed. There are about 150,000 cubic yards of silt, that has collected in the sections immediately north of Culebra Cut, because the Chagres River has been running through this part of the Canal. This silt will be removed later by dredges.

In the Atlantic and Pacific entrances the dredging work continued, and the excavation in those sections is respectively 70 and 80 per cent completed. The ladder dredge *Corozal* arrived at the Pacific entrance in March and is at work.

Excavation was begun in the section between Pedro Miguel and Miraflores Locks.

Excavation was completed at Gatun Locks, and Pedro Miguel Lock, and is nearing completion in Miraflores lock pit.

Culebra Cut—The excavation in Culebra Cut is 89 per cent completed. The record of the past year and the records of previous years are, as follows:

May 1 to May 1	Cubic Yards
1904–1905	648,911
1905–1906	1,250,570
1906–1907	4,861,895
1907–1908	11,285,217
1908–1909	13,955,753
1909–1910	14,886,427
1910–1911	15,925,976
1911–1912	16,448,513

Trouble with slides continued throughout the year. The plan of lessening the amount of material that will move into the Cut, by lightening the mass at the top, was continued and the unusually long dry season has been very favorable to this work.

The lowest steamshovel cut is now 17 feet above the bottom of the channel at Culebra, the summit of excavation. From this point it runs down to the final grade at both ends. At the north end the excavation is practically finished, from the Chagres River as far south as Las Cascadas; and at the south end the trench is nearly to grade for a mile or more. The greater part of what remains to be taken out lies between Empire and Gold Hill, a distance of about two miles.

TERMINAL FACILITIES.

Studies were completed during the year for the terminal docks at both entrances to the Canal, and work was begun. The reports giving details have been published in THE CANAL RECORD. It was decided that, until the need for mechanical handling of cargo at the terminal docks becomes more apparent than it is, no system of cranes need be adopted, but the cargo would be transferred by ships' booms and crane boats.

Atlantic Entrance—The system of docks for the Atlantic entrance was begun, and construction is now in progress on two quay walls around Cristobal Point and one pier running parallel with the west quay wall and almost parallel with the channel of the Canal. This pier only will be constructed at this time, although the project provides for five piers, which may be built as the need arises. Plans for the coal storage and handling plant were considered but no decision has yet been reached.

Pacific Entrance—A dry dock behind Sosa Hill, alongside the Canal, marine shops between the dry dock and the Canal, quay walls around the dry dock, in front of the machine shops, and extending along an anchorage basin leading into the Canal, were decided upon for the Pacific entrance during the year. Part of the quay wall, known as the lumber wharf, has been constructed, and preliminary work on the other walls and the dry dock is in progress. No decision was reached on a project for a series of piers jutting from the land into the anchorage basin, although the plan was thoroughly discussed and borings were made to determine the nature of the foundations and of the material that must be dredged.

MILITARY PROTECTION.

Work on the systems of fortifications that will guard both entrances to the Canal was begun during the year. One regiment of infantry was added to the permanent garrison of the Canal Zone which had consisted of a battalion of Marines. The site for the permanent post was fixed, opposite Culebra, on the east side of the Canal on land well drained and accessible both from the Canal and the new line of the Panama railroad.

Wireless communication with the Isthmus was placed under the Navy Department, and plans were made for a system of one high power and three low power stations.

LIGHTING THE CANAL.

Plans for lighting the Canal by beacons and buoys were approved, and work was begun.

Dinner of the 1904 Men.

The fifth annual dinner of the members of the Inca Society, an organization composed of Canal employes, and others, whose term of service with the Canal Commission began during the year 1904, was held at the Hotel Tivoli on Saturday evening, May 4. The dinner has been always held on May 4 in commemoration of the date on which Director Renaudin, representing the new French canal company, formally turned over the Canal property to Captain Mark Brooke, representing the United States Government. The dinner on Saturday night was attended by 47 members, the largest number since the custom of holding these dinners was begun, and included the greater proportion of the 1904 men still on the Isthmus, the record showing 63 as compared with 71 at the same time last year. Col. Tom M. Cooke presided. A committee was appointed to arrange for a suitable emblem for the society. Inasmuch as May 4, 1913, falls on Sunday, it was decided to hold the next dinner on Saturday, May 3.

Those present were: R. W. Unckles, M. B. Connolly, A. B. Nichols, M. W. Tenny, Geo. M. Wells, D. E. Wright, Jr., Dr. C. C. Pierce, Dr. J. C. Perry, Patrick Kenealy, Silas Davidson, W. M. Wood, Dr. A. B. Herrick, D. E. McDonald, Dr. Lloyd Noland, A. A. Lundishef, J. M. Sinclair, Walter Emery, C. L. Galyon, J. J. Reidy, C. M. Butters, Tom M. Cooke, O. S. Boyd, L. E. Dubois, Chas. Parker, E. E. Alexander, Joseph S. Kirk, J. J. Meehan, H. A. Gudger, C. L. Stockelberg, J. J. Moran, Dr. W. H. Bell, C. C. J. Wirz, A. C. Griggs, Lieut. R. D. LaGarde, Frank Loulan, M. C. Pratt, Geo. H. Ruggles, M. L. Padgett, Albert Wiedman, F. E. Moore, W. A. Torbert, D. F. Donahue, Hartley Rowe, Chas. L. Parker, A. P. Mason, W. H. Bates, F. J. Cotton.

Hotel Tivoli Addition About Completed.

The first floor of the new addition to Hotel Tivoli was thrown open to the public for the first time on Sunday, May 5, and the basement floor, which contains the new billiard room, barber shop, bootblacks' parlor, and storage room for baggage, will be occupied this week. The second and third floors of the addition, which are devoted exclusively to guests' rooms, have been in use for some time. The addition provides for 28 more bedrooms, 10 each on the second and third floors; six on the first floor, and two in the basement section. In addition to the bedrooms on the first floor, there is a spacious room, extending the entire width of the addition, which has been temporarily fitted up as a lounging room, with desks for correspondence purposes.

PERSONAL.

Col. C. A. Devol sailed for the States on the *Panama* on May 3 under orders to attend the ninth International Red Cross Conference at Washington, May 7 to 17, as representative of the Canal Zone Red Cross.

Mr. M. H. Thatcher, head of the Department of Civil Administration, accompanied by Mrs. Thatcher, will sail on Thursday on the United Fruit Company's steamer *Parismina*, on his annual leave of absence in the States.

Mr. E. A. Gongwer of Washington, D. C., Auditor of the War Department, accompanied by Mrs. Gongwer, arrived on the Isthmus on the *Cristobal* on Sunday, May 5.

Dynamite.

In the article on the explosives and blasting materials required for the Canal work during the fiscal year beginning July 1, 1912, which appeared in THE CANAL RECORD of May 1, it was stated that the estimated amount of dynamite required amounted to 3,986,500 pounds. This is only the estimated amount of dynamite required for six months, or from July 1, 1912, to the end of the year, and the request for bids was upon this basis. The estimate for the miscellaneous blasting materials, caps, wire, fuse, etc., however, is correct as stated, and is based upon the full fiscal year's requirements.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at the Hotel Tivoli, Ancon, C. Z., Sunday, May 12, 1912 at 8.00 p. m. The program follows:

1. March—*Officer of the Day*..........Hall
2. Selection—*The Paradise of Mahomet*..Planquette and Ganne
3. Waltz—*Golden Sunset*..........Hall
4. Overture—*Summer Night's Dream*........Suppe
5. Popular March—*Take a Tip From Father*..... Berlin & Snyder
6. —*Gems of Stephen Foster*..........Tobani
7. Idyl—*Softly, Unawares*..........Lincke
8. Selection—*The Pink Lady*..........Caryll
9. March—*Col. Estey*..........Bagley

CHARLES E. JENNINGS, *Musical Director.*

The next concert will be given at Gatun, May 19, at 5 p. m.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, May 4, 1912. All heights are in feet above mean sealevel.

DRY SEASON RAINFALL.

Past Season Driest of Record Since American Occupation.

The dry season, now drawing to a close, has been the driest of record on the Isthmus since the American occupation of the Canal Zone, and judging from the records available, probably the driest since the earliest French days. The month of April completes five months of continuous dry weather. During the period from December, 1911, to April, 1912, inclusive, the rainfall at Alhajuela amounted to only 1.02 inches, being the lightest of record at any station on the Isthmus during five consecutive months.

The subjoined table presents the accumulated rainfall at selected stations and for the whole Canal Zone during the dry season of 1912 (December, 1911, to April, 1912, inclusive) compared with the normal rainfall during the same period, and the fall during the dry season of 1910.

It may be noted that the average rainfall in the Canal Zone during the present dry season equals about one-fourth of the normal fall, while the average fall during the same period of 1910 amounted to very nearly double the normal fall.

STATION	Normal Dry Season Rainfall Dec. to Apr.	Years of Record.	Dry Season 1912 Dec. 1911 to Apr. 1912.	Per cent of Normal	Dry Season 1910 Dec. 1909 to Apr. 1910.	Per cent of Normal

Rainfall in inches.

WEATHER CONDITIONS, CANAL ZONE, APRIL, 1912.

The unusually warm, dry, windy weather experienced during March continued during the month of April.

There was a marked deficiency in rainfall along the Atlantic Coast and over the upper Chagres basin in the vicinity of Alhajuela. The fall was generally well below normal over the whole Isthmus except at Miraflores, Pedro Miguel and Gatun, where heavy local showers occurred.

All previous maximum temperature records were exceeded during the month at Culebra and Ancon. The maximum temperature at Culebra on the 17th., 96° F., is the highest of record at this station, while the maximum at Ancon on the 7th., 97° F., establishes a new high-temperature record for the Canal Zone. Average temperatures were about two degrees above normal at Culebra and Colon, and the highest of record for the month of April.

The relative humidity was uniform over the Isthmus but well below normal, while the average cloudiness was the lowest of record for April at each of the meteorological stations.

There was a moderate excess in atmospheric pressure, and the wind movement at the various stations was the highest that has been recorded during the month of April since records have been kept.

The following table presents the principal items of meteorological interest for the month.

STATIONS.	Press're (reduc'd to mean of 24 hours.)	Temperature.					Mean relative humidity.	Precipitation.			Wind

FOUND—The person who left a small package of embroidery on the train which left Colon at 4.35 p. m., Thursday, May 2, may have the same by proving property. Mrs. Thos. B. Gardiner, House 45, Paraiso, C. Z.

The following ships arrived at, or departed from the port of Balboa during the week ending May 4:

Arrivals—April 28, *City of Sydney*, from San Francisco; April 29, *Ucayali*, from Callao; April 29, *Guatemala*, from Callao; April 29, *Acapulco*, from San Francisco; May 1, *Trinculo*, from Port Harford; May 3, *Quito*, from Guayaquil.

Departures—April 29, *Riverside*, to San Francisco; April 29, *Pachitea*, to Callao; May 2, *Pleiades* to San Francisco; May 2, *Limari*, to Valparaiso; May 3, *Peru* (P. S. N.) to Guayaquil; May 3, *Ucayali*, to Callao; May 3, *Manavi*, to Buenaventura; May 4, *City of Sydney*, to San Francisco.

OFFICIAL CIRCULARS.

Installation of Tungsten Lamps.

CULEBRA, C. Z., May 6, 1912.

CIRCULAR No. 336–C.

Numerous requests have been made for the installation of tungsten lamps in locations not considered advisable or economical. The following rules will in the future govern the installation of tungsten or other metallic filament lamps for all departments and divisions of the Isthmian Canal Commission and Panama Railroad Company:

1. No additional installations will be made where, on account of existing conditions, the life of metallic filament lamps is so shortened as to render their use uneconomical.
2. No installation of metallic lamps will be made where the expected time of further occupancy of the building is so short as not to warrant the changes in wiring, etc., necessary; and, on this account, no further installations will be made in buildings on the west side of the Canal.
3. No installations will be made except where the metallic filament lamp will be controlled by a wall switch, and, if on a drop cord, where it will hang on a cord of fixed length high enough to prevent injury to the filament by the handling of the lamp.
4. In making installations of the metallic filament lamps the department or division requesting same shall pay the cost of any changes in wiring necessary, the cost of installing wall switches, etc., and shall, in addition, pay for the first installation of metallic filament lamps.
5. The wiring of all permanent buildings shall be arranged for the use of metallic filament lamps.

The foregoing rules will likewise apply to the installation of metallic filament lamps for any other department of the Government or any private individual, with the exception, that if such department or individual desires to use metallic filament lamps under any other than the foregoing standard conditions the same may be permitted with the understanding that such department or individual shall pay not only the cost of the first installation but also for all renewals thereof.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Shop Expense Percentage.

CULEBRA, C. Z., May 3, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

In accordance with the provisions of Circular No. 169–E the following shop expense percentage for each shop is hereby fixed, effective May 1, 1912, and will be applied, until further orders, to the distributed labor used in all shop work, in accordance with the provisions of Circular No. 264–A, viz:

Division or Shop	Shop expense Per cent.
Mechanical Division	37.5
Empire shop	40
Dry Dock shop	40
Balboa shop	40
Porto Bello shop	45
Toro Point shop	50
Panama Railroad shop	30

Previous circular letters from this office, fixing shop expense percentage, are revoked.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Acting Chief Sanitary Officer.

CULEBRA, C. Z., April 29, 1912

CIRCULAR No. 440:

During the absence of Colonel W. C. Gorgas, Chief Sanitary Officer, beginning April 29, 1912, Lieutenant Colonel John L. Phillips is designated as Acting Chief Sanitary Officer.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Chief Quartermaster.

CULEBRA, C. Z., May 3, 1912.

CIRCULAR No. 441:

Effective this date, Captain R. E. Wood will act as Chief Quartermaster during the absence from the Isthmus of Colonel C. A. Devol.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Superintendent of Telegraph and Telephones.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT.
COLON, R. P., May 1, 1912.

TO ALL CONCERNED:

Effective May 1, 1912, Mr. C. L. Bleakley, Acting Superintendent Telegraph and Telephones, is hereby appointed Superintendent Telegraph and Telephones.

J. A. SMITH, *General Superintendent.*

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments for the week May 13 to 18, follows: Monday, Gatun; Tuesday, Cristobal; Wednesday, Gorgona; Thursday, Corozal; Friday, Culebra; Saturday, Empire.

The following is the standing in the pool tournament:

	Won.	Lost.	P. C.
Gatun	16	8	.666
Corozal	13	7	.650
Empire	15	9	.625
Cristobal	7	17	.290
Gorgona	5	15	.250

CULEBRA.

A handball tournament has been organized, and it is desired that every one who has joined come out and practice.

All those that know of good books for the library are requested to leave the name and author at the office.

The Culebra duckpin bowling team took two games from Cristobal, at Culebra on Saturday. Scores:

Culebra.				Cristobal.			
Cornth'aite	76	80	81	Barrett	101	77	94
Sterns	105	78	77	C. Cotton	73	81	87
Brown	76			Orr	80	85	80
Grier	84	92	80	Whittles	77	85	84
Balmer	84	92	82	Weston	95	93	102
Mengel		98	113				
Total	425	440	433		426	421	447

Saturday evening Gatun will bowl at Culebra.

The billiard team will go to Cristobal Saturday evening, May 11.

EMPIRE.

Empire took three straight games from Camp Elliott on the Empire alleys Saturday night, May 4. Scores:

Empire.				Camp Elliott.			
Sawtelle	84			W. Wright	87	83	86
Nelson	86	84	83	Bus	77	96	71
Goolsby	81	101	77	Cataldo	86	80	99
N. Giavolli	91	82	70	Walters	69		
Dakin	93	84	101	McCabe	92	90	77
Gustavson		122	84	Murphy		78	77
Total	435	473	415		411	427	410

The pool and billiard games played between Empire and Gatun on Saturday, May 4, resulted in Empire winning four out of six games of pool and losing two billiard games.

Saturday, May 11, the Corozal indoor baseball team will play at Empire. This will be the last game of the league for Empire.

Twenty-six new library books were received from the States during the past week.

GORGONA.

The following games of duckpins were rolled Saturday night, May 4, between Gatun and Gorgona:

Gorgona.				Gatun.			
Seebt	92	85	95	Dennis	87	89	86
Powell	97	74	84	Mohen	84	89	90
Robertson	80			Huttle'eir	100	93	103
Otis		77	86	Hodges	77	87	84
Moyer	78			Dickson	83	88	75
Miller		95	90				
Dunlop	84	77	96				
Total	431	408	451		431	446	438

The last game of indoor baseball of the season will be played between Gorgona and Culebra at Gorgona, Saturday night, May 11, at 7.45 p. m. Admission free.

The Gorgona Discussion Club will organize a World Congress to meet every Monday night in the game room at 7.45 p. m. All men are invited to attend. Admission free to all sessions of the club and the congress.

Dr. Orenstein will deliver a health talk Sunday night, May 14, at 7 p. m., after the regular sunset song service. Admission free to all. The lecture will be illustrated with stereopticon slides and will be on "Flies and Their Menace to Health."

GATUN.

D. C. Galloway won a handsome cue given as a prize for the ten highest runs in pool during the month of April. There were five 15-ball, two 14, two 13 and one 21-ball runs.

Gorgona took two out of three games of duckpins at Gatun on Saturday, May 4.

One hundred and two new books, recently received from the States were placed on the shelves Saturday, May 4. The books include a full set of Mark Twain's and Shakespeare's works.

On Saturday evening, May 11, Gatun will bowl against Culebra, and play pool and billiards with Corozal at Gatun.

Forty-two students are now enrolled in the Spanish classes.

CRISTOBAL.

On Saturday night the Gatun Y. M. C. A. indoor baseball team won from Cristobal by a score of 25 to 17. The line-up was as follows: *Gatun*—Brown, 1b; Kerruish, 2b; Carr, 3b; Wright, p; Claybourne, ss; Thompson, c; McCullough, f. *Cristobal*—Russell, p; MacSparran c; Simons, 1b; Duff, ss; Cousineau, 2b; Schwallenberg 3b; Mendes f.

On Thursday evening, May 16, Mr. F. J. Bernsee, the star checker player, will be on hand to meet all checker players of the Cristobal Association in simultaneous play. Mr. Bernsee has been granted the privilege of inviting any outside players to play.

On Sunday evening, May 19, at 5.30 o'clock the Colonial Band (colored) will give a concert at the Commission band stand under the auspices of the clubhouse.

Arrangements are being made with the Tenth Regiment Band for a concert in the near future.

On Saturday night, May 11, the Empire duckpin bowling team will play Cristobal on the local alleys.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending May 4, 1912:

Turrialba, April 27, from New York, with 26 packages castings, 93 cases copper bars, for Superintendent of Erection; 66 pieces of lumber, for Mechanical Division; 10,700 pieces hollow tile, for Panama Railroad Company; and 10 cases hardware, for stock.

Mistor, April 28, from New York, with 20 cases of benzine, for stock and 167,194 bags of cement, for Atlantic and Pacific Divisions.

Prinz August Wilhelm, April 29, from New York, with 3 cases of stationery, for stock.

Metapan, May 1, from New York, with 100 pieces of lumber, for Mechanical Division; 17 cases of hardware, 7 cases of packing, 20 bales of life preservers, and 14 pieces of steel bars, for stock

Meltonian, May 1, from Liverpool, with 200 barrels of carbolic acid, for stock.

Alexandrian, May 1, from Liverpool, with 400 barrels of carbolic acid, for stock.

Dinsdale Hall, May 2, from New York, with 121,029 bags of cement, for Atlantic and Pacific Divisions and 248 cases of blasting caps, for stock.

Parismina, May 2, from New Orleans, 136 barrels of fire clay, 98 bags sucrene feed, 36 rolls cotton duck, 140 cases fire brick, 10 cases seats, 3 pieces steam-shovel chain, 64 pieces piping, 6,434 pieces lumber, for stock; 325 tons pig iron, 42 barrels brake shoes, 3,052 pieces lumber, and 3 reels wire cables, for Mechanical Division.

Allianca, May 2, from New York, with 77 bundles steel bars and 63 pieces snubbing posts, for Atlantic Division; 42 pieces snubbing posts for Pacific Division; 250 pieces castings, 50 cases incandescent lamps and 31 barrels iron pins, for Mechanical Division; 32 packages castings, 61 cases castings, for Superintendent of Erection; 27 cases dry goods, 10 cases sundries, for Sanitary Department; 150 barrels paint, 10 bales wool waste, 29 barrels rosin, 100 cases soap, 30 cases glass, 227 coils rope, 62 cases water meters, 250 bundles brooms, 22 reels wire rope, 1,460 pieces pipe, 247 bundles pipe, 834 bundles roofing iron, 31 cases hose, 10 cases varnish, 20 cases picks and 46 cases paper, for stock; and a miscellaneous cargo, the whole consisting of 4,448 packages, weighing 485 tons.

Tivives, May 4, from New York, with 59 packages hose and 21 cases tape fuse, for stock; and 74 cases copper bars, for Superintendent of Erection.

Misdirected Letters.

ANCON, C. Z., May 8, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

71 Lighting and buoying canal		$49,084.87			$70,307 95			$119,392.82	
Total expenditures, constr. and engr'n'g.								$144,600,134 07	

*Denotes credit.

Item 29—*Colon Breakwater*. Figures shown include fill from Toro Point and large rock from Porto Bello.

Item 33—*Dredging Excavation, Prism*. Preliminary surveys.

Item 35—Operation of cement gun used in facing walls of Cut.

Item 38—*Dredging Excavation, Prism*. With the accounts for the month of April 1911, the total cost of the dredging plant had been absorbed into the work hence no abitrary for plant is charged in this quarter.

Item 51—*Miraflores Dams, Hydraulic Filling*. Expenditures represent cost of pipe lines, flumes, etc. 661,048 cubic yards have been deposited in dams from dredging and hydraulic excavation in lock chambers and in prism below the locks, the total expenditures therefor being charged to "Excavation."

Items 65, 66, and 67—These expenses were incurred prior to the adoption of Miraflores as the site for the lower locks and dams, at the Pacific entrance to the Canal.

Items 30, 36, and 70—*Plant*. The expenditures for plant and equipment are absorbed into construction costs on the basis of estimated total cost of plant, and the estimated quantities of work to be done. The amounts shown under these items represent the balances which are to be absorbed into construction costs after March 31, 1912.

General—When excavated material is used in filling, such as dams, back filling, etc., the cost of dumping only is charged to the items benefited, all other expenses being charged to "Excavation."

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MAY 15, 1912. No. 38.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

First Test of Lock Gate Operating Machines.

The miter gate moving machinery for the first leaf completed in the construction of the Canal was tested in operation of the leaf on May 13, at 9.30 a. m. The west leaf of the upper guard gate in the east chamber of Gatun Locks was swung from halfway position to closure, opened fully, closed, and drawn back to halfway position. The complete revolution of the bull wheel, a strut from which moves the gate, occupied one minute and forty-eight seconds, which is 12 seconds less than the time required in the specifications. The machinery, a description of which was published in THE CANAL RECORD of April 26, 1911, worked perfectly, swinging the 448 tons of steel in the gate proper, which is 54 feet high, 65 feet long and 7 feet thick, under perfect control, and without noise or vibration. The operation was witnessed by a number of officials and engineers whose work has been connected with the construction of the Locks, gate, and operating machinery. A photographer for a cinematograph company was present and procured photographs of the gate in motion.

Record Rainfall at Ancon.

The heaviest rainfall of record at Ancon for 24 consecutive hours began at 3.45 Sunday afternoon, May 12, when a total of 7.23 inches of rain fell. During the period from 3.45 to 6.10 p. m., when the rain was the heaviest, the fall amounted to 6.30 inches. From the time it began raining to 5½ hours afterward, the fall amounted to 7.05 inches. The rain came from a southerly direction, and was accompanied by variable winds, although during the period of heaviest fall, the wind was from the south with a maximum velocity of 20 miles an hour. At Balboa, the rainfall approximated that at Ancon, the record showing a total of about seven inches for the 24-hour period, but as the storm went inland the rain decreased, stopping north of Empire. The rainfall at Pedro Miguel was over three inches; at Culebra 1.43 inches; and at Empire about one inch. There have been heavier rainfalls for 24-hour periods at Bohio, Colon, Porto Bello, and other points, but the heaviest rainfall previous to this time, at Ancon, was on November 16 and 17 1906, when 6.37 inches fell during 24 consecutive hours. The greatest rainfall of record on the Isthmus, for 24 consecutive hours, occurred at Porto Bello, on December 28 and 29, 1909, when 10.86 inches of rain fell.

Bridge Approaches Damaged by High Water.

High water in the Cardenas River, a small stream emptying into the Rio Grande, between Corozal and Miraflores, caused by the heavy rain on Sunday, May 12, brought down a mass of brushwood that found lodgment on the upstream side of the wagon bridge on the Zone road, thereby forming a dam that backed up and diverted the water against the earth approaches to the bridge. A section of the north approach about 25 feet long, and a section of the south approach about 40 feet long, were carried away. The material in the approaches was comparatively soft, having been in place only about a year. The water rose to such a height that it flowed over the bridge, but no damage was done to the structure, except the tearing off, at one end, of a section of the pipe railing.

Closing of Charcoal Kiln.

The charcoal plant at Gorgona has discontinued operations, with a stock on hand sufficient for a year's supply. Since April, 1911, thirty kilns have been burned, producing 350,229 pounds. The cost of this, including the erection of the kilns, was $1,592.76. The average cost of producing charcoal was 45½ cents per hundred pounds; the two last kilns cost 29 cents per hundred pounds. The price of charcoal a year ago was $1.10 per hundredweight, at which, the amount produced in the year past would have cost $3,852.52, so that the saving effected by the operations of the plant amounted to $2,259,76. The principal use of charcoal in the Canal and railroad work is in starting fires in locomotives and steamshovels.

Drilling and Blasting in Culebra Cut.

The 142 tripod drills, at work in varying material in Culebra Cut, made a total penetration of 146,766 linear feet during the month of March, an average of 39.5 feet per drill each day. The number of drill days was 3,716. The 77 well drills in 1,177.2 drill days penetrated 75,013 linear feet, a rate of 42.3 feet per drill per day. The average for both kinds of drills was 40.4 linear feet per drill per day. Fifteen tripod drills, working exclusively in hard rock, penetrated 11,095 feet in 378 drill days, or 29.4 feet per drill per day. The working day is nine hours. These penetrations are regarded as an index of the normal drilling operations in the Cut. In blasting, 17,532 holes were exploded in various sorts of material. The aggregate depth of the holes was 303,010 linear feet, the average depth was 17.3 feet. In all, 363,670 pounds of dynamite were exploded, an average of 20.7 pounds per hole. The average efficiency of the blasting during the month, in all kinds of material, was 2.14 cubic yards per pound of explosive.

Arrival of Cranes for Balboa Pier.

Shipments of material for the eight 4-ton electric cargo-handling cranes for the steel pier at Balboa, contract for which was awarded the Maine Electric Company in July, 1911, have begun to arrive, and the work of erecting the two first at the southern end of the pier is in progress. The new cranes will take the place of the ten French cranes now in use on the pier. The latter will be dismantled and stored.

Extension of Hydraulic Excavation.

The lagoon, formed by throwing a dike across the partly excavated Pacific entrance channel, at a point about a mile south of the Agua Dulce hydraulic pressure plant, has been pumped out, and a monitor, operating near the pump, has begun hydraulic excavation in the mile-long stretch of channel cut off by the dike. Other monitors are at work immediately north of this section.

Canal Visitors, Season of 1911–12.

The season in which the people from the United States and foreign countries visit the Canal in the greatest numbers is included in the dry months, namely, December, January, February, March and April. There is less travel to the Isthmus in December than in any of the other four months, as the majority do not plan their trips until after the holidays are over. By the end of April, which usually signalizes the beginning of spring operations in the countries from which most of the visitors come, the travel slackens, although there are small parties or individual sightseers on the Isthmus in all months of the year. A larger number of people from the United States and abroad visited the Canal during the season of 1911–1912 than at any other time since the beginning of operations by the Americans. The record shows that February was the principal travel month, and during that month more ships docked at the ports of Cristobal and Colon than in any previous month in their history. The number was 103. All visitors are classed in the record of port operations as "in transit", and as near as can be estimated, about 95 per cent of the total under this head, who landed at Colon or Cristobal, were Canal sight-seers. The increase of visitors during the five months above mentioned was about 60 per cent over the corresponding period in 1910–11. The following table shows the number of transit passen-

NOTES OF PROGRESS.

(*Continued.*)

gers who landed at Cristobal and Colon from December 1, 1911 to May 1, 1912, together with the figures for the corresponding period in 1910–11:

1910–11		1911–12.	
December, 1910...	1,479	December, 1911....	1,605
January, 1911.....	1,368	January, 1912.....	2,261
February, 1911....	2,567	February, 1912....	4,249
March, 1911......	3,434	March, 1912......	3,836
April, 1911.......	1,001	April, 1912	2,691
Totals..........	9,849		14,642

The increase in the number of transit passengers during the past dry season over the previous one, as shown by the above table is 5,793. Deducting 5 per cent from the totals of each dry season will give 9,357 Canal visitors for the 1910–11 season, and 13,910 for that of 1911–12.

The transit passengers who land on the Pacific side do not figure largely in the tourist class. There has been one large party of visitors from California, but aside from this, the transit passengers have been mostly people going through. Many from the western part of the United States go east to join the steamship tours to the tropics, which, at the present time, include a visit to the Canal as a part of their itinerary.

Severe Wind Storm at Bas Obispo and Vicinity.

A severe wind and rain storm occurred at Bas Obispo and Matachin on Tuesday evening, May 14, unroofing several houses and breaking down trees. Telegraph and telephone communication was interrupted, the roof of a house falling across the wires at Bas Obispo carrying them down for a distance of about one-half mile. Another long break was caused near Matachin by a tree falling across the line.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is about 88 per cent completed, 197,765 cubic yards, out of a total of 225,000, having been placed at the close of work on May 11. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
May 6................	88	5.30	1
May 7................	28	1.30	1
May 8................	80	4.00	1
May 9................	120	7.00	2
May 10................	68	4.00	1
May 11................	38	2.45	1
Total................	422	24.45	1.17
Previously reported ..	197,343		
Grand total............	197,765		

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending May 11:

DATE.	Hours worked.	Cubic Yards.
May 6..........................	13.15	4,989
May 7..........................	11.50	4,885
May 8..........................	10.05	4,091
May 9..........................	11.20	4,279
May 10..........................	11.25	4,987
May 11..........................	11 00	4,196
Total..........................	68.55	27,427

The steamer *Francis H. Leggett*, loaded with 1,400,000 feet B. M., Oregon pine, with the schooner *Meteor* in tow, with 800,000 feet, has arrived at Balboa, and the cargoes are being discharged. It is expected that the *Leggett* and tow will sail for the north on May 16.

The Panama Railroad Company has discontinued supplying water to vessels at Balboa, Colon and Cristobal, except in quantities that may be needed to reach the next port, and has notified the steamship companies that it may become necessary to stop supplying any water at all. The sale of coal, which was discontinued on account of the strike of bituminous workers, has been resumed.

CONCRETE WORK IN THE LOCKS.

About 84 per cent of the concrete for the locks is in place, the amount at the close of work on May 11 being 3,638,112½ cubic yards, out of a total of approximately 4,303,486. A total of 25,806 cubic yards of concrete was laid in the locks during the week ending May 11.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 11 being 1,870,194½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending May 11, and of the total follows; and a similar statement for the work in the spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

Grand total....................	....	....	......	....	....	......	....	1,870,194½

The 86 yards shown for the portable mixer are reinforced concrete, and were placed on the following days: May 6, 34; May 10, 21; May 11, 31.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 93 per cent completed, 841,095 cubic yards, out of a total of 890,750, bucket measurement, having been placed at the close of work on May 11. The record for each of the six working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.

SHORTAGE OF WATER SUPPLY.

Emergency Measures Necessary, Because of Long Dry Season.

The past dry season, with the minimum recorded rainfall for an equivalent period, has subjected the water-supplying facilities of the Canal Zone to unprecedented strain. Emergency measures have been necessary to maintain the system for Cristobal and Colon, and that for the inland villages of Gorgona, Matachin, Bas Obispo, Las Cascadas, and part of Empire. For the Rio-Grande-Panama system the supply from the Rio Grande reservoir has been supplemented by pumping from Cocoli Lake. The installation of an auxiliary system of pumps and filters for this purpose was completed during the latter part of 1909. On the morning of May 12, Rio Grande reservoir and Cocoli Lake together contained enough water to supply the towns and the construction work on the Pacific slope of the continental divide for at least forty days. During the afternoon and evening of that day such heavy rainfall occurred over the watersheds of these reservoirs that the dry season for the southern portion of the Canal Zone was effectually broken and no concern need be felt for the adequacy of the water supply.

In the areas supplied by the Camacho and Carabali reservoirs, however, the situation has been more difficult. Since January 24, the Camacho system, extending from West Culebra to Bas Obispo, inclusive, and supplying a part of Culebra Cut, has used, in part, water from the Chagres River, forced up by two 3-stage, 8 inch centrifugal pumps, mounted on the south channel pier of the railroad bridge at Gamboa. Under full operation these pumps can supply 3,000,000 gallons daily. This quantity is ample for the drains on the Camacho system. Due to the supply of the Carabali reservoir being exhausted the towns of Gorgona and Matachin have been supplied with mains leading from the pumps at Gamboa bridge. The installation of 3,000 feet of 6-inch pipe for this purpose was completed on March 13. In addition to this supply, two pumps were installed on the Chagres for supplying water for industrial uses in the Gorgona shops. One additional condenser was installed to furnish the native town with condensed water.

The pumping plants at Tabernilla and Frijoles which supplied the villages of San Pablo, Barbacoas, Tabernilla and Frijoles have been removed, due to construction work being complete to Gorgona, and the materials stored at the water service storehouse, Empire.

The flow of water from the Brazos Brook reservoir was cut off from Cristobal on May 9, when the surface of the water came within 2 feet 9 inches of the top of the lowest outlet at the reservoir. Between 35,000,000 and 40,000,000 gallons remain available for Colon consumption only. For some time the water has been so low that it would not flow by gravity to Mount Hope, but had to be pumped. When the reservoir is full to its capacity of 650,000,000 gallons, the surface of the water is 20 feet above the outlets. For three months past, water has been pumped into the mains from the East Diversion, at Mindi. Until two weeks ago it was filtered, when the filtration was omitted, in order to save the wash water, which amounts to about 300,000 gallons a day.

Cristobal is supplied with water hauled from Gatun in barges and pumped into the mains through connections made at Dock 13. The Panama railroad tug *Phoenix* is tied up there and pumps the water from the holds of the barges brought alongside. The barges are filled with water from the Agua Clara plant, supplying Gatun, New Gatun and Spillway, which has the largest reserve on the Isthmus, and towed through the French canal to Mindi, thence along the American Canal to Dock 13. Five barges, formerly in the cement service, and one 1,000-ton rock barge, are used for this purpose, supplying daily about 600,000 gallons of water. This arrangement was put into effect on May 10, and has been fairly satisfactory. There are interruptions of the pressure when the barges are changed, but this is partly obviated by increasing the pressure just before effecting a change, and by the head of water afforded by the 75,000-gallon tank in the Panama railroad yards at Cristobal. Switching engines only are supplied from this tank, all the main line locomotives taking water at Gatun.

For four months, water has been hauled in clapets to Toro Point from Gatun. One clapet is in use at a time, making a daily trip with about 120,000 gallons. Porto Bello is being supplied with one 65,000-gallon barge a day from the same source. Agua Clara reservoir has in it now about 190,000,000 gallons, sufficient to meet the present unusual demands on it for a period of 45 days without rain.

Inasmuch as the rainy season has opened, the strain of the situation has passed, except between West Culebra and Gorgona, and in Colon and Cristobal. It is not likely ever to be as bad again, not only because the past dry season has been phenomenal, but also, because the population of the Zone villages and the extent of the construction work will decrease from this time to the completion of the Canal.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Inspectors at the Administration building, Ancon, on May 22. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration building at 8 a.m., on May 22, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability properly to operate an automobile, and must have the automobile with them.

Knights Templar.

All Knights Templar in good standing are invited to be present at the institution of Canal Zone Commandery, U. D. Knights Templar, Saturday, May 18, at 8.15 p. m., at Las Cascadas.

Notice to Mariners.

I am advised that an uncharted pinnacle rock has been found lying in the channel between Taboga and Tortola Islands. The rock has a least depth of 18 feet at mean lower low water, or 16 feet at the lowest tides observed. It is about 70 yards in diameter, and is on the summit of a small bank with 32 to 35 feet at M.L.L.W., surrounded by greater depths (45 to 50 feet).

Sextant angles locating rock—San José Rock to C. & G. S. signal on Tortola Island 29: 31. Signal on Tortola Island to lighthouse, Melones Island 109: 57.

Ships should avoid this locality.

J. St. C. Hunt, *Port Captain.*

Pacific Division Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of April, follows:

Destination.	Number Cars.	Cubic Yards.
Pacific Division	2,941	48,547
Atlantic Division	10	230
Central Division	18	270
Quartermaster's Department	4	98
Lighthouse Service	2	46
Fortifications	73	1,679
Panama Railroad Company	2	50
Miscellaneous	13	325
Total	3,063	51,245

Obituary.

Charles Higley, an employe of the Atlantic Division, living at Las Cascadas, died at Ancon Hospital, on May 4. He was 43 years of age, married, and has been on the Isthmus three and one-half years, coming here from Iowa. He is survived by his wife, now living at Las Cascadas.

Suicide.

George C. Gill, a member of Company D of the Tenth Infantry, committed suicide with carbolic acid near Camp Otis, on May 5. He was 25 years of age, single, and had been on the Isthmus seven months, coming here from Greenville, Texas.

BASEBALL.

The Culebra baseball team which has been playing independently during the past season, defeated the Commissary-Subsistence team, winner of the pennant in the Panama Canal League for the season of 1911-12, in a six-inning game at Empire park on Sunday afternoon, May 12. Summary:

Game called in the sixth inning, on account of rain, with one man out.

Earned runs—Com-Sub., 1; Culebra, 4. Two base hits—Van Zandt, Hayes, Fleishman. Home runs—Clements. Stolen bases—Dougherty, Hayes, C. O. Herring, Fleishman, Curtis 2. Sacrifice hits—Pardue, Weiss. Base on balls—off Davis, 1; off Barnes, 3. Left on bases—Com.-Sub., 7; Culebra, 3. Wild pitches—Davis, 1. First base on errors—Com.-Sub. 2; Culebra 1. Hit by pitcher—By Davis, Helper; by Barnes, Herring and Sterner. Hits off Davis—3 in 3 innings, off Mosher 1 in 2 innings. Time of game—1 hour, 5 minutes. Umpire—Mr. Markley. Scorer—Garrett.

The following ships arrived or departed from the port of Balboa during the week ending May 11:

Arrivals—May 5, *Sonoma*, from north; May 5, *Chile*, from Guayaquil; May 5, *Rupanco*, from Buenaventura. May 7, *Mantaro*, from Callao; May 8, *Huasco*, from Valparaiso; May 9, *Leelanaw*, from San Francisco.

Departures—May 5, *City of Sidney*, to San Francisco; May 6, *Guatemala*, to Callao; May 8, *Aztec*, to San Francisco; May 8, *Quito*, to Guayaquil; May 8, *Sonoma*, to north; May 10, *Acapulco*, to San Francisco.

Lost—Watch fob and locket, on Sunday, May 12, between Panama railroad station and Ancon Hospital grounds. Finder will please communicate with A. W. Borgen, Box 358, Gorgona.

CANAL MEDAL AND SERVICE BAR LIST.

Below are published the names of American employes of the Isthmian Canal Commission, who completed six years of continuous service on the Isthmus during the twelve months ending December 31, 1911, and are in consequence entitled to receive a second service bar for their Canal Medal. The date shown opposite each name is that on which medal service was completed.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Office of the Chairman, at Culebra, for correction.

On this page will be found also a part of the list of employes of the Panama Railroad Company who completed two years of continuous service some time during the past year and are entitled to medals.

The heads of divisions are requested to check carefully their lists of American employes on the silver roll, and to report any omissions on the medal or bar lists to the above office.

TRAMWAY CONSTRUCTION.

Work Begun by New Owners of Panama Franchise and Canal Zone License.

A history of the negotiations for a franchise for the construction and operation of a tramway system in the city of Panama, and along the Balboa, Tivoli, and Sabanas roads in the Canal Zone, up to January 11, 1911, is given in THE CANAL RECORD of that date. These negotiations led to the granting, by the municipality of Panama, of a 50-year franchise to Mr. Henry T. Cook on October 29, 1906. About the same time Mr. Cook made application of the Canal Commission for a license to operate in the Canal Zone. This was recommended, but subsequently the Panama Government was called upon to stop the work, which Mr. Cook had already begun on the Panama streets, on account of his having failed to give satisfactory guarantee for replacing the pavements which he proposed to tear up. The Panama authorities, at the request of the United States Government, compelled him to cease construction operations, and, as a result, he sought relief in the courts, obtaining a favorable decision. The franchise was then extended by the city on condition that work be resumed by December 9, 1910, and on December 16, 1910, the President of the United States granted Mr. Cook a revocable license for extending his lines into the Canal Zone. On July 18, 1910, the Public Utilities Corporation was organized for carrying on the work.

In May, 1911, Mr. Cook, having been unable to successfully finance the undertaking, gave an option on the city franchise and the Canal Zone license to Mr. Minor C. Keith, vice-president of the United Fruit Company. Mr. Keith, before exercising the option desired to obtain certain modifications, both in the Canal Zone license and in the franchise granted by the municipality of Panama. Under date of June 22, 1911, these changes were favorably acted upon by the municipality, and, in October, 1911, Mr. Keith acquired from Mr. Cook his interest in the franchise, license, and the Public Utilities Corporation. The latter organization was liquidated shortly after by Mr. Keith, who formed in its stead the Panama Tramways Company, organized under the laws of the State of New Jersey, with a capital stock of $750,000, and of which he became the head, Mr. C. G. Young of 60 Wall Street, New York, being consulting engineer. On January 23, 1912, a contract was entered into with the firm of R. W. Hebard & Co. for the construction of the entire project. By the terms of the municipal franchise, work was to be begun not later than February 7, 1912, and must be completed not later than 18 months from that date. Under the terms of the contract with the constructing firm, the work must be completed within 14 months from January 23. By the terms of the contract, the contractors, in addition to constructing the line, act as engineers for the tramways company.

The revocable license under which the new company will operate in the Canal Zone has not yet been signed, but the terms have been agreed upon, and the documents will probably be formally executed shortly. The tramways company desired two important modifications in the original license; one, to change the provision requiring the company to pay a franchise tax of one per cent on all gross receipts, both in the city of Panama and in the Canal Zone, to the Canal Zone Government. The company desired this provision be made applicable only to gross receipts in the Canal Zone. The request has been allowed. The second change desired was the elimination of the clause prohibiting the tramways company from doing an express package business over the Panama–Balboa line. This has been denied.

Work on the tramway construction was begun by the contractors on February 5, 1912, with a small force, which has since been augmented, until at the present time it numbers over 200 men. Crews are at work grading on the line running to the Hotel Tivoli; for the spur extending to the Catholic chapel in the Ancon Hospital grounds, and on the Balboa road, in the vicinity of East Balboa, where the roadbed is being excavated from the side of the hill. The spoil is transported on small dump cars, operating on Decauville track, to the points where it can be used as fill. This section will constitute the heaviest piece of construction the contractors will meet with in their grading operations.

The system will consist practically of three lines; one on Central avenue, one to Balboa, and one on North avenue to the Sabanas road, and along that road as far as the Zone police station. The Central avenue line will start at the corner of the east wing of the Hotel Tivoli, thence it will follow the road to the railroad station, crossing it on the way to the side on which the park is situated, in order to make a sharp turn where the road intersects with Central avenue. The line will continue along Central avenue to the seawall, stopping in front of the Government palace. There will be a loop around the small park at the railroad station, in order to allow the cars to draw close to the passenger exits. The Ancon spur, which is a part of this line, will skirt one side of the knoll on which the Hotel Tivoli stands, thence proceed in as nearly a direct line as possible to a point opposite the Catholic chapel on the Ancon Hospital road.

The Balboa line will start at Santa Ana park, extend down C street to 16th, thence along 16th street to B street, near the Santo Tomas Hospital; thence out B street until the Canal Zone boundary is reached. The track will be laid on the right-of-way of the Balboa road to the Zone boundary, and from that point, on private right-of-way. Beyond East Balboa, the location of the tramway cannot be determined until the Canal Commission has definitely fixed on the plans for the new projects at Balboa.

The Sabanas line will branch off from Central avenue at 13th street, continue on that street to North avenue; thence along the latter thoroughfare to Guachapali, where the streets turn to the left and parallels the railroad yard. The tramway will continue on North avenue to its intersection with the Caledonia road, near the railroad viaduct, thence out the Caledonia and Sabanas roads to the Zone police station.

In the construction of the tramway, "T" rail will be used on the macadam or dirt roads, and grooved rail on the streets that are paved with brick. In addition to other material, including a complete construction plant, about 200 tons of rail have already been received.

The system will include about twelve miles of track, as follows:

	Feet.
Santa Ana park to Sabanas police station....	20,000
Santa Ana park to Balboa..................	14,000
Hotel Tivoli to Government palace..........	8,000
Hotel Tivoli to Catholic chapel............	1,200
Double track from Canal Zone boundary to Balboa................................	10,000
Double track on lower Central Avenue......	1,200
Total..................................	54,900

In addition to the above, sidings will bring the total track mileage to between 11½ and 12 miles.

PERSONAL.

Lieut. Col. Charles F. Mason, accompanied by his family, sailed on the *Cristobal* on Tuesday, May 14, on his annual leave of absence.

Dr. Claude C. Pierce sailed on the *Parismina* on Thursday, May 9, for New Orleans, on annual leave.

Mr. Edward Schildhauer, acompanied by Mrs. Schildhauer, sailed on the *Colon*, on Wednesday, May 15, on his annual leave.

Major T. C. Dickson, accompanied by his family, sailed on the *Cristobal*, on Tuesday, May 14, on his annual leave of absence.

Observance of Fourth of July.

In a circular letter dated May 7, the Chairman and Chief Engineer has requested the heads of departments and divisions to appoint representatives to attend a meeting to be held at the Administration building in Ancon on Saturday, May 18, at 2.30 p. m., to consider the question of a celebration of Independence Day by the Americans on the Isthmus. The letter continues:

> Among the questions to be decided are:
>
> 1st—Shall such a celebration be held?
>
> 2d.—If so, where; and what shall be the general program of the celebration or celebrations?
>
> 3d.—Organization for making necessary arrangements, raising subscriptions, etc.
>
> Such celebrations are intended to be arranged by and for the benefit of Americans on the Isthmus, and it is intended that any celebration held shall be carried out in accordance with the wishes of the majority of the American employes of the Isthmian Canal Commission and the Panama Railroad Company. Please advise me as soon as practicable whom you designate to attend this meeting (who will be expected to act on this committee until further notice.) Your representatives should be instructed to canvass the sentiment among the employes in their respective departments or divisions prior to the meeting on May 18, so that they may be able to act with as full knowledge of the views as those whom they may represent at the meeting on May 18, as practicable. The Disbursing Officer of the Commission will be a member *ex-officio* and any head of department or division may likewise act on this committee *ex-officio* and be present at the meeting. The committee is authorized to appoint any additional members to act with it.

Commissioner H. H. Rousseau is appointed general chairman of the Fourth of July celebration committee.

The committee will be glad to receive any suggestions direct from any one in connection with any matters pertaining to the celebration in time to consider them at the meeting on May 18.

SOCIAL LIFE OF THE ZONE.

Annual Meeting of Cristobal Woman's Club—Other Club Notes.

The fifth annual meeting of the Cristobal Woman's Club was held in the Commission clubhouse on Wednesday, May 1. The reports of the officers showed that the club has maintained a good standard of work during the year, and closes for the summer with a membership of 53. The club season opened with a reception on September 27, 1911, and the meetings have been held weekly for eight months. There have been several general meetings with addresses on a variety of topics including household science, primary education, some modern aspects of criminology, nursing as an art, and modern views of philosophy. The home department studied domestic science and related topics, and devoted a series of programs to the study of home life in different countries. The department expended $40 for Christmas gifts among the poor children in Sunday schools of Colon and Cristobal. The education department has had charge of the juvenile library belonging to the Canal Zone Federation of Woman's Clubs and reported that 250 books are in use in the Union Sunday school of Cristobal. The art and literature department took up the study of various schools of art and furnished two instructive programs on folk songs and folk lore. The Dickens centenary was made the subject of one program.

An important feature of the club work has been the free health lectures for the poor of the city of Colon, which have been conducted by the subcommittee of the philanthropy department. There have been nine lectures, five in English, three in Spanish, and one in French. The subjects were oral hygiene, tuberculosis, its prevention and cure; and the danger of the house fly. The English lectures were the best attended, there being on some occasions audiences of from four to five hundred. The next largest attendance was at the Spanish lecture given on April 25, when there were 200 present. The lectures were illustrated with lantern slides, the first series of which were furnished by the Sanitary Department of the Isthmian Canal Commission. In December, the philanthropy department of the Cristobal club donated $100 to this committee for its work and from this sum additional slides were purchased. This work has the cooperation of the health department of the Commission, the municipality of the city of Colon, the ministers of the various churches, and the teachers and physicians both of Cristobal and Colon.

The Cristobal club entertained the Federation at its midseason meeting in January. Its donation to the Federation fund for the education of a native blind boy was $106.

The following officers were elected for the ensuing term: President, Mrs. J. L. Storla; first vice-president, Mrs. Carl H. Elliott; second vice-president, Mrs. Thomas E. Brown, Jr.; recording secretary, Mrs. V. Hart; corresponding secretary, Mrs. Charles Butters; treasurer, Mrs. A. Whitney. The members of the departments are: Art and literature, Mrs. Perkins, Mrs. Culbertson, Mrs. Divin; home, Mrs. Putnam, Mrs. Whitney, Mrs. Murray; philanthropy, Mrs. Morris, Mrs. Willson, Mrs. Rerdell; education, Mrs. George Butters, Mrs. Arminger.

At the meeting of the Gatun Woman's Club on Thursday May 9, it was decided that the organization should hold a three months' recess, beginning June 18, and reconvene on the first Thursday in September. During the recess period all communications regarding club matters may be addressed to Mrs. W. J. Allen, the secretary. The club has adopted the system of annual dues in place of monthly dues, and the rate has been fixed at $1, with an initiation fee of the same amount.

The Paraiso Woman's Club has entered upon a vacation which will last until September. Communications regarding club matters should be addressed to the secretary, Mrs. W. M. McIntyre.

Sunday School Association Meeting.

The quarterly meeting of the Isthmian Sunday School Association was held at Gorgona, in April, with an attendance of about 63. The reports showed that both the enrollment and the average attendance of the federated Sunday schools in the Zone are well maintained, and that the status of the work is equal to that of any year since the organization of the association in 1908. In point of numbers the schools stand in the following order: Cristobal. 240, with an extension at Porto Bello of 30 members; Empire, 130; Gorgona, 125; Gatun, 116; Las Cascadas, 110; Panama Methodist Episcopal, 90; Culebra, 85; Pedro Miguel, 54; Paraiso, 53; Corozal, 46; East Balboa, 32; Balboa, 25. The total cradle roll for the Isthmus is 127, and the total enrollment is 1,048, the number being divided into 193 adults and 855 children. The officers of the association are: President, Rev. A. A. Nellis; vice-president, Mr. J. F. Warner; secretary, Mr. E. H. Putnam; treasurer, Judge J. B. March.

Ministers Meeting.

The monthly meeeting of the Isthmian Ministers Association was held in St. Luke's Hospital chapel on Monday afternoon, May 6. Addresses were delivered by Dr. Darling and Dr. Reeder of Ancon Hospital staff.

The next mecting will be held on the first Monday in May at Empire.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending May 11:

Prinz Sigismund, May 5, from New York with 560 kegs of nails for stock.

Cristobal, May 5, from New York, with 124,400 barrels cement, for Atlantic and Pacific Divisions; 133 pieces steel bars, for Atlantic Division; 36 pieces steel beams, 13 cases brake shoe heads, 5 cases machinery, for Mechanical Division; 18,400 pieces hollow tile, 174 packages crane parts, for Panama Railroad Company; 26 cases castings, for Superintendent of Erection; 59 bundles paper, for stock.

Arcadian, May 5, from New York, witb 1 case of paper, for stock.

Francis H. Leggett, May 4, from Columbia River, with 35,786 pieces fir lumber, for stock.

Meteor, May 4, from Columbia River, with 24,069 pieces of fir lumber, for stock.

Zacapa, May 8, from New York, with 65 packages car parts, 92 cases water coolers, 7 cases rubber packing, 5 cases hardware, for stock; 48 pieces lumber for Mechanical Division.

Abangarez, May 9, from New Orleans, with 750 kegs white lead, 109 packages car parts, 315 sacks dairy feed, 694 cases fire brick, 66 pieces piling, 16 cases, plumbing supplies, 2,762 pieces lumber, for stock; 4 cases glass, for Panama Railroad Company; 17,603 pieces of lumber, 55 barrels brake shoes, for Mechanical Division.

Leelanaw, May 9, from San Francisco, with 986 bales alfalfa hay, for stock.

Colon, May 10, from New York, with 7 cases ice machinery, for Pacific Division; 19 barrels bearings, 175 pieces car couplers, 25 cases iocandescent lamps, for Mechanical Division; 30 packages crane parts, for Panama Railroad Company; 16 packages chains, 115 kegs rivets, 235 reels wire rope, 18 pieces steel plates, 194 kegs bolts aod rivets, 175 cases caustic soda, 25 bundles galvanized buckets, 10 cases caulks, 9 cases pots for stock; 12 cases caskets, 20 cases drugs and suodries, for Sanitary Department; and a miscelleous cargo, the whole coosisting of 1,425 packages, weighing 250 toos.

Sixaola, May 11, from New York, with 9,127 pieces hollow tile, for Panama Railroad Company; 80 drums calcium carbide, 9 pieces castings, 13 cases hardware, for stock.

Rainfall from May 1 to May 11, 1912, Inclusive.

OFFICIAL CIRCULARS.

Electric Current for Individuals and Companies in the Canal Zone.

CULEBRA, C. Z., May 7, 1912.

CIRCULAR No. 336-D:

The furnishing of electric current by the Isthmian Canal Commission to individuals and companies in the Canal Zone is approved, as follows:

1. All applications for service of this character shall be made on regular forms and be approved by the Chairman and Chief Engineer before any work is done.
2. All secondary and interior wiring, including entrance switch, will be installed, in accordance with the rules and requirements of the National Board of Fire Underwriters of the United States, by the Isthmian Canal Commission and be paid for by the customer in accordance with existing rules and rates for labor and material furnished by the Isthmian Canal Commission to individuals and companies, after which this wiring and other material shall become the property of the customer.
3. The customer shall agree to permit the authorized employes of the Isthmian Canal Commission to inspect the interior and other secondary wiring at any convenient time and shall agree to pay the Commission for any alterations which may be necessary from time to time to keep the installation in safe condition in accordance with the rules and requirements of the National Board of Fire Underwriters of the United States.
4. The customer shall agree that no additions or alterations will be made by him in the secondary or interior wiring, and that all work shall be performed by the Isthmian Canal Commission under the same terms as the original installation.
5. The Isthmian Canal Commission will furnish at its own expense the necessary transformers. In general, any necessary extensions to the outside primary wiring circuits and pole lines to furnish the desired service will be paid for by the customer, who shall agree that the ownership of the same shall remain with the Commission. Due consideration will be given in each case to any variation deemed equitable from this policy.
6. Payment for current consumed shall be made by the customer in accordance with approved rates for individuals and companies on the basis of the number of 16-c.p., or equivalent, carbon filament lamps, where the number of lamps is fifteen or less. If any greater number of lamps is installed it will be arranged in advance by mutual agreement whether payment shall be made per lamp, or whether the current shall be measured and paid for in accordance with the approved rate per kilowatt hour for individuals and companies. The Commission will furnish all meters required at its own expense. The cost of current supplied will cover the exchange of new carbon filament lamps for the sockets of broken lamps and the cost of ordinary repairs to wiring, etc.
7. The minimum charge per month for any installation shall be $3 regardless of the number of lamps, or the amount of current consumed.

GEO. W. GOETHALS, *Chairman.*

Rates Charged for Use of Equipment Between Departments and Divisions of the Commission and Panama Railroad.

CULEBRA, C. Z., April 27, 1912.

CIRCULAR No. 169-M:

Effective May 1, 1912, the following rates will be charged for the use of equipment between departments and divisions of the Commission and the Panama railroad, and for individuals and companies:

BETWEEN DEPARTMENTS AND DIVISIONS OF COMMISSION AND PANAMA RAILROAD COMPANY.

For the use of the following equipment, without crew, covering fuel, supplies and repairs:

	Per Hour.
Pile drivers	$ .50
Locomotive cranes	.50
Floating pile drivers	.50
Tugs	5.00
Barges with towing machines	1.10
Barges without towing machines (400 tons or over)	.45
Barges without towing machines (under 400 tons)	.15
Wrecking barge, when used in crane or wrecking service	3.00

In addition a charge will be made for the actual time of the crew and auxiliary gangs, plus 10 per cent, as provided in Circular 169-E, except in the case of tugs, for which a rate with crew is provided.

WITH CREWS.	*Per Hour.*
Wrecking cranes	$ 7.00
Tugs	10.00
American locomotives	8.00
French locomotives	6.00
Switch locomotives, with hourly silver employes	2.50
Crane barge *La Valley*	10.00
Clapets	7.50
Steam launches, Navy type	2.00
Tug *DeLesseps* and launch *Sanidad*	7.50
Launches *Birdina, Petite Louise, Balboa* and *No. 26*	1.75
Gasoline launches and steam whaleboats	.60

Minimum charge will be for one hour.

USE OF DRY DOCK, SHIPWAYS AND GRIDIRON.

Cristobal Dry Dock.

Vessels under 200 feet, first day	$30.00
Subsequent days, per day	10.00

Balboa Shipways and Gridiron.

Vessels over 125 feet, per day	$5.00
Vessels under 125 feet, per day	3.00

No charge to be made for Sundays or holidays, or for days on which no work is performed.

FOR INDIVIDUALS AND COMPANIES.

Use of the following equipment, without crews, covering fuel, supplies, repairs and depreciation:

	Per Hour.
Pile driver	$1.00
Locomotive cranes	1.00
Floating pile drivers	1.00
Barges with towing machines	2.25
Barges without towing machines (400 tons or over)	90
Barges without towing machines (under 400 tons)	.30
Wrecking barge, when used in crane or wrecking service	6.00

In addition a charge will be made for the actual time of the crew and auxiliary gangs, plus 20 per cent, as provided in Circular 169-E.

WITH CREWS.	*Per Hour.*
Wrecking cranes	$10.50
Tugs	15 00
Locomotives	12.00
Crane barge *La Valley*	15.00
Clapets	12 50
Steam launches, Navy type	3 00
Tug *DeLesseps*, launch *Sanidad*	12.50
Launches *Birdina, Petite Louise*, and *No. 26*	2.75
Gasoline launches and steam whaleboats	.90

Minimum charge will be for one hour.

USE OF DRY DOCK, SHIPWAYS AND GRIDIRON.

Cristobal Dry Dock.

Vessels docked alone, first day	$60.00
Subsequent days, per day	20.00
Vessels docked with another vessel, first day	40.00
Subsequent days, per day	14.00

Balboa Shipways and Gridiron.

Vessels over 125 feet, per day	$25 00
Vessels under 125 feet, per day	15.00

Minimum charge shall be for one day.

No charge will be made for Sundays, or holidays, or for days on which no work is performed.

No change will be made in charge of $1 per person for transportation of passengers from the quarantine station to Balboa.

Circulars 169-F, 169-G, and 169-I are hereby cancelled.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Locomotive Inspectors.

CULEBRA, C. Z., May 13, 1912.

CIRCULAR No. 259-C:

The proper handling of injectors on locomotives is an important factor in the life of boilers and machinery, and also in fuel economy. Locomotive engineers, having in general better knowledge as to the amount of steam that will be needed, are in a position to best regulate the water supply. Hereafter, therefore, locomotive engineers will be required to work injectors at all times when the right-hand injector is in good condition; and they will also be held responsible for seeing that both injectors are always in good working order.

The foregoing rule is adopted as being in accord with the practice in vogue in the United States, and as being unanimously recommended by the transportation committee of the Isthmian Canal Commission and Panama Railroad Company.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Blanket Orders for Repair Work.

CULEBRA, C. Z., May 6, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is invited to paragraph 9 of Circular 343, dated August 25, 1910, requiring that request be made on the Chief Engineer not later than June 15 of each year for annual blanket orders for such repair work as may be required during the succeeding fiscal year.

GEO. W. GOETHALS, *Chairman.*

Hotel Washington.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., May 8, 1912.

CIRCULAR No. 82:

ALL CONCERNED:

The new hotel being constructed on Colon Beach will be known as the "Hotel Washington."

J. A. SMITH, *General Superintendent.*

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gatun, C. C., Sunday, May 19, 1912, at 5 p. m. The program follows:

1. March—*Joe Weber*...Appelles
2. Selection—*The Paradise of Mahomet*...Planquette & Ganne
3. Idyl—*Softly, Unawares*...Tobani
4. Overture—*William Tell*...Rossini
5. (a) Two Step—*Everybody's Doing It Now*. Berlin
   (b) March—*Take a Tip from Father*...Berlin & Snyder
6. Mazurka—*La Czarine*...Ganne
7. Descriptive—*The Rocket at Gilligan's*...De Witt
8. Selection—*The Golden Girl* (by request)...Howard
9. March—*Officer of the Day*...Hall

The next concert will be given at Empire, May 26, at 6 p. m.

CHARLES E. JENNINGS, *Musical Director.*

CLASSIFIED EXPENDITURES.

A statement of classified expenditures of the Isthmian Canal Commission to March 31, 1912, follows:

PERIODS.	Department of Civil Administration	Department of Law	Department of Sanitation.	Department of Construction and Engineering	General Items.	Fortifications.	Total
To June 30, 1909	3,427,090.29	....	9,673,539.28	69,622,561.42	78,022,606.10	....	160,745,797.09

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for the moving picture shows for the week of May 20 to 25 is, as follows: Monday, Corozal; Tuesday, Culebra; Wednesday, Empire; Thursday, Cristobal; Friday, Gatun; and Saturday, Gorgona.

The standing of the teams in the pool league is the same as last week, with Gatun leading, Corozal second and Empire third.

Culebra leads the billiard league, with Empire and Gatun close contenders.

Cristobal has a lead of five games in the duckpin tournament; Empire is second and Culebra third.

The final standing of the teams in the indoor baseball league is as follows:

Team.	Won	Lost	P. C.
Gorgona	10	0	1.000
Culebra	8	2	.800
Empire	4	6	.400
Corozal	3	7	.300
Gatun	3	7	.300
Cristobal	1	9	.100

A moving picture reel showing various forms of activity along the Canal was exhibited at the clubhouses during the past week through the courtesy of Mr. Kemp of San Francisco. Since April 15, the reels have been secured direct from the United States. These films are passed by the National Board of Censorship, as well as a committee of clubhouse secretaries in the Zone. Among the unusual films shown this week is a reel entitled "Raising ostriches in Egypt;" "Herring fishing off Boulogne," and "Modes and customs of the Hindoos". A striking film will be exhibited during the week of May 20 to 25, in which "The immortal Alamo" is acted by a strong cast of professional actors.

Upon request, Miss Gay Zenola MacLaren has arranged for a return engagement for a series of plays, and will arrive on the Isthmus May 27. Among the plays added to Miss MacLaren's repertoire since her visit in July, 1910, are: "Maggie Pepper". "Bought and paid for", "The fortune hunter" and "Rebecca of Sunnybrook farm". Dates of engagements at the various clubhouses will be announced later.

COROZAL.

The first prize in the handicap billiard tournament was won by R. A. Russell. He won 12 out of 13 games played. McKee and White tied for second place.

The library shelves and office desk have been moved to the opposite side of the front lobby. The main door leading from the lobby has been enlarged to double size.

Saturday night, May 4, the Corozal pool team won four games from the Cristobal team. The billiard games resulted in one victory for each team.

Last week the clubhouse membership passed the **250 mark.**

CULEBRA.

The volleyball games have again been started, and will be held every Tuesday from 5.10 to 6 p. m.

The Culebra bowling team took two of the three games on Saturday evening, from Gatun. Scores:

Culebra				Gatun.			
Bartlett	80	80	78	Green	105	105	83
Grier	80	95	98	Carr	87	86	78
Silver	81	90	79	Mohan	66		79
Hill	89	83	105	Barte	83	101	91
Palmer	98	80	90	Arthur		104	75
				Walters	78	78	
Totals	428	428	450		419	474	406

One of the new handball courts is ready for use; the others are nearly completed.

The clubhouse has procured a supply of individual paper combs, which are on sale at the cigar counter at one cent each.

A stereopticon lecture will be held at the clubhouse on Thursday evening, May 16, on "Flies, and their relation to disease", by Dr. Orenstein. Admission free.

A discussion club has been organized, and will meet every Friday evening from 7.30 to 8 o'clock. The regular discussion will be followed by consideration of some subject on hygiene that may be of practical value to the members. The meetings are open to men of Culebra.

The Camp Elliott team will bowl at Culebra, and the Culebra team at Camp Elliott, on Saturday evening.

The Culebra billiard team, winner of every game in the tournament, will play at Empire on Saturday evening.

EMPIRE.

The pool and billiard tournament games that were to have been played between Gorgona and Empire have been postponed and will be played at a later date.

The Corozal indoor baseball team failed to send a team to Empire Saturday night, May 11, and Empire won the last game of the present tournament by a forfeit.

The Gorgona bowling team will bowl at Empire Saturday, May 18.

The Rambler Dance Club will hold a dance in the clubhouse hall on Saturday, May 18.

On the Empire alleys Saturday night, May 11, the Cristobal duckpin team took three straight games from the Empire team; Scores:

Empire.				Cristobal.			
H. Giavelli	85	85	90	Herrington	90	94	76
Grund	85	84	93	Gibson	90	86	97
Goolsby	81	80	93	Collins	89	83	93
Dakin	79			Bullard	79	83	81
L. Giavelli	98	94	78	Herring	96	95	111
Sawtelle		84	75				
Totals	428	427	429		444	441	458

GORGONA.

Gorgona took two out of the three games rolled on Saturday night, May 11, between Gorgona and Camp Elliott.

F. L. Bernsee will play all comers a simultaneous checker match, Saturday night, May 18. All who play checkers are invited to participate in the games.

Culebra forfeited the last game to Gorgona, Saturday night, May 11, by the team failing to play the regular scheduled game. This gave Gorgona a perfect score of 1.000 per cent and is the second season that Gorgona has won the indoor baseball championship. A "smoker" is being planned by the entertainment committee in the team's honor.

In place of the regular scheduled game of indoor baseball Saturday night, May 11, the "Regulars" played the "First Team" with a victory for the "Regulars". Score 26 to 15. Batteries: "Regulars", Hilty and Simms; "First Team," Christensen and Ridge.

GATUN.

"Open house" was observed at the Gatun clubhouse on Saturday evening, May 11. A large number of the men of Gatun attended. Refreshments were served during the evening. The results of the various games were:

Gatun.		Corozal.	
Pool.			
DePoorter	100	Wilson	25
Dalton	100	McKee	50
Galloway	100	Roberts	85
Hughes	100	Baker	44
Billiards.			
Townsley	100	White	92
Wurster	100	Thompson	34

Bowling.

Culebra	461	443	419
Gatun	438	468	452

In the checker match 14 Gatun men played F. L. Bernsee, simultaneously. The results were: Out of 45 games played, Mr. Bernsee won 38, lost 4, draws 3. The Gatun players who won games were: Dr. Dunn, 1; R. E. Chatfield, 1; and F. D. Gartrell (Gatun's star player); 2. The who secured draws were: R. E. Chatfield, 1; F. D. Gartrell, 2; The checker players of Gatun will organize a club in the near future and will challenge all other checker clubs on the Isthmus.

Sanitary combs are now on sale at the Gatun clubhouse at one cent each.

On Saturday, May 18, Gatun will play pool and billiards at Corozal and will bowl Cristobal at home and abroad. Moving pictures will be shown on this night also. Mrs. Blanche Caldwell, lyric soprano of Empire, will sing two songs.

Another order for new books will shortly be sent to the United States. Suggestions gladly received.

CRISTOBAL.

On Saturday evening, May 18, Dr. Orenstein will deliver an illustrated lecture on "Flies and their relation to disease", under the auspices of the debating club. All men are invited to attend. The next debate will will be held on Wednesday evening, May 22. Subject: "Resolved, That the United States Government acted arbitrarily in acquiring the Panama Canal."

The indoor baseball team received notice that the game which was to have been played at Corozal has been forfeited to the local team by the Corozal team.

On Saturday night, May 11, the local bowlers took one out of three games from the Empire team by the following scores:

Cristobal.				Empire.			
Barrett	95	85	88	Pinney	90	113	109
Cotton, C.	77	80	85	Gustavson	97	83	96
Orr, E.	79	94	100	Nelson	90	84	93
Weston	95	112	92	Danielson	89	94	78
Louch	86	102	95	Rodeghiero	81	91	105
Totals	422	473	460		447	465	481

Married.

McCARTHY–MacINTYRE—At the Union Church Chapel, Cristobal, on May 11, Edith MacIntyre of Newark, N. J., to Joseph Sheldon McCarthy of New York City, the Rev. Carl H. Elliott officiating. Isthmian residence, Colon.

P. R. R. steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York via Kingston at 10 a. m. on sailing dates. The *Prinz August Wilhelm* and *Prinz Eitel Friedrich* call at Santiago de Cuba, on both outward and homeward voyages.

LOST—A No. 12 size Elgin watch, with the initials "J. L. W." on the back, on train No. 3, between Colon and Pedro Miguel. Finder will please return to J. L. Wickersham, Pedro Miguel.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MAY 22, 1912. No. 39.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Monthly Report.

The report of the Chairman of the Isthmian Canal Commission for the month of April is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Relocation of Canal Zone Penitentiary.

The committee having in charge the selection of a permanent site for a Canal Zone penitentiary, consisting of Col. J. P. Fyffe, Frank Cotton, J. A. LePrince, M. E. Gilmore, and Lieut. Walter D. Smith, has submitted its recommendations, and the same were approved by the Chairman and Chief Engineer on May 11. The site selected by the committee is on a tract of land, situated at the east end of the footbridge over the Pedro Miguel River, opposite the town of Pedro Miguel, and, in the opinion of the committee, presents more advantages for such a purpose than any other location it was able to discover. The present requirements call for a penitentiary building capable of housing 160 persons. Because of the uncertainty as to the size of the population of the Canal Zone after the completion of the Canal, the committee made no recommendation as to ultimate requirements, but left the matter open. Present needs, it is believed, however, will be met by the removal and reerection, at the new site, of the concrete building, formerly in use at Culebra, together with the old wooden buildings adjacent thereto, formerly used as quarters for guards, etc.

The new building will be erected as a central unit, so that if found necessary at any future time, it can be readily enlarged. The greater part of the iron work in the old building, and other material that may be available, will be utilized. The plans for improving the new site contemplate the building of a suitable roadway from the village to the grounds at an estimated cost of $3,000; the laying of sewers and water mains at an estimated cost of $2,800. The cost of removing the old buildings is estimated at $8,900. The cost of taking down the present buildings will be borne by the Department of Construction and Engineering, but the remainder of the work is to be paid for out of the funds of the Department of Civil Administration.

Most of the prisoners that were formerly confined in the penitentiary at Culebra are now housed at the stockade on the Mandingo River on the new road toward Chorrera, from Empire. The others are confined in the jail recently erected at West Culebra.

Contractor's Task at Point 4-B, Opposite Juan Grande.

The Central Division has undertaken the completion of the Canal channel excavation, opposite Juan Grande, which was let to a contractor in December, 1910. The award was for the removal of 112,450 cubic yards of earth, lying on the east bank of the Chagres River, opposite Gorgona, in Mile 29, between stations 28-1,000 and 28-2,300, at the rate of 21½ cents per cubic yard. The successful bidder assigned the work to a subcontractor, by whom it was renounced on March 6, 1912. The bondsmen for the contractor were called on to state whether they would take up the contract and finish the work. They declined, and on May 16, the Central Division began the excavation with a steamshovel. There remain to be excavated about 15,000 cubic yards.

New Dynamite Dock in Use.

The new dynamite dock, situated on the bank of the French canal, near its intersection with the American Canal at Mindi, has been completed, and was placed in service for the first time on Friday of last week, when the steamer *Flora* arrived at Cristobal, with a cargo of 15,000 cases of dynamite, 10,000 cases of which consisted of 45 per cent, and 5,000 cases, of 60 per cent dynamite. In addition, the vessel had in its hold 19,000 bags of cement for reserve stock. The dock is 33 feet wide and 120 feet long, and was built at this point on account of its isolation, thereby insuring a greater measure of safety in the discharging of explosives. Formerly, dynamite and other explosives were unloaded at Dock 14. The new dock will be used also for the unloading of material intended for use on the fortifications.

Alterations at Ancon Hospital Laundry.

The boiler for the laundry of Ancon Hospital, having worn to the point at which repairing would be uneconomical, is to be supplanted by a Manning type boiler of 114 horsepower, which had been used at the Panama railroad shops at Cristobal from 1907 to 1910, and is believed to be capable of five or six years more service. The old boiler is a Nagel locomotive boiler made in Pennsylvania. It was used about two years by the Americans at the planing mill at Ancon, from which it was removed and installed in the laundry in July, 1909.

The removal of a portion of the wall on the north side of the main room of the first floor of the building has made a part of the porch, in effect, a part of the room, increasing its floor space by about four hundred square feet, and allowing readier communication with the spaces devoted to sorting and wrapping.

Tug Reliance and Tows.

The tug *Reliance*, which is towing three barges from Colon to Balboa, arrived at Punta Arenas, midway in the Strait of Magellan, on May 9. This port is 6,729 miles from Colon, and 3,750 miles from Balboa. The *Reliance* sailed from Colon on February 11, and is due at Balboa about June 20.

Auxiliary Mixing Plant in Lower Miraflores Lock.

One of the 2-cubic yard Chicago cube mixers, to be used in the auxiliary concrete mixing plant in the east side wall of the lower lock at Miraflores, has been installed, and is in use; the other has been transferred from berm crane E. These mixers discharge into 2-cubic yard buckets carried on narrow-gage trains to the chamber cranes, which place the concrete in the center wall. One of the chamber cranes was used in installing the mixers, by lifting them to a platform level with the recess left for it when the adjacent portions of the wall were built. The first mixer was taken from the plant in the west forebay at Pedro Miguel Lock. When it was loaded on a car for transfer, it was handled by a locomotive crane, operating from the 40-foot storage trestle over the bins which supplied the mixers.

New Automobile Fire Engines.

One of the two automobile fire engines purchased from the Webb Motor Fire Apparatus Company of St. Louis for the Ancon and Cristobal fire stations was received on April 18, the other on April 25. Both machines are at the Cristobal station, where they have been subjected to the prescribed tests under the direction of the mechanical engineer at Gorgona, and the chief of the Canal Zone fire department. On a test run from Gatun, at 9.30 o'clock at night, one of the engines covered the distance of seven and nine-tenths miles from the fire station at Gatun to the fire station at Cristobal in 25 minutes. There are many sharp turns and several heavy grades in this road.

A description of the engines was published in THE CANAL RECORD of October 25, 1911. They are of the six-cylinder type, 80 horsepower, A. L. A. M. rating, and, under the specifications, must be able to run 20 miles an hour up a 12 per cent grade, or 50 miles an hour on level roads. The pumps, on test, have shown a capacity of from 600 to 690 gallons of water per minute, through two

NOTES OF PROGRESS.

(Continued.)

300-foot lines of hose, with one and one-fourth inch nozzle attached, from suction, with 8-foot lift from the sea. Each engine will carry 1,200 feet of hose when fully equipped, and is supplied with one 12-foot roof ladder, one 20-foot extension ladder, and two 3-gallon fire extinguishers.

The Ancon engine will be kept at Cristobal until the water situation there is relieved. In case of a serious fire and the necessity of resorting to the use of sea water, the water could be carried a considerable distance by using both automobile engines and the steam fire engine on a relay line.

Several members of the company at the Cristobal station are taking a course of instruction in the operation and care of the engines, and four have already passed the examination under the Board of Local Inspectors. The position of motor engineer in the Canal Zone fire department has been created, and the engineer who was sent down by the manufacturers to place the machines on service, has been appointed to fill it.

Requisition was made some time ago for the purchase of an automobile tractor and a supplementary pair of wheels with transmission axle, to be substituted for horses in drawing the No. 3 Silsby fire engine at the Cristobal station. The bids received, however, failed to provide an economical machine that met all the requirements, and they were rejected. Further consideration of purchase will depend on whether, or not, suitable apparatus can be found.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 88 per cent completed, 198,089 cubic yards, out of a total of 225,000, having been placed at the close of work on May 18. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
May 13	64	3.30	1
May 14	68	4.00	1
May 15	28	1.30	1
May 16	40	2.00	1
May 17	48	3.00	1
May 18	76	4.15	1
Total	324	18.15	1
Previously reported	197,765		
Grand total	198,089		

Trestle to South Approach Wall at Pedro Miguel.

A trestle has been constructed across the lower approach to the west chamber of Pedro Miguel Lock, on a level with the wing wall, to carry material for filling the south approach wall. It is about 134 feet long, crossing at an angle of 64 degrees with the axis of the lock, and rises 54 feet above the surface of the floor, which is at elevation 13 feet above sealevel. Each of the eight supporting bents is built with four upright and two battering posts, for which piles were used. The bents are at right angles with the track, except two, which were placed parallel to the center wall, in order to clear a track on the floor of the lock.

Notice.

Owners of launches of all classes, as well as motor boats and gasoline boats, and all boats propelled in whole, or in part, by machinery, operated in Canal Zone waters, are hereby notified that such boats are subject to the inspection laws of the Canal Zone. Owners or operators should apply to the Board of Local Inspectors, Ancon, for the inspection of their boat, stating where the boat is located and when it can be inspected, in order that the Board may arrange for its inspection. After inspection, a certificate will be issued by the Board of Local Inspectors authorizing the use and operation of such boat in Canal Zone waters, subject to the conditions set forth in the certificate of inspection. The operation of all such boats in Canal Zone waters without first securing a certificate from the Board of Local Inspectors is a violation of law.

CONCRETE WORK IN THE LOCKS.

About 84 per cent of the concrete for the locks is in place, the amount at the close of work on May 18 being 3,662,246 cubic yards, out of a total of approximately 4,303,486. A total of 24,133½ cubic yards of concrete was laid in the locks during the week ending May 18.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 18 being 1,871,823 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending May 18, and of the total follows; and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.

Grand total	......	......	......	......	......	......	......	1,871,820

The 269½ yards shown for the portable mixers are reinforced concrete, and were placed on the following days: May 13th, 51½; May 14th, 48½; May 15th, 20; May 16th, 35; May 17th, 55½; May 19th, 59.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 94 per cent completed, 843,582 cubic yards, out of a total of 890,750, bucket measurement, having been placed at the close of work on May 18. The record for each of the working days of last week, follows:

Date.	Auxiliary Plant.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
	Cu. Yds.			Cu. Yds.			Cu. Yds.	Cu. Yds.

MIRAFLORES LOCKS.

Over 66 per cent of the concrete for the system of two twin locks at Miraflores was in place on May 18, the total amount on that date being 946,844 cubic yards, bucket measurement, out of a total of approximately 1,412,736. The record for each of the six working days of last week, follows:

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant.							Total.
				2-cubic yard mixers.			½-cubic yard mixers.

FOURTH OF JULY.

Celebration to be Held at Ancon and Balboa This Year.

At a meeting of the representatives of the different departments and divisions held at Ancon on Saturday afternoon, May 18, to arrange for the celebration of Independence Day by the Americans on the Isthmus, there was a good attendance and considerable interest was manifested. The sentiment was almost unanimously in favor of a celebration, and a resolution was carried to the effect that such a celebration should be held on the general lines of the celebrations of previous years. In regard to the place for holding the celebration, which was held last year at Cristobal, a considerable preference was shown for Ancon and Balboa, Ancon for the field, and other land events, and Balboa for the aquatic sports. Cristobal was second choice, and Empire third. After thoroughly canvassing the situation, a resolution was carried to the effect that the celebration this year should be held at Ancon.

It was stated that on account of the larger number of Americans on the Isthmus this year than last (due to the presence of the Tenth Infantry at Camp Otis, and the force of Americans engaged in the erection of the lock gates,) that the facilities of the Panama railroad would be inadequate to undertake safely unlimited free transportation, as has been the custom heretofore, and that it had been decided by the Chairman and Chief Engineer to be necessary, on this account, to limit free transportation to contributors and participants in the celebration.

The general chairman of the celebration, Mr. H. H. Rousseau, was directed to appoint the chairmen of the various subcommittees, who, in accordance with the usual custom, would make up the executive committee in general charge. The following have been announced by him: Chairman, entertainment and amusement committee, Capt. R. E. Wood; transportation, Mr. J. A. Smith; finance, Mr. E. J. Williams; fireworks, Capt. F. O. Whitlock; dance, Dr. J. C. Perry; publicity, Col. Tom M. Cooke. A meeting of the executive committee will be held at Ancon on Saturday afternoon, June 1, to receive reports, select the members of the subcommittees, and to decide upon the details of the celebration. Mr. Williams, chairman of the finance committee, will issue the subscription blanks for distribution to the various departments and divisions as soon as they are printed. It is desired to have as quickly as possible approximate estimates from the departments and divisions of the totals of their respective subscriptions, in order to be able to outline the scope and cost of the celebration. The total receipts last year amounted to $5,568.71; total disbursements $4,419.96; unexpended balance, $1,248.75.

It is proposed also to distribute fireworks among the villages of Cristobal and Gorgona, and to provide for a joint display at Culebra and Empire, for the benefit of the children. There will be also the customary displays at Taboga sanitarium, and at the Palo Seco leper asylum.

Obituary.

Mrs. Martin Roe, wife of Mr. Martin Roe of Ancon, died in Ancon Hospital on May 19. She was thirty-five years of age, and had been on the Isthmus six years. She is survived by her husband.

CANAL WORK IN APRIL.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., May 15, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of April, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	....	1,626,947	195,117	1,822,064
Work excavation, wet	Cubic yards	403,616	....	383,995	787,611
Total work excavation	Cubic yards	403,616	1,626,947	579,112	2,609,675
Plant excavation, dry	Cubic yards	....	27,528	....	27,528
Plant excavation, wet	Cubic yards	....	....	117,180	117,180
Total plant excavation	Cubic yards	....	27,528	117,180	144,708
Total Canal excavation	Cubic yards	403,616	1,654,475	696,292	2,754,383
Material placed in dams	Cubic yards	491,145	....	93,677	584,822
Concrete placed in locks and dams	Cubic yards	14,992	....	107,195	122,187
Explosives used	Tons (Gross)	97.49	190.63	35.19	323.31
Rock drilled	Feet	69,571	427,709	81,756	579,036
Tracks removed	Miles	....	12.22	....	12.22
New tracks laid	Miles	4.22	15.73	3.33	23.28
Rock crushed	Cubic yards	46,172	....	82,770	128,942
Cement used	Barrels	20,632	171	109,355	130,158
New roads built	Miles	0.35	....	....	0.35
Water mains laid	Feet	7,889	1,237	672	9,798
Sewers laid	Feet	2,809	929	....	3,736
Open drains and ditches dug	Feet	18,367	58,694	17,975	95,036
Average daily force	....	6,285	8,086	6,042	20,413
Average rainfall	Inches	1.58	1.81	3.52	2.35

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers, the inspection being cared for by this subdivision. Work was continued on the grinding of fixed irons and preparing valve chambers for the installation of the valves, which work is being done under supervision of this office. This subdivision is also charged with general inspection of masonry work of all the locks.

LOCK GATES AND PROTECTIVE DEVICES.

Up to April 20, a total of 50,275 tons of structural steel had been accepted at the rolling mills, of which 1,414 tons were required to replace material lost on the steamship *Moldegaard*, leaving 48,861 tons on original orders, or about 96 per cent of the total required for all lock gates. The amount accepted between March 20 and April 20 was 1,245 tons. A total of 31,776 tons of riveted structural steel had been shipped from the Rankin shops, or about 62 per cent of the total contract weight of this class. Of this last item, 2,853 tons were shipped between March 20 and April 20. In addition to these quantities, 1,432 tons of riveted steel had been shipped in complete replacement of all material of this class lost on the steamship *Moldegaard*.

The following are details of material shipped up to April 20, 1912:

Gatun Locks—Practically all material for the 20 gates in the upper chamber, about 25 per cent of the steel for the gates (77 feet 10 inches high) in the intermediate chamber, about three-fourths of the material for the 77-foot gates in the lower chamber, and one-third of that required for the lower guard gates, had been shipped.

Pedro Miguel Lock—Practically all material for this lock had been shipped.

Miraflores Locks—A small amount of material for the upper guard gates had been shipped.

LOCK GATE ERECTION.

Gatun—Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive: The work done on these gates during the month consisted mainly in fitting and attaching the castings along the quoin and miter posts. Gate No. 38 was placed on its pintle and fixed to the anchorage on April 15, and gate No. 37 was moved to its final position over the pintle and made ready for lowering. Leaf No. 39 was practically ready for moving into position on April 30. On leaf No. 40, about two-thirds of the rivets in and about the quoin castings remained to be driven before moving the leaf. The reaction castings at the miter end of leaves Nos. 37 and 38 were attached and partly fitted, while the end plates on leaves Nos. 39 and 40 were ground ready for the attachment of the castings. The work remaining to be done on these gates consists in hanging the leaves, the attaching of castings at the miter end, the adjustment and babbitting of the bearing plates, a small amount of riveting and calking, the testing for watertightness, the painting and the fitting and attaching of the timber sills and fenders, and also the footwalk and railing.

Upper gates, upper lock, 77 feet high, leaves Nos. 33 to 36, inclusive: Very little work was done on these leaves during the month. It consisted in bolting, reaming and riveting the sheathing plates. The reaming was about completed, except close to the false work frames. The riveting was about one-third completed, as against one-fourth at the beginning of the month.

Middle gates, upper lock, 77 feet high, leaves Nos. 29 to 32, inclusive: Very little work was done on these leaves during the month. The sheathing plates were bolted up, except the two top panels, and two panels reamed on three of the leaves and five panels on the fourth leaf. No riveting of the sheathing had been done.

Safety gates, upper lock, 77 feet high, leaves 25 to 28, inclusive: The erection of these leaves began April 1. The skeletons have been erected, excepting the top girders, and riveted for a height of five panels out of eighteen. Three panels of upstream sheathing were put in place on all these leaves.

Middle gates, lower lock, 77 feet high, leaves Nos. 9 to 12, inclusive: The erection began on April 12. One panel was raised, and the interior framing riveted. Work was then stopped on account of lack of material.

Pedro Miguel—Upper guard gates, 54 feet 8 inches high, leaves Nos. 50 to 53, inclusive: A small amount of riveting was done and the grinding of the end plates continued, considerable grinding and riveting remaining to be done. No castings were attached.

Upper gates, 79 feet high, leaves Nos. 54 to 57, inclusive: The work on these leaves consisted of a small amount of interior riveting and the attaching of about two-thirds of the sheathing plates. These have been partly bolted, without cover or splice plates, but no riveting was done on them during the month.

Safety gates, 79 feet high, leaves Nos. 62 to 65, inclusive: The placing of the sheathing on both faces was completed, and the erection bridges were moved on April 29. The interior framing was riveted up, but little reaming and no riveting was done on the sheathing plates.

Lower guard gates, 79 feet high, leaves Nos. 62 to 65, inclusive: The placing of the sheathing on both faces was completed, and the erection bridges were moved on April 29. The interior framing was riveted up, but little reaming and no riveting was done on the sheathing plates.

Lower guard gates, 47 feet 4 inches high, leaves Nos. 70 to 73, inclusive: The bottom girders for two leaves were placed on April 9; further work was stopped owing to lack of material.

Miraflores—No material has been erected in these locks.

The total tonnage of lock gates erected on the Canal to May 1, 1912, without regard to its being fully reamed or riveted, was about 13,682 tons, out of a total of 58,000 tons, or about 24 per cent. Of this, 2,646 tons, or 4½ per cent, were erected during April. The total of field rivets driven was 668,575, or 11.6 per cent, of which 135,403, or 2.4 per cent, were driven during the month.

LOCK GATE RECESS COVERS.

The material for all recess covers (80 in all,) including the castings, has been shipped from the United States. At Gatun, nine covers were put in place during April, making 27 in all, to date, out of a total of 36. One cover was riveted during the month, making a total of 17 riveted to date. Two were aligned and grouted in April, making a total of 10 at the present time. At Pedro Miguel, 16 out of 20 have been erected and riveted, but none fully aligned, or grouted, to date. Four of these were erected, and five riveted, during April.

CHAIN FENDERS.

All shop drawings have been approved, except the piping plans, which are being revised to fit the operating pumps. The structural steel work has been practically all rolled, riveted up, and finished. Nearly all iron and steel castings for the sample fender have been cast and machined. About half of the hawsepipe castings for all fenders on the Canal have been satisfactorily cast, but none were machined at the end of the month. The chain for the sample fender was finished, and tested, accepted, and shipped to the Isthmus.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection, as follows:

(*1*) *For the rising stem and cylindrical valve machines purchased under Circular 614*—The two trial rising stem gate valve machines, Nos. 260 and 261, are now on the Isthmus, and the installation is practically completed, but on account of nonreceipt of required parts to make connections of valve stems to crossheads, nothing was done in the way of continuing this installation during the month. The first machine on the order for the remaining 114 rising stem gate valve machines was set up on the new testing rig at the plant of the manufacturers, and it is expected that the machine will be ready to ship some time during the ensuing month. The various groups, as stated in the contract, as parts not required to be tested, are being delivered.

The second, and last, trial cylindrical valve machine was received complete during the month. Nine of the remaining 118 cylindrical valve machines have been received to date, eight of which were received during the month.

None of the motors under this circular were received during the month. The tests of the trial motors, as stated in last month's report, are now completed.

(*2*) *For the rack railway and other material purchased under Circulars 619, 636, 636-D, 647, 666 and 688*—Inspection on the Isthmus shows some irregularities in the machining of the ends of rack sections. Inherent irregularities were found also in the conductor slot cover brackets. Otherwise the work progressed satisfactorily.

(*3*) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, purchased under Circular 627*—No work has been done on the installation of these machines, the same being held up owing to the work on any of the miter gates not being completed. The second trial miter gate moving machine was received during the month. None of the 90 miter gate moving machines have been shipped.

Two motors for the miter gate moving machines were received during the month. One of these motors was installed and operated with machine, but machine was not connected to gate with stem.

(*4*) *For the gate and girder hoisting machinery for the emergency dams, purchased under Circular 616*—Satisfactory progress was made on this machinery during the month.

(*5*) *For the hydroelectric station, purchased under Circular 648*—The castings in the main for the turbines are completed, and work on penstocks, headgates, turbines, exciters, and reactances progressed satisfactorily.

(*6*) *For the electric towing locomotives, purchased under Circular 650*—Working drawings are being prepared for Class 1, Item 1, one trial locomotive, at the works of the manufacturer. Award has not yet been made for the remaining 39 locomotives.

(*7*) *For locomotive cranes, derricks, and hoisting engines for erection plant of machinery and electrical equipment, purchased under Circular 622*—Two more of the cranes were received during the month, and were sent to Gorgona shops for erection. This leaves two cranes under this order yet to be received. The four previously received are erected and now in service.

The following is a summary of the work accomplished in the field by the erecting forces:

Atlantic Division Locks—The force installing machinery and electrical equipment assembled 2,292 feet of towing track, including the assembly of rack sections, channels, anchor bolts and "T" rails, and bonding of same. (This does not include the installation of conductor rails, conductor covers, and brackets.) A total of 4,200 feet of towing track has been placed and partly finished to date.

The work of grinding and chipping irons in the valves has been carried on during the month in valves 256, 257, 262, and 263; also, on intake valves Nos. 264, 265, 267, 268, and 269.

The seals fixed in the masonry for the intake valves had to be removed and planed. Three of the intake valve chambers were ready to receive the valves at the end of the month. Cylindrical valve No. 558 was installed.

The motor and back gear shaft has been installed on miter gate moving machine No. 38

During the month, 390 cubic yards of concrete were placed. The amount previously reported was 496.6, making the total to date 886.6; 128.8 for locomotive track, and the remainder, 261.2, in rising stem gate valves, cylindrical valves, and miscellaneous places.

Pacific Division Locks—Most of the work in the Pacific Division locks has been of a preparatory nature, and at Pedro Miguel only. Installation of steel for miter gate recess covers continued, and the installation of towing locomotive track was commenced. One 15-ton locomotive crane, for handling machinery, track material and hoisting cement, was erected on the return track of the middle wall.

EMERGENCY DAMS.

The inspection work in the United States progressed satisfactorily during the month. Up to April 20, a total of 883 drawings, covering turning and wedging machinery, structural material, etc., were completed and approved. This completes all the drawings for Gatun and Pedro Miguel dams, and about 20 per cent of the drawings required for the Miraflores dams.

At the rolling mills and foundries, 795 tons of riveted nickel steel, 110 tons of riveted structural steel, 66 tons of turning and wedging machinery, including miscellaneous material, were fabricated during the month. At the shops, 611 tons of riveted nickel steel, 44 tons of riveted structural steel, and 46 tons of turning and wedging machinery, including miscellaneous material, were fabricated during the month. Satisfactory progress has been made on the roller bearings, all the roller bearings for five dams having been manufactured and accepted to date.

To summarize, practically all the material for the first four dams has been manufactured and accepted in the rolling mills and foundries, and twelve per cent of the total material required for all six emergency dams has been manufactured in the shops to date.

AIDS TO NAVIGATION.

Surveys—Practically all of the surveys required in connection with the work of this subdivision have been completed. The force on this work were engaged during the month in working up field notes and checking same for the location of buoys in the section from Mamei to Gamboa.

Construction—Range No. 9-11, Pacific Division—Seventy-five cubic yards of ballast rock were placed in the foundation of the front tower.

Range No. 1-2, Pacific Division—Same status as when last reported.

Range 13-14, Pacific Division—Temporary lights were installed in both towers.

Range No. 5-6, Atlantic Division—Rear tower—Brass lantern frame and curved glass were placed, and the electric light and flashing apparatus were installed. Front tower—The spiral concrete stairway was completed; all doors and windows were put in place; brass lantern frame and curved glass were set, and electric light and flashing apparatus were installed.

Range No. 21-22, Gatun Lake section—Same status as when reported last month.

Range No. 24-25, Gatun Lake section—Front tower—The newel post was carried up to its full height. Rear tower—Same status as when reported last month.

Range No. 1-2, Gatun Lake section—Front tower—Wooden forms for the platform supporting the tower were constructed, and at the end of the month, were 90 per cent completed.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month, two shovels were engaged in borrow pit excavation for the Locks backfill, and for construction tracks, 69,221 cubic yards of material being removed.

Backfill—Backfilling behind the side and center walls of the middle and center locks was continued. The quantity placed during the month aggregated 64,537 cubic yards, distributed, as follows: East wall, 24,140 cubic yards; west wall, 27,415 cubic yards; center wall, 12,982 cubic yards. The total placed to May 1 amounted to 1,394,706 cubic yards, which was 77.5 per cent of the entire backfill.

Receiving and Issuing Material—The consumption of sand exceeded the receipts by 6,031 cubic yards, and the receipts of rock and cement exceeded the consumption by 35,503 cubic yards, and 5,720 barrels, respectively.

Mixing and Placing Plants—Plant No. 1 and all portable mixers were kept in satisfactory operation during the month.

Iron and Steel Work—During the month, 209.8 tons of fixed steel, and 105,777 feet of reinforcing rods were placed. Two and one-half tons of reinforcing rails, and 23.1 tons of electric return track, were laid.

Concrete Work—There was a decrease of 15,932 cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 25 working days was 464 cubic yards, as compared with a daily average during March of 1,059 cubic yards. The total amount of concrete placed during the month was 11,600 cubic yards. The bucket measurement exceeded the place measurement by 346.5 cubic yards. Of the total, 1,849 cubic yards were placed in the upper lock, 1,630 cubic yards in the middle lock and 8,121 cubic yards in the lower lock. The concrete work for the entire lock system was 93.09 per cent completed at the end of April.

OPERATION OF THE PERMANENT CONCRETE CONSTRUCTION PLANTS.

Length of working day (hours)	9.00
Average number of hours per day worked, per strand of cableway laying concrete and large stone (actual working time)	1.23
Average number of mixers per day	3.36
Average hourly output per mixer (actual working time) cu. yds	.50
Average amount of concrete and large stone laid per hour, per strand of cableway (actual working time) cu. yds	32.04
Large stone laid, cubic yards	
Concrete laid, cableways, cubic yards	8,852 00
Concrete laid, crane and derrick, cu. yds	
Concrete laid, derricks, cubic yards	2,010.00
Concrete laid, portable mixers, cu. yds	1,084.50
Total amount of concrete laid, cu. yds	11,946.50

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 491,145 cubic yards, making the total amount in place 19,043,431 cubic yards. On May 1, the Dam was 88.68 per cent completed.

Hydraulic Fill—The dredges increased the hydraulic fill by 204,189 cubic yards. The total hydraulic fill in place April 30 was 9,599,657 cubic yards.

Dry Fill—The material received from the steamshovels, amounting to 286,956 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 9,443,774 cubic yards.

GATUN SPILLWAY.

Excavation—The Spillway excavation was not extended during the month, the total amount of material removed remaining at 1,589,108 cubic yards, as previously reported.

Backfill—Backfilling was not extended during the month, the total remaining at 16,236 cubic yards.

Concrete—The work of placing concrete was continued. The amount placed during the month aggregated 3,392 cubic yards, which increased the total to 197,870 cubic yards. The concrete work for the Spillway was 87.94 per cent completed.

HARBOR AND CHANNEL SECTION.

Dredging from Ocean to Mindi—Five dredges removed 199,447 cubic yards of earth, and 54,125 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 6,291 cubic yards of rock at the Panama railroad Cristobal terminal docks. On April 30th, 40 feet of water could be carried from zero to zero plus 2,800 feet; 35 feet to Mile Post 3 plus 4,500 feet; 30 feet to Mile Post 4 plus 1,400 feet; 20 feet to Mile Post 5 plus 2,438.9 feet, the point of intersection with the French canal.

Approach to Gatun Locks—Two dredges removed 127,629 cubic yards of earth, and 22,415 cubic yards or rock from the Canal prism.

PORTO BELLO.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day, hours	8.00
Average number of hours worked per day	3.97
Average number of cubic yards per hour of working day	229.79
Average number of cubic yards per working hour	472.95
Maximum day's output (5 hrs. 15 min.) cu. yds	2,176.00
Average day's output (25 days) cu. yds	1,838.28
Average hourly output (168 hrs., 38 min.) cu. yds	272.60
Total output for the month, cu. yds	46,172.00

SAND, STONE, AND CEMENT SERVICE.

In connection with this service, plant steamed 3,410 miles, handled 504 barges, and carried 3,028 passengers.

WEST BREAKWATER, COLON.

During the month, 46,538 cubic yards of material were excavated and dumped from the trestle. The double track trestle was extended 334 linear feet. On May 1, the trestle extended 10,498 linear feet from shore. Eight thousand three hundred and eighty cubic yards of Porto Bello rock were placed on the breakwater, making a total of 50,236 cubic yards used for that purpose to May 1. The total amount of rock dredged and dumped on the west breakwater to April 1, 1912, was 970,695 cubic yards. During the month, 54,125 cubic yards of rock were dredged and dumped, increasing the total to 1,024,820 cubic yards. The amount of dry fill placed to May 1 was 756,829 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended, as required, to facilitate construction work.

Work was continued on the Colon street improvements.

Central Division.

During the month of April, the total amount of material excavated in the Central Division was 1,654,475 cubic yards, of which 362,615 cubic yards were excavated as earth, and 1,291,860 cubic yards as rock. Of this quantity, 1,624,947 cubic yards were removed by steamshovels and 19,776 cubic yards by cranes. Contractors removed 6,496 cubic yards by hand and 3,256 cubic yards by steamshovel. Of the total, 1,600,779 cubic yards consisted of primary excavation for the Canal prism, 26,169 cubic yards for diversion, and 27,528 cubic yards were gravel removed and an incline excavation outside of the prism.

The daily average number of steamshovels at work during the month was 45.78 and the total number of shovel days was 1,144½, as compared with 46.27 at work during the month of March, with 1,203 shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'k'g days.	Av. yards per shovel day.
		Rock.	Earth.			
1911:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
April	1,470,752	1,227,485	243,267	44.71	24	1,370.70
1912:						
April	1,624,947	1,287,364	337,583	45.78	25	1,414.30

Rainfall at Empire: 1911, 3.93 ins.; 1912, 2.64 ins.

The above table shows the average output per shovel to be 3.12 per cent greater in April, 1912, than in the corresponding month of the previous year.

The total amount of material excavated from the prism in the Culebra section of the Central Division in April, 1912—1,429,048 cubic yards—was the highest record in that section for the month of April.

The total estimated amount of material to be removed in the Central Division according to revised estimate of July 1, 1911, was 101,801,296 cubic yards, and up to May 1, 1912, 91,626,193 cubic yards had been removed, leaving 10,175,103 cubic yards yet to be removed in order to complete all excavation in the Central Division. From these figures, it will be seen that 90 per cent of all excavation in the Central Division had been accomplished up to the close of the month of April, and 10 per cent yet remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed, and that to be completed, at the close of April operations was, as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	79,263,262
To be completed	10,180,743
CHAGRES SECTION.	*Cu. Yds.*
Completed	12,362,931

From the above figures, it will be seen that the Culebra section, locally known as the "Culebra Cut," was 88.62 per cent completed, with 11.38 per cent to be completed. The Chagres section was completed so far as dry excavation is concerned, but it is estimated that it will be necessary to remove about

300,000 cubic yards of wet excavation in this section.

During the month, 16,985 cubic yards of material were dumped in the embankment for the new roadbed for the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,171,428 cubic yards.

During the month, 459 cubic yards of material were hauled to Gatun for use in the construction of the Dam, which increased the total amount to 5,374,310 cubic yards.

There was also furnished to the Pacific Division 7,560 cubic yards of material for backfill at Pedro Miguel Lock.

The daily average number of laborers at work on the whole division during the month was 7,294, and the daily average number of gold employes was 792.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 195,117 cubic yards, of which 83,327 cubic yards were classified as earth, and 111,790 cubic yards as rock.

Filling and Embankment—During April, 67,385 cubic yards of dry filling were added to the prism of the west dam at Pedro Miguel, increasing the total amount of material in place at the close of the month to 545,755 cubic yards. The backfill at Pedro Miguel was increased by 33,822 cubic yards, the total amount in place at the end of the month aggregating 585,260 cubic yards.

At Miraflores, 26,292 cubic yards were added to the dry fill in the toes of the west dam. The total quantities of dry and hydraulic filling in place at the end of the month were 1,172,634 cubic yards, and 661,048 cubic yards, respectively. The backfill was increased by 43,980 cubic yards, the total aggregating 517,724 cubic yards at the end of the month.

Pedro Miguel Lock—Excavation in the Canal prism, between the Pedro Miguel and Miraflores locks, was continued, two steam shovels being employed during the greater part of the month, the spoil being used for filling the core of the west dam, and for backfilling behind the east lock wall. Work was commenced on the erection of a wooden trestle bridge across the lower end of the west lock chamber. By this means, trains will be run in to the completed portion of the south guide wall for the purpose of filling in, as well as supplying materials for completing the south end of the guide wall. The amount of iron placed in the masonry aggregated 124,396 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 9,460 cubic yards, as compared with 9,459 cubic yards during March. The concrete was placed, as follows: Four thousand three hundred and thirty cubic yards in the north center guide wall, 690 cubic yards in the northwest wing wall, 1,369 cubic yards in the east wall, 889 cubic yards in the center wall, 1,176 cubic yards in the west wall, 66 cubic yards in the southwest wing wall, and 940 cubic yards in the floors.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	3.73
Average number of mixers per day	4.52
Average hourly output per mixer (actual working time) cu. yds	17.26
Large stone laid, cu. yds	
Concrete laid, cu. yds	9,460.00
Total concrete laid, cu. yds	9,460.00

Average number of mixers—4.52—consisted of one 2-cubic yard and five ½-cubic yard mixers. Placing plant consisted of a daily average of 4.04 locomotive cranes and derricks.

Miraflores Locks—Rock and sand storage bins for an auxiliary mixing plant, together with one of the two 2-cubic yard concrete mixers, were installed in the east wall of the lower lock, which, in addition to a similar plant in the east wall of the upper lock, will supply concrete for the chamber cranes in the construction of the center and center guide walls of the lower lock. Dry excavation in the Canal prism, immediately south of the locks, and filling on the east and west toes of the west dam were continued during the month. Work was continued in connection with backfilling behind the east and west lock walls. The sinking and filling of concrete caisson foundations for the north center guide wall, and the construction of the reinforced concrete wall base girders, supported by the caisson piers, were continued. During the month, the amount of iron placed aggregated 801,644 pounds.

Concrete Work—The total amount of concrete and large stone laid at Miraflores was 107,211 cubic yards, as compared with 83,722 cubic yards during March. The concrete was placed, as follows: Three thousand two hundred and twelve cubic yards in the north center guide wall, 32,276 cubic yards in the east wall, 30,893 cubic yards in the center wall, 29,075 cubic yards in the west wall, 2,279 cubic yards in the floors, and 16 cubic yards in the air compressor.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	12.00	8 & 12.00
Average number of hours per day worked laying concrete and large stone (actual working time)	6.37	6.47
Average number of mixers per day	7.88	10.00
	Cu. Yds.	*Cu Yds.*
Average hourly output per mixer (actual working time)	32.57	27.21
Average amount of concrete and large stone laid per hour, per berm, or chamber crane (actual working time)	68.71	....
Large stone laid	50 00	....
Concrete laid	73,974.00	23,711.00
Total concrete laid	74,024 00	23,711.00

Permanent plant consisted of four berm cranes and three chamber cranes, each working 12 hours a day, and one chamber crane working eight hours a day.

Auxiliary plant consisted of two 2-cubic yard mixers working 12 hours a day, and a daily average of 8.32 ½-cubic yard mixers working eight hours a day. Auxiliary placing plant consisted of a daily average of 1.32 locomotive cranes and derricks.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the six dredges, which were in operation during the month, and of the amount of material excavated hydraulically:

Dredge.	Type.	Work. Earth.	Work. Rock.	Plant. Earth.	Plant. Rock.	Total.	Remarks.
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 51,245 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, and oil pipe lines were maintained and extended, as required, to facilitate construction work.

The work on the Panama municipal improvements was completed.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours)	8 & 12.00
Average number of hours per day (actual working time)	9.43
Average number of cubic yards crushed per hour per working day	248.53
Average number of cubic yards crushed per working hour	350.98
Total output for the month	87,770.00

Relocation of Panama Railroad.

During the month, 7,532 cubic yards of material were excavated, increasing the total excavation at the close of the month to 10,168,759 cubic yards, and 41,156 cubic yards of material were placed in embankment, increasing the total for this purpose to 16,425,292 cubic yards.

No temporary trestle was driven during the month. At the end of the month, there were 64,512 linear feet of 70-pound and 163,908 linear feet of 90-pound, track. The force averaged 595 men.

Quartermaster's Department.

LABOR.

There was practically no change in the labor situation during the month.

MATERIAL AND SUPPLIES.

The value of material received from the United States during the month was $993,652.06. Supplies were delivered by 41 steamers, the total weight of cargo aggregating 47,117 tons, exclusive of lumber, piling, and ties.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens, and the line hotels, showed a net profit of $2,320.15. The operation of the Hotel Tivoli showed a net profit of $6,111, and there was a net profit on restaurants, penitentiaries, tugs, and dredges of $174.58. The net profit on subsistence operations was $8,605.73.

Department of Civil Administration.

COURTS.

During the month, two civil cases and one criminal case were disposed of in the Supreme Court. One hundred and fifteen civil and 58 criminal cases were disposed of in the Circuit Courts and 155 civil and 662 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for April amounted to $363,626.30, and the fees to $1,739.57. Receipts from stamp and card sales and newspaper postage aggregated $6,942.38. The total collection of revenues made by the division was $20,283.99, and the collection on account of court fines, costs, and fees, $3,671.48.

Twenty-six vessels entered at, and the same number cleared from, the port of Ancon; and 35 vessels entered at, and 34 cleared from, the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 641, of whom 589 were men and 52 women. Twenty-five nations, or forty-nine separate states and dependencies, were represented. The total number of arrests for the month was an increase of two, as compared with the month of March. Ten convicts were committed to the penitentiary and 12 were discharged, leaving 143 convicts in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,911.83, and the value of their work on Canal Zone roads was $2,491.20.

DIVISION OF FIRE PROTECTION.

Forty-five fires were reported in the Canal Zone during the month, as compared with 65 in March. The damage to Commission property was $2,290, and to private property, $28.50.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,361,355 gallons, and in Colon, 1,297,578 gallons.

The usual inspection and maintenance work of this division was performed during the month.

DIVISION OF SCHOOLS.

The net enrollment in the white schools during the month was 1,230, and the average daily attendance, 962,3, or 94.3 per cent of the enrollment; and in the colored schools the net enrollment was 1,474, and the average daily attendance 728.9, or 81.1 per cent of the enrollment. Forty-six white and 28 colored teachers were employed in the division on April 30.

Department of Sanitation.

The total number of deaths from all causes among employes was 48. These were divided, as follows: From disease, 37, and from violence, 11, giving the annual average per thousand of 8.77 and 2.61, respectively, on the basis of the number of employes estimated by the Department of Sanitation. The annual average death rate per thousand among employes for the month of April, 1911, was 9.38.

The annual average death rate per thousand in the cities of Panama, Colon, and in the Canal Zone, including both employes and nonemployes, based upon the population as estimated by the Department of Sanitation, was 17.21.

The average annual death rate per thousand for the month of April, 1911, among the same classes of population, was 17.74.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 3.74, blacks, 10.48, giving a general average for disease of 8.77. For the same month during 1910, the annual average death rate per thousand from disease was: Whites, 4.48, blacks, 9.97, giving a general average of 8.62; and for the same month during 1911: Whites, 2.85, blacks, 7.67, giving a general average of 6.42.

Among employes during the month, deaths from the principal diseases were, as follows: Chronic nephritis, 2; dysentery, clinical, 1; haemoglobinuric fever, 1; malarial fever, E. A., 1; organic disease of heart, 4; pneumonia, 4; tuberculosis, 9; typhoid fever, 1, leaving a balance of 14 deaths from all other diseases, and 11 deaths from external violence.

No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus.

Respectfully,
GEO. W. GOETHALS, *Chairman.*

Memorial Day Services.

In accordance with a program drawn up by the 1912 Memorial Day committee, and approved by Colonel Goethals, Memorial Day will be observed at Ancon, Thursday, May 30. There will be a special train for the members of military and fraternal organizations who desire to take part in the exercises. Train will leave Colon at 7 a. m., and stop at all stations ten minutes after train No. 21. Returning, the train will leave Panama at 4.15 p. m.

Immediately upon arrival at Panama, a parade will be formed to march to Ancon cemetery, where appropriate services will be held. The U. S. M. C., Tenth Infantry, and I. C. C. bands will furnish music, Justice H. A. Gudger will deliver the address, and the boy scouts and schoolgirls will decorate the graves.

All members of military and fraternal organizations are invited to cooperate in making this a memorable day on the Isthmus. A special invitation is extended to the Blue and the Gray, the veterans of the Civil War.

On Sunday, May 26, Memorial services will be held at Mount Hope. Transportation will be provided by special tickets on train No. 20, leaving Panama at 6.40 a. m. A special train will leave Colon at 8.30 a. m., to meet train No. 20 at Mount Hope. The joint committee in charge of the exercises consists of Messrs. E. M. Bucklin, John Feckstein, W. D. Rodgers, John Abramson, L. E. DuBois, and W. H. Kromer, the latter being the secretary.

American Veterans of Foreign Service.

The regular monthly meeting of the American Veterans of Foreign Service will be held in the courtroom, Cristobal, C. Z., Saturday evening, May 25. All comrades are invited to attend, as important business in connection with the Memorial Day exercises will be disposed of.

Improved Order of Red Men.

All members of the order are requested to attend Memorial Day services to be held at Mount Hope, Sunday, May 26. Transportation will be furnished by special tickets on train leaving Panama at 6.40 a. m. These tickets will be good on any train leaving Colon on that day.

United Spanish War Veterans.

The next regular meeting of Chagres Camp, No. 2, U. S. W. V., will be held at the Empire lodge hall on Sunday, May 26, at 3 p. m. Final arrangements for the observance of Memorial Day will be made.

Suicide.

The body of Charles R. Gould, first-class policeman at Gatun, was found floating in Gatun Lake on the afternoon of May 13, and the verdict of the coroner's jury was that he died from a self-inflicted bullet wound in the head, fired while he was standing in such a position that he fell into the lake after being struck. Mr. Gould was born in October, 1880, was single, and had been on the Isthmus seven months, coming here from Narragansett Pier, R. I.

OFFICIAL CIRCULARS.

May 30, a Holiday.

CULEBRA, C. Z., May 20, 1912.

CIRCULAR No. 443:

Decoration Day, Thursday, May 30, 1912, will be observed as a holiday in the Canal Zone, and, as far as practicable, all public business will be suspended on that day.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Pay for Transfer Time of Gold Hourly Employes.

CULEBRA, C. Z., May 18, 1912.

CIRCULAR No. 357-D:

Effective this date, gold hourly employes transferred from one station to another within the Canal Zone limits, with the exception of Toro Point and Naos Island, will be allowed four hours' pay when such transfer necessitates the transfer of quarters, this allowance to cover all time required for the checking out of tools, transit time, transportation and arrangement for baggage.

For the transfer of men to Porto Bello, Toro Point and Naos Island, a minimum of four hours' time will be allowed, and, in addition, any time in excess of four hours which is absolutely necessary for them to reach their destination.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Packing of Gauges, Clocks, Etc., for Shipment to Gorgona Shops.

CULEBRA, C. Z., May 18, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Attention is invited to the fact that proper care is not being exercised in the packing of gauges, clocks, etc., shipped to Gorgona shops for repairs. Watchman's clocks have been received in gunny sacks, and gauges loosely packed in boxes, so that they can slide past each other when the boxes are turned over, etc., which has resulted in the smashing of all crystals, pulling off hands, and other unnecessary damage. Greater care in the packing of such equipment for shipment is enjoined on the part of all departments and divisions.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Examiner of Accounts.

CULEBRA, C. Z., May 14, 1912.

CIRCULAR No. 442:

Effective May 14, 1912, Mr. T. L. Clear will act as Examiner of Accounts during the absence of Mr. H. A. A. Smith.

GEO. W. GOETHALS, *Chairman.*

Acting Receiving and Forwarding Agent, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., May 15, 1912.

CIRCULAR No. 91:

Heads of Departments: During the absence of Mr. R. W. Bergin, receiving and forwarding agent, Colon, on leave, effective May 16, 1912, Mr. J. C. Angel is appointed acting receiving and forwarding agent.

J. A. SMITH, *General Superintendent.*

Electrical Superintendent, Mechanical Division.

GORGONA, C. Z., May 15, 1912.

TO ALL CONCERNED:

Effective this date and to continue during the absence of Electrical Superintendent Rowe on leave, Mr. W. L. Fey will act as electrical superintendent of this division.

A. L. ROBINSON,
Superintendent, Mechanical Division.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, May 18, 1912. All heights are in feet above mean sealevel.

DAY AND DATE.	STATION.				
	Vigia	Alhajuela	Gamboa	Bohio	Gatun Lake

The following ships arrived at or departed from the port of Balboa during the week ending May 18:

Arrivals—May 12, *San Juan*, from San Francisco; May 13, *Mexico*, from Valparaiso; May 13, *Monari*, from Buenaventura; May 13, *Ecuador*, from Guayaquil; May 16, *Peru* (P. S. N.), from Guayaquil.

Departures—May 13, *Chile*, to Guayaquil; May 14, *Mantaro*, to Callao; May 15, *Huasco*, to Valparaiso; May 16, *F. H. Leggett*, to San Francisco; May 16, *Meteor*, to Portland; May 17, *Leelanow*, to San Francisco.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week, May 27 to June 1 is, as follows: Monday, Culebra; Tuesday, Gorgona; Wednesday, Corozal; Thursday, Gatun; Friday, Empire; Saturday, Cristobal.

Miss Gay Zenola MacLaren's dates at the various clubhouses are, as follows: Empire, Thursday, May 30; Gorgona, Friday, May 31; Culebra, Saturday, June 1; Gatun, Monday, June 3; and Friday, June 14; Cristobal, Tuesday, June 4; Corozal, Friday, June 7, and Tuesday, June 18.

COROZAL.

The new bowling alleys will be opend for use on Memorial Day. An orchestra has been engaged to furnish music for an "Open house" on that night. Games are being arranged between local teams for the opening day.

CULEBRA.

A concert will be held by the glee club on Tuesday evening, June 4.

Volleyball will be played every Tuesday from 5 to 6 p. m. Eight men turned out on Tuesday evening of last week.

Culebra took three straight games from Camp Elliott on Saturday evening. Scores:

Culebra.				Camp Elliott.			
Crain	90	113	81	Kribel	85	85	88
Sterns	91	78	102	Allen	80	101	76
Palmer	101	115	92	McAbee	92	83	93
Mengel	98	92	93	Bees	92	100	92
Case	100	87	94	Weigelt	86	92	88
Total	480	485	462		435	461	437

Empire will bowl at Culebra on Saturday evening. May 25.

EMPIRE.

The duckpin bowling league games played May 18, between Gorgona and Empire, resulted in Empire winning two out of three. Scores:

Empire	433	438	451	Gorgona	416	439	429

The billiard games played between Culebra and Empire on Saturday, May 18, resulted in each side winning and losing a game.

On Tuesday evening, May 28, the members of the Empire clubhouse will celebrate the fifth anniversary of the opening of the building. Invitations have been issued to all its members and their families. A special program has been prepared, after which there will be a reception, followed by refreshments.

GORGONA.

The following games of duckpins were rolled Saturday night, May 18, in the interassociation tournament between Empire and Gorgona:

Empire.				Gorgona.			
King	90	88	83	Seebt	84	79	103
Nelson	93	92	88	Denst	85	90	77
Danielson	97	98	98	Moyer	89	81	88
Giavelli	97	87	85	Dunlop	101	81	96
Gustavson	81	82	90	Haggerty	87	100	82
Total	458	447	444		446	422	446

In the billiard game between Gorgona and Cristobal, Saturday night, May 18, Pack of Cristobal defeated Wolcutt of Gorgona, score 100 to 83.

The "smoker" to be given in honor of the Gorgona indoor baseball team, will be held on Tuesday, May 28, at 7.45 p. m. A program, consisting of musical numbers and vaudeville sketches, is being arranged. A picture of the team will be taken May 19, at 9 a. m.

F. L. Bernsee, the Isthmian checker champion, appeared at the clubhouse, Saturday, May 18. Out of the sixty games played simultaneously with twenty different men, Messrs. Miller and Payton won one each, and Messrs. Lynn, Payton, Taylor, Hosden, and Hill had a draw game each, while Mr. Dunn of Culebra had two games, both draws.

GATUN.

The results of the Gatun-Corozal pool and billiard match on Saturday evening, May 18 were, as follows:

Pool.

Gatun.		Corozal.	
DePoorter	100	Roberts	70
Hughes	100	Baker	73
Cheeks	100	McKee	94
Galloway	92	Roberts	100

Billiards.

Wurster	100	Thompson	84
Townsley	73	Triholet	100

The above pool games are the last which Gatun plays in the Isthmian tournament, and although other teams still have games to play, Gatun has already won enough to insure its winning the pennant. The Gatun team consists of Louis DePoorter, Geo. L. Hughes, D. C. Galloway, W. H. Cheeks, and W. L. Dalton. Each will receive a gold medal as a prize, and the Gatun clubhouse will receive a silver cup.

Cristobal took two out of three games of duckpins at Gatun on Saturday, May 18.

Eight sets of duckpins and ten new duckpin balls have been added to the equipment of the clubhouse.

On Saturday, May 25, Camp Elliott bowls at Gatun, and Culebra plays billiards at Gatun.

A German orchestra will give a concert at Gatun on Monday, May 27.

Physicial Director Dwelle is reorganizing the local branch of the Health League. Any member may join.

The checker club, F. D. Gartrell, president, is open for challenges from any other club on the Isthmus.

The Gatun executive council will meet on Friday, May 24.

A one-man duckpin tournament started on Wednesday, May 22.

A pair of bowling shoes will be given as a prize to the member bowling the three highest games of duckpins for the period May 15 to May 30.

CRISTOBAL.

On Saturday night, May 18, the local bowlers took three games from Gatun on the Cristobal alleys. Scores:

Gatun.				Cristobal.			
Denniss	75	89	89	Louch	94	78	88
Hodges	92	88	75	Whittles	80	77	89

Total	442	447	423		480	449	436

On Thursday evening, May 16, Mr. F. L. Bernsee, the Isthmian checker champion, met 21 players in simultaneous checkers before a good-sized audience. A total of 63 games was played, Mr. Bernsee losing two, with 57 games won, and four draws. The winner of the two games was Dr. Dunn of Culebra. The draws were credited to Messrs. Dunn, Herrington, Burrows, and Putnam. During the games, punch was served.

The next session of the debating club will be held on Wednesday evening, May 29. The announcement of the subject will be made by bulletin. All men are invited to attend and participate in the open discussion.

On Saturday evening, May 25, the Gorgona duckpin bowling team will play Cristobal team on the local alleys. A team of the Cristobal association will also play at Gorgona.

Band Concert.

A band concert will be given by the Isthmian Commission Band at Empire C. Z., Sunday, May 26, 1912, at 6 p. m. The program follows:

1. March—*Col. Estey*....................Bagley
2. Selection—*Paradise of Mahomet*..Planquette & Ganne
3. Waltz—*Golden Sunset*....................Hall
4. Overture—*William Tell*...............Rossini
5. (a) March—*Take a Tip From Father*............ Berlin & Snyder
   (b) Two Step—*Everybody's Doing It Now*........ Berlin
6. Idyl—*Softly, Unawares*..................Lincke
7. —*Gems of Stephen Foster*................Tobani
8. Medley Selection—*Popular Hits*........Schultz
9. March—*Joe Weber*....................Appelles

CHARLES E. JENNINGS, *Musical Director.*

The next concert will be given at Gorgona, June 2, at 6 p. m.

Rainfall from May 1 to 18, 1912, Inclusive.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, MAY 29, 1912. No. 40.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Excavation Work in Connection with Balboa Terminals.

In connection with the work on the new Balboa terminals, the division engineer of the Pacific Division has been requested to prepare and submit an estimate of the cost of the excavation required along the northwest side of Sosa Hill, in order that the Balboa road and the two Panama railroad tracks may be thrown over to their new location. As the zone of the excavation operations includes very nearly all of the quarters comprised in the American settlement of old Balboa, upward of 40, actual work cannot be started until the buildings have been removed, which will be done by the Quartermaster's Department. The plans for the new terminal docks, which are to be constructed in this vicinity, are being prepared in the office of the division engineer of the Pacific Division, and will be completed shortly.

Lighters Withdrawn from Sale.

The six steel lighters, formerly used in hauling cement from Cristobal to Gatun, advertised for sale in Circular No. 709 from the Washington office of the Isthmian Canal Commission, note of which was made in THE CANAL RECORD of April 24, 1912, have been withdrawn from sale. They are to be used as coal lighters and will continue in use as such after the Canal is completed.

Upper Guard Gates at Gatun Locks.

Work is being pushed on the three uncompleted leaves of the upper guard gates at Gatun Locks. Since the intakes for the culverts were closed with steel bulkheads, the lowest points at which the water of Gatun Lake would flow into the lock chambers are over the sills of the upper guard gates, which are at elevation 37 feet four inches above sealevel. At the present rate of rising, the surface of the lake would be at this height in approximately three weeks. The superintendent of erection of the gates anticipates that they will be made watertight by that time. A seal, consisting of a rubber flap, has been devised to prevent the seeping of water between the gates and the sills. This device is now being fitted to the upper guard gates, and will, it is believed, reduce the leakage to the minimum.

The erection of gates at Gatun Locks, except at the bridge in the upper level, has been at a standstill for the past six weeks, owing to lack of material. The steamships *Belosco* and *Nordpol* recently brought a considerable quantity of material, and the work of erection at Gatun will proceed more rapidly.

Extension of Control Over Lake Area.

In a decree issued by the President of the Republic of Panama, under date of March 29, 1912, described as resolution No. 22, public proclamation was made that the Republic of Panama no longer exercises any authority in the area to be covered by Gatun Lake, which extends beyond the lines of the 10-mile strip, the same having passed into American control in accordance with the Canal treaty.

The area of the territory affected by the decree is along streams contributing to Gatun Lake, notably the Trinidad, Gatun, and Chagres Rivers, and comprises a total of about 70 square miles. Like the rest of the lake area, it is to be depopulated. Following the posting of placards, warning the public against trespassing, the Canal Zone police will patrol the territory and assist the inhabitants to move beyond the 87-foot contour line. Five first-class and three second-class policemen are engaged in the work. About 300 native houses have been destroyed by the police to date in all of the lake area.

New Folding Machine at Mount Hope Printing Plant.

A new folding machine, manufactured by the Dexter Folding Company of New York, has been installed at the Mount Hope printing plant. The machine will fold sheets 10 by 15 inches in three-fold work, or 12 by 16 inches in four-fold work, to as large as 25 by 38 inches. It can be fed by hand at the rate of about 40 sheets per minute, or 2,400 per hour, and is equipped with a moving side guide for registering the sheet by the edge after it enters the machine. THE CANAL RECORD will hereafter be made ready for distribution on this folder, which, it is expected, will expedite the delivery by about one-half day.

Hotel Tivoli Improvements.

A second story is being added to the three houses in the rear of the Hotel Tivoli, at one time used as servants' quarters, but during the past dry season used as an annex to accommodate the overflow of guests at the hotel. When the improvements are completed, each building will contain 16 rooms, eight on each floor. There will be also two bathrooms on each floor, and a lavatory in each room. These buildings, together with another two-story building nearby, which is already utilized as an annex, will provide a total of 64 additional rooms outside of the hotel proper.

It is probable that before the advent of the next dry season, the front porch of the lower floor of the hotel may be widened, in order that the part on which the dining room opens may be used as a dining room annex. The present porch was so used during the past dry season, and the plan was greatly appreciated by the guests. In order to make the porch uniform for its entire length in front of the hotel, that part along the west wing may also be widened.

East Dam of Gatun Locks.

The construction of the east dam at Gatun, between the Locks and the hill, crowned by the division office building, has been delayed by the steamshovel excavation in the anchorage basin, since railway tracks crossing the site of the dam could not be removed until the shovel was brought out. These tracks have been taken up and the 4-foot concrete core wall extending from the side wall of the Locks to the hill, is being brought to its final elevation of 88 feet above sealevel. Clay is being dumped on the lake side of this wall, and a borrow pit, in which one steamshovel will be used, has been started on a rock bluff alongside the relocated line of the Panama railroad, three-fourths of a mile east of Gatun station, to furnish rock for filling on the lower side of the wall.

Change in Train Schedules.

A new passenger train schedule will go into effect on the Panama railroad early next month. It provides for the reinstatement of train No. 6, formerly leaving Panama at 1.30 p. m., which was abolished on February 15. This train, while it carries only a limited number of passengers, is of considerable convenience to Canal employes, and others, whose duties take them from one point to another on the railroad. Train No. 4, which now leaves Panama at 10.55 a. m., will be set back, leaving at about 10.20. The shuttle train, operating between Colon and Gatun, will be discontinued on the same date, and the traffic will be handled thereafter by the regular trains.

In view of the fact that the tourist season is practically over, and that, in consequence, there are fewer people to take advantage of the running of the sight-seeing train, the schedule will be shortened, and the train will be run three days each week only, effective June 1, 1912, instead of six days, as at present. The new schedule will be substantially, as follows:

Monday, trip through Culebra Cut and Pacific Division—Train leaves Panama railroad station at 7 a. m., goes through Culebra Cut, then to Culebra, where opportunity will be

NOTES OF PROGRESS.

(*Continued.*)

given to see the work from the observation platform, and to view the lock models in the Administration building. Lunch will be served to tourists at 12.45 o'clock at the Commission hotel. Persons wishing to go to Colon may take the train that arrives at Culebra at 11 a. m., or at about 2.05 p. m., and to Panama, that which arrives at 12.19 p. m. The train will leave Culebra station at about 1.30 p. m., for the trip to Pedro Miguel Lock, Miraflores Locks and dam, and the Pacific entrance, returning to Panama in time to allow passengers to take the 5.25 p. m. train for Colon. Persons wishing to make the trip over the Pacific Division only should take the regular passenger train from Panama at about 10.20 a. m., getting off at Pedro Miguel, where they can obtain lunch at the Commission hotel. The sight-seeing train leaves the station there at about 2 p. m.

Thursday, trip to Gatun Locks and Dam, and over Atlantic Division—The train will leave Colon at 8 a. m., and 1.30 p. m., making two trips, the departure from Gatun station for the tour over the Locks and Dam being made at 8.30 a. m., and at about 2 p. m. After the completion of the afternoon trip, the train will go direct to Panama. Persons wishing to take the Atlantic Division trip from Panama must go to Gatun by one of the morning trains, leaving Panama at 6.35 and at about 10.20 o'clock, respectively. These trains arrive at Gatun at about 8.41 a. m., and 12.30 p. m., respectively.

Saturday, trip through Pacific Division and Culebra Cut—Train will leave Panama about 7.45 a. m. and will be operated over the Pacific Division, afterward returning to Panama for lunch. In the afternoon, the train will leave Panama at about 2 p. m., for Culebra and the Central Division, returning to Panama in time for passengers to take the 5.25 p. m. train for Colon.

Regular fare will be charged between Panama and Pedro Miguel; Colon and Gatun, and Gatun and Panama; and one dollar extra will be charged for the trip over each division.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 88 per cent completed, 198,559 cubic yards, out of a total of 225,000, having been placed at the close of work on May 25. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
May 20	96	5.00	2
May 21	104	6.00	1
May 22	86	3.30	1
May 23	80	3.45	1
May 24	80	5.00	1
May 25	24	2.30	1
Total	470	25.45	1.17
Previously reported	198,089		
Grand total	198,559		

Drilling and Blasting in Culebra Cut.

Owing to some inaccuracies in the article under the above caption, which appeared in The Canal Record of May 15, it is reprinted in corrected form herewith:

The 202 tripod drills, at work in varying material in Culebra Cut, made a total penetration of 213,874 linear feet during the month of March, an average of 41.6 feet per drill each day. The number of drill days was 5,142. The 173 well drills in 3,716 drill days penetrated 192,604 linear feet, a rate of 51.8 feet per drill per day. The average of both kinds of drills was 45.9 linear feet per drill per day. The working day is nine hours. These penetrations are regarded as an index of the normal drilling operations in the Cut.

In blasting, 20,133 holes were exploded in all sorts of material. The aggregate depth of the holes was 345,223 linear feet; the average depth was 17.3 feet. In all, 415,709 pounds of dynamite were exploded, an average of 20.7 pounds per hole. The average efficiency of the blasting during the month, in all kinds of materials, was 2.14 cubic yards per pound of explosive.

CONCRETE WORK IN THE LOCKS.

Over 85 per cent of the concrete for the locks is in place, the amount at the close of work on May 25 being 3,688,009½ cubic yards, out of a total of approximately 4,303,486. A total of 25,673½ cubic yards of concrete was laid in the locks during the week ending May 25.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 25 being 1,873,036½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending May 25, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
	Cu. Yds.			*Cu. Yds.*			*Cu. Yds.*	*Cu. Yds.*
May 20	184	2.58	2					237½
May 21	76	1.35	1					89½

May 25	232	3.52	2					255
*Portable mixers				200½				
Total	1,016	17.23	1.83	200½				1,216½
Previously reported								1,871,820
Grand total								1,873,036½

The 200½ yards shown for the portable mixer were placed on the following days: May 20th, 53½; May 21st, 13½; May 22nd, 64; May 23rd, 46½; May 25th, 23. Eighty-seven yards of this amount consisted of reinforced concrete.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 95 per cent completed, 846,365 cubic yards, out of a total of 890,750, bucket measurement, having been placed at the close of work on May 25. The record for each of the working days of last week, follows:

Date.	Auxiliary Plant.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

RECIPROCAL LICENSE.

Amendment of the Ordinance Providing for the Licensing and Regulation of Motor Vehicles in the Canal Zone.

Be it enacted by the Isthmian Canal Commission, as follows:

That the ordinance providing for the licensing and regulation of motor vehicles in the Canal Zone, enacted by the Isthmian Canal Commission at its 158th meeting on August 25, 1910, and approved by the Acting Secretary of War, October 31, 1910, be, and the same is hereby amended, as follows:

Section 1 is amended so that the same shall now read, as follows:

Section 1. That, hereafter, there shall be collected and accounted for as other similar taxes, the following license taxes from the owners or operators of motor vehicles used or employed on the streets or roads of the Canal Zone, viz.: (1) Excepting motor cycles, (*a*) for each motor vehicle operated for the transportation of freight for hire, or for the transportation of merchandise or freight by any merchant or dealer, Ninety Dollars ($90) per annum; (*b*) for each motor vehicle operated for the transportation of passengers for hire, Fifty Dollars ($50) per annum; (*c*) for each motor vehicle operated for pleasure, Twenty-five Dollars ($25) per annum; and (II) for each motor cycle, Ten Dollars ($10) per annum. *Provided, however*, that for motor vehicles operated over the streets and roads of the Canal Zone, which have already been duly licensed and authorized to operate over the streets and roads of the Republic of Panama, and where the licensees are residents of the Republic of Panama, there may be collected, with the approval of the Head of the Department of Civil Administration, in lieu of the license taxes above enumerated, license taxes, as follows: (I) Excepting motor cycles, (*a*) for each motor vehicle operated for the transportation of freight for hire, or for the transportation of merchandise or freight by any merchant or dealer, Ninety Dollars ($90) per annum; (*b*) for each motor vehicle operated for the transportation of passengers for hire, Thirty Dollars ($30) per annum; (*c*) for each motor vehicle operated for pleasure, Five Dollars ($5) per annum; and (II) for each motor cycle, Two Dollars ($2) per annum; if, reciprocally on the various kinds of motor vehicles in this proviso enumerated, which have already been duly licensed for operation over the streets and roads of the Canal Zone, and where the licensees are residents of the Canal Zone, there are exacted and collected in the Republic of Panama total license taxes or charges, per annum, not exceeding the respective license taxes, in this proviso enumerated; and, in the event that the reciprocal motor vehicle license taxes of the classes herein enumerated are increased in the Republic of Panama over those herein named, there shall be collected in the Canal Zone, with the approval of the head of the Department of Civil Administration, 'reciprocal motor vehicle license taxes equal to the total thus reciprocally charged in the Republic of Panama; and, *Provided further*, that where any motor vehicle licensed in the Canal Zone shall, before the period for which the license is taken expires, be sold or transferred by the licensee to some other person who may desire to continue to use and operate such vehicle over the streets and roads of the Canal Zone, such transferee, by application to the Collector of Revenues, and upon submission of satisfactory evidence of such purchase or transfer, may have the license transferred to him by endorsement made thereon by the Collector of Revenues, authorizing such transferee to operate such motor vehicle under such license, without the payment of any additional license charge or fee.

Approved: May 1, 1912.

H. L. STIMSON, *Secretary of War.*

Notice to Mariners.

Recent survey has developed the existence of a rock shoal, nearly on the center line of the Canal, center of the shoal being opposite a point about 400 feet seaward of angle of the Panama railroad wharf. There is a depth of 28 feet of water on shoal at mean tide, which only gives 18 feet at low water springs. The shoal is about 75 feet wide by 150 feet long, with 42 to 45 feet depths surrounding it at mean tide.

Ships coming to Balboa wharf should avoid sailing near this shoal.

J. ST. C. HUNT, *Port Captain.*

Balboa, C. Z., May 22, 1912.

Drowning.

John D. Kemp, a first-class policeman stationed at Balboa, was drowned near Restingue, one of the settlements on Taboga Island, at about 9 a. m., Wednesday, May 22. He had been sent to the sanitarium only the day before. He was born at Mountain View, Ark., where his father, F. W. Kemp now resides, 26 years ago, was single, and had been on the Isthmus since October 12, 1911.

Missing Men.

Any one having information regarding the whereabouts of Mr. Roy Proctor, who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Gorgona, C. Z., Sunday, June 2, 1912, at 6 p. m.

The next concert will be given at the Hotel Tivoli, Ancon, June 9, at 8 p. m.

CANAL MEDAL AND SERVICE BAR LIST.

Below are published the names of American employes of the Panama Railroad Company, who completed two years of continuous service on the Isthmus during the period ending December 31, 1911, and are, in consequence, entitled to receive the Canal medal; also, a list of American employes of the Panama Railroad Company, who completed their fourth year of service, and are entitled to receive their first service bar, and those who have completed six years of continuous service, and are entitled to receive their second service bar.

The list is now published, in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which the service is reckoned, should be promptly reported to the Office of the Chairman, at Culebra, for correction. The heads of divisions are requested to check carefully their lists of American employes on the silver roll, and to report any omissions on the medal and bar lists to the above office.

The list given below completes the publication of all American employes of the Isthmian Canal Commission and the Panama Railroad Company entitled to receive medals and service bars. The list of corrections will be published at an early date.

EXECUTIVE ORDER.

Petitions of Civil Service Employes to Congress.

It is hereby ordered that petitions or other communications regarding public business, addressed to the Congress, or either House, or any Committee or Member thereof by officers or employes in the civil service of the United States, shall be transmitted through the heads of their respective departments or offices, who shall forward them without delay with such comment as they may deem requisite in the public interest. Officers and employes are strictly prohibited either directly or indirectly from attempting to secure legislation or to influence pending legislation, except in the manner above prescribed.

This Order supersedes the Executive Orders of January 31, 1902, January 25, 1906, and November 26, 1909, regarding the same general matter. WM. H. TAFT.

THE WHITE HOUSE,
April 8, 1912.

Memorial Day Observance.

The order of parade in the exercises to be held at Ancon on Thursday, May 30, in commemoration of Memorial Day, will be, as follows: Escort of mounted Panamanian police; Capt. Peter Johnson and mounted police; grand marshal, Capt. R. E. Wood, U. S. Army; aids, Lieutenant Fleming, U. S. Engineers, Joseph Lawrence, Third U. S. Calvary, Lieutenant Hohl, Tenth U. S. Infantry, E. W. Bucklin, U. S. Rough Riders; band of the Tenth U. S. Infantry; battalion Tenth U. S. Infantry, Capt. F. S. Cocheu, commanding; Col. H. A. Greene, U. S. Army; Chief Justice, H. A. Gudger; Captain Ingram, U. S. Army; Captain Breckenridge, U. S. Army; Sr. Don Gil Sanchez; Sr. Don Julio Quijano; Rev. C. O. Purdy; Rev. Father Collins; band of the U. S. Marine Corps; buglers; firing squad; sailors from the U. S. S. S. *Prairie*; veterans of the Blue and the Gray; Garrison No. 106, Army and Navy Union, O. R. Lampson, commanding; Garrison No. 118, Army and Navy Union, A. B. Kratz, commanding; Chagres Camp, U. S. W. V., John Abramson, commanding; Sibert Camp, U. S. W. V., W. D. Rogers, commanding; Canal Zone Post No. 40, A. V. F. S., H. B. Furlong, commanding; schoolgirls, escorted by boy scouts; Red Cross ambulance, I. C. C. band; Uniform Rank, K. of P., C. R. Chisholm, commanding; Knights of Pythias; Red Men; Odd Fellows; Kangaroos; the Moose.

The parade will be formed immediately after the arrival of the special train from Colon, and will march to Ancon Cemetery, where the following exercises will take place: Invocation, Rev. C. O. Purdy; selection, "Reverie—In silent thought," by the I. C. C. band; reading, President Lincoln's Gettysburg address; selection, "Nearer My God To Thee," by all of the bands, in memory of the musicians of the *Titanic* who played "Bethany," as they went to their watery graves; address, Justice H. A. Gudger; singing of "Onward christian soldiers," by the assemblage, the bands leading; decoration of the graves of the American dead by the schoolgirls and boy scouts; singing of "America;" firing squad; taps; benediction, Rev. Father Collins.

United Fruit Company's Service to England.

The United Fruit Company announces that a service from Colon to Liverpool, England, by way of Kingston, Jamaica, will be placed in effect, beginning with the sailing of the *Heredia* on June 27. This vessel will be followed by the *Sixaola*, sailing from Colon on July 12, and the *Carrillo*, on July 29.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending May 25:

DATE.	Hours worked.	Cubic Yards.
May 13	7.05	3,058
May 14	9.45	2,568
May 15	12.10	3,311
May 16	11.35	4,068
May 17	10.50	4,201
May 18	6.20	2,217
Total	57.45	19,423
May 20	11.40	4,024
May 21	10.15	4,032
May 22	14.30	4,513
May 23	12.05	4,850
May 24	11.50	4,866
May 25	12.50	4,508
Total	73.10	26,793

PERSONAL.

Col. Geo. W. Goethals sailed for New York on Tuesday, May 28, on the United Fruit Company's steamer *Carrillo*. He will be absent from the Isthmus about one month.

Lieut-Col. Wm. L. Sibert sails for the United States, on the *Ancon*, on Saturday, June 1, to attend the graduation of his son at West Point.

Mr. Joseph Bucklin Bishop, accompanied by his wife and son, will sail for New York, on the *Ancon*, on Saturday, June 1, on his annual leave of absence. Miss Bishop will sail for San Francisco on the *City of Para*, on May 30.

Col. C. A. Devol, who went to Washington as representative of the Canal Zone Red Cross at the ninth International Red Cross Conference held there on May 7-17, returned to the Isthmus on the steamship *Allianca*, on May 27.

Among others who will sail for the United States on the *Ancon*, leaving Saturday, June 1, are Maj. J. P. Jervey and family of Gatun, and Lieut. Frederick Mears and family of Colon.

Capt. Courtland Nixon, accompanied by Mrs. Nixon, returned on Thursday, May 23, from a week's leave of absence, spent in Costa Rica.

On account of the steps on west side of Culebra Cut, about 300 feet north of the suspension bridge at Empire, being destroyed by a slide, new steps have been erected just north of the east end of the bridge. The sides of the channel are practically vertical at this point, and the new stairs are in three flights, with a total of 144 eight-inch steps.

LABOR FORCE AND QUARTERS IN APRIL.

On April 24 there were 36,136 employes actually at work on the Canal and Panama railroad, and of that number 29,354 were Canal employes. The gold force on the Canal work, composed almost entirely of white Americans, was 4,276. The total force on April 26, 1911, was 35,259, and the Canal force, 28,132. The force report for April 24, 1912, follows:

DEPARTMENT.	SILVER EMPLOYES.*													Total Silver.	Total Gold.	Grand Total.

QUARTERS.

On May 1, there were 24,831 occupants of Commission quarters. Of these 9,393 were white Americans ,of whom 5,347 were men, 2,041 were women, and 1,915 were children. There were 6,088 Europeans of the laborer class, of whom 5,433 were men, 1,042 women, and 391 children. There were 9,440 West Indian negroes, of whom 7,035 were men, 1,042 women, and 1,363 children.

APPROACH TO GATUN LOCKS.

Walls Specially Designed to Minimize Action of Waves from Gatun Lake.

The general designs for the three sets of locks for the Canal are the same, but variations occur in the construction of the wing and approach walls in adaptation to local geographical conditions. The upper wing walls and the intakes for the culverts in the side walls at Gatun Locks were designed to minimize the effect of wave action in the approach chambers.

The Locks are at the lower end of Gatun Lake, where waves, sweeping over an unobstructed distance of about five miles, would be liable to funnel in the narrowing approach and interfere with the operation of the miter gates. To dissipate the waves, the approach was widened by the construction of offset walls, on each side of the approach, forming large recesses between the wing walls and the backfill. The wing walls, instead of being continuous monoliths, as proposed for Pedro Miguel and Miraflores Locks, where the backfill is to lie against them, are, at Gatun, a series of piers and arches to support the tracks for towing locomotives. The under surfaces of the arches being higher than the proposed surface of the lake, the stretch from the center wall to the retaining wall on either side is a continuous chamber, and such obstruction as the piers cause is but a further means of reducing the waves.

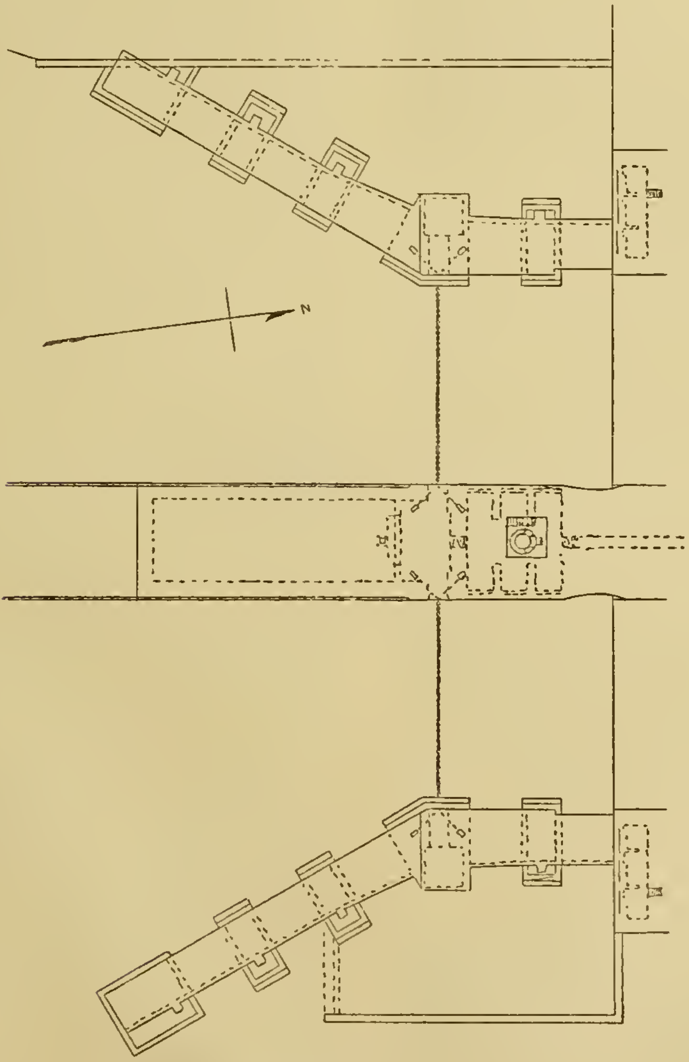

FIG. 1—PLAN OF THE UPPER APPROACH AT GATUN LOCKS.

The plan of center approach, wing and retaining walls is shown in Figure 1, accompanying this article, and the elevation of a wing wall is shown in Figure 2. The offset wall, which is perpendicular to the axis of the Locks, is carried out 50 feet from the side wall, on a line with the sill for the floating caisson dam. Its top is level with the top of the side wall at that point. From the outer end, the portion parallel to the channel dips at an angle of 30 degrees with the horizontal, and slopes to the ground. The backfill is graded even with it. These retaining walls are concrete, gravity section type, four feet wide at the top, and increasing in thickness toward the bottom. The thickness at base varies according to the elevation of the rock on which the walls are founded.

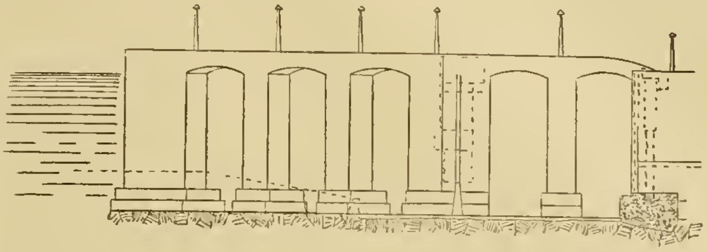

FIG. 2—ELEVATION OF WING WALL AT UPPER, OR SOUTH END, GATUN LOCKS.

The locations of the intakes for the culverts are indicated in Figure 1. Each intake, is divided at the entrance into three passages, eight feet wide by 18 feet high, by concrete partition walls. Intakes for center wall culverts are identical for all locks. For the side wall culverts they are similarly located with reference to the culverts proper, but at Pedro Miguel and Miraflores the water is to flow in through vaulted recesses in the side walls, opening toward the approach chamber.

That portion of an upper wing wall at Gatun which is parallel to the axis of the Locks contains two arches, each 30 feet long, supported on piers, the foundations for which rest on rock at 13 feet above sealevel. The piers are of solid concrete. That nearest the intake to the side wall culvert is 21 feet long by 46 feet wide in base section. The second, at which the flare of the wing wall begins, is an irregular pentagon in plan section, with its greatest dimensions approximately 25 by 48 feet. The flaring portion of the wall extends 195 feet, in three arches on piers 35 feet apart. Two of these piers are 21 feet long by 45 feet wide at foundation, vertical on the face toward the channel, and stepped-in at the rear, by six 18-inch steps at intervals of six feet, to a width of 21 feet three inches at the top. The pier at the outer end of the flare wall is larger than its intermediate supports, being 33 by 37 feet in foundation section, but similar in other features of construction. At the top of each pier, on the rear side, is a concrete buttress to support a lamp post.

The piers proper rest on concrete bases at elevation 35 feet above sealevel, and the springing line of the arches is 52 feet above, or at 87 feet, the proposed highest level of the surface of Gatun Lake. The arches are built on a curvature of 30.125 feet radius. The thickness from top to soffit line is 12 feet at the springing line and eight feet at the crown, and the width is 21 feet three inches. The wall will support a rack, and a return track for towing locomotives, of 5-foot gage. A description of the arches for connecting the lock walls with the guide and flare walls at the lower end of the Locks was published in THE CANAL RECORD of November 29, 1911.

Sailing of the Ancon.

The sailing date for the steamship *Ancon* has been set for June 1, at 3 p. m., from pier No. 11, Cristobal, C. Z.

LOST—D. A. R. official recognition pin, national number, 86,949, engraved on back. Please return to Edgar Clarke Soule, Empire, C. Z.

SOCIAL LIFE OF THE ZONE.

Women's Clubs Raise Fund for Education of Blind Boy—Other Club Notes.

At a meeting of the executive board of the Canal Zone Federation of Women's Clubs held at Cristobal on May 18, it was reported that the fund pledged by the Federation in January for the education of a native blind boy had reached the sum of $382.45. Three hundred dollars of this money will pay for one year's schooling at the Perkins Institute for the Blind in Boston, Mass., and the surplus will be used for the purchase of the school outfit and other incidental expenses. The money has been raised by the federated clubs, assisted by 24 outside organizations, including church guilds, societies and auxiliaries, Sunday schools, fraternal societies, one club of little girls, and individual subscriptions. The largest subscription was given by the Cristobal Woman's Club, and the next largest by the Gatun Woman's Club. The Federation treasurer reported that a new supply of Federation pins had been received. These pins may be secured by application to Mrs. J. H. Westberg, Empire. The librarian and custodian reported that the federation pictures are now on exhibit at the Empire school. The exhibit is being used daily in the class work.

Unless called for a special conference, there will be no meeting of the executive board until October. Matters of business relating to the federation may be referred to a committee composed of the president, the recording secretary and the treasurer.

The first meeting of the new executive board of the Cristobal Woman's Club was held at the clubhouse on May 15. It is the purpose of the new administration to continue the policy of the club on the same lines that have been followed hitherto so successfully in the organization. The free health lecture courses will be continued as a prominent feature of the work. The program committee expects to have the year book in the hands of the printer by July 1. An especially interesting program is being drawn up by the chairman of the art and literature department.

The Ancon Study Club has completed its second study course, the subject of which was Greek and Roman life, and the history of the Greek and Italian Renaissance, with the national development of the fine arts under its influence. The work was concluded by a review of seventeenth, eighteenth, and nineteenth century painting and sculpture in France, England, and Germany, and the development of a national art in America. The next course will be the operas currently presented in musical centers, including French, German, and Italian compositions. The first study in this series will be at the meeting on May 31, at the home of Mrs. Mark White.

Social Activities at Las Cascadas.

The social activities in the village of Las Caseadas center mainly around the fraternal societies, the dancing, card, and social clubs having recently disbanded. The orders and societies holding regular meetings in the lodge hall are the Masonic club, with its different degrees of orders, which meets every Saturday evening, the Knights of Pythias, the Uniformed Rank of the Knights of Pythias, which occupies the hall every Monday evening, and the Independent Order of Red Men. The Brotherhood of Locomotive Engineers meets on the second Sunday in each month, and the woman's auxiliary to the order, holds semimonthly meetings on the second and fourth Friday afternoons. The order of the Pythian Sisters meets on the second and fourth Wednesday evenings in each month. This order held a card party in April and is arranging to hold a similar entertainment in May. The regimental band plays in the band stand on Mondays, Wednesdays, and Fridays at 7.30 p. m.

Church Notes.

Beginning with the meeting on June 6, the Woman's Foreign Missionary Society of the Methodist Episcopal Church, Panama, will take up a course of study on South America. The subject will be divided under different heads, and the history, government, industries, people, customs, and religions will be discussed at each meeting. Mrs. Harry Compton, president of the society, will be leader.

The class meetings of the Fidelity chapter of the Empire Union Sunday school are held on the second and fourth Tuesdays in each month. Since the removal from Empire of Mrs. Stephen Witt, the class leader is Mrs. Van Hardeveldt.

On Sunday, May 19, the newly erected church building for the Baptist congregation in New Gatun was dedicated. There were three services: At 10 a. m., when the Rev. Mr. Wise, superintendent of the work of the Southern Baptist Convention, preached; at 3 p. m., with an address by the Rev. A. A. Nellis, Commission chaplain at Empire and Culebra, and at 7.30, when the Rev. Stephen Witt, pastor of the mission, preached.

The Foreign Missionary Society of the Methodist Episcopal Church, with headquarters in Panama, has taken out a 15-year lease with the Panama Railroad Company for a lot in the Guachapali district, Panama, for the purpose of erecting thereon a church building. The lot is located south of Caledonia bridge, in Block 5, facing 12th of October street, and measures 35 by 100 feet. It is understood that a frame structure will be erected by the society and that provision will be made in it for a meeting house, or mission house, and a school.

The Woman's Altar Guild of St. Luke's Hospital Chapel, Ancon, will hold its next meeting at the Hotel Tivoli on Tuesday, June 4, at 9.30 a. m.

The Rev. Father Dyer has completed his missions at Christ Church, Colon, at St. Paul's Church, Panama, and at St. Mark's Church, Culebra. He will be at St. Andrew's Church, Empire, for the week ending June 1, and will sail for New Orleans on June 6.

At the recent entertainment given at the nurses' home at Colon Hospital by the Woman's Altar Guild of Christ Church, the receipts were $150. The money will be used for the guild expenses and for the work of the church.

Sale at Public Auction.

Office of Chief Quartermaster,
Culebra, C. Z., May 24, 1912.

There will be sold at public auction, by the district quartermaster at Gatun, Canal Zone, at the Y. M. C. A. clubhouse, at 2 p. m., Saturday, June 8, 1912, to the highest bidder for cash the following Isthmian Canal Commission property:

Two (2) billiard tables.

The Government reserves the right to accept or reject any or all bids.

For further information apply to the District Quartermaster, Gatun, Canal Zone.

R. E. Wood, *Acting Chief Quartermaster.*

Found—A leather satchel, at Ancon Hospital admitting office. Inquire there.

OFFICIAL CIRCULARS.

Acting Chairman and Chief Engineer.

Culebra, C. Z., May 27, 1912.

Circular No. 445:

During my absence from the Isthmus, Col. H. F. Hodges will be in charge of the work as Acting Chairman and Chief Engineer, effective May 28, 1912.

Geo. W. Goethals,
Chairman and Chief Engineer.

Acting Head of Department of Civil Administration.

Culebra, C. Z., May 27, 1912.

Circular No. 446:

Mr. H. H. Rousseau will have charge of the Department of Civil Administration during my absence from the Isthmus and until the return from leave of Mr. M. H. Thatcher, effective May 28, 1912.

Geo. W. Goethals,
Chairman and Chief Engineer.

Purchase of Commissary Coupon Books for Cash.

Culebra, C. Z., May 27, 1912.

Circular No. 256-e:

Effective June 1, 1912, gold employes of the Commission and Panama Railroad Company will, in addition to securing such books by the "deduction method," as heretofore, be permitted to purchase commissary coupon books for cash at the following points and at the times stated:

Colon—During regular office hours on any day from the cashier of the Panama Railroad Company.

Cristobal—During regular office hours on any day from the commissary cashier in building No. 2.

Empire—On Mondays, Wednesdays and Fridays during the hours in which the commissary is open for business.

Culebra—On Tuesdays, Thursdays, and Saturdays during the hours in which the commissary is open for business.

Until further notice, presentation of employe's check, either by himself, or by some member of his family, will be the only identification required.

This new system of enabling employes to secure commissary coupon books for cash is being instituted at the points named for trial, upon the termination of which, if it appears warranted, the system will be extended to other points on the Isthmus.

Geo. W. Goethals,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Concessions to the Fourth of July Celebration.

Culebra, C. Z., May 22, 1912.

Heads of Departments and Divisions:

I beg to advise that I have approved the following in connection with the 1912 Fourth of July celebration for which arrangements are now under way:

1. Authority has been granted to use "penalty" envelopes in connection with official business of the celebration.

2. Work performed by any department or division of the Commission or Panama Railroad Company upon request of the committee in charge of the celebration will carry the same surcharge as work done by one department or division for another.

3. Floating equipment of the Commission and Panama Railroad Company may be used in connection with any program outlined for the celebration, with the understanding that such use will be in accordance with rules and regulations prescribed by the Board of Local Inspectors of the Canal Zone.

4. Subscriptions for the celebration may be made by employes by the "Deduction method," *i. e.*, in a manner similar to that in which hotel and commissary coupon books are secured, any arrangements necessary to give this effect to be approved by the Examiner of Accounts, and deduction of subscriptions from pay due to be made only upon written request of the employe subscribing. Subscriptions will, of course, also be made by cash payment, as preferred by employes.

Geo. W. Goethals,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Surplus Equipment.

Culebra, C. Z., May 27, 1912.

Circular No. 323-c:

When equipment becomes surplus and it is desired to dispose of the same, Form C. E. 187-2 should be submitted giving full description of equipment, in order that same may be readily identified. No disposition will be made of such equipment until approved Form C. E. 187-2 has been returned to accountable official.

Geo. W. Goethals,
Chairman and Chief Engineer.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments, week of June 3 to 8 is, as follows: Monday, Empire; Tuesday, Corozal; Wednesday, Culebra; Thursday, Gatun; Friday, Cristobal; Saturday, Gatun.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Assembling Gates for Gatun Spillway.

Material for the Stoney gates and caissons for the Spillway of Gatun Dam is being assembled in the abandoned borrow pit, north of the division offices at Gatun, between the Panama railroad and the Locks. The material is being supplied from the mills of the McClintic-Marshall Construction Company, and a part of the firm's force at Gatun will soon be engaged in the work of assembling, riveting, caulking and testing the gates, which, when ready for installation, will be transferred by the forces of the Commission to the Dam site, and installed. Fourteen gates, weighing approximately 43 tons each, are to be used in the Spillway at Gatun, and eight gates will be used at Miraflores spillway. One caisson will be used at Gatun, and one at Miraflores. Thirty-five per cent of the material for Gatun has arrived on the Isthmus, while none of that for Miraflores is yet at hand. The installation of the gates at Gatun will begin about August 15, 1912, and should be completed December 31, 1912.

Fire and Boat Drills on Vessels in Port.

Test boat and fire drills are now conducted, under the supervision of the Board of Local Inspectors, on vessels that call at the port of Balboa. Since the employment of the regular inspector on January 1 of this year, he has been kept busy seeing that the commercial vessels that carry a Canal Zone certificate, comply with the rules and regulations of the Board concerning the condition of their boilers, and the state and extent of their life-saving appliances. These conditions, having in the main been met, the inspector has been directed to turn his attention to the matter of the proficiency of the crews of visiting vessels in fire and boat drills. In carrying on these drills, it has developed that very few of the crews can handle the apparatus within the time limit set, which, in the case of the fire drill allows one minute as the time to elapse before the water is on, and in case of the boat drill, two minutes as the time to elapse before the boat is in the water. As showing how deficient some of the crews are in this practice, it may be cited that one day recently at a fire drill, it took a crew 22 minutes to get water on. In this instance, there were some mechanical difficulties to be overcome which prevented quick action, but these difficulties might have arisen in the case of an actual fire, hence the value of the tests.

Immigration at Ports of Colon and Cristobal.

The number of persons who landed at Colon and Cristobal from foreign ports during the month of May was 2,603, consisting of 1,209 cabin, and 1,394 steerage passengers. The number of persons who embarked for foreign ports during the same period was 4,278, consisting of 1,949 cabin, and 2,329 steerage passengers. The number of persons who embarked during the month, over those who landed, was 1,675. The persons who arrived "in transit" in May numbered 1,396.

Proposed Change in High School Organization.

To minimize the amount of railroad travel for high school pupils, a change in the organization of the high school has been proposed by the superintendent of schools.

The table below, based on the present attendance in the eighth grade and high school, indicates the possible number of high school pupils of the Canal Zone next year from the various points:

TOWN.	Ninth Grade.	Tenth Grade.	Elev'th Grade.	Twelfth Grade.	Total.
Ancon	10	11	5	......	26
Pedro Miguel Paraiso	4	.....	......	......	4
Culebra	3	2	......	3	8
Empire	14	7	4	......	25
Las Cascadas	......	3	2	1	6
Gorgona	8	4	......	......	12
Gatun	4	2	1	1	8
Cristobal	12	3	2	2	19
Total	55	32	14	7	108

Of these, Ancon, Gorgona, and intermediate points furnish 39 ninth-year, 27 tenth-year, 11 eleventh-year, and four twelfth-year pupils, a total of 81; Gatun and Cristobal, 16 ninth-year, five tenth-year, three eleventh-year, and three twelfth-year pupils, a total of 27.

The plan is to provide two years' work at Gatun, where the first and second-year pupils from Cristobal and Gatun will attend; two years' work at Empire, where the first and second-year pupils from Gorgona, Culebra, and intermediate points will be provided for; and four years' work at Ancon, where all first and second-year pupils, south of Culebra, and all third and fourth-year pupils of the Zone shall be provided for. Two teachers will have charge of the work at Gatun, while the teachers of the consolidated school at Ancon—where an afternoon session is to be had—will have charge of the pupils at Empire in a morning session.

Such an arrangement makes possible the continuance of departmental teaching, which the Division of Schools established in November, 1909, and at the same time reduces the amount of railroad travel by about two-thirds.

It is desired that parents of all children of the present eighth grade, and of the high school, write to the superintendent of schools on or before June 15, expressing their views on the foregoing proposed change.

Tug "Reliance" on Its Way Up the Pacific Coast.

The tug *Reliance*, and its tow of three barges, was at Taltal, Chile, on Sunday, June 2, according to a cablegram received from there on that date. This place is over 500 miles north of Valparaiso. On Sunday, May 26, the tug put in at Coronel, Chile, a port about 268 miles south of Valparaiso, so that in about 7 days' time it covered a distance of about 800 miles. The tug left Colon on February 11, and at the present rate of progress, is due to arrive at Balboa the latter part of this month. Its voyage thus far has been uneventful, and the roughest part of the trip appears to have been in sailing from Colon to Trinidad. The tug's departure was timed so that it would arrive at the Strait of Magellan before the winter in that latitude set in, and, while off the Chilean coast bad weather is often times experienced, it is believed that there is less danger at this season than any other time during the year.

The fact that a great deal more sand is needed from the deposits at Punta Chame than first estimated, because of additional work, is primarily responsible for the trip of the tug around South America. In view of the cessation of operations in the sand pits at Nombre de Dios, a number of barges on the Atlantic side were retired from active service, and became available for use elsewhere. It is believed to be cheaper to bring the barges to Balboa by water, a distance of approximately 10,500 miles, than to take them apart, and ship them by rail across the Isthmus, a distance of 47 miles, and, providing no mishap occurs on the trip, this undoubtedly will be the case. It is proposed to place only two of the barges in the sand service; the third one will be used in connection with the fortification work at the Pacific entrance.

When the sand beds at Punta Chame were first opened, it was estimated that it would be necessary to excavate upward of 1,000,000 cubic yards, practically all of this amount to be used in the construction of the locks at Pedro Miguel and Miraflores. Shortly afterward came the demand upon them from the Atlantic Division, and about 300,000 cubic yards of sand will have been supplied Gatun Locks by the time the work there is finished. In addition, sand has been furnished, when practicable, to various other projects in connection with the Canal work, so that at the present time, the original estimate has been increased about 850,000 cubic yards. Other

NOTES OF PROGRESS.

(Continued.)

projects under consideration will require an additional amount, so that before the demand ceases probably over 2,000,000 cubic yards of sand will have been excavated. The approximate amount of sand delivered from the sand beds at Punta Chame up to and including May 31, 1912, is 1,240,000 cubic yards.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is about 89 per cent completed, 199,101 cubic yards, out of a total of 225,000, having been placed at the close of work on June 1, A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
May 27	120	7.30	1
May 28	70	4.30	2
May 29	104	6.30	1

Total	45.00	16,042

Central Division Unloaders for May.

The following statement shows the number of trains and lidgerwood cars unloaded by the Central Division during the month of May:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	4	1,213	24,260
Miraflores	*3	641	12,820
Gamboa	4	1,014	21,294
Total	*11	2,868	58,374

*One unloader worked from 1st to 17th inclusive, only.

Pacific Division Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of May follows:

DESTINATION.	Number Cars.	Cubic Yards.
Pacific Division	3,827	63,581
Atlantic Division	8	188
Central Division	27	405
Fortifications	52	1,196
Quartermaster's Department	5	125
Panama railroad	2	50
Lighthouse	2	46
Panamanian Government	2	50
Total	3,925	65,641

Civil Service Examinations.

Examinations will be held at Culebra, Canal Zone, probably on the last Sunday in July, for the position of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service. Persons interested should request a copy of Form 1424, which contains information in regard to the abovenamed examinations.

Applications will not be received after July 2; this date may be changed if necessary.

Competitors in the abovenamed examinations must bring their own typewriting machines to the examination room; typewriting tables will be furnished.

It is to be noted that in answer to questions as to residence, applicants must show such residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.
Culebra, C. Z., June 1, 1912.

CONCRETE WORK IN THE LOCKS.

Over 85 per cent of the concrete for the locks is in place, the amount at the close of work on June 1 being 3,708,712½ cubic yards, out of a total of approximately 4,303,486. A total of 20,703 cubic yards of concrete was laid in the locks during the week ending June 1.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 1 being 1,874,469½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending June 1, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

CLUBHOUSES CELEBRATE.

Fifth Anniversary of Their Opening Observed at Empire.

The Empire clubhouse was chosen for the scene of the celebration of the fifth anniversary of the opening of the Commission clubhouses for Canal employes, which was held on Tuesday evening, May 28. The building was decorated throughout with palms, flags and Japanese lanterns. The program, held in the entertainment hall, was, as follows:

Overture, Tenth Infantry Band; Invocation, Chaplain A. A. Nellis; quartet, *The Sea Hath Its Pearls*, by Pinsuti, Mrs. A. P. Boyd, Mrs. L. L. Faure, Mr. W. G. Ross, and Mr. E. P. Case; address, Young Men's Christian Association, Mr. Alfred B. Dickson; solo, *Aria from Cavalleria Rusticana*, Mr. W. G. Ross; address, Lieut-Col. Wm. L. Sibert; *Ave Maria*, by Gounod, Mrs. L. L. Faure; Miss Gay Zenola MacLaren; retrospect, Empire clubhouse, Mr. Walter H. Warr; solo, Mrs. A. P. Boyd; address, Mr. J. A. Smith; quartet, *On a Bank—Two Roses*, Mr. A. B. Dickson, Mr. W. G. Ross, Mr. E. P. Case, Mr. Harry Kersey.

The Isthmian Canal Commission authorized the construction of clubhouses for the use of Canal employes at its one hundred and first meeting held in Washington on November 9, 1905. It was reported at that time that a room had been assigned to a club in Cristobal, known as the Cristobal Club, for social and recreative purposes, and following this report, the Commission adopted a resolution to furnish houses to be used for club purposes "provided such clubs shall be open to all *bona fide* gold employes who comply with reasonable regulations." During the year 1907, clubhouses were constructed at Cristobal, Gorgona, Empire, and Culebra, these being the largest villages in the Canal Zone at that time. In 1909, buildings were constructed at Gatun and Corozal, and in the following year, a small clubhouse was opened at Porto Bello. The original request of the Cristobal club for a two-story building, with verandas 10 feet wide on both floors, giving space for billiard rooms, bowling alleys, card, reading, and smoking rooms, with the necessary toilets and showers, and a sleeping room for a steward, was taken as a standard upon which the clubhouses were constructed; other features subsequently added by the Commission being a gymnasium and entertainment hall, barber shop, and refreshment parlors.

The operation of these social centers is in the hands of a superintendent selected from the forces of the Young Men's Christian Association in the United States, and a staff of secretaries and physical directors from the same association for the local work. This staff acts under the direction of an advisory board composed of Canal officials.

The clubhouses are operated at an annual expense of $150,000, two-thirds of which sum is paid by its various activities, and the remainder by the Isthmian Canal Commission. The total membership at the end of April this year was 2,091, or 52 per cent of the gold employes that were in the clubhouse villages on that date.

In 1910, it became the practice to hold moving picture shows weekly. The films of these shows are sent from the United States in lots of eighteen, ten of the best of which are selected for the entertainments. The films are passed on by a board of censors in the United States before they are shipped, and again by a committee of the clubhouse secretaries before they are exhibited.

A popular feature is the library. At the opening of the work the Canal Commission furnished each clubhouse with a library of 600 volumes. The standard reference books, works on history, travel, science, philosophy, and religion were in the same library, but the fiction libraries were different, it being the purpose to change from time to time from one clubhouse to another thus forming a traveling fiction library for the entire Zone. There is now a total of 4,718 books in the libraries, and new fiction is constantly added to the shelves. More than 100 newspapers and periodicals are provided for the reading tables. There is an enrollment of 112 in the study classes; these are engaged principally in the study of Spanish. Sixty-seven are enrolled in the Bible clubs, and there is an average of 52 at the religious meetings.

There is an active spirit in the interclubhouse tournaments held from time to time, billiard and bowling games being the most popular. Indoor baseball is played during the summer months, and the basketball season opens in September, and continues for about half of the year. About six lyceum entertainments are brought from the United States each year.

The junior department has an enrollment of 119; the average attendance in all the clubhouses is about 12. The total number of boys engaged in systematic gymnasium work is 737.

Women are admitted at all times to the lobby and refreshment parlors, and certain afternoons in each week are assigned to them for their club meetings.

Red Cross Finances.

The financial statement of the Canal Zone Chapter of the Red Cross for the month of April, 1912, follows:

RECEIPTS.		
April 1, On hand	$2,973.73	
April 3, Interest credited at bank for February and March.	9.35	
April 9, Dues	1.00	
Total receipts		$2,984.08
DISBURSEMENTS.		
April 3, Remitted to Treasurer, American Red Cross, Washington, one-half of membership dues received during past year	$ 452.00	
April 24, Relief of destitute Americans at Cristobal, four cases	55.00	
Total disbursements		$ 507.00
April 30, Balance on hand		$ 2,477.08

John L. Phillips, *Treasurer.*

Approved:
Wm. L. Sibert, *Acting Chairman.*

Missing Men.

Any one having information regarding the whereabouts of Philip E. O'Brien, formerly of Company E, Sixth Artillery, who is supposed to have come to the Isthmus in search of work in December last, is requested to communicate with The Canal Record, Ancon.

Any one having information regarding the whereabouts of S. Bengston, formerly in charge of seamen on board the dredge *Corozal*, is requested to communicate with the British Vice Consul, Panama.

EXECUTIVE ORDER.

Collection of Distillation Tax.

By virtue of the authority vested in me, the Executive Order of May 13, 1911, providing for the collection of a distillation tax in the Canal Zone, is amended, as follows:

1. The output of each still may be measured by any method approved by the Chairman of the Isthmian Canal Commission, if, in his opinion, measurement by meter, as provided in Section 3 of said Executive Order, is not satisfactory.

2. On and after January 1, 1913, the right to operate any still within the Canal Zone shall cease and determine, and any person who shall, on or after that date, manufacture or distill any of the spirits or alcoholic liquors enumerated in the Executive Order of May 13, 1911, shall be guilty of a misdemeanor, and, upon conviction, shall be punished by a fine not exceeding One Thousand Dollars ($1,000,) or by imprisonment in the district jail for a term not exceeding twelve (12) months, or by both such fine and imprisonment, within the discretion of the court.

3. This Order shall take effect from and after this date.

Wm. H. Taft.

The White House,
May 21, 1912.

PERSONAL.

Justice Thomas E. Brown, Jr., accompanied by Mrs. Brown, returned on the *Colon*, on Sunday, June 2, from a leave of absence, which he spent in the United States.

Major Eugene T. Wilson sailed for New York on the United Fruit Company's steamer *Turrialba*, on Tuesday, June 4, on his annual leave of absence.

Panama Auxiliary, No. 1, U. S. W. V.

The next meeting of the Panama Auxiliary, No. 1, United Spanish War Veterans, will be held at the lodge hall in Empire on Sunday, June 9, at 1.30 p. m., when there will be a muster and installation of officers. It is requested that all the ladies whose signatures appear on the charter, and all those wishing to join the auxiliary as charter members, be present, as the charter will be closed at this meeting. Members of the U. S. W. V. are invited to attend. Anna Hoffman, *Chairman.*

Gatun, C. Z., June 1, 1912.

Parish Celebration at Empire.

The Roman Catholic parish of St. Ferdinand, at Empire, celebrated the feast day of its patron saint, St Ferdinand, on Thursday, May 30. On the eve of the feast, a concert was held in the parish house by the negro section of the congregation, the lower floor being cleared and arranged as an auditorium for the occasion. There were about 300 people present. On the following day, there was a solemn High Mass at 8 a. m., and following this, an all-day church fair was held in the parish house. The festival closed with solemn vespers at 7.30 p. m.

Notice to Owners of Launches on Gatun Lake.

For the convenience of owners of launches, privately owned on Gatun Lake, the Board of Local Inspectors will meet at the Gatun railroad station at 9 a. m., Sunday, June 16, for the purpose of inspecting any and all launches that require it. Owners will please have launches ready and be on the ground themselves at that time.

GOLD HILL LINE COMPLETED.

P. R. R. Relocation Organization to Be Abolished June 30.

The section of the Panama railroad relocation, known as the Gold Hill line, nine and three-eighths miles long, was formally turned over to the Panama Railroad Company at noon, Saturday, May 25, and the relocation organization, which has been conducted as an independent department, will cease to exist after June 30, the close of the present fiscal year. The large cuts and fills on the new line have been practically completed, and such riprapping of fills as will be necessary, as well as taking up construction tracks, and installing the bascule bridge over the Gatun River at Monte Lirio, will be done by the maintenance-of-way forces of the railroad and charged to the relocation account. While the Naos Island breakwater is under construction not more than two or three trainloads of rock a day can be supplied from Culebra Cut, so that the work of riprapping the fills will probably proceed slowly. The construction tracks in the Gatun valley district will be left where they are for the present, as it is not known what effect soaking with water during the rainy season may have on the heavy embankments, and some supplementary work in this connection may be required. There remains to be laid a permanent track through the dump district, north of Gamboa bridge, and this work will probably be postponed, in the interests of economy, until the Central Division has finished operations in that section. At the present time, the new line can be utilized for the running of trains for its entire length, but only freight trains will use the road around Gold Hill, the passenger trains continuing to cross to the other side of the Canal at Gamboa until such time as it is found necessary to take away the dike, by means of which the crossover is made.

The relocated line of the Panama railroad was made necessary by the plans of the Canal Commission for building an 85-foot level lock Canal. The old Panama railroad was used from Colon to Mindi, five miles, but from that point to Corozal, an entirely new line had to be constructed, for the most part through difficult territory. Surveys were made in 1906, but it was not until June, 1907, that actual construction work was begun. The first section built was from Mindi to Gatun, as the old line passed through the present site of the Locks, and it was necessary to remove it as soon as possible. A temporary line was then built from Gatun to Tiger Hill, connecting the high level line at Gatun, with the low grade of the old road at Tiger Hill.

The original plan was to have the relocated line cross the Gatun River valley, at Gatun, on an embankment 82 feet high and one and one-fourth miles long. Borings established the fact, however, that the foundation for this embankment would consist of a 20-foot stratum of clay overlying a bed of soft silt, and the idea was abandoned. The construction of a steel viaduct to cross this section was then considered, but on account of the excessive maintenance cost involved, this plan was also given up. In July, 1907, the plan of extending the road east along the north side of the Gatun River valley to a point about one mile from the Canal Zone boundary line, thence building it south across the valleys of the Quebrancha and Gatun rivers on fills having more stable foundations, was adopted. Work was begun on this section of the road, soon after the adoption of the report, by two steamshovels and a piledriver. About the same time tracks were laid from the old main line to points on the relocation opposite Pedro Miguel, Gatun, San Pablo, and Miraflores. In October, 1909, all but five and one-half miles of the line between Gatun and Gamboa had been completed. On March 28, 1910, the ends were joined near Monte Lirio, and on Sunday, May 1, 1910, the first passenger train passed over this part of the line.

It was originally proposed in building the line south of Gamboa to let it follow closely the east bank of the Canal, and to pass through the Culebra Cut on a berm. Owing to the slides that later developed in the east bank of the Canal, opposite Culebra, the plan had to be abandoned. In July, 1910, the committee appointed to consider a new route recommended that the line be constructed back of Gold Hill, which was approved. Construction work was begun shortly afterward, and this section, the last part of the relocated line to be completed, was practically finished last month. The line from Paraiso Junction to Corozal was formally turned over to the Panama Railroad Company on September 4, 1910, and it was placed in operation soon afterwards.

The old line formerly crossed the Chagres River at Barbacoas. It now crosses it at Gamboa, 10 miles further upstream. The Gamboa bridge is 1,320 feet long, and consists of fourteen 80-foot through girder spans, and one 200-foot through truss span. The only other bridge of size along the route will be that over the Gatun River, near Monte Lirio. It is of the bascule, or balanced lift, type, and will rest on piers designed to carry three plate girders, formerly used in the Barbacoas bridge. Pier No. 3 will be used as a trunnion pier, and one of the old plate girder spans will be converted into a lift span by the installation of a lifting mechanism. The piers are all in place, and one of the spans has been laid. While the work is in progress, trains are using a temporary trestle to cross the river bed. The purpose of the lift span is to permit vessels of size to pass through into the east arm of the lake. The other streams along the railroad are crossed in two or three instances by arch culverts; in the remainder, by ordinary culverts. The pavements of these culverts are invariably elevated above the former beds of the streams, in order to procure more stable foundations, and to prevent their being filled up with sedimentary deposits, which would occur at the lower elevations. The road passes through a tunnel at only one point—at Miraflores station. It is 736 feet long between portals, and is lined with reinforced concrete. Excavation was begun on July 1, 1907, and completed on July 9, 1908. The tunnel was entirely completed and ready for use on May 8, 1909.

In the construction of the road, three systems of labor were tried, one, consisting of carrying on the work by the company's forces; the second, by letting certain sections out to contractors at a fixed price per cubic yard, and the third, by the task method. By far the greater part of the excavation was accomplished by the company's own forces. On March 18, 1908, there were upward of 1,000 men employed on the relocation work, and the highest number at work at any one time was on November 29, 1911, when the force reached 2,514. On May 1, 1912, which practically marked the close of construction operations, there had been excavated a total of 10,168,759 cubic yards; 16,425,292 cubic yards had been placed in embankment fill; 163,908 linear feet of 90-pound, and 64,512 feet of 70-pound, track had been laid.

The best record for steamshovel excavation on the relocated line was made by Steamshovel 257, working in the Gatun section from September, 1910 to September, 1911. This record, contained in the following table, is believed to be the best record ever made on the Isthmus, or in the world:

MONTH	Output by cross-section.		
	Earth	Rock	Total
1910.	Cu. Yds.	Cu. Yds.	Cu. Yds.
September	2,725	37,030	39,755

August	76,030	80.3	27
September	15,200	76.9	5
Total	733,550	72.3	304

Note—Average per day, 2,351 cubic yards; output for September, 1911 (5 days) taken from car report. Working days are eight hours.

Some serious slides occurred on the relocated line during the process of construction. The plans for a lock level canal required that the new railroad be built two feet above the proposed lake level, which necessitated constructing a high level roadbed through a low level country. The greater part of the time and expense has been necessitated by the crossing of the Gatun valley. From the point where the road leaves the Gatun ridge, to the hills near Monte Lirio, a distance of three and a half miles, the line crosses the main valley of the Gatun River and its several tributaries. In this section there has been placed 5,500,000 cubic yards of embankment. The foundation for some of these embankments was very poor, which necessitated spreading the base of the embankment over a much wider section, in order to reduce the pressure per square foot on the natural ground, and prevent upheaval beyond the toes of the slope.

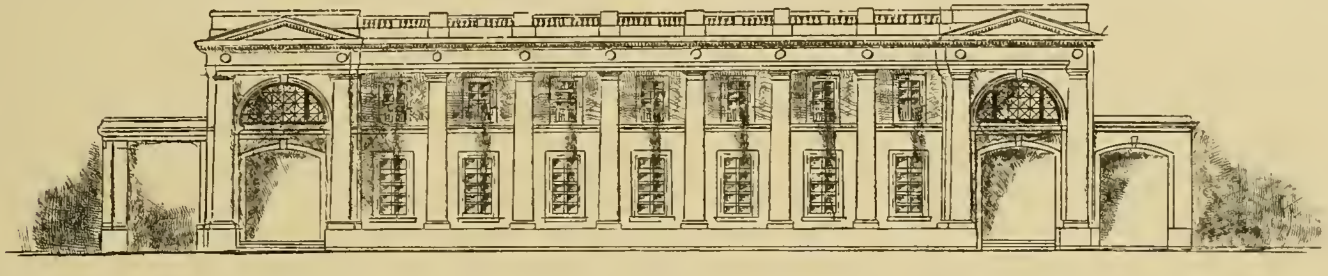
The total length of the new road from Colon station to Panama station is 47.11 miles. The total cost will be about $9,000,000.

A vote of thanks was passed at a meeting of the Memorial Day committee, held Sunday afternoon, June 2, to all those who took part in or contributed to the success of the Memorial Day observance.

NEW STATION AT PANAMA.

Plans for Improvement of Railroad Terminal have been Approved.

The plans for a modern passenger station, to be built by the Panama Railroad Company in connection with the proposed improvement of its Panama terminal, have been approved, and preliminary work on the site has been begun. The main part of the new building, a front view of which is published herewith, will be of the Italian Renaissance style of architecture, will have a frontage on Central avenue of 170 feet, and will extend back from it a distance of 55 feet. It will be situated just south of the present station, and almost in front of the triangular-shaped plot of of ground now fronting the passenger exits. In front of the building there will be a row of columns, six in number, made of concrete, each 27 feet high and three feet four inches in diameter. The walls will be built of terra cotta, similar to the material used in the erection of the new Hotel Washington at Colon. On each side of the station there will be a vestibule, 20 feet in width, reaching clear to the roof, with vaulted ceiling. Each vestibule opens on a waiting room, one for the first-class, and the other, for the second-class passengers. The first-class waiting room will be on the south side of the station, as at present. Each room will be 30 by 40 feet in size, separated by a closed partition, which will extend from the ticket office, situated on the track side of the station, to the news stand on the street side. On each side of the depot, adjoining the vestibules, will be a covered *porte-cochère* where coaches may come up and discharge passengers. The floors of the waiting rooms and vestibules will be of tile overlying concrete; the ceilings will probably be decorated with designs in stucco. In the rear of the ticket office will be toilets for the use of passengers. In getting to the trains, the passenger will pass through a gate to a ramp, or covered way, which will extend from the waiting rooms to the train shed. As there will be a difference in elevation between the two ends of about eight feet, the floor of the ramp will have about a six per cent grade.



FRONT VIEW OF PROPOSED NEW PANAMA RAILROAD STATION IN PANAMA.

The baggage room will extend at right angles from the main section, and, in its construction, the iron work in the present station will be utilized as far as possible. This will make a difference in the appearance of the roofs, that on the baggage department being hip-shaped, and on the main building more or less flat. The floor of the waiting room section will be on a level with the street, but the ground floor of the baggage room will be on a level with the tracks, a difference of about eight feet. The main section will have only two floors, while the baggage room will virtually have three, including a mezzanine. The lower floor of the baggage room will be used solely for the handling of baggage and express matter. Access to this room can be gained direct from the waiting rooms, and, from a platform especially built for the purpose at one end of the baggage room, passengers may stand and identify their property, or make their wants known. In case a personal search is necessary there are steps in reach, by which they can descend to the floor. The mezzanine floor will be fitted up for offices for the use of the company's cashier, and for the commissary purchasing agent in Panama. The upper floor, in this, as well as in the main part will be devoted to quarters for employes. In the second story of the baggage room there will be 14 double rooms, approximately 12 feet six inches by 25 feet in size, and two single rooms about 12 by 13 feet. Two hallways, one on each side, will extend the entire length of the baggage room section giving access to the rooms, and on the outside of the building, there will be a veranda. It is proposed to install a 1,000-gallon water tank in the attic for use in case of emergency. The second floor in the main section will be divided into eleven single rooms, about 12 by 13 feet in size, all opening on hallways. In this part also, there will be a toilet for all the second floors occupants. Access to the upper floors in both sections is gained by a stairway that ascends back of the waiting rooms.

GROUND PLAN OF PROPOSED NEW PANAMA STATION.

The new ground arrangement has been planned with the idea of making the passenger exits as accessible as possible. There will be a 20-foot sidewalk in front of the station, and at this point, Central avenue will be widened to 50 feet. This width will be continued the entire length of the station, but where the Tivoli road branches off, the thoroughfare will narrow down to about 30 feet. Twenty-third street, which now ends at Avenue B, will be extended on down through the present yard to the roadway that will be laid out parallel with the train shed. All roadways in the grounds will be of the uniform width of 16 feet, with an ingress and an egress on each side of the station for passenger vehicles. By this arrangement, coaches can enter by one road, pass down to the train shed, procure their load, and pass out in another direction, thereby avoiding confusion. Extending midway through the grounds will be a depressed roadway, so-called from the fact that it will be excavated to the level of the railroad tracks, and of the ground floor of the baggage room. This roadway will pass under the ramp, and the carriage ways,on each side of the station, and connect with the roadway alongside the baggage room. It will be for the use of carts, trucks, mail wagons, etc., and by this means, their drivers will be able to keep out of the way of other traffic. Special facilities for loading and unloading the mails directly at the train shed will be provided.

An iron fence will separate the grounds from the alighting platform, and in this fence there will be 10 gates, or passenger exits, five for the first-class, and an equal number for the second-class passengers. The alighting platform will be 30 feet wide and 800 feet long, and has been nearly completed. The train shed is of about the same length, and consists of a butterfly-shaped roof, similar to the one appertaining to the station at Colon, with the exception that the Panama structure is of double construction, whereas the one at Colon is of single construction. The roof, when completed, will project about 13 feet over the road. The courts, four in number, will be planted to grass, and later embellished with plants and flowers.

The constiuction of the main part of the new station, outside of the foundations, will probably be done by contract, and bids for this work will be asked for within a short time. The erection of the baggage section will probably be done by the company's own forces.

Fourth of July Arrangements.

A meeting of the executive committee of the Fourth of July celebration was held at Ancon on Sunday afternoon, June 1. Mr. E. J. Williams, chairman of the finance committee reported that the subscription lists had been printed, and that the deduction blanks and combination and transportation slips would be ready by June 3. Bonded timekeepers have been appointed members of the finance committee to assist in obtaining subscriptions.

Mr. J. A. Smith, chairman of the transportation committee reported that it was proposed to run one through train from Cristobal to Ancon for those traveling to Ancon to attend the celebration, and at least two trains from Gorgona, of which, one will be reserved for the marines and soldiers. In case aquatic sports are held at Balboa, a 30-minute train service could be arranged between the hours of 10.30 a. m., and 2 p. m., from Ancon to Balboa, using the Tivoli spur at Ancon. The last train from Panama will be run after the dance, the exact time to be announced later.

The following chairmen of subcommittees have been appointed by Capt. R. E. Wood, chairman of the entertainment and amusement committee: Athletics, W. H. Warr; water sports, W. W. Spaulding; Marines, Capt. F. Halford; Tenth Infantry, Lieut. L. H. Hohl, refreshments, D. W. MacCormack; printing, C. L. Parker; prizes, Alex. M. Fechtig; decorations, B. C. Poole; police department and stands, Capt. C. W. Barber; exercises, Frank A. Gause. The program has not yet been definitely arranged, as the matter of holding aquatic sports at Balboa is still in abeyance.

Capt. Whitlock of the fireworks committee, reported that fireworks had been ordered to the value of $1,425, and had been apportioned among the different localities, in amounts, as follows: Ancon, $775, Cristobal, $250; Gorgona, $150; Empire-Culebra, $150; Palo Seco, $50; Taboga sanitarium $50. Upon motion, it was decided to increase the Ancon allotment to $900.

Dr. Perry of the dance committee reported that the dance would be held in the ballroom at the Hotel Tivoli, and would start not later than 9 p. m. Suitable music and refreshments will be provided.

The chairman of the executive committee delegated Col. Cooke to act as chairman of the reception committee, he to select his committee members. It was the sense of the committee that invitations be extended to the President of the Republic of Panama, the members of his cabinet, and to the ministers accredited to the Republic, to attend the celebration.

The total allotments, as requested and approved, are, as follows: Entertainment and amusement, $3,200 to $3,500; transportation, $100; finance, $100; fireworks, $1,550; publicity, $50; total, $5,500 to $5,800.

The next meeting of the executive committee will be held at Ancon on Saturday afternoon, June 29.

Masonic Banquet.

On Saturday night, June 22, a St. John's Day banquet will be given at the International Hotel, Panama, under the auspices of the Ancon, Corozal, and Pedro Miguel Masonic clubs. Masons residing on the Isthmus, or visiting brothers, who desire to attend the banquet, may obtain tickets, at $3.50 each, from any member of the committee in charge of the arrangements, or the secretaries of the Pacific, Corozal, and Pedro Miguel Masonic clubs.

Sale of Public Buildings.

OFFICE OF CHIEF QUARTERMASTER,
CULEBRA, C. Z., May 31, 1912.

Sealed proposals will be received at this office until 3 p. m., Saturday, June 15, 1912, and then opened, for the purchase of any or all of eight buildings located at Bas Obispo and Gorgona. List of buildings and information will be furnished upon application to any of the district quartermasters, or at this office. Envelopes containing proposals should be endorsed "Proposals for purchase of buildings," and addressed to Col. C. A. Devol, Chief Quartermaster, Culebra, C. Z.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending June 12, 1912, (75 meridian time):

WEATHER CONDITIONS, CANAL ZONE, MAY, 1912.

May rainfall was below normal at all stations, except Ancon, Balboa, Alhajuela, El Vigia, and Porto Bello. In general the fall was above normal along the immediate Pacific coast and over the upper Chagres basin; slightly below normal along the Atlantic coast, and generally deficient elsewhere. Practically all of this deficiency occurred during the first week of the month.

An unusually heavy rain occurred along the Pacific coast on the 12th of the month. The fall at Ancon during 24 consecutive hours amounted to 7.23 inches, and establishes a new maximum record for this station.

Average temperatures were nearly two degrees above normal and the highest of record for the month of May. The air temperature has been above normal on the Isthmus every month during the present year.

The wind movement was also above normal, and the highest of record for the month.

There was a general deficiency in relative humidity, while the conditions of atmospheric pressure and cloudiness were not far from normal.

The following table summarizes the weather conditions for the month:

STATIONS.	Press're (reduc'd to mean of 24 hours.)	Temperature.					Mean relative humidity.	Precipitation.			Wind.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments for the week, June 10 to 15 is, as follows: Monday, Gorgona; Tuesday, Cristobal; Wednesday, Gatun; Thursday, Corozal; Friday, Culebra; Saturday, Empire.

Miss Gay Zenola MacLaren will hold entertainments at the local clubhouses on the following dates: Corozal, Friday, June 7; Gorgona, Tuesday, June 11, return engagement; Empire, Wednesday, June 12, return engagement; Gatun, Friday, June 14, return engagement.

COROZAL.

The new bowling alleys were opened for use for the first time on Decoration Day. In the evening the Tenth Infantry orchestra furnished music, while games were rolled by six different local teams. The high score of the evening—202—was rolled by Mr. H. O. Cole. The bowling alleys will be open for women Wednesday and Friday afternoons, and for boys on Tuesday and Thursday afternoons, and Saturday morning.

A Spanish class, with Mr. Curtis as instructor, will hold regular meetings at the clubhouse on Wednesday night of each week.

CULEBRA.

The volleyball teams play on Tuesday and Friday of each week, from 5.10 to 6 p. m. Every one is invited to take part. The two handball courts are ready, and those interested in the game are urged to join the club.

Following are the scores of the games played between Culebra and Gorgona, at Culebra, in the Isthmian duckpin tournament:

Culebra.				Gorgona.			
Lowande...	91	90	85	Davis......	75	75	83
Sterns......	93	83	83	Bornefeld...	92	96	73
Grier.......	80	85	80	Diehl......	92	93	80
Crane......	92	82	78	Anderson...	101	96	91
Silver......	100	80	89	Bishop.....			78
				Ruchte.....	80	75	
Total....	456	420	416		440	435	405

The Cristobal billiard team played Culebra at home with the following result:

Culebra.		Cristobal.	
Tragsdorf...........	100	Pack................	80
Conlan.............	97	Rice................	100

EMPIRE.

Empire took two out of three games from Gatun, Saturday, June 1. Scores:

Empire..... 465 408 433 Gatun...... 413 444 414

The gymnasium classes started Wednesday, June 5, and will be held regularly twice each week hereafter. A fencing class is being formed; all interested speak to Mr. Russell.

GORGONA.

The following games of duckpins were rolled on the Gorgona alleys Monday, May 27, between Gorgona and Camp Elliott:

Gorgona.				Camp Elliott.			
Seebt......	98	83	78	Egert......	90	84	107
Moyer.....	86	89	77	Kribel......	90	67	76
Denst......	75	80	93	Hicks......	95	70	92
Dunlop.....	82	94	89	McAbre....	88	101	83
Haggerty...	78	88	105	Teeters.....	84	83	89
Total....	419	434	442		447	405	447

Saturday night, June 1, the following games were rolled between Gorgona and Culebra:

Culebra.				Gorgona.			
Mengel.....	97	78	84	Seebt......	82	96	94
Judge......	93	95	83	Robertson..	85	83	78
Brown.....	89	91	90	Denst......	78	102	84
Hill........	81	96	86	Dunlop....	78	82	78
Case.......	90	94	85	Haggerty...	86	84	94
Total....	450	454	428		409	447	428

A "smoker" was held at the clubhouse on Tuesday night, May 28, in honor of the Gorgona indoor baseball team. Mr. C. Patterson introduced the players, and Manager Kuentz and Captain Ridge responded on behalf of the team. A flashlight picture was taken of the gathering, which will be on sale at the office.

The weekly sunset song service will be held at the clubhouse on Sunday, June 9, at 7 p. m. Admission free.

The current topics club has changed its time of meeting from Monday to Wednesday nights, at 7.45. All men are invited to attend.

GATUN.

Gatun and Gorgona broke even in the billiard match at Gatun on Saturday, June 1. The results were as follows:

Gatun		Gorgona	
Townsley	100	Walcott..........	94
Wurster..............	88	Walcott..........	190

Mr. George W. Huttelmaier won a pennant for having bowled the three highest games of duckpins for the month of May. Mr. J. Mohen received a pennant for having bowled the three highest games of tenpins.

Another order for new books was sent to the United States during the past week. The library now consists of about 1,100 volumes.

The Gatun dramatic club is holding rehearsals for the production of a comic opera entitled "Sinbad the Sailor," which will be given in about two weeks.

Gatun took one out of three games of duckpins in a match with Empire on Saturday, June 1.

The Gatun checker club is still awaiting replies to its challenge issued on May 18.

The pianola in the clubhouse has been thoroughly overhauled and repaired by an expert mechanic and is now in excellent condition.

Seventy-six pictures of the various groups, recently photographed at the clubhouse, have been sold.

CRISTOBAL.

On Thursday evening, June 6, the Tenth Infantry Band will give a concert in the auditorium, beginning at 8 p. m. Admission free.

The duckpin games scheduled between Camp Elliott and Cristobal for Saturday evening, June 1, were rolled on Thursday evening, May 29, the local team taking three straight games on the local alleys.

On Saturday evening, June 8, the Cristobal team will meet the Culebra team on the local alleys, and will also send a team to Culebra.

There will be a meeting of the local basketball enthusiasts in the game room Friday evening, June 7, for the purpose of organizing a local departmental tournament. Teams from the Mount Hope depot, commissary, Panama railroad, and the dry dock will enter for prizes to be determined later. All interested in basketball are invited to attend this meeting.

Band Concerts.

A band concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., Sunday, June 9, 1912, at 8 p. m. The program follows:

The next concert of the I. C. C. Band will be given at Culebra, June 16, at 4.30 p. m.

Change in Schedule of Sight-seeing Train.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT.
COLON, R. P., June 1, 1912.

Effective Monday, June 3, the Panama railroad sight-seeing train will be operated three days each week, only, on the following schedule:

Monday forenoon—Leave Panama passenger station 7.45 a. m., go through Culebra Cut, then proceed to Culebra to visit the models. Lunch will be served at the Culebra Commission dining room.

Monday afternoon—Leave Culebra for the Pacific Division at 1.30 p. m., and leave Pedro Miguel passenger station at 2 p. m., for the trip over the Pacific Division, after which the train will return to Panama.

Thursday forenoon and afternoon—Train will leave Colon passenger station at 8 a. m., and 1.30 p. m., for Gatun, after which trip will be made over the Atlantic Division, the train returning to Colon passenger station after each trip.

Saturday forenoon—Leave Panama passenger station for the Pacific Division 7 a. m. After the morning trip over this division the train will return to Panama.

Saturday afternoon—Leave Panama passenger station 1.45 p. m., go through Culebra Cut, then proceed to Culebra to visit the models, after which the train will return directly to Panama carrying passengers on regular transportation.

J. A. SMITH,
General Superintendent.

OFFICIAL CIRCULARS.

Transfer of Empire Shops to Mechanical Division.

CULEBRA, C. Z., May 27, 1912.

CIRCULAR No. 349-A:

1. Effective July 1, 1912, the Empire shops, including day and night steamshovel repair gangs, and the inspectors in the Culebra Cut, will be transferred from the Central Division to the Mechanical Division.

2. After July 1, 1912, the Mechanical Division will manufacture all spare parts for steamshovels, rock drills, and other mechanical apparatus heretofore made in the Empire shops, will inspect and repair all steamshovels, etc., and will perform all mechanical work, both day and night, that may be required by the division engineer, or the general inspector of the Central Division. The division engineer of the Central Division will inform the superintendent of the Mechanical Division of the manner in which the cost of repairs to the different classes of apparatus should be kept and reported to him.

3. All manufacturing work and heavy repairs heretofore performed in the Empire shops will be transferred as promptly as practicable after July 1, 1912, to the Gorgona shops. A sufficient force will be retained in the erecting and carpenter shops at Empire, under the superintendent of steamshovel repairs, for making light repairs to steamshovels, rock drills, track jacks and track drills, hand and push cars, and emergency repairs to sump pumps, that do not require machine work; carpenter work exclusive of manufactures; and day and night repairs to steamshovels and other mechanical equipment used by the Central Division.

4. All machines, tools, gauges, etc., in the Empire shops will be inventoried and transferred without charge to the Mechanical Division. Such gauges, tempets, jigs, dies, tools, machines, etc., required for the above classes of work will be transferred to the Gorgona shops in the prescribed manner; all other machines, tools, etc., not required by the day and night repair gangs will be cleaned and doped.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Acting Division Engineer, Atlantic Division.

CULEBRA, C. Z., May 31, 1912.

CIRCULAR No. 447:

During the absence of Lieut.-Col. Wm. L. Sibert on leave, Major Chester Harding will be in charge of the Atlantic Division as acting division engineer.

Effective June 1, 1912. H. F. HODGES,
Acting Chairman and Chief Engineer.

Acting Subsistence Officer.

CULEBRA, C. Z., June 3, 1912.

CIRCULAR No. 449:

During the absence from the Isthmus of Lieut.-Col. E. T. Wilson, subsistence officer, Isthmian Canal Commission, all his duties in connection with the Subsistence Department, Isthmian Canal Commission, and the Commissary Department, Panama Railroad Company, will be performed by Capt. F. O. Whitlock, assistant subsistence officer, Isthmian Canal Commission. Effective June 4, 1912.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Acting Charge of Panama Railroad Relocation.

CULEBRA, C. Z., June 1, 1912.

CIRCULAR No. 448:

Effective this date, Mr. E. Zook, engineer of maintenance, will be in charge of the relocation of the Panama railroad during the absence on leave of Lieut. Frederick Mears. H. F. HODGES,
Acting Chairman and Chief Engineer.

Meritorious Sick Leave and Disability Certificates.

CULEBRA, C. Z., May 31, 1912.

CIRCULAR No. 235-F:

In the future, all recommendations for meritorious sick leave, together with disability certificates, are to be forwarded in quadruplicate, on Form C. E. 206-3, direct to the Examiner of Accounts, who will check the same and transmit them to this office for approval. One copy, with disability certificate, will be returned by the Examiner of Accounts to the department making the recommendation.

Requisition should be made at once for a supply of Form C. E. 206-3, upon receipt of which all obsolete meritorious sick leave forms should be destroyed.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Acting Chief Engineer, P. R R.

PANAMA RAILROAD COMPANY,
COLON, R. P., May 31, 1912

CIRCULAR No. 100:

All Concerned: During the absence of Lieut. F. Mears, chief engineer, on vacation, effective June 1, 1912, Mr. E. Zook, engineer of maintenance, is appointed acting chief engineer.

J. A. SMITH, *General Superintendent.*

Volume V. ANCON, CANAL ZONE, WEDNESDAY, JUNE 12, 1912. No. 42.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

First Test of Lock Gate Air Chambers.

The lower part of each leaf of the lock gates is a watertight air chamber, so that the use of the leaf will be buoyed up by the surrounding water, reducing the weight on its hinges and making it easier to move. In order to keep the leaf from lifting when the gates are closed, the upper part of the leaf has holes on the side toward the upper lock level to let water in and thus weight the leaf down. The air chamber of the west leaf of the upper guard gate in the east chamber of Gatun Locks was tested on June 10, by filling it with water. The leaf is built with a watertight manshaft extending from the top to the air chamber, and as this was also filled with water, the pressure of the water in the air chamber was slightly greater than that to which the gate will be subjected when in use, as the surface of the water will be about one foot below the top of the gate. The test was highly satisfactory, the leakage being very small and easily remedied.

The air chamber of this leaf contains 13,000 cubic feet. The upper guard gates, 54 feet 8 inches high, are the smallest of the gates in the locks, except the sea gates. For the higher gates the air chambers are proportionately larger.

Canal Work in May.

The grand total of Canal excavation to June 1 was 170,930,045 cubic yards, leaving to be excavated 24,393,334 cubic yards, or less than one-eighth of the entire amount for the completed Canal.

The total for May was 2,506,916 cubic yards, as compared with 2,570,592 cubic yards in May, 1911.

The dry excavation amounted to 1,624,695 cubic yards, and was principally by steamshovels. The dredges removed 795,331, and 86,890 cubic yards were sluiced at Miraflores Locks, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 460,137 cubic yards. Of this total, 27,134 cubic yards were dry excavation at Mindi, and the remainder was wet excavation—232,473 cubic yards from the Atlantic entrance, and 200,530 cubic yards near the Locks.

The total excavation in the Central Division was 1,418,284 cubic yards, 1,405,760 cubic yards from the Culebra Cut section, and 12,524 cubic yards from the Chagres section.

In the Pacific Division, the total excavation was 628,495 cubic yards, 449,218 cubic yards of which were taken out by dredges at the Pacific entrance, and 86,890 cubic yards by sluicing. The total dry excavation amounted to 179,277 cubic yards; 140,163 cubic yards from the prism, and 39,114 cubic yards near the locks.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation—	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*

TOTAL CANAL EXCAVATION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation	1,624,695	....	1,624,695
Wet excavation	818,466	63,755	882,221
Total	2,443,161	63,755	2,506,916

Mean rainfall along Canal (ten stations), 9.01 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc., It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL.	Atlantic.	Pacifiic.	Total.
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*
Concrete laid in locks.	7,746	102,831	110,577
Concrete laid in dams and spillways	1,920	....	1,920
Fill placed in dams	421,750	53,002	474,752

Dredge Finishes Its Work at Gatun.

Pipe line suction dredge *No. 82*, which has been engaged on the lake side of the east wing of Gatun Dam, pumping hydraulic fill into the two wings of the Dam, and placing a supporting fill around the cellular approach wall at the upper end of Gatun Locks, has been retired from service at Gatun, and is being overhauled at the foot of the west toe, about 300 yards from the Spillway intake. Three other pipe line suction dredges, two below and one above Gatun Dam, are still supplying hydraulic material for its construction.

Removing French Dump from Canal Bank.

In accordance with the policy of contending with slides in Culebra Cut by lightening the tops to reduce the pressure on the masses in motion, one steamshovel has been put at work near the west side of the present channel, between the villages of Cerro and Culebra, to remove an extensive dump made during the French excavation. This dump lies, in general, parallel to the Canal channel, is about 2,000 feet long, from 20 feet wide at Station 1,740 to 300 feet wide at Station 1,750, and rises about 30 feet above the surrounding area. Part of it has slipped into the Cut in connection with a large slide just north of Culebra. Approximately 250,000 cubic yards of material above the edge of the Cut, or dump, are to be excavated. The spoil is dumped on the west side of Culebra, in extension of a dump started there in 1907.

Decrease of Concrete Work at Gatun Locks.

The amount of concrete placed in the walls of Gatun Locks during the month of May amounted to 7,745½ cubic yards, which is the least amount placed during any month since the first month of concrete placement in the Locks—August, 1909. Only two of the eight 2-cubic yard Chicago cube mixers in the construction plant were employed, and these were not in continuous use. The walls of the Locks proper are finished, except for placing small quantities of concrete in tunnel construction and grouting machinery. The only heavy masonry being placed is in the cellular approach wall at the upper end of the Locks. The output of concrete will be small until the inauguration of work on the lower wing and approach walls, at the sites of which excavation is being made by pipe line suction

NOTES OF PROGRESS.

(*Continued.*)

dredge. When the excavation has been completed, the pit will be pumped out, and the laying of concrete for the walls should begin about September 1, 1912.

The extent to which the force employed at Gatun Locks has been reduced is indicated by the contrast between the payrolls for September, 1910, when concrete placement was in full swing, and for May, 1912. Figures are for the forces engaged on the Locks proper, exclusive of backfilling.

In September, 1910, the amount paid to "gold" employes was $44,947.61; to "silver" employes, $91,714.71; total, $136,662.32. In May, 1912, the rolls amounted to $24,652.25 for "gold" employes, and $52,680.36 for "silver" employes, a total of $77,332.61.

Transfer of Excavating Pumps.

In preparation for the hydraulic excavation of the Canal channel through the section between the Agua Dulce pressure plant and the dike a mile south of it retaining the waters of the Pacific, two more centrifugal pumps are being transferred to the east side of the lagoon. One pump began work in connection with a monitor at the north end of this section, 800 yards south of Miraflores locks, early in April, immediately after the lagoon had been pumped out. The pumps will be placed at intervals between the first dike, and the retaining dike, so as to share the portion of the channel which is out of the scope of the first pump. The material excavated will be forced through pipe lines, under the sand track and across the Rio Grande diversion, to the flats which are to be reclaimed between the river and the Panama railroad, opposite Corozal.

Inasmuch as the section of channel has been an estuary, the soil is very soft and it has been necessary to build trestles out from the side to support the tracks for carrying the materials for the pump and pumphouse. Piledrivers have been used to place the uprights for the bents on 15-foot centers.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 89 per cent completed, 201,119 cubic yards, out of a total of 225,000, having been placed at the close of work on June 8, A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
June 3	132	7.15	2
June 4	144	7.45	2
June 5	116	6.30	1
June 6	....	....	....
June 7	132	8.00	2
June 8	100	7.00	1
Total	624	36.30	1.60
Previously reported	200,495		
Grand total	201,119		

Steamshovel Wrecked by Slide.

Steamshovel No. 218, working in rock in the nearly completed portion of the Canal channel opposite Las Cascadas, was totally wrecked by a slide on May 29. The shovel was cleaning up, its track being at elevation 39 feet above sealevel, on the final bottom of the Canal at that point. The adjacent bank, on the west side, was almost vertical to the level of the 95 foot berm. The excavation loosened a pocket in the bank, and about 2,000 cubic yards of rock slid down in an avalanche, burying the shovel, so that only a portion of the boom showed above the mass. The crew escaped without injury. The wreckage was hauled to the shops at Empire on four flat cars on June 2, and it was found that scarcely an essential part of it, except the dipper and its shaft, was not broken or deformed.

This is the most destructive accident that has occurred to any of the steamshovels engaged in the Canal work. In the explosion at Bas Obispo on December 12, 1908, by which 22 Canal employes were killed, steamshovel No. 261 was blown to pieces, but it would have been repaired had it not been desirable to use it for supplying parts to other shovels in need of repairs. No. 218 has been reduced to scrap. It was a 95-ton Bucyrus shovel and had made a good record.

CONCRETE WORK IN THE LOCKS.

Over 86 per cent of the concrete for the locks is in place, the amount at the close of work on June 8 being 3,730,664½ cubic yards, out of a total of approximately 4,302,563. A total of 21,952 cubic yards of concrete was laid in the locks during the week ending June 8.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 8 being 1,876,012½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending June 8, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

Grand total	....	....	....	....	....	....	....	1,876,012½

The amount shown for the portable mixer (reinforced concrete) was placed on the following days: June 3rd, 26; June 4th, 8; June 5th, 27; June 6th, 36.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 95 per cent completed, 850,785 cubic yards, out of a total of 889,827, bucket measurement, having been placed at the close of work on June 8. The record for each of the working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.

STEAMSHOVEL RECORDS.

Work of Central Division Shovels in May.

During the month of May, the total amount of material excavated in the Central Division was 1,418,284 cubic yards, of which 230,412 cubic yards were classified as earth, and 1,187,872 cubic yards as rock.

Of this quantity, 1,412,380 cubic yards were removed by steamshovels. Contractors removed 5,904 cubic yards by steamshovel.

The high record for the month was made by Shovel 231, working 25½ days in the Pedro Miguel district, which excavated 60,308 cubic yards of rock.

The second best record for the month was made by Shovel 217, working 26 days in the Culebra district, which excavated 47,869 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by Shovel No. 115, working 26 days in the Culebra district, which excavated 36,015 cubic yards of earth and rock.

Shovel No. 203, working in the Culebra district, made a high record for one day by excavating 3,135 cubic yards of rock on May 6.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best record for the month, and for one day, are shown below:

BEST RECORD FOR THE MONTH.

Fourth of July Events.

The program for the field events and the aquatic sports at the Fourth of July celebration at Ancon and Balboa has been arranged, as follows:

FIELD EVENTS, ANCON—9.30 A. M.

One hundred yard dash (preliminaries and finals); 75-yard dash—for boys; sack race; 100-yard low hurdles; running high jump; 220-yard run; potato race; fat man's race (75 yards, 200 pounds minimum weight); 12-pound shot put; running broad jump; equipment race (Marines and Tenth Infantry); 440-yard run; boys' relay 75, yards, 4 boys in each team; 880-yard run; wall-scaling contest. (Marines and Tenth Infantry) three-legged race; tug-of-war (eight men on a team); one mile relay (four men on a team).

An entrance fee of 50 cents must accompany each entry blank, this fee to be returned if the person competes. The events marked (*) are regular events, all others are special events. No one entered in the regular events can compete in the special events. In all events, except the "Tug-of-war," "Equipment race," and the "Wall-scaling contest," the prizes will be gold, silver, and bronze medals. A prize of $40 will be given the winning tug-of-war team. The age limit of boys will be 16 years, and entry must be signed by parent or guardian. Boys will not be allowed to compete in the special events. All entries accompanied by fees must be sent to R. L. Dwelle, clerk of course, care of Commission clubhouse, Gatun, C. Z. Entries to the above events will close on June 22.

AQUATIC SPORTS, BALBOA—3.30 P. M.

3.30. Lifeboat race, (distance, three-fourths mile), six-oared and coxswain, prizes: $25 and $15 (three or more entries.) 3.40. Four-round aquatic boxing contest, A. A. U. rules, prizes: $15 and $10 (four or more entries.) 3.45. Gasoline boat race, second-class (below 10 horsepower), distance, 3 miles, prizes: $20 and $10 (three or more entries.) 3.50. Swimming contest for men, distance, 100 yards, gold, silver, and bronze medals. 4. Panga race (distance half-mile), two-oared and coxswain, prizes: $15 and $10 (three or more entries.) 4. Swimming contest for boys (age limit 15 years), distance, 100 yards, prizes: gold, silver, and bronze medals. 4.10. High diving contest, prizes: $25 and $15 (five or more entries). 4.15. Gasoline boat race, first-class (10 horsepower and up), distance, 3 miles, prizes: $20 and $10 (three or more entries). 4.20. Log rolling contest, prize: $10. 4.30. Duck hunt, prize: $10. 4.30. Relay swimming contest, four-men teams, distance, 200 yards, prizes: gold medals. 4.45. Fancy diving contest. prize: gold medal. 4.50. Tub race (with paddles), distance 100 yards, prizes $10 and $5 (three or more entries.) 5.00 Obstacle swimming contest, prizes: $15 and $10 (three or more entries.) 5.10. Greased horizontal spar (60 feet,) winner to leave lighter and get flag from end of spar, prize: $15. 5.15. Exhibition fire and lifeboat drill (tugs *Bolivar*, *La Boca*, *Miraflores*, *and Cocoli*.) Fire drill must be completed before lifeboat drill is commenced. Lifeboat must be put in water and vessel cleared, prize: $25.

An entrance fee of 25 cents will be collected, which will be returned to contestants after the events. All entrance fees should be forwarded to Mr. J. E. Siler, Balboa, C. Z.

Odd Fellow Memorial Services.

The annual memorial service of the Independent Order of Odd Fellows will be held at the Commission chapel, Empire, on Sunday evening, June 16, at 7.30 o'clock. An appropriate program will be given in which Mrs. McLean, Mrs. Hudson, Mrs. Willson, Mrs. Storing, Miss Smith, and Messrs. Dohrman and Skinner will take part. The Rev. J. L. Wise will preach on the friendship of David and Jonathan. The service was organized and will be carried out under the auspices of Canal Zone Lodge, No. 3, Empire, although it is desired that members of all the Zone lodges attend. There are lodges at Cristobal, Gorgona, Empire, Culebra, and Ancon, with an auxiliary at Gorgona. The total membership is about 400.

Odd Fellow Election.

At the meeting of Pacific Lodge, No. 4, I. O. O. F., held on Thursday evening, June 6, officers were elected for the ensuing six months, as follows: Noble grand, Olen E. Granberry; vice-grand, E. M. Keyser; secretary, A. F. Holzaphel; treasurer, A. S. Curtis.

Burning of the Launch "Cathandre."

The launch *Cathandre*, in the service of Messrs. Pinel Brothers, Panama, was destroyed by fire about six miles from the mouth of the Bayano River on Sunday morning, June 9. Of the party of 13 Americans who were on board, bound for the Bayano River, 12 were picked up by the *Cava*, at the mouth of the Chico River on Monday afternoon, they having escaped from the burning launch in two small boats. The one missing man is Jos. B. Brenner, an employe of the cold storage department of the P. R. R. commissary.

SOCIAL LIFE OF THE ZONE.

Dancing a Popular Diversion.

That dancing is one of the most popular forms of amusement in the Canal Zone is evidenced by the number of clubs holding regular dances in the Canal villages, and, in addition, special dances are given by orders and societies, clubs, and private residents.

Of the organizations solely for dancing, the Tivoli club is the oldest and the largest. It has its dances at the Hotel Tivoli on the second and fourth Saturday evenings in each month. The Tivoli club has members from Camp Otis and Camp Elliott, Empire, Culebra, Ancon, and Panama. The guests of the hotel are always included as guests of the club at its dances.

The Culebra dancing club meets once a month. At Empire, four dancing clubs hold regular meetings; the Wizards and the Ramblers have dances twice in the month at the Commission clubhouse; the Kangaroos hold one dance a month at their hall, and the Catholic club has one dance a month in the parish house connected with St. Ferdinand's Church.

Gorgona has one dancing club, with one dance monthly at the clubhouse. In Gatun, there are the Gatun club, with one dance a month, the Lock City club, with dances at irregular periods, and the "H2O" club, which also has frequent dances.

Cristobal has the Cristobal dancing club, with meetings at the clubhouse once a month, and Colon has the Strangers club, one of the oldest on the Isthmus, which has a dance in the clubhouse once a month, and the Colon club, which has a dance at the Lincoln House once a month.

At Paraiso, Bas Obispo and Las Cascadas, dances are held by clubs and societies.

Church Notes.

Hereafter, the Woman's Altar Guild of St. Luke's Hospital Chapel, Ancon, will hold its meeting on the first Tuesday in each month at the Hotel Tivoli, at 9.30 a. m.; the second meeting in each month will be held on the fourth Tuesday, as usual, at the home of a member. Mrs. Charles W. Barber will entertain the guild on June 18, at 3.30 p. m. Beginning with July 1, the monthly dues will be reduced to 10 cents, this being in conformity with the custom of societies of a similar nature in the United States.

The monthly meeting of the Woman's Altar Guild of Christ Church, Colon, was held on Tuesday, June 4. The Rev. H. Page Dyer, visiting missioner, celebrated at the corporate communion of the society. The guild is planning to place a marble altar in Christ Church, as a permanent memorial of its work in Colon.

There was a special service of the Union Church in the schoolbuilding, Culebra, on Sunday evening, June 9. In the absence of the chaplain, Judge J. B. March of Gorgona, delivered an address.

The semiannual election of officers for the Culebra Christian League, which was held in the chapel on Thursday evening, June 6, resulted, as follows: President, Mr. A. F. Warner; vice-president, W. E. Hoffman; secretary, F. A. Gould; treasurer, R. W. Bechlem; usher, D. T. Dorraly; chorister, G. R. D. Kramer. Several members were elected "at large" for special office. The work of the league is prospering.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

COLON BREAKWATER.

Double Track Trestle Now Driven to Within 700 Feet of the End.

On June 1, the double track trestle on the west breakwater at the Atlantic entrance to the Canal had been extended a distance of 10,895 feet from land, leaving about 700 feet still to be constructed. Owing to long delays due to lack of piling, the fill in the remaining part will be brought up to—15 feet, by dumping dredged rock from scows. A single-track trestle will then be built for the remaining distance and Porto Bello armor rock dumped from it to 5 feet above sealevel. At the end of May, 800,838 cubic yards of material, excavated by the steamshovels working in the quarries on Toro Point, had been dumped on the breakwater; a total of 1,070,888 cubic yards had been dumped by dredges, and 57,768 cubic yards of large rock from the Porto Bello quarry had been placed. This latter work is proceeding slowly on account of the lack of lidgerwood cars at Porto Bello. The equipment now in use at that point is all narrow gage which was used in furnishing crushed rock. It is expected that a number of lidgerwoods will be released in the Central Division, and with one or two additional steamshovels, the output at Porto Bello can be materially increased. The second of the two derrick barges, built at Cristobal dry dock especially for placing large rock on the breakwater, has been practically completed. The design and method of constructing these barges were described in THE CANAL RECORD of May 24, 1911. The first barge was launched on July 15, 1911, but has never been placed in service, because the large stone had not been supplied in sufficient quantities to justify it. At the present time, large rock is lifted from the transportation barges to a train of lidgerwood cars, by cranes, and then plowed off on the breakwater. The new derrick barge will be placed in commission as soon as the rock shipments are increased. As the sea will seldom be calm enough for the barges to be stationed on the seaward side of the breakwater, it is proposed to remove the inside half of the trestle when the fill has been made, thereby allowing them to draw close and place the rock on the outer toe of the embankment from the harbor side.

Naos Island Breakwater.

To hasten the construction of the Naos Island breakwater, two piledrivers at work on the double track trestle have been placed on 12-hour shifts, as a result of which the end of the trestle is advancing toward the island about a third more rapidly than before. About 13,800 feet of the trestle have been driven, and about 2,000 feet remain to be placed. The fill at present is being made with average of five trains of rock a day from Culebra Cut. The number of trains will probably be increased. The committee, which recently reported on the advisability of changes in the method of construction, recommended that the plans followed since last October be carried to completion, but that the rate of operation be accelerated.

A Double Joint Debate.

At a meeting of the Cristobal debating club, held on Wednesday, June 5, it was decided to challenge the Gorgona debating club to a joint debate, to take place on or about June 26, in which each society shall appoint two teams, one to debate on one side of the subject at the clubhouse in one town, and the other to debate on the opposite side at the clubhouse in the other place, both on the same date. Each team is to consist of two men. The subject will be chosen by the club challenged.

In the article on the fifth anniversary of the Commission clubhouses, published in THE CANAL RECORD of June 5, it was stated that the membership of the clubhouses at the end of April was 2,091. The number should have read 2,001.

Postal Business and Canal Zone Revenues.

The total value of money orders issued in the Canal Zone during the month of April was $363,717.54, of which $292,427.19 was issued payable in the United States, $70,412.07 in the Canal Zone, $643.88 in Martinique, and $234.40 in Costa Rica. The number of orders issued was 17,940, and the average value was $20.27. Money order fees amounted to $1,739.76, and the amount paid and repaid was $104,963.46. Postal sales amounted to $6,930, and newspaper postage to $12.38.

Revenue collections during the month of April were, as follows: Bicycle and chauffeur licenses, $37; insurance collections, $571.85; motor vehicle licenses, $59; steamboat inspection, $1,280.65; taxes, licenses, etc., $9,003.54, making a total of $10,952.04.

Close of Canal Zone Schools.

The seventh year of the Canal Zone public schools will close on Friday, June 28. On the evening of the same day the commencement exercises of the high school will be held in the Gatun clubhouse at 8 o'clock. Judge Thomas E. Brown, Jr., will deliver an address. On Sunday morning, June 30, Maj. Henry A. Brown will deliver a sermon to the graduates at the clubhouse.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending June 8:

DATE.	Hours worked.	Cubic Yards.
June 3	6.10	2,376
June 4	7.00	2,547
June 5	8.35	3,233
June 6	7.55	2,981
June 7	7.25	2,851
June 8	8.05	2,527
Total	45.10	16,515

St. John's Day Banquet.

The members of the committee on arrangements for the Masonic banquet to be given at the International hotel, Panama. on Sunday evening, June 22, are requested to meet at Ancon hall on Saturday night, June 15, and be prepared to report definitely as to the number of tickets sold. As final arrangements for the banquet are to be made at this meeting, a large attendance is desired.

Rifle Matches.

The Canal Zone Rifle Club held a special match on the Caimitillo range at Pedro Miguel, on June 2, for a trophy offered by Mr. Gill, vice-president of the club. Two ranges were shot—200 yards rapid fire on "A" target, and 600 yards slow fire on "B" target. Mr. W. L. Greene of Pedro Miguel won the match with scores of 40 and 42, respectively.

Another match is planned in the near future for the championship of the club. This match will be more comprehensive than anything yet held, consisting of 300 and 500 yards rapid fire; 600 and 1,000 yards slow fire, and a skirmish run.

A special match will be held on June 30, open to all white riflemen on the Isthmus, the first of a series of sporting match shoots to determine the best shot on the Zone. Standing and running deer shoots at unknown distances, as well as rapid fire, will make up the matches. An entry fee of 50 cents will be charged to cover expense of special prizes. Information may be procured from G. C. Ferris, secretary, Pedro Miguel.

Postal Savings Bank.

A statement of Canal Zone postal savings bank transactions at Canal Zone post-offices for the period of April 1, to April 27, follows:

Name of Office.	Postal Savings Certificates Issued	Postal Saving Certificates Paid.
Ancon	$7,122.00	$2,837.00
Balboa	6,853.00	4,337.00
Bas Obispo	310.00	120.00
Corozal	10,696.00	3,462.00
Cristobal	6,689.00	4,448.00
Culebra	8,981.00	2,731.00
Empire	6,873.00	1,943.00
Gatun	11,547.00	4,094.00

Miraflores	4,228.00	1,436.00
Paraiso	3,754.00	1,682.00
Pedro Miguel	17,933.00	7,842.00
Cristobal, Sta. "A"	585.00	50.00
Cristobal, Sta. "B"	762.00	145.00
Total	$112,768.00	$49,017.00

United Fruit Company's Sailings to England.

The United Fruit Company announces the following sailings to Liverpool, England: *Heredia*, June 29; *Sixaola*, July 12; *Cartago*, July 27. The time of the voyage will be 16 days, including a stop at Jamaica.

Obituary.

Carl Fondren of the *U. S. S. Maryland* died at Ancon Hospital, on June 2, after an illness of a little over three months. He was 24 years of age, single, and is survived by his father, W. E. Fondren of Garner, Texas.

I. B. of S. S. and D. M.

Local No. 19, I. B. of S. S. & D. M., will hold its regular meeting on Sunday, June 16, at 12.15 p. m., at the Empire lodge hall. All members are requested to attend.

A. EDMONSON,
Secretary and Treasurer.

Empire, C. Z., June 6, 1912.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration building, Ancon, on June 19. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration building at 8 a.m., on June 19, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability properly to operate an automobile, and must have the automobile with them.

OFFICIAL CIRCULARS.

Acting Examiner of Accounts.

CULEBRA, C. Z., June 5, 1912.

CIRCULAR No. 450:

Effective June 6, 1912, Mr. J. H. McLean will act as Examiner of Accounts during the absence of Mr. T. L. Clear.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Annual Reports for Fiscal Year.

CULEBRA, C. Z., June 8, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is desired that annual reports for the fiscal year ending June 30, 1912, be in this office not later than August 1, and it is directed that you be governed accordingly. Reports will be submitted in quintuplicate, on the same size and kind of paper as that on which these instructions are written.

H. F. HODGES,
Acting Chairman and Chief Engineer.

New P. R. R. Time Table.

CULEBRA, C. Z., June 8, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

The General Superintendent of the Panama railroad advises that a new time table, No. 12, will go into effect at 12 01 a. m., Wednesday, June 12, 1912, and that copies of the same will be furnished to all concerned in ample time.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Fourth of July Celebration Subscriptions.

ANCON, C. Z., June 7, 1912.

TO HEADS OF DEPARTMENTS AND DIVISIONS:

The finance committee of the Fourth of July celebration, of which Mr. E. J. Williams is chairman, and the chief timekeepers of the different departments and divisions are members, has been furnished with the necessary subscription blanks, etc., for the purpose of raising funds for this year's Fourth of July celebration, and your cooperation is respectfully requested by the Fourth of July committee in authorizing and affording the representative of your department or division on the finance committee every assistance in obtaining subscriptions from all American employes in your department or division.

H. H. ROUSSEAU,
Chairman, Executive Committee,
1912 Fourth of July Celebration.

Acting Local Auditor.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT.
COLON, R. P., June 8, 1912.

CIRCULAR No. 115:

All concerned: During the absence, on leave, of Mr. R. W. Hart, local auditor, effective June 9, 1912, Mr. M. L. Duff is appointed acting local auditor.

J. A. SMITH, *General Superintendent.*

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Miss Gay Zenola MacLaren will hold entertainments at the local clubhouses, and at Ancon hall, in Ancon, on the following dates: Corozal, Tuesday, June 18, return engagement; Empire, Monday, June 17, return engagement; Gatun, Friday, June 14, return engagement; Cristobal, Thursday, June 20, return engagement; Ancon, Saturday, June 29.

COROZAL.

Arthur Sims rolled the high score in tenpins during the past week. Score: 226. P. G. Flynn rolled the high score in duckpins—112. Eight teams, representing the various departments, are now bowling in a local tenpin tournament.

CULEBRA.

The Isthmian billiard tournament closed on Saturday evening, June 8. Messrs. Tragsdorf and Conlon of Culebra won from Messrs. Worster and Townsley of Gatun by the following scores:

Culebra.		Gatun.	
Tragsdorf	100	Worster	64
Conlon	100	Townsley	48

Messrs. Tragsdorf and Conlon will now play 1,000 points to decide the championship of the Isthmus.

Cristobal played Culebra at duckpins on Saturday night, June 8. Scores:

Culebra.				Cristobal.			
Sterns	80	94	81	Herrington	88	95	81
Lowande	84	94	98	Whittles	75	92	84
Brown	82	87	91	Collins	92	100	96
Crain	85	86	97	Claherty	83	91	81
Cornthwaite	83	84	90	Herring	94	88	90
Totals	414	445	457		432	466	432

Eight men can play on the handball courts at one time. Mondays and Wednesdays are the playing days. A tournament will be organized soon.

All men that desire to join the Culebra clubhouse track team should hand in their names to the secretary.

The Gatun duckpin bowling team will bowl at Culebra, Saturday evening, June 15.

EMPIRE.

The gymnasium classes have started again and will meet twice weekly. All interested see Mr. Russell. A fencing class was started Tuesday, June 11, under the direction of Mr. Russell. Nine men were present.

A handicap pool tournament has been started for the month of June. All wishing to enter leave names at the desk.

On Saturday, June 15, the Empire bowling team will bowl the Cristobal team.

Entry blanks may be secured at the office for the Fourth of July athletic meet, and the aquatic events.

GORGONA.

The following games of duckpins were rolled on the Gorgona alleys Saturday, June 8:

Gatun.				Gorgona.			
Wilson	76	80	86	Seebt	99	86	97
Mohen	75	84	76	M. Varen'p.	90	82	84
Harper	94	82	91	Denst	87	68	82
Curry	73			Robertson	85	97	85
Mack	86	82	83	Haggerty	124	100	87
Brennan		95	79				
Totals	404	423	415		485	433	435

At the meeting of the current topics club on Wednesday night, June 5, there was a discussion of the Alaskan question. The greater part of the 60 men present expressed themselves in favor of utilizing the Canal equipment for railroad building in Alaska.

Monday, June 3, a baseball membership campaign was organized with the following teams:

Team.	Manager.	Captain.
Tigers	Christensen	Hennen
Athletics	Hilty	Deavours
Giants	Charnley	Kinney
Reds	Reinhold	Carpenter
Phillies	Kuentz	Cogan
Pirates	Baldensperger	Emery
Senators	Lowe	Sundquist
White Sox	Bishop	J. Ridge
Red Sox	Ellington	Boster
Browns	Boyer	Lynch
Cubs	Keenan	Bornefield

The campaign will close June 30. Powell leads the individual batting average with 13 home runs, four three-base hits, three two-base hits. Deavours is second with five home runs, five three-base hits, one two-base hit. The "Red Sox" lead the league with the Cincinatti "Reds" in third place, and the Athletics in second place. Yearly new members count as home runs, renewals for one year, and new members for six months count as three-base hits, renewals for six months and new members for three months count as two-base hits, and renewals for three months count as one-base hits.

CRISTOBAL.

On Friday evening, June 14, Father Cooper of Christ Church, Colon will give an illustrated lecture on Guatemala. The lecture will be under the auspices of the literary and debating club. The date was changed to meet the convenience of Father Cooper. The lecture will begin at 8.15.

On Saturday evening, June 8, the Cristobal duckpin bowling team took two out of three games from the Culebra team on the local alleys. Scores:

Culebra.				Cristobal.			
Palmer	88	88	87	Barrett	85	120	104
Hill	86	108	86	Cotton	79	88	85
Mengel	88	86	93	Orr	99	84	89
Silver	115	81	77	Weston	81	86	88
Case	90	81	84	Louch	93	94	95
Total	467	444	427		437	472	461

The next and final contest will be held on the local alleys on Saturday evening, June 15, the team competing with Empire. A team from Cristobal will bowl at Empire.

GATUN.

Gatun won two out of three games of duckpins on Saturday night, June 8.

The final rehearsals of Sinbad the sailor are being held this week.

The report of the Acting Chairman of the Isthmian Canal Commission for the month of May is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Extension of Mole at Cristobal Terminals.

Under the plans authorized to date for the Cristobal terminals, the mole from which piers are to extend, has a length of 2,050 feet from the shore. It is thought that this may not be adequate to protect vessels, lying on the west side of Pier 17, in all weathers, and estimates are being prepared to cover an extension of the mole for a distance of about 1,200 feet beyond its present authorized length.

In preparation for such extension, the spoil, consisting mostly of coral, being excavated by the dipper dredge *Mindi* in the slip between Wharf 16 and Pier 17, is dumped at the outer end of the present mole. It is being deposited over a distance of 500 feet in extension of the axis of the mole; and further excavation at Cristobal, supplemented if necessary by spoil from the Atlantic entrance, will furnish material for dumping over the remainder of the proposed extension.

Sluice Gates in Gatun Spillway Opened.

Two of the sluice gates in the ogee of the Spillway dam at Gatun were opened on June 5, since which the surface of Gatun Lake has risen only three-fifths of a foot. The surface of the lake had reached an elevation of 26.5 feet above sealevel when the gates were opened to prevent a rise which might submerge, at elevation 28 feet, the sills for the floating caisson dams in the upper approach to Gatun Locks. The upstream angle of each of the concrete sills, with which the caisson will be in contact when in use, is being sheathed with steel plates, and it was to obviate interference with this work that the Spillway gates were opened. The sheathing will probably be completed before the end of this week, and the gates will be closed as soon as possible. The opening of the gates has caused the appearance at the lower end of the lake of a number of floating islands. These are masses of decayed vegetation and fallen trees, held together by the roots of a dense overgrowth of swamp plants. They appear to have formed in the Black swamp and to have been been loosened by the 10-foot rise of the lake since April 30. The opening of the sluice gates made currents which have brought them toward the Dam. So far about twenty have floated down. They vary in size; some being 300 feet long and 200 feet wide, and, in general, are of sufficient solidity to support a man in walking over them.

Excavation for Balboa Terminal Docks Begun.

Excavation on the north side of Sosa Hill for the permanent Balboa roadway, the Panama railroad connections to present docks, and a part of the site for the proposed new terminal docks, was begun on Thursday, June 13, by steamshovel No. 126, which was recently transferred from the Central Division to the Pacific Division, and has just been overhauled in the shops. The excavation work was started at a point opposite a collection of native houses, known as Little Panama. The material is being used to make a fill in the swamp between Diablo and Sosa hills, where the permanent track layout in connection with the docks is planned. The excavation will be extended around the hill, and the deepest cut into it, approximately 100 feet, to accommodate one end of the dry dock, will be about where the Balboa police station formerly stood.

Removing Quarters at Balboa.

The removal of the quarters in the American section of the town of Balboa, preliminary to excavating for the permanent terminal, necessitates providing other quarters for approximately 50 families, 97 bachelors, and 213 West Indian laborers. This will be accomplished by moving buildings to East Balboa and camps adjacent to Ancon and by converting to different uses some buildings already at those places.

The police station at Balboa is to be moved to East Balboa and made over into bachelor quarters. Police supervision of East Balboa and the Balboa area is to be conducted by the Ancon station. The second story of the East Balboa hotel will be converted into bachelor quarters, and a type-18 house in the village, which has been used for nonhousekeeping quarters, will be returned to the service for which it was designed. These arrangements provide accommodations for a maximum of 114 bachelors.

Family quarters will be provided by moving four buildings from Balboa to Ancon, four buildings from Spillway, Gatun, to Ancon, three buildings from Gorgona to Ancon, and converting four buildings now at Ancon. Each of the 15 buildings will be converted into two-family houses, and, in the Spanish camp, No. 2, Ancon, similarly altering three buildings and changing seven "silver" married quarters into one-family "gold" quarters. This provides for 43 families. Others will be accommodated at Corozal and Pedro Miguel.

Provision for the West Indian laborers will be made by converting married "silver" quarters at East Balboa into camps.

Arrival of "Reliance" at Balboa.

The tug *Reliance*, with three barges in tow, arrived in Panama Bay during the afternoon of June 17, from Colon, via the Strait of Magellan. The craft left Cristobal in the morning of February 11, and 126 days were occupied by the voyage of 10,500 miles. The number of steaming days was 86. From Para to Pernambuco, 1,100 miles, the time was nine days and five hours. The severest weather was encountered during the first three days out, and it was necessary to anchor in Savanilla Bay for repairs. The heavy seas had kept the decks awash, the towing machine at the stern of the tug was often submerged, while the prow of the vessel was in the air. After rounding the shoulder of South America, the tug met with generally moderate seas, and the principal difficulties were with the supplies of coal and water.

The crew of 34 men, under command of R. C. Thompson, master of the *Reliance*, manning the tug and tow, remained in good health throughout the voyage, with slight exceptions. The craft arrived at the end of the voyage in good condition.

Following is a list of ports of call made by the *Reliance*: Willemstad, February 19; Port of Spain, February 26; Para, March 15; Pernambuco, March 24; Rio de Janeiro, April 4; Montevideo, April 18; Punta Arenas, May 9; La Concepcion, May 26; Taltal, June 2; Balboa, June 17.

It is thought that this is the first time a tow of this character has ever taken a trip of such a length and through such seas.

Accident to the "Corozal."

The main driving wheel gear on the port side of the new ladder dredge *Corozal* broke on the afternoon of Tuesday, June 4, placing the remainder of the machinery out of commission. The accident occurred while the dredge was excavating in a 25-foot bank, the upper part of which consisted of stratified clay, and the lower part of argillaceous sandstone. The wheel gear is a ponderous affair, made up of an outer wheel, or cog rim, and an inner wheel, consisting of rim, spokes, and hub, which works by means of a friction brake. The entire wheel gear is 14½ feet in diameter, two feet thick, and each section weighs close to 10 tons, making the combined weight about 20 tons. So heavy was it that the dredge had to be taken to the Panama railroad wharf, and the wheel removed in

NOTES OF PROGRESS.

(*Continued.*)

sections by crane. The accident was a peculiar one, and the first of the kind on an Isthmian Canal Commission dredge, although it is recorded that a similar accident occurred on a Suez Canal dredge. Every one of the six huge iron spokes was broken short off, leaving the hub entirely free from the remainder of the gear. A new casting has been made at Gorgona shops, and machined at Empire, which was ready for shipment on the 17th instant. Another casting has been ordered by cable from the builders of the dredge in Scotland, and, it is expected, will be shipped about the end of June.

United Spanish War Veterans.

The next regular meeting of Chagres Camp, No. 2, U. S. W. V., will be held at Empire lodge hall on Sunday, June 23, at 3 p. m. A large attendance is desired as there is special business to be transacted in connection with the semiannual inspection to be held on June 29.

CONCRETE WORK IN THE LOCKS

Over 87 per cent of the concrete for the locks is in place. the amount at the close of work on June 15 being 3,749,482½ cubic yards, out of a total of approximately 4,302,563. A total of 18,818 cubic yards of concrete was laid in the locks during the week ending June 15.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 15 being 1,877,579½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending June 15, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No of mixers	Concrete placed.	Hours worked.	No. of mixers

June 10	328	6.02	2					328
June 11	168	4.06	2					169½
June 12	256	4.18	2					256
June 13	260	4.26	2					260
June 14	302	5.22	2					307½
June 15	236	4.10	2					246
*Portable mixer				17				
Total	1,550	28.24	2	17				1,567
Previously reported								1,876,012½
Grand total								1,877,579½

The 17 yards shown for the portable mixer are reinforced concrete, and were placed on the following days: June 11th, 1½; June 14th, 5½; June 15th, 10.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is about 96 per cent completed. 853,014 cubic yards, out of a total of 889,827, bucket measurement, having been placed at the close of work on June 15. The record for each of the working days of last week, follows:

DATE.	AUXILIARY PLANT.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

MIRAFLORES LOCKS.

Over 72 per cent of the concrete for the system of two twin locks at Miraflores was in place on June 15, the total amount on that date being 1,018,889 cubic yards, bucket measurement, out of a total of approximately 1,412,736. The record for each of the six working days of last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.
				2-cubic yard mixers.			½-cubic yard mixers

EXECUTIVE ORDER.

Special Orders No. 129.

WAR DEPARTMENT,
WASHINGTON, June 1, 1912.

Extract—1. The following Executive Order is published for the information and guidance of all concerned:

EXECUTIVE ORDER.

It is hereby ordered that all Portland cement that may hereafter be purchased by any department, bureau, office, or independent establishment of the Government, or that may be used in construction work connected with any of the aforesaid branches of the Government service, shall conform in every respect to the specification for Portland cement adopted by the departmental conference at the meeting held at the Bureau of Standards on February 13, 1912, and approved by the heads of the several departments (to be known as the United States Government specification for Portland cement): *Provided, however,* That such specification may be modified from time to time by any similar departmental conference, with the approval of the heads of the several departments.

WM. H. TAFT.

THE WHITE HOUSE,
April 30, 1912

The United States Government specification for Portland cement, referred to in the foregoing Order, has been published by the Department of Commerce and Labor as Circular of the Bureau of Standards, No. 33.

[1914631], A. G. O.

* * * * *

By order of the Secretary of War:

LEONARD WOOD,
Major General, Chief of Staff.

OFFICIAL:
W. P. HALL,
The Adjutant General.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 89 per cent completed, 201,152 cubic yards, out of a total of 225,000, having been placed at the close of work on June 15. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
June 10	112	6.15	1
June 11	84	5.00	1
June 12	128	6.00	1
June 13	118	7.00	2

Previously reported	*200,518		
Grand total	201,152		

*Revised to June 8.

Pythian Memorial Service.

The Canal Zone lodges of the order of the Knights of Pythias held their first annual memorial service in the National Theatre, Panama, on Sunday, June 16. A special train brought the members and their friends from Colon, arriving at Panama at 2.30. At the station a line of march was formed, which included 400 members of the order, with 75 members of the Uniform Rank. The procession was headed by the band of the Tenth Infantry. The program consisted of the memorial ritual of the order, an address by the Rev. William H. Decker, and selections by the band. The roll call included the names of members who have died since 1907, the year of the institution of the order in the Canal Zone. There are eight lodges in the

Zone, as follows: Panama No. 1, (Cristobal); Empire, No. 2; Culebra, No. 3; Balboa, No. 4; Lock City, No. 5, (Gatun); Paradise, No. 6, (Paraiso); Ancon, No. 7; Cruces, No. 8, (Gorgona.) There are four companies of the Uniform Rank. The total membership is about 1,000.

High School Commencement.

The date for the service in connection with the commencement of the Canal Zone high school has been fixed for June 23, instead of June 30, as previously announced. This service will be held in the Gatun clubhouse at 9.30 a. m., and the Rev. Henry A. Brown, chaplain, Engineer Corps, U. S. A. will preach. The high school will give its annual entertainment at the various clubhouses after the close of the school. The dates of these entertainments will be announced later.

Lawn Tennis Tournament.

The Fourth of July celebration committee will hold the usual open tennis tournament in singles and doubles at Ancon.

Singles—The preliminaries, including the semifinals, will be played on June 23. Matches, best two out of three sets. Entries close June 19 at 12 noon. The finals will be played at 10 a. m., July 4, best three out of five sets.

Doubles—The preliminaries, including the semifinals, will be played on June 30. Matches, best two out of three sets. Entries close June 26 at 12 noon. The finals will be played at 3 p. m., July 4, best three out of five sets.

Consolation—In singles and doubles on July 4; only those defeated by the winners of the semifinals are eligible.

Prizes will consist of gold, silver, and bronze medals. Entries may be made by letter, or by telephone, to Chase Pulsifer, Empire, C. Z., care of office of Examiner of Accounts, telephone, 189. There is no entry fee.

Services at St. Luke's, Ancon.

Major Henry A. Brown, chaplain of Ancon Hospital, returned from his leave of absence on the *Parismina*, on Thursday, June 13. The services at St. Luke's Hospital Chapel will be maintained as usual, Holy communion at 7 a. m., and divine service at 10 a. m. Owing to the absence of the chaplain from Ancon on Sunday, June 23, there will be no services at St. Luke's Chapel.

Obituary.

Thomas Coarts Reynolds, the one-year old son of Mr. and Mrs. Thomas M. Reynolds of Cristobal, died in Colon Hospital on June 13.

Isaac Powers, an employe of the Pacific Division at Miraflores, died at Ancon Hospital on June 14. He was 56 years of age, a widower, and had been on the Isthmus six years.

The body of Joseph Brenner, who was missing when the launch *Cathandre* was destroyed by fire on Sunday, June 9, has been recovered and will be buried at Ancon. Mr. Brenner was employed in the cold storage department of the Panama railroad commissary at Cristobal; was 38 years of age, and had been on the Isthmus four years, coming here from New Orleans, where he formerly resided. He is survived by his wife and infant daughter, living at Cristobal.

Band Concert.

A concert will be given by the Isthmian Canal Commission Band at Corozal, C. Z., Sunday, June 23, 1912, at 5 p. m.

CANAL WORK IN MAY.

Monthly Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., June 15, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of May, 1912:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	27,134	1,418,284	179,277	1,624,695
Work excavation, wet	Cubic yards	430,156	....	388,310	818,466
Total work excavation	Cubic yards	457,290	1,418,284	567,587	2,443,161
Plant excavation, dry	Cubic yards	....	....	....	......
Plant excavation, wet	Cubic yards	2,847	....	60,908	63,755
Total plant excavation	Cubic yards	2,847	....	60,908	63,755
Total Canal excavation	Cubic yards	460,137	1,418,284	628,495	2,506,916
Material placed in dams	Cubic yards	421,750	....	53,002	474,752
Concrete placed in locks and dams	Cubic yards	9,666	....	102,831	112,497
Explosives used	Tons (Gross)	58.21	189.42	36.18	283.81
Rock drilled	Feet	38,583	401,095	74,698	514,376
Tracks removed	Miles	....	13.95	....	13.95
New tracks laid	Miles	2.28	16.62	2.90	21.80
Rock crushed	Cubic yards	....	....	102,302	102,302
Cement used	Barrels	13,868	138	104,888	118,894
New roads built	Miles	0.17.	....	....	0.17
Water mains laid	Feet	5,351	1,992	794	8,137
Sewers laid	Feet	1,672	80	304	2,056
Open drains and ditches dug	Feet	53,514	36,335	4,787	94,636
Average daily force	....	5,499	7,405	6,257	19,161
Average rainfall	Inches	12.93	7.96	8.24	9.01

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. Work was continued on the grinding of fixed irons and preparing valve chambers for the installation of the valves and bulkheads, which work is being done under supervision of this office. This subdivision is also charged with general inspection of masonry work of all the locks.

LOCK GATES AND PROTECTIVE DEVICES.

Up to May 20, a total of 50,813 tons of structural material was accepted at the rolling mills, in addition to replace orders, of which 1,952 were accepted between April 20 and May 20. This nearly completes the material required, excepting for the spare parts. A total of 36,046 tons of structural riveted steel had been shipped from the Rankin shops, or about 70 per cent of the total contract weight of this class. Of this last item, 4,270 tons were shipped between April 20 and May 20.

LOCK GATE ERECTION.

Gatun—Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive—The work on these leaves during May consisted mainly in fitting end reaction castings and wedge fillers, driving rivets in the sheathing which could not be driven previously, attaching manhole covers and bottom fender angles, and also the angles for the water seal. Leaves Nos. 37, 39 and 40 were placed on their pintles and attached to the anchorages on May 7, 16, and 20, respectively. The principal work necessary for the completion of these gates is the aligning and babbitting of the bearing plates along the quoin and miter posts of all four leaves; also, the attachment of the water seals, and the water testing. Besides this, a small amount of fitting, riveting and miscellaneous work, mainly on leaves Nos. 39 and 40, remains to be done. The footwalks and handrailing are not in place on any of the leaves, nor has any field painting been done. It is expected to begin the water testing in a day or two. Practically all material is in place. The erection of these four leaves began May 27, 1911.

Upper gates, upper lock, 77 feet high, leaves Nos. 33 to 36, inclusive—A small amount of riveting was done during the month, so that about half the rivets through the sheathing have now been driven, compared with about one-third at the beginning of the month. All rivet holes in the sheathing were reamed and all the rivets in the skeletons driven prior to May 1. Practically all material, except castings, is in place. The erection of these four leaves began October 9, 1911.

Middle gates, upper lock, 77 feet high, leaves Nos. 29 to 32, inclusive—The work during the month consisted in reaming rivet holes through the sheathing. Sixty-five per cent of the total number in the four leaves have been reamed, of which 45 per cent were reamed before May 1. Practically all the structural steel is in place, but no sheathing rivets have been driven. The erection of these four leaves began January 27, 1912.

Safety gates, upper lock, 77 feet high, leaves Nos. 25 to 28, inclusive—The skeletons of all four leaves have been erected, excepting the top girders, and about three-fourths of the interior rivets driven. About half the sheathing plates have been attached to the frame, but only a small part of same has been bolted up. The work in May consisted of the attachment of about 42 per cent of the total sheathing plates, and the driving of 47 per cent of the interior rivets in the four leaves. No reaming has been done, and no rivets driven through the sheathing. The first set of erection bridges is engaged on these leaves. The erection of these four leaves began April 1, 1912.

Middle gates, lower lock, 77 feet high, leaves Nos. 9 to 12, inclusive—About 25 per cent of the skeletons of the four leaves have been erected and one panel in each leaf riveted. About 20 per cent of this material was erected during May. The second set of erection bridges is engaged on these leaves. The erection of these leaves began April 12, 1912.

Pedro Miguel—Upper guard gates, 54 feet

8 inches high, four leaves, Nos. 50 to 53, inclusive—The work during the month consisted in grinding a small amount of the end plates on the quoin and miter posts for the reception of the reaction castings. This work has not yet been completed on any of the leaves. Practically all the structural material is in place. The erection of these leaves began August 7, 1911.

Upper gates, 79 feet high, leaves Nos. 54 to 57, inclusive—Practically all structural steel is now in place and the interior riveting is nearly complete. No reaming has been done nor any rivets driven through the sheathing. The work during May consisted in attaching about three-eighths of the total number of sheathing plates in the leaves and in erecting the top girders. The erection of these leaves began January 29, 1912. The first erecting bridge is still engaged on these leaves.

Safety gates, 79 feet high, leaves Nos. 62 to 65, inclusive—Practically all structural steel had been erected prior to May 1, and nearly all interior riveting completed, but hardly any reaming done. During May, about 60 per cent of the rivet holes in the sheathing were reamed and about two per cent riveted. The erection of these leaves began December 15, 1911.

Lower guard gates, 47 feet 4 inches high, leaves Nos. 70 to 73, inclusive—The erection of these leaves was started with a locomotive crane, April 9, 1912, when two bottom girders were placed in the chamber. Work has been held up since then on account of lack of material.

Lower gates, 79 feet high, leaves Nos. 66 to 69, inclusive—The erection of these leaves was started May 1, and about one-third of the skeleton was put in place and the interior riveting begun.

Miraflores—No material has been erected in these locks.

The total tonnage of lock gates erected on the Canal to June 1, was, without regard to its being fully reamed or riveted, about 15,872 tons, out of a total of about 58,000 tons, or about 28 per cent. Of this, 2,010 tons, or about four per cent were erected during May. The total of field rivets driven was 780,000, or about 14 per cent, of which 129,500, or about two and one-fourth per cent were driven in May.

The total amount of work done during the month fell decidedly below the amount laid down in the program, both as to erecting, reaming and riveting. Of the 2,100 tons "erected," nearly one-half was raised by the lower bridges at Pedro Miguel. The lower bridges at Gatun raised 300 tons of girders for the middle gates of the lower lock. This bridge was idle most of the month. The other two bridges raised 400 and 350 tons, respectively, of sheathing plates. The three last sets of bridges fell below the standard of 750 to 900 tons set in the program, mainly from lack of material. The reaming and riveting was also far below the required average. This was due in part to lack of "erected" material, and in part, to shortage in tools, bolts and erecting force.

The machine work, etc., on the upper guard gates at Gatun has progressed satisfactorily. This is necessarily slow work and a more intelligent arrangement of this part of the work, by which the castings could be attached, fitted, bolted and riveted at the same time as the riveting through the sheathing proceeds is imperative for rapid progress. Frequent shortages in grinding wheels, etc., have also delayed this work.

LOCK GATE RECESS COVERS.

All material, excepting a small part of the castings, has been received. Thirty-three covers out of 36 have been erected at Gatun, 31 riveted and 20 aligned and grouted. At Pedro Miguel, all the 20 covers have been erected and riveted, and four of same have been aligned and grouted. No covers have been erected at Miraflores.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection, as follows:

(*1*) *For the rising stem and cylindrical valve machines purchased under Circular 614*—The two trial rising stem gate valve machines, Nos. 260 and 261, are now on the Isthmus and the installation is practically completed. The required parts to make connection of valve stems to crossheads were received during the month and installation continued. Eleven rising stem gate valve machines were shipped from the works of the contractor during the month, but on account of stevedore strike on the docks at Baltimore, the shipping point, the machines have been held up.

Satisfactory progress is being made in the delivery of the various groups named in the contracts as parts not required to be tested.

Ten of the 118 cylindrical valve machines have been received. Fifteen more cylindrical valve machines, one 36-inch and one 60-inch auxiliary culvert valve machines, were also shipped from the works of the contractor during the month, but were held up on account of the strike at Baltimore.

Hydraulic tests on the first of the two cylindrical valve machines received on the Isthmus were continued during the month. Continued tests of the valve demonstrated excessive leakage at the seat. Certain modifications were made in segmental plates holding the seals, and the concluding tests showed a decided improvement in the leakage.

Satisfactory progress was made at the works of the contractors on the drawings for the motors for the rising stem and cylindrical valve machines.

Work is progressing satisfactorily on the manufacture of the 232 limit switches. The contractors have fifteen limit switches completed and on the test floor, and it is expected that 25 more will be placed on the test floor during the forepart of the coming month.

(*2*) *For the gate and girder hoisting machinery for the emergency dams, purchased under Circular 616*—Satisfactory progress was made on this machinery during the month.

(*3*) *For the rack railway and other material purchased under circulars Nos. 619, 635, 636, 636-D, 647, 666, and 688*—Curved racks for inclines were received during the month. Out of the 57 items contained in the above circular, 27 items are 100 per cent completed.

(*4*) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, and motors for same, Classes 3 and 4, purchased under Circular 627*—At 9.30 a. m., on May 13, miter gate No. 38, to which strut and operating machine had been connected during the month, was swung in the air. Both the machine and the gate functioned satisfactorily. At the end of the month, the second miter gate moving machine, received during April, was about 90 per cent completed.

On May 9, the General Purchasing Officer was authorized to make award to the General Electric Company for Item 1, two motors, and Item 2, ninety motors for miter gate moving machines.

Award was also made to the General Electric Company for Item 2, Class 4, forty-five motors, conditionally, until final determination is made for the adoption of a miter forcing machine, which cannot be decided upon until the trial machine now on the Isthmus is tested. Test will not be possible until the gate contractor has completed one pair of leaves.

(*5*) *For the hydroelectric station equipment, purchased under Circular 648*—Parts of three penstocks were received during the month. Work progressed satisfactorily.

(*6*) *For the electric towing locomotives, purchased under Circular 650*—Practically all of the working drawings have been prepared for Class 1, Item 1, one trial locomotive. Award has not yet been made for the remaining 39 locomotives.

(*7*) *For the Spillway gate machines and pumps purchased under Circular 661*—Work is progressing satisfactorily on test rig, plans, etc.

(*8*) *For locomotive cranes for erection plant of machinery and electrical equipment, purchased under Circular 662*—Two additional locomotive cranes were received during the month, which completes the order for eight locomotive cranes. The last two cranes are now being erected at Gorgona shops.

(*9*) *For control apparatus for all locks, purchased under Circular 679*—The General Purchasing Officer was authorized on April 15, to award all items of Class 1, 506 starting panels; Class 2, 270 limit switches, 92 commutating switches, 92 auxiliary cut-out switches, 200 indicator switches, and 80 handrail controllers; Class 3, 472 indicators; Class 4, five switchboards; Class 5, excepting item 27, fender chain control apparatus, to the General Electric Company. Item 27 of Class 5, covering two indicating devices, was awarded to the Union Switch and Signal Company.

(*10*) *For motors, pumps, float switches and starters purchased under Circular 681*—The General Purchasing Officer was authorized on April 29 to award all motors, float switches, and starters to the General Electric Company: 80 handrail gearings to the Earle Gear and Machine Company; pumps for chain fender machines, drainage sumps and main culverts, to the Cameron Pump Company; pumps for chain fender sumps, miter gates, and for machinery and cable pits, to Alberger Pump Company.

(*11*) *For crossovers advertised under Circular 688*—The General Purchasing Officer was authorized on April 26 to award contract to the United States Steel Products Company for Items 1 to 4 of Class 1, eighteen crossovers. Work on these crossovers progressed satisfactorily during the month.

The following is a summary of the work accomplished in the field by the erecting forces:

Atlantic Division Locks—The force engaged in installing machinery and electrical equipment on the Isthmus assembled 414 feet of towing track, including the assembling of rack sections, channels, anchor bolts, and "T" rails, and bonding of the same. (This does not include the installation of conductor rails, conductor slot covers, and brackets.) A total of 4,614 feet of towing track has been placed and finished to date.

Miter gate moving machine No. 38 was

completed. Miter gate moving machine No. 37 is about 90 per cent complete. Cylindrical valve operating machines for valves 540, 541, 542, 543, 544, 546, 547, 548, and 549 have been put in place. The stem connections have not been completed for all of the above valves. Stem connections for rising stem valve machines Nos. 260 and 261 have been received, and are in place. The lining up and chipping of fixed irons was continued throughout the month on valves 256-257 and 262-263. Intake valves 264, 265, and 266 have been completed; and 267, 268, and 269 are about 80 per cent completed.

Pacific Division Locks—Most of the work in the Pacific Division locks has been of a preparatory nature, and at Pedro Miguel only. Bulkhead frames were placed and lined in valves Nos. 328 and 329. All pipe work was finished in all cylindrical valves below masonry. One thousand eight hundred and twelve feet of towing track were laid. During the month, 220 cubic yards of concrete were placed for the towing track. One recess cover form was 85 per cent completed.

EMERGENCY DAMS.

The inspection work in the United States progressed satisfactorily during the month. A revised list of drawings showed that up to May 20th, 908 drawings for the Gatun and Pedro Miguel emergency dams had been completed, out of a total number of 918 drawings required. For Miraflores emergency dams, 100 drawings have been completed, out of a total number of 550 required.

At the rolling mills and foundries, 81 tons of riveted nickel steel, 145 tons of riveted structural steel, 195 tons of turning and wedging machinery, including miscellaneous material, were fabricated during the month. At the shops, 585 tons of riveted nickel steel, 283 tons of riveted structural steel, 44 tons of turning and wedging machinery, including miscellaneous material, were fabricated during the month.

Satisfactory progress has been made on the roller bearings, all the bearings for all six dams having been manufactured and accepted.

To summarize, practically all the material for the first four dams and 10 per cent for the last two dams has been manufactured and accepted at the rolling mills and foundries; and 33 per cent of the total material required for all six dams has been manufactured in the shops.

INSPECTION ON ISTHMUS.

The contractors had arranged to start the erection on the Isthmus on May 15, but due to the strike of the stevedores at Baltimore, the shipment of material has been delayed, and, thereby also, the erection. By the middle of the present month it is expected to receive on the Isthmus, 1,100 tons of material, and the contractor has completed practically all the necessary preparations for the erection immediately upon the receipt of this material. Up to date only 75 tons of castings have been received at the sites of the emergency dams.

AIDS TO NAVIGATION.

Surveys—Practically all of the surveys required in connection with the work of this subdivision are completed. The force on this work were engaged during the month in plotting up field notes, and detailing drawings for the west breakwater light in Colon Harbor.

Construction—Range 9-11, Pacific Division—The ball ventilators for both towers were set in place; otherwise, the status of the towers is the same as when last reported.

Range No. 1-2—Pacific Division—Same status as when last reported.

Range No. 13-14—Pacific Division—Same status as when last reported.

Range No. 5-6—Pacific Divsion—Same status as when last reported.

Range No. 21-22—Gatun Lake Section—Same status as when last reported.

Range No. 24-25—Gatun Lake Section, front tower—The reinforced concrete stairway was completed and the door and windows were hung. *Rear Tower*—The concrete newel post and stairway were completed, and the door and windows were hung.

Range No. 1-2—Gatun Lake Section—Front tower—The reinforced concrete platform upon which the tower is superimposed was completed, except the railing. The walls of the tower were carried up to their final height; the vestibule and windows were completed; and the concrete stairway was about 90 per cent completed.

Range No. 5-6—Gatun Lake Section—Front tower—The site for the front tower was selected and preparations are under way for the construction of this tower.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month, two shovels were engaged in borrow pit excavation for the locks backfill and construction tracks, 74,654 cubic yards of material being removed.

Backfill—Backfilling behind the side and center walls of the middle and center locks was continued. The quantity placed during the month aggregated 73,053 cubic yards, distributed, as follows: East wall, 18,878 cubic yards; west wall, 47,701 cubic yards; center wall, 6,474 cubic yards. The total placed to June 1 amounted to 1,467,759 cubic yards, which was 80.42 per cent of the entire backfill.

Receiving and Issuing Material—The receipts of sand and cement exceeded the consumption by 2,999 cubic yards, and 7,674 barrels, respectively, and the consumption of rock exceeded the receipts by 4,264 cubic yards.

Mixing and Placing Plants—Plant No. 1 and all portable mixers were kept in satisfactory operation during the month.

Iron and Steel Work—During the month, 303.4 tons of fixed steel, and 58,900 feet of reinforcing rods were placed, and 46.6 tons of electric return track were laid.

Concrete Work—There was a decrease of 3,914½ cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 27 working days was 287 cubic yards, as compared with a daily average during April of 464 cubic yards. The total amount of concrete placed during the month was 7,745½ cubic yards. The place measurement exceeded the bucket measurement by 86½ yards. Of the total, 1,915 cubic yards were placed in the upper lock, 2,488 cubic yards in the middle lock, and 3,342½ cubic yards in the lower lock. The concrete work for the entire lock system was 93.48 per cent complete at the end of May.

OPERATION OF THE PERMANENT CONCRETE CONSTRUCTION PLANTS.

Length of working day (hours)	9.00
Average number of hours per day worked, per strand of cableway laying concrete (actual working time)	1.05
Average number of mixers per day	2.04
Average hourly output per mixer (actual working time) cu. yds	59.95
Average amount of concrete laid per hour per strand of cableway (actual working time) cu. yds	26.13
Concrete laid (cubic yards) cableways	5,711.00
Concrete laid (cubic yards(derricks	1,205.00
Concrete laid (cubic yards) portable mixers	743.00
Total	7,659.00

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 421,750 cubic yards, making the total amount in place 19,465,181 cubic yards. On June 1, the Dam was 90.53 per cent completed.

Hydraulic Fill—The dredges increased the hydraulic fill by 194,733 cubic yards, making the total hydraulic fill in place May 31st, 9,794,390 cubic yards.

Dry Fill—The material received from the steamshovels, amounting to 227,017 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 9,670,791 cubic yards.

GATUN SPILLWAY.

Backfill—Backfilling was not extended during the month, the total remaining at 16,236 cubic yards.

Concrete—The work of placing concrete was continued. The amount placed during the month aggregated 1,920 cubic yards, which increased the total to 199,790 cubic yards. The concrete work for the Spillway was 88.8 per cent completed.

HARBOR AND CHANNEL SECTION.

Dredging from the Ocean to Mindi—Four dredges removed 283,558 cubic yards of earth, and 46,068 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 35,328 cubic yards of rock from the Panama railroad Cristobal terminal docks, and the dredge *Chagres* removed 2,847 cubic years of earth at the dynamite dock at Mindi, and 2,450 cubic yards from the slip at Gatun cement docks. On May 31st, 40 feet of water could be carried from zero to zero plus 1,850 feet; 35 feet to mile post 4 plus 1,400 feet; 30 feet to mile post 4 plus 3,200 feet, and 20 feet to mile post 6 plus 0 feet.

Approach to Gatun Locks—Two dredges removed 73,508 cubic yards of earth, and 27,022 cubic yards of rock from the Canal prism.

PORTO BELLO.

During the month, 7,559 cubic yards of rock were shipped to Toro Point for use in the construction of the breakwater.

No further crushing of rock will be performed at Porto Bello, there being a sufficient amount of crushed rock in storage at Gatun to complete the masonry for the Locks and the Spillway.

ROCK AND WATER SERVICE.

In connection with this service, plant steamed 3,290 miles, handled 366 barges, and carried 2,254 passengers.

WEST BREAKWATER, COLON.

During the month, 44,639 cubic yards of material were excavated, of which 44,009 cubic yards were dumped from the trestle, and 630 cubic yards furnished to fortification work. The double track trestle was extended 381 linear feet, and 16 feet of single track were built. On June 1, the trestle extended 10,895 linear feet from shore. Seven thousand five hundred and thirty-two cubic yards of Porto Bello rock were unloaded, making the total to June 1st, 57,768 cubic yards.

MUNICIPAL ENGINEERING

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work.

Work was continued on the Colon street improvements.

Central Division

During the month of May, the total amount of material excavated in the Central Division was 1,418,284 cubic yards, of which 230,412 cubic yards were classified as earth, and 1,187,872 cubic yards as rock. Of this quantity, 1,412,380 cubic yards were removed by steamshovels, and contractors removed 5,904 cubic yards by the same method. The total—1,418,284 cubic yards—was primary excavation for the Canal prism.

The daily average number of steamshovels at work during the month was 40.54, and the total number of shovel days was 1,054, as compared with 45.78 at work during the month of April, with 1,144½ shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W'kg days.	Av. yards per shovel day
		Rock.	Earth.			
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
1911: May....	1,298,240	1,149,886	148,354	38 62	26	1,293.08
1912: May....	1,412,380	1,187,872	224,508	40.54	26	1,340.01

Rainfall at Empire: 1911, 13.74 ins.; 1912, 6.21 ins.

The above table shows the average output per shovel to be 3.63 per cent greater in May, 1912, than in the corresponding month of 1911.

The total amount of material excavated from the prism in the Culebra section of the Central Division in May, 1912—1,405,760 cubic yards—was the highest record in that section for the month of May.

The total estimated amount of material to be removed in the Central Division, according to the revised estimate of July 1, 1911, was 101,801,296 cubic yards, and up to June 1, 1912, 93,044,477 cubic yards had been removed, leaving 8,756,819 cubic yards to be removed, in order to complete all excavation in the Central Division. From these figures it will be seen that 91.40 per cent of all excavation in the Central Division had been accomplished up to the close of the month of May, and 8.60 per cent remained uncompleted.

Considering the two sections which compose the Central Division, the excavation completed, and that to be completed, at the close of May operations was, as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	80,669,022
To be completed	8,774,983
CHAGRES SECTION.	*Cu. Yds.*
Completed	12,375,455

From the above figures it will be seen that the Culebra section, locally known as the "Culebra Cut," was 90.19 per cent completed, with 9.81 per cent to be completed. The Chagres section was completed so far as dry excavation is concerned, but it is estimated that it will be necessary to remove about 300,000 cubic yards of wet excavation in this section.

During the month, 25,106 cubic yards of material were dumped in the embankment for the new roadbed for the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,196,534 cubic yards.

During the month, no material was furnished this division for use in the construction of the Gatun Dam, the total amount remaining at 5,374,310 cubic yards.

There was also furnished to the Panama railroad 6,426 cubic yards of material for the terminals in Colon.

The daily average number of laborers at work on the whole division during the month was 6,755, while the daily average number of gold employes was 650.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 179,277 cubic yards, of which 76,649 cubic yards were classified as rock and 102,628 cubic yards as earth.

Filling and Embankment—During May, 21,782 cubic yards of dry filling were added to the prism of the west dam at Pedro Miguel, increasing the total amount of material in place at the close of the month to 567,537 cubic yards. The backfill at Pedro Miguel was increased by 43,440 cubic yards, the total amount in place at the end of the month aggregating 628,700 cubic yards.

At Miraflores, 31,220 cubic yards were added to the dry fill in the toes of the west dam. The total quantities of dry and hydraulic filling in place at the end of the month were 1,203,854 cubic yards, and 661,048 cubic yards, respectively. The backfill was increased by 38,541 cubic yards, the total aggregating 556,265 cubic yards at the end of the month.

Pedro Miguel Lock—Excavation in the Canal prism between the Pedro Miguel and Miraflores locks was continued, two steamshovels being employed. One steamshovel was engaged during the month in excavating the high ground along the east side of the lock, and one shovel was used to excavate the foundation for the northwest wing wall. The spoil from these four shovels was utilized for backfilling behind the lock walls and for topping the west dam. The wooden trestle across the south end of the west lock chamber was completed. During the month, 8,109 linear feet of vitrified ducts were laid in the operating tunnels. The amount of iron placed in the masonry aggregated 411,909 pounds.

Concrete Work—The total amount of concrete and large stone laid at Pedro Miguel was 10,736 cubic yards, as compared with 9,460 cubic yards during April. The concrete was placed, as follows: Four thousand six hundred and twenty-nine cubic yards in the north center guide wall; 1,215 cubic yards in the northwest wing wall; 1,202 cubic yards in the east wall; 562 cubic yards in the center wall; 1,877 cubic yards in the west wall; 727 cubic yards in the southwest wing wall; 460 cubic yards in the floors; and 64 cubic yards around ducts, 50 cubic yards of which were placed in operating tunnel "A", and 14 cubic yards in operating tunnel "C."

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	4.02
Average number of mixers per day	5.77
Average hourly output per mixer (actual working time) cu. yds	14.79
Large stone laid, cu. yds	....
Concrete laid, cu. yds	10,672.00
Total concrete laid, cu. yds	10,672.00

Mixing plant consisted of one 2-cubic yard mixer, and a daily average of 4.77 ½-cubic yard mixers. Placing plant consisted of a daily average of 4.77 ½-cubic yard mixers discharging directly into forms, and a daily average of 2.96 locomotive cranes and derricks.

In addition to the above, 64 cubic yards of concrete, placed around ducts in operating tunnels, were mixed by hand.

Miraflores Locks—The work of sinking and filling concrete caisson foundations for the north center guide wall was continued; likewise, the construction of the reinforced concrete wall base girders supported by the caisson piers and the reinforced concrete wall proper. Dry excavation, principally in the Canal prism south of the locks, was continued, five steamshovels being employed. Work was continued in connection with backfilling behind the east and west lock walls. During the month, the amount of iron placed in the masonry aggregated 433,097 pounds.

Concrete Work—The total amount of concrete and large stone laid at Miraflores was 92,085 cubic yards, as compared with 107,211 cubic yards during April. The concrete was placed, as follows: Four thousand one hundred and sixty-eight cubic yards in the north center guide wall, 20,705 cubic yards in the east wall; 38,447 cubic yards in the center wall; 23,784 cubic yards in the west wall; 3,663 cubic yards in the floors, and 1,328 cubic yards in the southeast wing wall.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	12.00	12.00
Average number of hours worked per day laying concrete and large stone (actual working time)	6.06	6.32
Average number of mixers per day	7.81	8.38
	Cu. Yds.	*Cu. Yds.*
Average hourly output per mixer (actual time)	56.96	17.86
Average amount of concrete and large stone laid per hour, per berm or chamber crane (actual time)	60.45	....
Large stone laid	....	....
Concrete laid	68,865.00	23,230.00
Total concrete laid	68,865.00	23,230.00

Permanent plant consisted of four berm cranes, and four chamber cranes placing concrete from 2-cubic yard auxiliary mixers.

Auxiliary mixing plant consisted of a daily average of 2.35 2-cubic yard mixers, and a daily average of 5.54 ½-cubic yard mixers. Auxiliary placing plant consisted of 4.19 ½-cubic yard mixers discharging directly into forms, and a daily average of 3.65 locomotive cranes and derricks.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT.		Total.	Remarks
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	
Cardenas	Dipper	2,600	7,650	1,600	....	11,850	Scow measurement
Corozal	Ladder	57,531	57,530	....	....	115,061	Place measurement
Marmot	Ladder	2,537	13,321	....	....	15,858	Place measurement
Badger	Ladder	....	....	56,521	2,787	59,308	Place measurement
Culebra	Suction	160,251	....	....	....	160,251	Scow measurement
Total		222,919	78,501	58,121	2,787	362,328	
Hydraulic excavation	....	*86,890	....	....	....	86,890	Place measurement
Grand total	....	309,809	78,501	58,121	2,787	449,218	

*Excavated from Canal prism, south of Miraflores lock site.

Note—The scow measurement for the dredge *Badger* is 110,674 cubic yards, or almost double the place measurement. This seems to indicate that slides from the bank under water have occurred.

CHAMÈ SAND EXCAVATION.

Approximately 65,641 cubic yards of sand were excavated at Punta Chamè and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours)	16 00
Average number of hours per day (actual working time)	11.08
Average number of cubic yards crushed per hour, per working day	218.59
Average number of cubic yards crushed per working hour	352.78
Total output for the month, cu. yds	102,302.00

Relocation of Panama Railroad.

During the month, 8,377 cubic yards of material were excavated, increasing the total excavation at the close of the month to 10,177,136 cubic yards, and 40,065 cubic yards of material were placed in embankment, increasing the total for this purpose to 16,465,357 cubic yards.

No temporary trestle was driven during the month. At the end of the month, there were 64,512 linear feet of 70-pound, and 163,908 linear feet of 90-pound track. The force averaged 472 men.

Quartermaster's Department.

LABOR.

The force reports of the Commission and the Panama railroad show a decrease of almost 4,000 gold and silver employes since January 1, 1912, but the number of laborers in quarters remains almost constant.

QUARTERS.

The congestion continued in the Corozal and Pedro Miguel–Paraiso districts, all vacancies in bachelor and family quarters being filled. Provision was made to increase the quarters for gold bachelors in Corozal and Pedro Miguel.

MATERIAL AND SUPPLIES.

The value of material received during the month was $808,498.25. Supplies were delivered by 41 steamers, the total weight of cargo aggregating 38,505 tons, exclusive of lumber and piling.

On June 1st, 4,488,510 barrels of cement had been delivered under the contract with the Atlas Portland Cement Company. This contract called for 4,500,000 barrels, with an allowable increase of 15 per cent, of which the Commission is now taking advantage.

Subsistence Department.

The operation of the European laborers' messes, the colored laborers' kitchens, and the line hotels showed a net profit of $4,294.07. The operation of the Hotel Tivoli showed a net profit of $59.34. The net profit on subsistence operations was $4,538.53.

Department of Civil Administration.

COURTS.

During the month, 65 civil and 45 criminal cases were disposed of in the Circuit Courts, and 68 civil and 707 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for May amounted to $395,884.15, and the fees to $1,879.32. Receipts from stamp and card sales, and newspaper postage aggregated $6,450.42. The total collection of revenues made by the division was $18,517.13, and the collection on account of court fines, costs, and fees, $3,535.41.

Thirty-one vessels entered at, and 32 cleared from the port of Ancon, and 26 vessels entered and 27 cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 681, of whom 617 were men and 64 women. Twenty-eight nations, or 52 separate states and dependencies, were represented. The total number of arrests for the month was an increase of 40, as compared with the month of April. Eleven convicts were committed to the penitentiary and 12 were discharged, leaving 142 convicts in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,823.54, and the value of their work on Canal Zone roads was $2,577.50.

DIVISION OF FIRE PROTECTION.

Twenty-six fires were reported in the Canal Zone during the month, as compared with 45 in April. The damage to Commission property was $30.

DIVISION OF PUBLIC WORKS.

In the city of Panama the daily average consumption of water was 1,361,780 gallons, and in Colon, 1,343,773 gallons.

The usual inspection and maintenance work in this division was performed during the month.

DIVISION OF SCHOOLS.

The net enrollment in the white schools during the month was 1,240 and the average daily attendance, 904.7, or 94 per cent of the enrollment; and in the colored schools the net enrollment was 1,524 and the average daily attendance 688.4, or 80 per cent of the enrollment. Forty-six white, and 28 colored teachers were employed in the division on May 31.

Department of Sanitation.

The total number of deaths from all causes among employes was 33. These were divided, as follows: From disease, 19, from violence, 14, giving the annual average per thousand of 4.61 and 3.40, respectively, on the basis of the number of employes estimated by the Department of Sanitation. The annual average death rate per thousand among employes for the month of May, 1911, was 10.89.

The annual average death rate per thousand in the cities of Panama, and Colon, and in the Canal Zone, including both employes and nonemployes, based upon the population as estimated by the Department of Sanitation, was 19.01.

The average annual death rate per thousand for the month of May, 1911, among the same classes of population was 22.32.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 1.95; blacks, 5.50, giving a general average for disease of 4.61. For the same month during 1910, the annual average death rate per thousand from disease was: Whites, 5.42; blacks, 4.55, giving a general average of 4.77; and for the same month during 1911: Whites, 5.81; blacks, 8.97, giving a general average of 8.17.

Among employes during the month, deaths from the principal diseases were, as follows: Bright's disease (chronic nephritis) five; lobar pneumonia, five; tuberculosis of the lungs, three; disseminated tuberculosis, one; cirrhosis of the liver, one; malaria, one; and organic disease of the heart, one, leaving two deaths from all other causes, and 14 from external violence.

No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus during the month.

Respectfully,
H. F. HODGES, *Acting Chairman.*

OFFICIAL CIRCULAR.

Method of Purchasing, Issuing, and Accounting for Commissary Coupon Books.

CULEBRA, C. Z., June 11, 1912.

CIRCULAR No. 256-F:

The following changes in the method of purchasing, issuing, and accounting for commissary coupon books will be effective July 1, 1912:

1. One style of commissary coupon book will be issued by both the Isthmian Canal Commission and Panama Railroad Company to be designated "Panama Railroad Company Commissary Book."

2. All commissary books will be purchased and received by the Panama Railroad Company, and will be distributed to all issuing clerks by the cashier upon approved requisition forwarded to him by the local auditor.

3. Employes of the Panama Railroad Company charged with the duty of issuing books will make requisition for same on the local auditor, as heretofore.

4. Employes of the Isthmian Canal Commission charged with the duty of issuing books will make requisition on the local auditor of the Panama Railroad Company, in duplicate, for commissary coupon books. Requisitions for hotel books and meal tickets will be made to the Examiner of Accounts on a separate form, one copy only being necessary.

5. The commissary department of the Panama Railroad Company will, with the approval of the Chairman and Chief Engineer, make such changes in the present form of commissary coupon books as may be desirable.

6. The validating stamp of the issuing clerk will hereafter appear on the inside of front cover, in space provided for that purpose, and also on the back of issuing coupon No. 2, which is to be forwarded to the Examiner of Accounts or local auditor of the Panama Railroad Company by issuing clerks of the Isthmian Canal Commission, or Panama Railroad Company, with the monthly collection report.

7. No. 1 issuing coupon will remain in the books; No. 2 will be forwarded with the reports at the close of each month. Coupons Nos. 3 and 4 will be discontinued.

8. Issuing clerks will be required to sign by initials only on the line provided for the name of the employe issuing the book.

9. The practice of stamping "Silver roll" on books issued to silver employes will be discontinued, instead of which all books issued to gold employes will be stamped "Gold roll."

10. The restrictions against issuing books during the last two and first four days of each month are removed. Hereafter, all coupon books will be issued during each working day, as far as practicable, and without the limitation as to the denomination or number of each heretofore in effect. Heads of departments and divisions are required to see that books are issued to employes with as little restriction or delay as possible. Two dollar and fifty cent commissary books will not be issued to gold employes.

11. The method of issuing books to employes for pay roll deduction will be supplemented by the sales for cash system to gold employes at the commissaries of the Panama Railroad Company, under such rules and at such places as have been approved by me, effective June 1, 1912.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Stages of the Chagres.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The Gorgona debating club has accepted the challenge of the Cristobal debating club for a double joint debate, to be held simultaneously at the Gorgona and Cristobal clubhouses, Wednesday, June 26, and has selected the following subject: *Resolved*, That nations should disarm in the interests of peace." Each club will be represented by two teams of two men each, an affirmative and a negative team, the affirmative teams to remain at home and advocate the proposition, and the negative teams to visit the opposing clubs. Three judges will be appointed from the audience by the chairman of the respective meetings, their decision to be based on the merits of the arguments. Twenty minutes will be allowed each speaker and twelve minutes for the rebuttal. Cristobal has arranged to use the large hall for the debate and has extended an invitation to every one, ladies included. Its representatives will be Messrs. Dinnin and Kromer for the affirmative, and Messrs. Weaver and Matthews for the negative. Gorgona's representatives will be finally chosen at this week's meeting.

CULEBRA.

Gatun bowled at Culebra Saturday evening, with the following results:

Culebra.				Gatun.			
Mengel	98	86	92	Brennan	81	83	93
Palmer	105	82	91	Mock	77	83	81
Grier	82	79	71	Harper	81	100	105
Hill	93	94	86	Wilson	88	90	67
Case	94	93	87	Mohen	73		
				Hughes		77	54
Total	472	434	427		400	433	400

This was the closing game of the league, and places Culebra in second place.

The high scores of the week in duckpins were: Silver, 121; Plato, 109; Palmer, 105.

All the men interested in the athletic meet on the Fourth of July should sign the entry blank, and come out for practice.

The 1,000 point game of billiards between Conlon and Tragsdorf, the winning team of the Isthmian billiard tournament, was closed on Friday night, with 600 points due to Conlon being transferred to Cristobal. The scores were: Conlon 558 points; Tragsdorf 600 points. This gives Tragsdorf the championship in billiards in the Zone.

EMPIRE.

The Empire duckpin bowling team lost two out of three games Saturday, June 15 to the Cristobal team. Scores·

Empire.				Cristobal.			
Goolsby	85	79	91	Barrett	106	83	86
N. Giavelli	104	68	72	M. Cotton	91	77	82
L. Giavelli	84	94	85	C. Cotton	79	91	86
King	86	74	82	Orr	80	76	87
Gorham	79	80	98	Weston	82	76	87
Total	438	395	428		438	403	428

The first and third games were a tie. In the roll-off each team won one game.

A local political tenpin tournament has been started, and the following teams have entered: Progressives, Democrats, Socialists, Independents, Standpatters.

There is still time to register in the beginners' class in Spanish, which meets every Tuesday and Thursday night.

GORGONA.

Mr. George Stoehr has been appointed manager of the bowling alleys in place of Mr. Steve Haggerty who has left for his home in the United States. Mr. J. C. Deavours has been appointed manager of the pool room in place of Mr. Joe Orr who recently left the Isthmus.

Mr. G. W. Watson has arrived and has succeeded Mr. J. T. Hopkins as assistant secretary and physical director. Mr. Watson is training a squad for the Fourth of July meet at Ancon, July 4. Monday, Wednesday, and Friday at 5.15 and 7.45 p. m., will be practice periods for the meet. A training table will be established at the Gorgona hotel during the last two weeks before the meet.

Those interested in basketball are looking forward to the proposed local league to be started July 15.

The boys' gymnasium classes will meet on Monday and Wednesday at 3.45, and Saturday at 9.15 p. m.

The "Red Sox" lead, with the "Athletics" and "Reds," following, in the leaders' league membership contest. Powell leads high batting average with Deavours second. Hilty, Dixon, Hosden, Nagle, Le Sassier, Moyer, Deyo, Carpenter, Kuentz, Cogan, Emery, Goree, W. A. Jones, Clements, Douglass, Ellington, Boster, Halderman, Simka, Geisshart Lynch, and Keenan have scored in the contest.

CRISTOBAL.

On Friday evening, June 14, Rev. Father Cooper delivered an illustrated lecture under the auspices of the debating club, the lecture being on Guatemala. Many instructive views were presented. He has been asked to give another lecture with personal experiences, on the same country soon.

On Saturday evening, June 15, the Empire duckpin bowling team took two out of three games on the local alley, while the visiting team at Empire took two out of three on Empire's alleys. This, however, did not affect the standing of the teams which gives to Cristobal first place, thus winning the Isthmian duckpin tournament. The standing of the teams follows:

Team.	Won.	Lost.	P. C.
Cristobal	43	17	.716
Culebra	37	23	.601
Empire	34	26	.566
Camp Elliott	32	28	.533
Gorgona	18	42	.300
Gatun	16	44	.266

Highest average—Pinney, Empire, 27 games, pinfall 2,589, percentage, 95-24|27 per cent; second high average—Herring, Cristobal, 27 games, pinfall, 2,575, percentage, 95-10|27; third high average—Huttlemaier, Gatun, 30 games, pinfall 2,858, percentage 95-8|30 per cent.

G. R. Herring wins the Putnam medal for the highest average in duckpins for two consecutive months.

A new Royal massage electric machine has been placed in the barber shop.

GATUN.

Gatun won second place in the recent Isthmian billiard tournament. Gatun's players were Louis Townsley and Charles C. G. Wurster.

The Gatun checker club played a match game with the checker players of the Cristobal clubhouse on Wednesday evening, June 12. The results were:

	Won.	Lost.	Draw
Gatun	34	11	5
Cristobal	11	34	5

The individual scores of the Gatun players were, as follows:

	Won.	Lost.	Draw
Acher	8	1	1
Gartrell	7	1	2
Chatfield	7	2	1
Kuenhle	7	2	1
West	5	5	0

Gatun has also received challenges from Camp Elliott and Gorgona, and will probably play at the latter place on June 22. The Gatun clubhouse is encouraging the proposition of an all-Isthmian chess and checker tournament.

The comic opera entitled, "Sinbad the Sailor," will be given by the Gatun dramatic club during the last week of June.

Huttelmaier of Gatun won third place for high average in the Isthmian duckpin tournament.

Rainfall from June 1 to 15, 1912, Inclusive.

LOST—Between East Balboa and Ancon, a purse containing a sum of money and two checks. Finder is requested to return same to Ancon police station.

LOST—In the vicinity of the commissary, Camp Bierd, at about 5.15 p. m., June 8, one gold watch fob composed of eleven Costa Rican gold coins and one American gold piece, fastened together by gold chain links. Finder will please return to the Canal Zone police station, Cristobal, and receive reward.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, JUNE 26, 1912. No. 44.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Parcels Posts for the Canal Zone.

The department of Civil Administration has been authorized by the Acting Chairman and Chief Engineer to submit plans for a system of parcels posts effective between points in the Canal Zone. At this time, the Canal Zone Government, in common with that of the United States, transacts parcels post business with 53 states and provinces, including all the greater nations of the world, with the exception of Russia. Until a parcels post system has been established in the United States, however, it is not probable that the postal authorities of the United States would consent to an interchange of parcels post deliveries between the United States and the Canal Zone without direct legislation. But there is nothing to prevent the establishment of a local system for interstate exchange between Canal Zone offices.

Closing of Spillway Sluice Gates at Gatun.

The sluice gates in the ogee of the Spillway dam at Gatun, which were opened on June 5 to obviate flooding the caisson dam sills in the approach to Gatun Locks, on which some work remained to be done, were closed again on June 19. The surface of Gatun Lake was then 27.5 feet above sealevel and in the week following had risen to elevation plus 29.37 feet. The point at which future interference by the lake with the work in the locks might occur is the sills for the upper guard gates. Should the lake rise and flow over these it would flood the lock chambers. The tops of the sills are at elevation 37 feet four inches above sealevel, and efforts are being made to complete and close the upper guard gates before the surface of the lake will have reached that level. The west leaf for the gate in the east approach passed final inspection on June 26, and is ready for closing. On the same day the water test for the other leaf of the gate was begun. After the completion of the test, which will take several days, the bearing plates and sills remain to be adjusted. In the west approach, neither leaf of the upper guard gate is completed, but it is anticipated that the gate can be closed and made watertight within a few weeks. The miter gate moving machines for two of the leaves are installed and ready for use.

Whistling Buoy at Porto Bello.

During recent heavy weather the whistling buoy on Salmadina Bank, in the approach to Porto Bello, became detached from its moorings and stranded near the shore, opposite its original position. The buoy was recovered, is being repaired, and will shortly be reestablished at its former location.

Highest Steamshovel Record.

Steamshovel No. 257, (S. I. Lyons, engineer, and E. E. Austin, craneman,) working in the west borrow pit of Gatun Dam, excavated a total of 84,519 cubic yards. place measurement, in the month of May—26 working days—or an average of 3,250 cubic yards per day.

This is the highest monthly record for a shovel of any class since the beginning of operations on the Isthmus.

The six steamshovels, two 91-ton, and four 70-ton, working in borrow pits for Gatun Dam, and excavating for the hydroelectric plant, excavated a total of 287,107 cubic yards, place measurement, for the month of May.

The following table classifies the material excavated, and indicates the yardage of each shovel by place measurement:

Shovel No.	Cubic Yards.			No. of working days.
	Earth.	Rock	Total	
116	22,905	25,905	48,810	26
117	28,244	....	28,244	20
120	21,917	21,765	43,682	26
134	9,041	18,441	27,482	19
257	42,259	42,260	84,519	26
263	16,311	38,059	54,370	26
Total	140,677	146,430	287,107	....

Additional Pumping Facilities at Gamboa.

Owing to the low stages of water in the Camacho reservoir at Empire, and in the Carabali reservoir at Gorgona, due to the unusually light rainfall in those localities up to June 7, it was decided to transfer the pump, formerly used in sluicing earth from the face of the rock in the Porto Bello quarry, to the bank of the Chagres River at Gamboa to furnish additional facilities there. This pump has a capacity of 1,500 gallons of water a minute, working against a head of 250 pounds pressure, but it is believed that it will not be necessary to operate it against a head of more than 175 pounds pressure in the new service. Two centrifugal pumps have been supplying water along both banks of the Canal, between Culebra and Gorgona, since January 24. A 6-inch pipe supplies the needs on the east bank of the Canal, while 8-inch, 10-inch, and 12-inch lines extend along the west side of the Canal, supplying water at West Culebra, Empire, Las Cascadas, Camp Elliott, Bas Obispo, and Gorgona. At Gorgona, Chagres River water is used only for mechanical purposes; that for domestic use being taken from the Carabali reservoir, which has remained about stationary with only this demand upon it. Under the new arrangement, it is proposed to use the two centrifugal pumps to supply the 8, 10 and 12-inch lines, and the new pump to supply the 6-inch, working independently, but with crossovers from one side of the Canal to the other to equalize the pressure. Since June 7, several hard showers have occurred in this territory, and the water in the reservoirs has risen in consequence. Analyses of Chagres River water made thus far show that it compares well in potability with the water in the Canal Zone reservoirs.

Ancon Hospital Farm Operations.

Twenty-five cows have recently been added to the Ancon Hospital dairy farm, increasing the total to 125 head. The latest arrivals are mixed breed Jerseys, and were in very poor condition when they reached the farm. All of them were dry, but under improved feeding conditions, six have begun to give milk. The cows are housed in two stables, the larger one erected shortly after the beginning of the hospital farm operations, and the other converted out of an old French building. The Jerseys, Herefords, and other breeds are housed in the larger stable, and the Holsteins in the smaller, which, in addition, serves as a storehouse for feed. A short time ago it was found necessary to install new feeding troughs in the larger stable, as well as bars for keeping the cows in their places, the wooden, unsanitary ones having fallen into decay. The new troughs are built of concrete, while the bars are constructed of galvanized iron pipe. The latter embody the idea, but are a considerable improvement over the cumbersome wooden bars, held in place by wooden pegs, in common use. They consist of two upright rows of pipes, wide enough apart to accommodate the cow's neck, turning upon pivots attached to two longitudinal rows of pipes extending the length of the stalls. One of the upright pipes is in two sections, which can be joined together, or opened, by moving a bolt, which fits into it, up or down.

The present output of milk from the dairy is about 260 quarts daily. There has been some improvement in the production since the advent of the rainy season, for, while the cows are fed largely on imported material, such as cottonseed hulls and meal, bran, and sucrene, it requires better pasturage to increase the milk supply. An imported feed known as calfalfa was formerly used to a considerable extent, but an increase in price made its use unprofitable. Sucrene, a compound of cottonseed meal, gluten feed, molasses, oat clippings, and ground and bolted screenings, has taken its place to a certain extent. During the past year the dairy end of the farm has shown up well, and there has been only a slight mortality in the herd.

Another feature which is making favorable

NOTES OF PROGRESS.

(Continued.)

progress is hog raising, an experiment begun within the past eight months. There are now 62 pigs, large and small, in the drove, 43 ranging from suckling pigs to porkers weighing 150 pounds. The sows were all purchased locally and consist of the better grades of native stock. The only imported member of the drove is a Berkshire boar brought from New York State. The pigs of the first lot raised on the farm are large enough to be killed. The only feed given the hogs, apart from what they can root up in the yard, is swill from the hospital kitchen. One or two of the litters failed to come up to average, but curiously enough, the smallest sow in the lot recently gave birth to the record litter at the hospital farm to date, namely, nine.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 89 per cent completed, 201,748 cubic yards, out of a total of 225,000, having been placed at the close of work on June 22. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
June 17	108	5.30	1
June 18	136	7.15	1
June 19	128	7.15	1

June 22	100	6.30	1
Total	596	34.00	1
Previously reported	201,152		
Grand total	201,748		

Lock End of Pedro Miguel Dam.

Following the removal of the railway tracks which crossed the site of Pedro Miguel dam near the locks, the core of the dam has been extended and the central portion of it has reached the west backfill. Excavation is being made east of the present fill for the core, for the concrete return and core wall, which is to extend from the end of the northwest wing wall of the locks and be surrounded in part by the lower end of the dam. A pit 12 feet wide and about a hundred feet long is being sunk to bed rock by hand, with derrick and buckets, for the outer portion of these joining walls; and the space between the pit and the wing wall will be excavated by steam-shovel. In preparation for this, railway connections with the west upper approach chamber will be made with tracks on the west side of the dam, from the Cerro Luisa end, and tracks which now cross the interval between the pit and the wing wall will be removed.

Canal Equipment and Supplies.

The Quartermaster's Department carries in its records, a complete list of material and supplies in stock on the Isthmus. An inventory as of June 30, 1912, is in course of preparation, which will show a total, including valuation, of all material and supplies on hand at the close of the fiscal year 1912.

There is also carried in the Quartermaster's Department, a list by units, of all plant and equipment. This list was inaugurated October 1, 1911, and is now being completed and brought up to date, giving that acquired from the French Canal Company separately from that purchased by the United States.

This list will also be brought down to the close of the fiscal year 1912, and will show original cost, date of purchase, from whom purchased, and physical condition June 30, 1912. From this data, catalogues can be prepared from time to time when the plant units become surplus and are offered for sale.

The Secretary of the Interior was furnished a list on February 25, 1912, of equipment in service of the Isthmian Canal Commission, suitable for railroad construction work, with approximate dates of release from the service here.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration building, Ancon, on July 3. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration building at 8 a.m., on July 3, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability properly to operate an automobile, and must have the automobile with them.

CONCRETE WORK IN THE LOCKS

Over 87 per cent of the concrete for the locks is in place. the amount at the close of work on June 22 being 3,768,695½ cubic yards, out of a total of approximately 4,302,563. A total of 19,213 cubic yards of concrete was laid in the locks during the week ending June 22.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 22 being 1,878,885½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending June 22, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The eleventh biennial convention of the General Federation of Women's Clubs will be held in San Francisco, California, on June 25 to July 5. This is the first time since its affiliation with the General Federation that the Canal Zone Federation has not sent delegates to the biennial convention, the reason being largely one of distance. The Canal Zone Federation was organized on October 12, 1907, and federated at the biennial convention held in Boston in June, 1908. Mrs. Thomas E. Brown, Jr., was its representative at that meeting. At the Cincinnati convention, in June, 1910, Mrs. Hiram J. Slifer represented the Zone Federation. A report of the work of the Canal Zone Federation for the biennial period has been forwarded and will appear in the published report of the eleventh biennial, which will be issued in August, 1912.

The fifth year of the Gatun Woman's Club closed with a tea held at the Commission clubhouse on Thursday afternoon, June 6. The club will resume its meetings on October 10. During the recess, informal meetings will be held at frequent intervals in order that the business of the club may be transacted. The season just closed has extended over a period of eight months. During this time the club has held semimonthly meetings, alternating business and social sessions. At the social meetings, programs have been given, papers being read on topics of general interest. There was one social gathering to which the members invited their friends; two afternoon teas have been given, and one charity ball was held. The club assisted the Christmas committee with its preparations for the community celebrations. During the vacation period, the club secretary, Mrs. Charles H. Stoddard may be addressed on all matters pertaining to the business of the club.

The Empire Women's Club is still holding regular meetings and will continue open through the season. All the other clubs are taking a recess.

Miss MacLaren's Entertainments.

Miss Gay Zenola MacLaren, who has been playing at the Canal Zone clubhouses, and who appeared in Ancon on June 19, has been booked for two additional performances at Ancon Hall. On Friday evening, June 28, she will play Broadhurst's comedy, "Bought and paid for," and on Monday evening, July 1, a dramatization of Kate Douglas Wiggin's book, "Rebecca of Sunnybrook Farm" will be given. Miss MacLaren will play at Pedro Miguel on Saturday evening, June 29. The performances will begin at 8.15 o'clock in each case.

United Spanish War Veterans.

The second annual inspection and muster of Chagres Camp, No. 2, U. S. W. V., will be held in Kangaroo hall, at Empire, on Saturday evening, June 29, at 8 p. m. All members of Colonel Sibert Camp, No. 1, U. S. W. V., American Veterans of Foreign Service, and of the Army and Navy Union, are cordially invited to attend.

High School Notes.

The high school graduation exercises will be held at the Gatun clubhouse on Friday night, June 28. A special train will be run, in accordance with the schedule given below. No tickets will be required on this train. The public is invited.

The baccalaureate services were held at the Gatun clubhouse on Sunday, June 23, at 9.30 a. m., with Mr. C. C. Carr in charge. The sermon was preached by Major Henry A. Brown, Commission chaplain, his subject being "Education–Religion." Prayer was offered by Rev. C. O. Purdy, and solos were sung by Mrs. Vaughn, and Mr. Weston of Cristobal. Mrs. Farmer acted as accompanist, and Mr. Smith led the congregational singing.

Obituary.

Henry Schwartz, an employe of the Mechanical Department at Pedro Miguel, died at Colon Hospital on June 18. He was 46 years of age, single, and had been on the Isthmus seven years. He is survived by a brother living at Balboa.

Killed by a Train.

Felipe Cedoya, a Spanish laborer, check No. 18,200, was run over and killed not far from Bridge 52, near Bas Obispo, on Sunday evening, June 23, by a Panama railroad train. So far, the number of the train that struck him has not been ascertained, but it is believed to have been one south bound. Cedoya lived at Haut Obispo.

The Gorgona Catholic Club will hold a dance at the clubhouse on Saturday evening, June 29.

Corrections in Canal Medal and Bar Lists.

A list of corrections and changes to be made in the service medal and bar lists recently published in The Canal Record is given below. Distribution of medals and bars will take place in September, unless unforeseen delays occur. To employes whose services may have terminated by that time, delivery of medals and bars will be made from the Washington Office, and much unnecessary delay, as well as correspondence, will be obviated if all changes of address are promptly reported to the above office. The medal list for 1910–12 will not be compiled until the close of the current year, and the distribution of the medals and bars for same will not take place until September, 1913.

I. C. C. MEDAL LIST—1909–1911.

Hamill, Michael, January 25, change to Hamill, Michael, Jr.
Steele, Russell L., March 3, omit, is on first bar list.
Woods, Lewis F., March 5, change to Woods, Louis F.
Daly, Jay, March 23, change to Daly, J. E.
MacNeil, Henry T., April 3, change to Macneil, Henry T.
Fraser, Guy O., April 17, change date to April 16.
Cross, Laura L., April 27, change to Cross, Laura A.
Langvardt, Neils, May 1, change to Langvardt, Niels
Greene, Wendell, May 5, add name to list.
Peterson, Mauremus, May 11, change to Peterson, Maurenus.
Forde, Arthur A., June 8, add name to list.
Whitsel, Frank H., June 22, add name to list.
Noland, C. P., July 1, omit name from list.
O'Shea, Patrick, July 17, change to O'Shea, Patrick P.
Fonda, Gorge H., July 31, change to Fonda, George H.
Zidbeck, Gustav, August 2, add name to list.
Huff, William, September 3, change to Huff, William E.
Peak, Albert F., September 3, change to Peak, Alfred F.
Hait, Henry, September 12, add name to list.
Raper, William, September 20, change to Raper, William K.
Morrison, Harry, October 13, add name to list.
Boogs, Reinhard A., October 14, change to Boggs, Reinhard A.
Uderitz, George, October 19, change to Uderitz, George W.
Marshall, W. J., October 20, add name to list.
Koch, Jacob, October 32, change date to October 31.
Fleming, William, November 6, add name to list.
Patterson, Marian, November 21, change to Borgen, Marian P.
Freelove, Charles, December 2, change to Freelove, Charles T.
Witmer, George S., December 3, add name to list.
Thompson, Edward, December 14, omit name from list
Olsen, John F., December 18, add name to list.

I. C. C. BAR LIST—FIRST.

Long, John N., February 8, change to Long, John H.
Kidhle, Fred E., April 10, change to Kiehle, Fred E.
Bruck, Harry W., April 14, omit one of the names.
Fulford, Louis, May 23, change to Fulford, Rufus.
Fox, Egbert G., May 30, change to Fox, Egbert H.
Ruby, Clyde K., June 20, change to Rudy, Clyde K.
Fleming, Harry V., July 16, omit, belongs on second bar list.
Boyland, Harry H., September 2, change to Boylan, Harry H.
Eagan, John F., October 14, change to Egan, John F.
Beattie, J. Maclslin, October 15, change to Beattie, J. Macklin.
Clarke, John A., October 22, change to Clarke, John H.
Lampson, Orson W., October 27, change to Lampson, Orson R.
Cummings, Michael, J., December 8, change date to December 9.

I. C. C. BAR LIST—SECOND.

Cantwell, Matthew D., May 5, omit from list.
Rosenbaum, Alex. R., August 25, change to Rosenbaum, Alex. L.
Huston, J. Frank, October 10, change to Houston, J. Frank.
Beam, Walter I., October 23, add name to list.

P. R. R. MEDAL LIST.

Brooks, John C., Jr., February 26, add name to list.
Neal, T. E., June 1, change date to June 2.
Rhoden, N., August 12, change to Rohden, N.
Decora, J. G., August 20, change to DeCora, J. G.

P. R. R. BAR LIST—FIRST.

Rotherford, F. A., January 29, change to Rutherford, F. A.
Ganserit, R. G., May 20, change to Gansereit, R. G.

P. R. R. BAR LIST—SECOND.

Price, Harvey, April 28, change date to April 24.

Married.

WARDLAW–MARTIN—On Thursday, June 6, at the home of the bride's sister, Miss Nellie Grey Martin of Calypso, N. C., to Mr. James Langdon Wardlaw of Oxford, Miss., the Rev. Carl H. Elliott officiating. Canal Zone residence, Empire.

FILLITER–VON OFEN—On Saturday, June 1, at St. Luke's Hospital Chapel, Ancon, by the Rev. H. R. Carson, Agnes Brunhild von Olen of Liegnitz, Silesia, Germany, to D. F. S. Filliter of Dorset, England.

FLETCHER–HUNTER—In the Union Church, Cristobal, on Thursday, June 20, Mary Louise Hunter of Brooklyn, N. Y., to Mr. Cecil Gary Fletcher of Accomac, Virginia, Rev. Carl H. Elliott officiating. Isthmian residence, Colon.

MCKEE–OGG—In the Union Church, Cristobal, on Friday, June 21, Effie May Ogg of Mount Vernon, Ohio, to Mr. James Otis McKee of Coshocton, Ohio, Rev. Carl H. Elliott officiating. Canal Zone residence, Culebra.

BERESFORD–HALE—At Empire, on June 15, Ida M. Hale of Paraiso, to Mr. George Beresford also of Paraiso, the Rev. A. A. Nellis officiating. Canal Zone residence, Paraiso.

MALSBURY–SCHUBER—At Ancon, on Saturday evening, June 22, Carmen Schuber, daughter of Mr. and Mrs. James Buchanan Schuber of Panama, to Mr. Omer, E. Malsbury, Chaplain Henry A. Brown officiating in the first ceremony, at his residence, and Rev. Henry Pouget at the second service at the chapel of the Sacred Heart. Canal Zone residence, Culebra.

FOURTH OF JULY.

Outline of Program for Celebration at Ancon and Balboa.

The program for the observance of Independence Day at Ancon and Balboa on July 4 is, as follows:

MORNING.

Patriotic exercises at the Ancon baseball park, beginning at 9.15 o'clock. Tennis tournament, finals in singles, at 10 o'clock. Athletic events at the ball park at 10 o'clock. The I. C. C. band will furnish music during the patriotic exercises, and the band of the Marine Corps during the athletic contests.

AFTERNOON.

Fire department exhibition at 1.45 o'clock. Baseball game between picked teams at 2.45 o'clock. Tennis tournament, finals in doubles, at 3 o'clock. Aquatic events at Balboa at 3.30 o'clock. The Tenth Infantry Band will play at the ball park, and the Band of the Marine Corps, at Balboa docks.

EVENING.

Fireworks at 7.30 o'clock. Dance at Hotel Tivoli, beginning at 9 o'clock. The Tenth Infantry and I. C. C. bands will give concerts during the fireworks display.

Three 2-story buildings at rear of Hotel Tivoli, facing ball park, have been reserved for rest and dressing rooms—No. 46 for athletes. No. 47 for men, and No. 50 for women and children. Maids will be in attendance in house No. 50. Toilet rooms in Ancon schoolhouse reserved for women and children exclusively. Free check room in lodge hall.

Ice water and sanitary drinking cups may be found at Hospital gate, schoolhouse, ball park, Ancon market, and Zone boundary on Tivoli road.

A physician will be in attendance at Balboa dispensary during water sports, and at Ancon dispensary all day.

Information bureau and headquarters of refreshment committee will be at Ancon market until 9 a. m., when they will be transferred to the Hotel Tivoli.

Lunch will be served from 11 a. m. to 1 p. m., to men unaccompanied by women or children, in space between ball park and bachelor quarters at rear of Hotel Tivoli, and to women and children and their escorts at Ancon schoolhouse.

A member of the subcommittee on prizes will be present, near the judges' stand, at each of the places where events are to take place, who will be prepared to pay all cash prizes.

If the medal prizes, which are now on order in the United States, arrive in time they will be presented on the Fourth; otherwise, presentation will be made by Mr. A. C. Fechtig, chairman, committee on prizes, as soon as they arrive.

Independence Day Banquet.

The citizens of Gorgona will hold an Independence Day banquet on Wednesday evening, July 3, at the Commission hotel, when Col. Geo. W. Goethals will be the guest of honor. The object of the event is to furnish an opportunity for the residents of the village to gather socially before the abandonment of the village. There will be addresses by Mr. H. H. Rousseau, and a number of others. The Marine Band will play. The arrangements are in the hands of a central committee, the members of which are: Messrs. C. E. Whipple, chairman, F. Morrison, A. F. Cameron, R. C. Shady, and A. L. Robinson. Provision will be made for 350 guests.

PANAMA RAILROAD COMPANY.

TIME TABLE FOR PASSENGER SERVICE ON JULY 4, 1912.

Supplement No. 1 to Current Time Table No. 12, Effective from 4 a. m., Thursday, July 4, to 3.45 a. m., Friday, July 5, Only.

Train No. 119 will carry members of Marines and Infantry, ONLY, from Bas Obispo and Las Cascadas.

Train No. 121 will pull out on main line at Pedro Miguel and back up to station platform to discharge and load passengers.

Trains Nos. 121, 134, and 200 to 221, inclusive, will handle first-class passengers, ONLY.

Train No. 121 will not handle any passengers for Gorgona or intermediate points south to Culebra.

PEDRO MIGUEL EXCAVATION.

History of Operations at that Point During the French and American Times.

A steamshovel is engaged in leveling the low hill separating the lock at Pedro Miguel from that part of the village situated west of the Panama railroad, the material being used in the backfill of the east lock wall. The amount to be excavated when the shovel began operations was approximately 114,000 cubic yards. The hill formerly sloped east to the old Panama railroad track, and the section that was outside of the Canal prism at elevation plus 141 feet, covered to some extent by spoil from the upper part of the hill removed in the French times, is that which is being leveled. To the west, the hill formerly sloped southward to the Rio Grande to elevation plus 32.80 feet, and on the other side, it formed a valley in conjunction with another hill above elevation plus 88 feet. When the Americans took up the excavation work at this point, the most notable feature of the French operations to be seen was an irregular-shaped hole, with sides of solid rock, which was known on the French canal plans as lock No. 9.

During the French administration, Pedro Miguel was a subsection of Paraiso, situated in a loop formed by the Rio Grande. The total length of this subsection, as laid out by the French, measured along the axis of the canal, was about 2,782 feet, and the total excavation to be made down to elevation plus 39 feet was approximately 1,307,900 cubic yards. The original contract for excavation was awarded on September 28, 1883, to a Frenchman named Carcenac, who was a cousin of the second Madame deLesseps, and during its existence about 514,615 cubic yards of material were removed. It extended from the present Station 1921 plus 55 feet to Station 1949 plus 37 feet. Mr. Albert Millet, a Frenchman, who had graduated at Troy, N. Y., joined Mr. Carcenac, but the firm was dissolved shortly afterward when the latter decided to return to France. Mr. Pierre Gey then became connected with the enterprise, and the work was continued by Millet and Gey until 1885, when M. Fillippi R. was given a 25 per cent interest in the firm. In 1887, another member was added in the person of M. Coiret, but the arrangement did not continue long, for the same year the work was merged, for financial reasons, in the general contract of Baratoux, Letellier & Company, who had assumed the contract from, but not including Culebra, to Naos Island, with the exception of the part included in the site for lock No. 9, which was turned over to Erzinger, Delphieux & Company, subcontractors for M. Eiffel, the general contractor for the locks, early in 1888. The remainder of the work in this section continued under Baratoux, Letellier & Company until the failure of the first French company.

In 1888, the Pedro Miguel contract was cancelled on account of the plan of the canal having been changed from sealevel to lock, and, by reason of this action, the contractors were awarded an indemnity. The amount paid the contractors at the start by the first French company, for every class of material, which, at Pedro Miguel, was principally rock, was $1.40 silver per cubic meter, but contracts made later carried different prices. Originally, silver was at a discount of only 16 to 24 per cent, but at the time the contract was dissolved, it had reached 150 per cent.

In beginning the excavation work at Pedro Miguel, the contractors made a pick and shovel attack on the hills on all sides, transporting the soil outside of the prism with Decauville cars, furnished by the canal company. The latter charged a ten per cent rental on all equipment supplied, for wear and tear, which not only applied to cars, locomotives, and excavators, but to rails, ties, and to houses, as well. Lumber, coal explosives, and other material purchased outright from the canal company was paid for at the company's valuation.

The excavation work at Pedro Miguel was begun by making benches at intervals of about 16 feet, in order to get into the hill with the heavier equipment. This equipment consisted of two Osgood steamshovels, and two Weir and Richmond excavators, together with a number of 4 and 6-meter dump cars, and four locomotives. All the clay, covering the rock in the hill was taken away with the lighter equipment, the larger equipment being used, in the main, in excavating on the Paraiso side of the hill. The rock was composed partly of a dike of diabase, and partly of calcareous sandstone and tuff. At elevation about 39 feet, a ledge of carboniferous shale was encountered. It is recorded that the Osgood shovels showed poor results at this point, and, although the excavators did better, the output never went much higher than 100 cars a day.

An official profile of this section, as of February 21, 1887, shows that some material had been removed between September, 1886, and the former date, but none of the elevations had been much changed. A profile of May, 1889, made to set forth the status of the work at the time of the failure of the old company, shows, with the exception of the pit at lock No. 9, the bottom of the excavation to have been about elevation plus 56 feet to elevation plus 75 feet.

Steamshovel excavation was started at the Pedro Miguel lock site in September, 1905. Prior to December 31, 1908, the Central Division forces removed 1,664,349 cubic yards of material between Station 1919 plus 30, the dividing line between the Central and Pacific Divisions, and Station 1954. During the period, November, 1910 to June 1, 1912, the Central Division forces have excavated 278,104 cubic yards of material between Station 1919 plus 30 and Station 1933, making a total of 1,942,453 cubic yards removed by the Central Division from the present limits of the Pacific Division. Work by the Central Division was carried down to elevation plus 40 feet over the greater portion of the lock site. The lock and dam section of the Pacific Division began excavating at this point in June, 1908, and up to date has removed a total of 1,291,459 cubic yards.

PERSONAL.

Among the passengers on the *Ancon*, which arrived at Cristobal on Monday, June 24, were: Col. W. C. Gorgas, accompanied by his wife and daughter; Lieut.-Col. W. L. Sibert, accompanied by his son; Lieut.-Col. Chas. F. Mason, accompanied by his son; and Maj. T. C. Dickson and family.

St. John's Day Banquet.

St. John's Day was celebrated by the Masons on the Isthmus by a banquet, which was held at the International Hotel in Panama, on Saturday night, June 22, under the auspices of the Ancon, Corozal, and Pedro Miguel Masonic clubs. About 80 Masons were present. Judge S. E. Blackburn officiated as toastmaster, and addresses were made by Justice H. A. Gudger, Rev. A. A. Nellis, Dr. Reeder, and Rev. W. H. Decker.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending June 22:

DATE.	Hours worked.	Cubic Yards.

OFFICIAL CIRCULARS.

Independence Day, A Holiday.

CULEBRA, C. Z., June 25, 1912.

CIRCULAR No. 453:

Independence Day, Thursday, July 4, 1912, will be observed as a holiday in the Canal Zone, and, as far as practicable, all public business will be suspended on that day.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Tables of Annual Rates of Pay for Hourly Employes

CULEBRA, C. Z., June 14, 1912.

CIRCULAR No. 451:

The following annual rates of pay for hourly employes will be used by all divisions and departments in the preparation of estimates for the fiscal year 1914:

Annual pay for 311 days for hourly employes entitled to gratuity pay for holidays.			Annual pay for 304 days for hourly employes not entitled to gratuity pay for holidays.		
Rate. Cents.	8 hours per day. Amount	9 hours per day. Amount	Rate. Cents.	8 hours per day. Amount	9 hours per day. Amount

In the comparative column showing present organization as of June 30, 1912, the same annual rates shown above for hourly men should be used.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Time Lost Due to Illness or Injury.

CULEBRA, C. Z., June 18, 1912.

CIRCULAR No. 297-c:

The instructions which are in effect for monthly employes—that time lost due to illness or injury, which is the result of the fault or misconduct of the employe, will not be credited as service entitling the employe to leave with pay—will, in the future, apply also to hourly employes.

This amends Paragraph 9 of Circular No. 297-B.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Personal Calls on Telephone Lines.

CULEBRA, C. Z., June 19, 1912.

TO ALL CONCERNED:

Attention is directed to instructions contained in Circular No. 433 that telephones installed for official use are not to be used for personal calls of employes during business hours, except in case of emergency. This applies more particularly to the hours from 7 to 12, and from 1 to 5. During these periods it is absolutely necessary that the 'phones be used only for official purposes so far as practicable.

H. F. HODGES, *Acting Chairman.*

Procedure of Employes Detailed for Service in Supervision of the Panama Elections.

CULEBRA, C. Z., June 24, 1912.

CIRCULAR No. 452:

The following procedure, in connection with I. C. C. employes detailed for service on the supervision of the elections to be held in the Republic of Panama in 1912, is furnished for the information and guidance of all concerned:

1. Each employe will be detailed to this work upon the request of the supervisory officer in charge, who will advise the Examiner of Accounts, by written notice, in duplicate, of the date on which the service is to begin.

2. Written notice, in duplicate, will also be furnished the Examiner of Accounts by supervisory officer in charge for each employe when the work is finished, giving the beginning and ending dates, inclusive, of the special duty assignment.

3. Each employe will be carried on the pay roll and paid by the I. C. C. for his full time, including time on special duty. Roll should show in remarks column in each case: "Pan. Elec. Duty, from .... to ....," both dates inclusive.

4. The cost accountant in each division or department will charge on his abstract of expenditures—Form C. E. 132-2—"Individuals and companies, Panama elections," the full value of time of employes while engaged in this work, and support the charge with detailed list of such employes, showing roll and pay references, rate of pay, inclusive dates of the detailed duty, total number of units, and extension in money.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Rules and Regulations Regarding the Examination, Treatment, and Care of Water Supplies from a Sanitary Standpoint.

CULEBRA, C. Z., May 22, 1912.

CIRCULAR No. 441:

1. These rules and regulations will cover all regular, auxiliary, and emergency water supplies for domestic use under the jurisdiction and control of the Isthmian Canal Commission and Panama Railroad Company.

2. The inspection, sampling, testing, analysis, and treatment of the water supplies shall be performed, under the direction and subject to the responsibility of the division engineer having jurisdiction, by two physiologists, one employed under the Atlantic Division and the other under the Pacific Division, whose jurisdiction for this purpose shall be territorially limited, as follows:

Physiologist, Atlantic Division—From New Frijoles northward, including Toro Point and Porto Bello.

Physiologist, Pacific Division—From Tabernilla southward, including any islands on the Pacific side.

Any division or department head may avail himself in the usual manner of the services of either of the physiologists for special analysis of the regular, or other water supplies.

3. The following rules will govern the inspection, sampling, testing, and analysis of water supplies from a sanitary standpoint:

(*a*) A complete chemical, microscopical, and bacteriological analysis of the raw, untreated waters of all reservoirs shall be made at least once each month, the results of which, together with statement of any changes noted in analysis, as compared with previous ones made, with reasons therefor if any are apparent, and any recommendations having in view the correction of any faults found, shall be promptly reported to the division engineer having jurisdiction.

(*b*) There should be attached to the report covered by section (*a*):

(1) A bacteriological and microscopical report of all filtered waters, including the results of such examinations of the bacterial content, alkalinity, and color of both raw and filtered water as are made from day to day at the filter plants, which daily examinations should be made in all cases, except where the filtration is of the nature of preliminary treatment, as for instance, at Miraflores.

(2) A bacteriological analysis of all condensed waters, both as it goes from the condensers and in the distributing cart. If the analysis shows a high bacteria content in either case an immediate report by telephone, to be confirmed as soon as possible by letter, should be made to the division engineer having jurisdiction, with proper recommendations to rectify the same.

(*c*) When any marked change in the character of a water supply occurs, as for example, the appearance of anabæna, an increase in the chlorine or B. coli content, etc., such change should be reported at once by telephone to the division engineer having jurisdiction, with recommendations for the rectification of the same, and confirmed in writing as soon as practicable thereafter.

(*d*) The methods of analysis are to be those of the American Public Health Association, excepting with regard to bacterial counts which should be made with + 1. agar incubated at room temperature.

4. The following rules will govern the care and maintenance of water supplies from a sanitary standpoint:

(*a*) An inspection shall be made at least twice a month of all reservoirs and filters, and a report thereon in writing made to the division engineer having jurisdiction, covering such matters as condition of water supply, manner of drawing water from reservoirs, treatment of waters, and method of handling the filters, which recommendations will form the basis of such instruction to the physiologist as the division engineer thinks proper. The amount and character of chemicals to be used in treating water and method of applying same will be subject to the supervision of the physiologists.

(*b*) As little water as practicable should be allowed to flow over the spillways. When the rising water in a reservoir reaches the crest of the spillway, the main blow-off valves should be opened whenever practicable and the water from the lower layers of the reservoir allowed to escape until the level of the water in the reservoir drops to a short distance below the spillway crest. The blow-off valves should be opened only upon the authority of the division engineer, upon the recommendation of the physiologist, and custodians of reservoirs will keep the physiologist informed in regard to this matter.

(*c*) Wherever practicable water drawn from any reservoir for domestic use shall be taken from as near the surface as possible.

(*d*) Hunting and picnicking one reservoir watersheds, and fishing or boating on reservoirs is absolutely forbidden. Custodians and others connected with water supplies will see that this rule is enforced. The police department will inspect all reservoir watersheds at least three times each month at regular intervals, to prevent trespassing thereon.

5. All reports herein directed to be made by the physiologists shall be forwarded, in triplicate, to the division engineer having jurisdiction, who will forward one copy thereof to the Chairman and Chief Engineer and one copy to the Chief Sanitary Officer.

6. The Department of Sanitation will examine carefully all copies of reports respecting water supply matters forwarded to it, and submit to the Chairman and Chief Engineer any comment or recommendations thereon which it considers desirable or necessary. It may also make any check analysis desired at any time.

7. The Department of Sanitation will be advised at once by the head of department concerned of the use of any other than a regular water supply for the furnishing of water for domestic purposes; and no new source of supply for domestic use shall be used, except after examination thereof by the physiologist having jurisdiction, and the submission by him to the division engineer concerned of recommendations thereon covering the fitness of water for domestic use, proper location for intake, any necessary treatment of water before consumption, etc.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Acting General Foreman, Mechanical Department, P. R. R.,

PANAMA RAILROAD COMPANY,
COLON, R. P., June 18, 1912

TO ALL CONCERNED:

During the absence, on leave, of Mr. H. H. Readle, general foreman, mechanical department, effective June 19, 1912, Mr. Joseph Bryant will act as general foreman of that department.

J. A. SMITH, *General Superintendent.*

Family Quarters.

Applications for married quarters on file on May 31, 1912, were, as follows:

DISTRICT.	List No 1.	List No. 2.
Ancon	4 (2)	60 (15)
Ancon Hospital	....	2
Balboa	....	38 (9)
Bas Obispo	....	37 (6)
Corozal	1	60 (13)

Total	9 (5)	733(147)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhousekeeping family quarters at stations other than those at which applications are filed.

LOST—On June 12, in Cristobal, or Colon, a small alligator purse containing money, a ring, and I. C. C. brass check No. 107657. Finder will please return to Toro Point police station and receive reward.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The official scorer of the duckpin league, Mr. Geo. A. Barte, reports the following results in the contest for individual medals: Highest average, Pinney, Empire, 95 per cent and 24 pins; second high average, Herring, Cristobal, 95 per cent and 10 pins; third high average, Huttlemaier, Gatun, 95 per cent and eight pins. Greatest number of marks, Pinney, Empire, six strikes; 42 spares. Three high games, Herring, Cristobal, 323. High scores, Weston, Cristobal, 125; Huttlemaier, Gatun, 125.

COROZAL.

The bowling match between Gorgona and the local team, June 22, resulted, as follows:

Gorgona.				Corozal.			
Davis......	180	120	154	Coonly.....	181	159	210
Arnold.....	116	145	93	Metzger....		126	143
Reichte....	124	147	152	Westcott...	100		
Trieger.....	132	135	140	Sims.......	147	147	142
C. Sims....	157	156	137	Souder.....	100	168	140
				Sessum.....	161	136	142
Total....	709	703	676		689	736	777

A farewell reception was given Mr. Geer on Wedoesday evening, June 19. Short speeches appropriate to the occasion were made. As a testimonial of regard, Mr. Geer was presented with a purse of $100 by the people of Corozal. Mr. R. L. Dwelle has been appointed acting secretary.

CULEBRA.

The volleyball teams of Culebra are organizing a local league, and will play a number of games to see which department in the Chief Engineer's office will be the winner. On Thursday evening, Mr. Warner's team was defeated by Mr. Baumer's team; score 2 to 1.

The basketball players are also planning a local league. Any one desiring to join can leave name at the secretary's desk.

The following are high scores in duckpins made during the week ending June 22: Palmer, 106, 104; Hobart, 106; Crain, 102; Case, 102.

EMPIRE.

The political tenpin bowling tournament was started Friday, June 21, when the Democrats bowled the Independents, the former winning two games out of the three played. This week's schedule is, as follows: Monday, June 24, Progressives versus Socialists; Friday, June 28, Democrats versus Socialists. Two games will be bowled each week until the series have been completed.

A gymnasium class for men engaged in night work will be held on Monday and Wednesday afternoons at 2 o'clock. A squad of men from this class is training for the Fourth of July athletic meet.

GORGONA.

At the meeting of the Current Topics club held Wednesday night, June 19. Messrs. Morrison, Levering, Beetham, Beebe, Taylor, and Grossberg were chosen to represent Gorgona in the debate to be held between Cristobal and Gorgona on Wednesday night, June 26.

The Catholic Club has been granted the use of the hall on Saturday night, June 29, and will give an entertainment and dance, the proceeds of which will be used for the Gorgona Catholic Church. Tickets are $1 gold. All are invited.

A mock trial will be held Friday night, June 28, at 7.30 o'clock. Admission is free, and all are invited to attend. The following men will participate: Messrs. Emery, Morrison, Ivanhoe, Taylor, Cogan. Mr. Roger Adams will act as judge.

Mr. T. L. Powell leads in the leaders league membership contest with Mr. J. C. Deavours in second place. The "Red Sox" team leads, with the "Athletics" second, and the "Phillies" third. Nearly 100 members have been secured in the league contest which closes Saturday night, June 29, at 12 o'clock.

GATUN.

"Singbad, the Sailor," a comic opera in three acts was presented by the Gatun dramatic club at the clubhouse on Tuesday evening, June 25. Special scenery was painted for the occasion. Seats were all sold on Monday night, and many stood. The participants, and the characters they represented were, as follows: Princess Aminta, Miss Eva Harris; Queen Gulnara, ruler of the Silent Isle, Mrs. C. H. Harris; Tuleika, wife of Murad, and an attendant of the queen's, Mrs. E. V. L. Finch; Lazula, prize vocal pupil, Miss Dagney Hanson; four pupils in Singbad's music school, Miss Emma Whiston, Mrs. F. E. Parmeter, Mrs. Caldwell, Miss Josephine Baker; Murad, the captain of the guard, A. C. Arthur; Ajib, the court magician, W. B. Wheeler; Singbad, a musical mariner, C. C. Carr; Hassan, his Nubian slave, J. T. Neely; Haroun al Raschid, caliph of Bagdad, H. E. Ruckert; a herald, O. Thompson; Muncho, king of cannibals, Chas. Ourand; Cruncho, Geo. W. Huttlemaier; Ginger, S. P. Dennis, Blab, A. J. Coleman; Flub, C. E. Vierbuchen; other cannibals, Messrs. Thompson, Crowell, Plummer, Duey; lady attendants to the queen, Miss Whiston, Miss Stephenson, Miss Hanson, Mrs. Caldwell, Mrs. Parmeter, Miss Murray; soldiers, courtiers, etc., Messrs. Dennis, Crowell, Loulan, Kernish, Plummer, Duey, Carr, Wilkie, Delgado, Swan, Wood. Scenes—Act 1, seashore, Silent Isle; Act II, palace gardens; Act III, seashore, Silent Isle. Period, that of the Arabian Nights. Musical director, A. B. Dickson; stage director, C. C. Carr; business manager, F. G. Smith; designer of costumes, Mrs. C. H. Harris; piano accompanist, H. F. Bronson; scenic artists, J. H. Reichard and Max Hienstorfer; stage carpenter, E. B. Clark.

Doyle has high score in tenpins so far in June—208 pins.

Mr. Geo. Huttlemaier has been appointed bowling alley attendant.

Moving pictures will be shown on Saturday night, instead of Monday, as previously announced.

CRISTOBAL

The next moving picture show will be held on Friday evening, June 28. Messrs. Glick and Weston will furnish music between the films. Several illustrated songs will be sung in which the audience will be requested to participate.

On Wednesday evening, June 19, the literary and debating club held its election. The following officers were chosen: President, G. K. Weston; vice-president, A. B. Shippee; secretary, H. L. Walsh. The last meeting of the club will be held on June 26, after which a vacation recess will be taken until Wednesday, September 4, when it will reconvene as a congress. This club has been one of the strongest features of clubhouse activity in Cristobal, drawing to its debates many hundreds of the residents of Cristobal during the past year. The joint debate assigned to take place between Gorgona and Cristobal on Wednesday evening will be an open program to which the public is invited. Admission will be free. Refreshments will be served. The I. C. C. orchestra will furnish special music.

Mr. F. L. Bernsee, champion checker player of the Isthmus, will entertain at simultaneous checkers all players of the Cristobal clubhouse, and such others as he may choose to invite, on Thursday evening, June 27, at 8.15.

CAMP ELLIOTT.

An exhibition of checker playing was given by S. L. Bernsee of the Cristobal clubhouse, on Saturday evening, June 22, during which twelve boards were played simultaneously. Twenty-two men played 71 games, of which 65 were won by Mr. Bernsee, four were lost, and two were draws.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmain Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the two weeks ending June 22:

Cristobal, June 8, from New York, with 500 cases turpentine, 118 barrels coal tar, 115 kegs nuts, 870 kegs nails, 225 pieces pipe, for stock; 75 cases springs, Atlantic Division; 32 casks brass tubes, 116 pieces structural steel, Panama Railroad Company; 32 cases castings, 90 packages castings, superintendent of erection; 85 pieces snubbing posts, 114,359 bags cement Pacific Division.

Sixaola, June 8, from New York, with 410 coils rope, 10 cases sundries, for stock; 36 cases castings for superintendent of erection; 254 pieces lumber, for Mechanical Division.

Advance, June 10, from New York, with 9 cases bolts, 180 cases soap, 100 bags tie plugs, 300 bundles brooms, 273 barrels brick, 67 cases lanterns, 100 drums thermit, 20 kegs chalk, 1,000 pieces steel bars, 34 pieces steel plates, 20 kegs horseshoes, 117 bundles galvanized steel sheets, 420 kegs nails, 12 cases wire, 15 cases handles for stock; 100 cases dry goods, 75 cases drugs and sundries, for Sanitary Department; 7 cases dredging sleeves, for Atlantic Division; and a miscellaneous cargo, the whole consisting of 3,700 packages, weighing 265 tons.

Prinz Joachim, June 10, from New York, with 77 pieces creosoted lumber, for Panama Railroad Company

Bongor, June 11, from New York, with 103,499 bags cement, for Pacific Division.

Pennsylvania, June 11, from San Francisco, with 11 bales dredging sleeves, for Atlantic Division.

Almirante, June 12, from New York, with 18 crates handles, 400 pieces pipe, 550 kegs spikes, for stock; 74 pieces castings, for superintendent of erection; 261 pieces lumber, for Mechanical Division.

Parismina, June 13, from New Orleans, with 200 cases soap, 8 cases cotters, 2,322 pieces lumber, 40 pieces piling, 1,152 pieces pipe, 392 drums oils, 200 cases grease, for stock; 1,827 pieces lumber for Mechanical Division.

Armenia, June 14, from New York, with 25 cases turpentine, 48 pieces steel plates 6,404 pieces sewer pipe, 45 cases glass, for stock; 1,225 car wheels, for Mechanical Division, Gorgona; 492 pieces lumber, for Mechanical Division; 216 bundles castings, 701 pieces structural steel, for superintendent of erection.

Hoyle Bank, June 14, from New York, with 1,500 tons structural steel, for superintendent of erection.

Panama, June 14, from New York, with 25 bundles bar iron, 50 cases steamshovel parts, 35 cases paint, 200 barrels sulphate alumina, 840 bundles roofing iron, 18 cases horseshoes, 37 cases paper, 21 barrels pipefittings, 18 kegs washers, 30 bales oakum, 15 cases mining machinery, for stock; 150 cases springs, for Atlantic Division; 64 bundles car springs, 23 pieces lumber, for Mechanical Division; 17 bundles pipe, 1,599 crates tiled slabs, 76 kegs rivets and bolts, 23 crates valves and fittings, 9 crates half-domes, for Panama Railroad Company; 50 barrels insulaters, 26 bundles cover seats, 15 cases castings, for superintendent of erection; 19 cases dry goods, 26 cases laundry machinery, 25 cases drugs and sundries, for Sanitary Department; and a miscellaneous cargo, the whole consisting of 4,545 packages, weighing 485 tons.

Carrillo, June 15, from New York, with 400 pieces black pipe, 12 cases rubber hose, for stock; 66 pieces steel plates, 45 cases castings, 10 bundles castings, for superintendent of erection.

Thames, June 16, from New York, with 122 barrels coal tar, 200 pieces steel plates, for stock.

Haakon VII, June 17, from Gulfport, with 1,101 pieces cross-ties, for Panama Railroad Company; 231 pieces lumber, for Mechanical Division,; 83 pieces piling; for Atlantic Division; 1,926 pieces piling, for stock.

Prinz Eitel Friedrich, June 18, from New York, with 75 bundles spring steel, 7 bundles steel bars, for stock.

Sonta Morta, June 19, from New York, with 9 cases castings, for superintendent of erection; 9 cases electrical material, 16 cases oil, 173 bundles pipe, 113 pieces lumber, for Mechanical Division; 725 pieces pipe, 14 cases brass sheets, 12 cases hardware, for stock.

Abongarez, June 20, from New Orleans, with 5,289 pieces lumber, for Mechanical Division; 3,625 pieces lumber, 73 pieces piling, 49 rolls cotton duck, 109 bundles car parts, 10 cases paint, 34 pieces steamshovel castings, 100 cases lard oil, 300 cases grease, for stock; 81 cases brass bolts, for superintendent of erection.

Allianco, June 21, from New York, with 75 cases steel springs, for Atlantic Division; 125 cases electrical material, for Mechanical Division; 267 packages sheet cork, 64 pieces steel beams, for Panama Railroad Company; 100 cases drugs and sundries, for Sanitary Department; 17 cases bottles, 13 cases oils, 1,000 kegs lead, 30 cases paint, 30 cases lead washers, 300 bundles roofing paper, 200 pieces steel plates, 115 bundles tie plugs, 67 cases candles, for stock; and a miscellaneous cargo, the whole consisting of 2,735 packages, weighing 330 tons.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, June 22, 1912. All heights are in feet above mean sealevel.

Misdirected Letters.

ANCON, C. Z., June 26, 1912.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Black, C. A.
Boswell, J. H.
Clark, E. B.
Conner, F. W.
Corwin, Dexte
Crols, Mrs. Leopold
Davis, John R.
Durning, W. J.
Fels, Capt. J. G.
Hake, Jacob A.
Hedde, P.
Hilty, Chas.
Hinds, E. Garfiled (2)
Hollar, Wm. J.
Klager, Matt C.
Lovell, Mrs. Earnest
Meisner, H. Frank
Mitchell, Reggie
Moran, W. M.
Morehead, Harrie H.
Morton, Brett A.
Phillips, Joseph L.
Pike, Wm.
Pitts, J. J.
Ridley, Hubert I.
Rielley, H. I.
Roberts, L. A.
Rose, Mrs. W. H.
Ross, C. C.
Shay, Charles D.
Suarez, Luis Valle
Thompson, William L.
Tonhey, John
Thornbury, Miss Ellen
Watson, George W. (2)

COMMISSARY DEPARTMENT.

The commissaries are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning June 26, 1912.

FRESH MEATS.

	Price.
Mutton—Stewing, per pound	6
Shoulder, neck trimmed off (4 pounds and over), per pound	9
Entire forequarter (not trimmed, 10 pounds and over), per pound	8
Leg (8 to 10 pounds), per pound	17
Cutlets, per pound	18
Short cut chops, per pound	20
Lamb—Stewing, per pound	6
Entire forequarter, neck trimmed off, per pound	9
Leg (5 to 8 pounds), per pound	20
Chops, per pound	24
Cutlets, per pound	24
Veal—Stewing, per pound	10
Shoulder, for roasting (not under 4 pounds), per pound	12½
Chops, shoulder, per pound	16
Chops, per pound	24
Loin for roasting, per pound	24
Cutlets, per pound	28
Pork—Loin chops or roast, per pound	18
Beef—Suet, per pound	2
Soup, per pound	5
Stew, per pound	8
Plate, per pound	9
Corned, No. 1, per pound	12
Corned, No. 2, per pound	10
Chuck roast (3 pounds and over), per pound	12
Pot roast, per pound	12½
Rib roast, second cut (not under 3½ pounds,) per pound	16
Rib roast, first cut (not under 3 pounds), per pound	18
Sirloin roast, per pound	19
Rump roast, per pound	19
Porterhouse roast, per pound	20
Steak, chuck, per pound	12½
Round, per pound	13
Rib, per pound	18
Sirloin, per pound	19
Rump, per pound	19
Porterhouse (not less than 1½ pounds), per pound	20
Tenderloin (Western), per pound	25
Venison (Imported), Stew, per pound	6
Forequarter (not under 6½ pounds), per pound	9
Rack (not under 5½ pounds), per pound	20
Saddle (not under 7½ lbs.), per pound	20
Leg (not under 9 pounds), per pound	20
Chops, per pound	24
Cutlets, per pound	24

MISCELLANEOUS.

Caviar, Russian in ½-lb. jars, jar	89
Livers—Beef, per pound	11
Calf, each	60
Half, each	30
Steak, Hamburger, pkg	13
Sausage—Bologna, per pound	10
Frankfurter, per pound	12
Lieberwurst, per pound	†13
Devonshire Farm, per pound	19
Sweetbreads—Beef, per pound	25
Eggs, fresh, dozen	26
one-half dozen only	14
Bluefish, per pound	11
Halibut, fresh, per pound	12
Salmon, fresh, per pound	14
Fluke, fresh, per pound	10
Shads, fresh, each	50
Roes, shad, pair	25

POULTRY AND GAME.

Chickens—Fancy roasting, milk fed, large, each	1.35
Fancy roasting, milk fed, med., each	1.00
Fancy roasting, corn fed, about 5½ pounds each	1.10
Fancy roasting, corn fed, about 4½ pounds, each	90
Fowls, each ††60, 70, 80, 90,	1.00
Ducks, Western, about 4½ pounds, each	†1.35
Hens, milk fed, for roasting, about 3 pounds each	50
Broilers, milk fed, each	70
Broilers, corn fed, each	60
Turkeys, per pound	23
Squabs, each	35
Capons, each	2.10
Ducks, teal, per pair	50
Ducks, Blackhead, pair	60
Partridges, pair	1.30
Grouse, per pair	1.30
Pheasants, per pair	1.30

CURED AND PICKLED MEATS.

	Price.
Ham—German, Westphalia, per pound	36
Sugar cured, per pound	20
Sliced, per pound	22
Sugar cured, Half, for boiling, per pound.	21
Boiled, per pound	28
Hocks, per pound	?8
Bacon—Breakfast, whole piece, per pound	23
sliced, per pound	24
Pork, salt, family, per pound	13
Ox tongues, each	1.00
Pigs'feet, per pound	9
Tongues, per pound	18

DAIRY PRODUCTS.

Butter—Creamery, special, per pound	38
Sheffield Farms, extra, fancy per lb.	46
Cheese—Philadelphia cream, cake	10

Panama railroad steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending June 22:

Arrivals—June 17, Tug *Reliance*, from Cristobal; June 17, *Huallaga*, from Callao; June 18, *Chile*, from Guayaquil; June 19, *Limari*, from Valparaiso.

Departures—June 17, *Quilpue*, to Valparaiso; June 19, *Ecuador*, to Guayaquil; June 19, *Peru*, (Pacific Mail), to San Francisco; June 21, *Pennsylvania*, to San Francisco; June 22, *Pleiades*, to San Francisco.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, JULY 3, 1912. No. 45.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Relocation of East Diversion Channel.

A new break in the slide in the east bank of the Canal, opposite the Whitehouse railroad yard, has set in motion earth and rock which will require, it is estimated, the operation of a steamshovel for 12 months, or equivalent services, for clearing the channel. The break extends to within 100 feet of the East Diversion, the center of which is 600 feet from the center line of the Canal, and in anticipation of a break in the diversion, which would flood Culebra Cut, a loop diversion channel is being constructed about 150 feet further east. This is to extend from opposite Station 1625 to opposite Station 1638, and will be about 1,300 feet in length.

The surface of the earth through which the new channel is to be cut is lower than the level of the track which extends along the dike on the Canal side of the present diversion. This requires that the trestle at each end of the loop, over which equipment will be carried across the present diversion to the site of excavation, be built on a grade. In consequence, each trestle will be approximately 274 feet long, though the width of the diversion is 30 feet. As the excavation proceeds, the spoil will be used for filling each trestle from the lower end, and when the new channel is completed the filling of the trestle across the present one will form dams to protect from inundation the part of the present diversion which is threatened by the slide. The deepest cut in the loop will extend about 15 feet below the surface of the ground. Approximately 15,000 cubic yards will be excavated, and the filling will require about that quantity of spoil.

Transfer from Empire to Gorgona Shops.

In accordance with the provisions of Circular No. 349–A, dated May 27, 1912, the operations at Empire shops have been almost wholly transferred to Gorgona shops since July 1. About 76 gold and 203 silver employes are to be retained at Empire shops for light repairs, while about 37 gold and 53 silver men, formerly there, have been given work at Gorgona. Between 25 and 30 of the transferred Americans will continue to occupy their "married quarters" in Empire, and for their benefit the Central Division labor train through Culebra Cut at lunch period will run to Gorgona, instead of only to Matachin, on its way from the Cut to Culebra, and return. The schedule of morning and evening Culebra-Gorgona labor trains will not be changed.

Change in High School Organization Approved.

The proposed change in the present high school organization, outlined in THE CANAL RECORD of June 5, whereby the first and second-year pupils at Colon, Cristobal, and Gatun will attend school at Gatun; the first and second-year pupils at Gorgona, Culebra and intermediate points to be provided for at Empire; the first and second-year pupils south of Culebra, and all third and fourth-year pupils in the Canal Zone to attend the consolidated school at Ancon, has been approved by the Acting Chairman and Chief Engineer. It has been estimated that this plan will result in cutting down the item of transportation fully two-thirds. During the past three school years the mileage consumed in transporting the scholars to and from school by Commission brakes and on the railroad, has aggregated about 1,500,000 miles. In this connection, the remarkable fact exists that during the entire period, not an accident has been reported as having occurred to any of the children while in transit.

Fall of Hail on Naos Island.

During the rain and wind squall along the Pacific coast, Saturday afternoon, June 15, the wind reached a maximum velocity of 50 miles an hour from the south at Sosa, and 33 miles from the south at Ancon. During this squall, hail was reported on Naos Island. This is the third time during the past six years that hail has been reported in the Canal Zone. Hail fell at Alhajuela on the afternoon of May 28, 1910, also at Cucaracha some two years earlier. No hail has yet been observed at any of the regular meteorological stations in the Canal Zone, The phenomenon is unusual in a tropical country.

New Trestle Across Culebra Cut.

In order that the Canal channel may be completed at the point where it is crossed by the Panama railroad, north of Pedro Miguel station, a new bridge is to be erected about 850 feet south of the present bridge, known as No. 57½, and the latter will be removed. This involves the construction of 2,000 feet of new track. Connecting with the present line at the Paraiso block tower, it will follow a letter "S" curve, crossing the Canal on a 700-foot trestle and joining the main line at the block tower just west of the channel. The middle of the new trestle will be about 1,950 feet north of the outer end of the upper approach wall of Pedro Miguel Lock. The channel at the site of the new bridge is being completed to full depth and width, so that the trestle may remain until the completion of the Canal. Its removal will be simple, as it is to be built on pile bents and with timber stringers.

Features of Lock Gate Construction.

In connection with the mitering lock gates, a somewhat novel device has lately been adopted in order to insure a tight fit between the bottom of the gates and the fixed sills on the masonry. The original plans provided for a heavy timber to be fixed to the masonry and a smaller timber fastened along the bottom of the gate leaf. In normal operation, when the gate is closed these two sills should be in contact. Owing to changes in temperatures and consequent slight variations in the lengths of the gate leaves, it is possible that an absolute fit of one timber against the other will not at all times be maintained. This may also arise from slight changes in the operation of the machinery.

Without making any change in the timbers as originally specified, a sill consisting of a rubber flap four inches wide and one-half inch thick, and fastened to the gate by an angle iron has been added. This seal will at all times fit closely, even though there be a slight gap between the fixed sill and the leaf. Experiments made at the Gorgona shops seem to indicate that the design will fulfill its purpose perfectly.

In order to protect the bottom girder of the leaf from corrosion on the inside of the leaf, and furthermore, to drain the bottom gate leaf of any accumulated water, a filling of concrete and coke is being placed on the bottom of each gate leaf. The seepage water is collected in four pumps, from which it will be pumped out by a pumping system to be installed in all the gates. Coke is used as being lighter than a solid concrete filling. The method used consists of first coating the steel work with a wash of cement, then packing in the coke, broken into small pieces, to a height of five inches, and pouring concrete cement grout over it, so as to fill the spaces between the pieces of coke. An impervious coating of cement about one inch thick will then be laid over the coke, pitched to proper surface. Material for this purpose is furnished by the Commission, but will be placed by the McClintic–Marshall Company as a part of their regular contract.

Single Piledriver on Double Trestle.

Piledriver No. 101 was returned to the Naos Island breakwater on July 1, after being repaired in Gorgona shops. During that period but one piledriver was engaged on the trestle, as no other swing-hammer driver could be spared to take the place of No. 101, and operations were carried on with considerable difficulty and delay. When the piledriver in use had driven a

NOTES OF PROGRESS.

(Continued.)

bent of four piles for one track, it would back, under its own motive power, to the end of the double track, cross over and advance to the outer end of the other track. When it had driven a bent there the operations of backing, crossing, and advancing would be repeated. In consequence, the rate of advance was about one-fifth of that when a piledriver is engaged on each track. The outer end of the trestle is about 1,360 feet from the crossover, and the speed of the piledriver, under its own power, is not more than five miles an hour.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 89 per cent completed, 202,228 cubic yards, out of a total of 225,000, having been placed at the close of work on June 29. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
June 23	....	...	......
June 24	104	6.30	1

Previously reported	201,748		
Grand total	202,228		

Special Trains on Election Days.

The Panama railroad operated a special train of six coaches from Frijoles to Colon, and return, and one of 14 coaches from Gorgona to Panama, and return, on June 30, to carry the citizens of the Republic of Panama, resident in the Canal Zone, to the respective cities to vote in the municipal election. In addition, special coaches were attached to three regular trains running into Panama. The special trains were chartered by one of the political parties, and the additional coaches by the other.

Statement of Track Shifter Operations.

A statement of tracks raised and thrown by machines during the month of June, is, as follows:

SHIFTER No.	Location.	No. of feet moved.
7	Miraflores	74,344
2	Balboa	139,600
7	Balboa	56,276

5	Relocation No. 7	28,357
		*533,984

* Equivalent to 101.15 miles.

Honors for Canal Zone Research.

The committee in charge of scientific exhibits at the sixty-third annual session of the American Medical Association, awarded a certificate of honor for the exhibit on tropical pathology prepared in the Sanitary Department of the Isthmian Canal Commission. The exhibit consisted of a series of slides made by Dr. W. M. James, showing malarial parasites. A paper on amœbic dysentery, by Dr. W. E. Deeks, was read before the clinical division.

Postal Business and Canal Zone Revenues.

The total amount of money orders issued in the Canal Zone during the month of May was $395,885.59, of which $319,392.40 was issued payable in the United States, $75,159.59 in the Canal Zone, $1,099.60 in Martinique, and $234 in Costa Rica. The number of orders issued was 19,282, and the average value was $20.53. Money order fees amounted to $1,879.40, and the amount paid and repaid was $116,984.32. Postal sales amounted to $6,436.50, and newspaper postage to $13.92.

Revenue collections during the month of April were, as follows: Bicycle and chauffeur licenses, $23; insurance collections, $50; motor vehicle licenses, $276; steamboat inspection, $311.95; taxes, licenses, etc., $9,526.44, making a total of $10,187.39.

CONCRETE WORK IN THE LOCKS

Over 88 per cent of the concrete for the locks is in place, the amount at the close of work on June 29 being 3,788,579½ cubic yards, out of a total of approximately 4,302,563. A total of 19,884 cubic yards of concrete was laid in the locks during the week ending June 29.

GATUN LOCKS.

Over 93 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on June 29 being 1,880,531½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day for the week ending June 29, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

PERMANENT SITES.

Those for Administration, Balboa Terminal, and Lock Operating Forces Fixed Upon.

The committee, consisting of Col. H. F. Hodges, Mr. H. H. Rousseau, Col. W. C. Gorgas, Mr. S. B. Williamson, and Lieut.-Col. C. A. Devol. appointed to consider a site for the permanent administration building for the Canal works, and a permanent site for the gold employes at the Pacific terminus of the Canal, has made its report, and under date of May 24, it was approved in its general terms by the Chairman and Chief Engineer, who stated, however, that he did not desire to have the lots platted, or the streets laid out, until the ground had been gone over by a competent architect.

The committee, in making its selection, visited a number of proposed sites, but decided that the one best answering the requirements was on the knoll, west of Ancon quarry, and directly east of the main track leading to the quarry. The committee believed a rectangular type of building would be best adapted to this site. It also recommended that quarters be provided for gold employes only; that the general area adjacent thereto, and northeast of the proposed site of the permanent administration building, be reserved for the quarters for the permanent administration force; that this area should be laid off into lots, using the present road for a basis, the lots to be 100 feet wide and 150 feet deep, or such other size as may be found best suited to the adopted type of building. The committee further recommended that the area on the slope of Sosa Hill, and on the fill next to the Ancon–Balboa road, be set apart as a site for quarters for the shopmen, and other gold terminal employes, it having been estimated that this area will be large enough, not only for the living quarters, but for the necessary auxiliary buildings, such as police station, post-office, fire station, clubhouse, hotel, and other miscellaneous buildings common to the present Canal Zone settlements. The committee ascertained that, with the exception of the Ancon–Balboa road, no shifting of highways will be required; that no road construction will be needed, except in the form of streets, and no railroad tracks will be interfered with.

PERMANENT SETTLEMENT FOR THE OPERATING FORCES OF THE PACIFIC LOCKS.

The committee appointed to consider the permanent site for the operating forces of the Miraflores and Pedro Miguel locks, made a report on June 5, which was approved by the Acting Chairman and Chief Engineer on June 11. The committee gave consideration to six different locations, including that of the general area occupied by the settlement at Corozal. It was the unanimous opinion of the committee that the operating forces of the Pacific locks should be housed in one settlement. Two proposed sites at Miraflores were dropped from consideration on account of their being unsuited for building purposes, and inconvenient for the Pedro Miguel lock force, without being especially convenient for the Miraflores lock force. Two locations along the margin of the proposed Miraflores lake, while suitable as building sites, were abandoned for the reason that water transportation would be necessary to reach them, either from Pedro Miguel or Miraflores locks. The main handicap against Corozal was that of distance. The first site considered, namely, that opposite to, and east of the Pedro Miguel lock, was finally decided upon as offering more advantages than the others. It is not only suitable from a building standpoint, but, in addition, is adjacent to the lock which guards the south end of the summit level, while the distance between it and the Miraflores lock is short.

Assuming that the operating forces for the Pedro Miguel and Miraflores locks may consist of as many as 62 gold employes, and 162 silver employes, there are at the present time American buildings, in good condition, in the area comprehended in the adopted site to house 22 gold families, 48 gold bachelors, and 300 silver laborers. To these may be added a number of other quarters at Pedro Miguel, situated on ground which will be submerged by Miraflores Lake, which can be removed to the permanent settlement, if necessary.

PERMANENT SETTLEMENT AT GATUN LOCKS.

In connection with the permanent site for the operating force at Gatun Locks, the committee was of one mind that the site now occupied by the Commission quarters should be utilized; that the present quarters will be ample for the permanent force, but that eventually permanent buildings should be erected to take the place of the present temporary structures.

Free Health Lectures.

The Canal Zone committee of public health education, of the American Medical Association, which was organized in March, has conducted a series of lectures in the Commission clubhouses at Cristobal, Gatun, Gorgona, Empire, and Culebra. Arrangements have been made for a continuance of the series after July 15, as follows. At Pedro Miguel, under the song and praise association, at Las Cascadas, under the Union Sunday school, and at Ancon, under the Women's Altar Guild of St. Luke's Hospital Chapel. The dates of these lectures will be announced later.

Under the auspices of the Knights of Pythias. a lecture on the menace of the housefly was given at Paraiso on Tuesday evening, June 25, by Dr. A. J. Orenstein, chairman of the Public Health Education committee. The committee has ordered two moving picture slides, one on "Good housekeeping," and the other on the "Fly," which will be available for use after July 15.

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Gatun, C. Z. on Sunday, July 7, at 5 p. m. The program follows:

1. March—*Niebelungen*..................Wagner
2. Selection—*The Fortune Hunter.* (By request)..........Herbert
3. (*a*)—*Pigeon Wing Rag*................Johnson
   (b)—*Wild Cherries Rag*................Snyder
4. Overture—*Hungarian Lustspiel*......Keler Bela
5. Intermezzo—*After Sunset*...............Pryor
6. Waltz—*Wedding of the Winds*..............Hall
7. Flower Song—*Hearts and Flowers*........Tobani
8. Medley Selection—*Remick's Hits*........Lampe
9. March—*Lance and Shield*..........Laurendeau

CHAS. E. JENNINGS, *Musical Director.*

The next concert will be given at Toro Point, July 14, at 2.30 p. m.

LABOR FORCE AND QUARTERS IN MAY.

On May 29, there were 35,063 employes actually at work on the Canal and the Panama railroad, and of that number, 28,272 were Canal employes. The gold force on the Canal work, composed almost entirely of white Americans, was 4,129. The force report for May 29, 1912, was, as follows:

Department.	SILVER EMPLOYES.*													Total Silver.	Total Gold.	Grand Total.

QUARTERS.

On May 31, there were 24,498 occupants of Commission quarters. Of these, 9,129 were white Americans, of whom 5,239 were men, 1,988 were women, and 1,902 were children. There were 5,874 Europeans of the laborer class, of whom 5,230 were men; 248 were women, and 396 were children. There were 9,129 West Indian negroes, of whom 7,127 were men; 1,027 were women, and 1,341 were children.

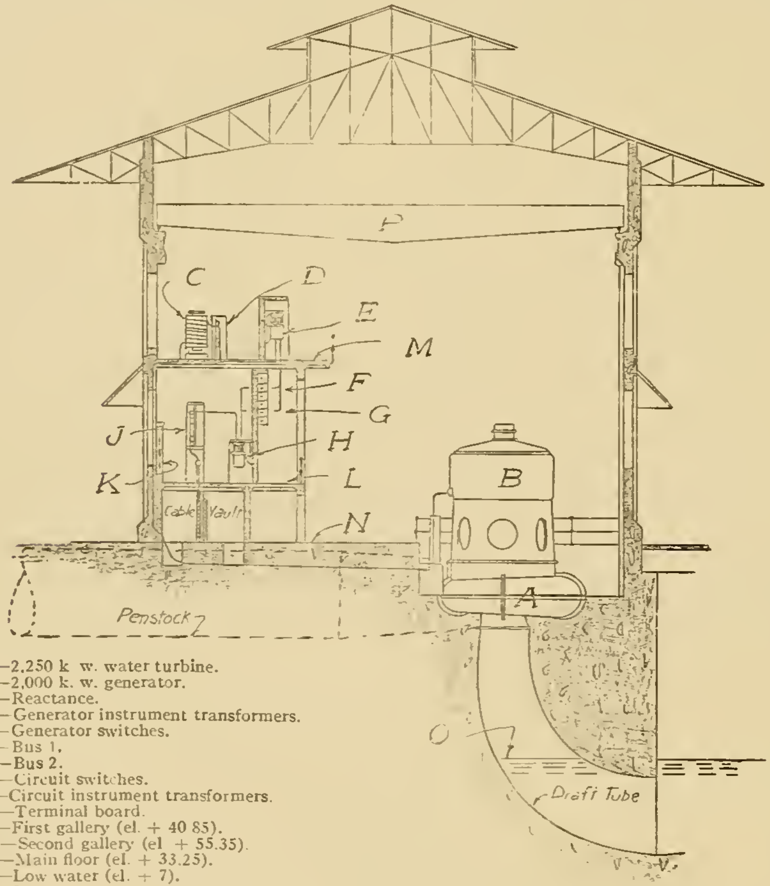
HYDROELECTRIC STATION AT GATUN SPILLWAY.

Surplus Water of Gatun Lake to Supply Electrical Energy for Canal Zone.

Specifications and requisition for auxiliary electrical equipment for the Gatun hydroelectric station have recently been forwarded to the Washington Office for purchase in the United States. This equipment is in addition to the plant purchased some time ago, the first contracts embracing the hydraulic equipment, with the electric generators and exciters. The principal items of the present requisition are the switchboards, oil-switch group, station battery, light and power transformers, and an air compressor, all necessary for the equipping of three complete generating units. A brief description of the waterpower project of the Panama Canal, follows:

From the storage in Gatun Lake, there will be available sufficient water to warrant the installation of 6,000 kilowatts in generating capacity, including reserve. The average head throughout the year will be approximately 75 feet, the elevation of the tail race being about eight feet above sealevel. During the rainy season, water will be plentiful and must be wasted over the adjacent Spillway. During the dry season, however, it will be necessary to draw upon the storage in Gatun Lake above elevation plus 79. The maximum quantity of water diverted for hydroelectric development is approximately seven per cent of the minimum water supply and is the excess which is not required for lockages, evaporation, and leakages. Water will be extremely abundant for several years, until such a time as the traffic through the Canal approaches full capacity.

The electrical load, which will be connected to the hydroelectric station, consists for the most part of power feeders, which will distribute energy to the machinery of the three locks, to the permanent machine shops, to the dry dock, to the coal handling plant, to the batteries, and to other smaller electric drive which is now giving service. In addition, there will be the lighting load of the locks and of the Zone towns. In all probability, considerable load will be obtained through a service for domestic purposes, electric cooking utensils replacing the stove, in order to create a saving in the cost of fuel, which is an expensive item upon the Isthmus. There is a slight possibility of an electrification of the Panama railroad over the relocated lines. the electrification depending entirely upon the nature of the traffic conditions that result after completion of the Canal. The circuits from the station to the load centers, in general, will be in duplicate, insuring as far as possible an absolutely continuous service. The station will be connected by means of a high voltage transmission line to the present steam generating station at Miraflores, which station will be held in reserve to tide over either shut-down or low-water periods of the Gatun station.



A—2,250 k w. water turbine.

N—Main floor (el. + 33.25).
O—Low water (el. + 7).
P—30-ton crane.

FIG. 1—SECTION THROUGH PROPOSED HYDROELECTRIC STATION AT GATUN.

The hydroelectric station is to be situated adjacent to the north wall of Gatun Spillway. The building will be constructed of concrete and steel, and will be of a design suitable for a permanent power house in a tropical country. The dimensions of the building are such as to permit the present installation of the three 2,000-kilowatt units, and provision is made for a future extension of three additional similar units. The building will be rectangular in shape, and will contain one main operating floor, with a turbine pit and two galleries for electrical equipment. The station equipment will include a 30-ton crane to be used during erection and whenever repairs are to be made. The building, with the machinery and electrical equipment, is laid out upon the unit principle. Each unit consists of an individual headgate, penstock, governor, generator, exciter, oil-switch, and control panel. The position of the main features of the development relative to the Spillway channel are shown in Figure 2.

Water is to be taken from Gatun Lake, the elevation of which will vary with the seasons from 79 to 87 feet above sealevel, through a forebay which is constructed as an integral part of the curved portion of the north Spillway approach wall. The curved portion of the Spillway wall contains five large apertures into the forebay and will serve as a fender wall to prevent floating débris from accumulating at the headgates.

From the forebay, the water will be carried to the turbines through three steel plate penstocks, each having an average length of 350 feet. The penstocks are to be constructed of ⅜-inch plates riveted together, and are to be 10 feet 6 inches in diameter inside. The exterior of the penstock is to be surrounded by a thick concrete coating to serve both as a protection against corrosion, and as a means of strengthening the penstock against superimposed earth pressures. The concrete will have a minimum thickness of 12 inches and will be anchored to the steel by means of Z-bars, which are riveted to the plates. The position of the station building relative to the headgates requires that each penstock makes a right angle bend to enter the station. The alignment of penstocks is such that the steel and masonry will be entirely covered by the fill of Gatun Dam. Near the lower end of the penstocks, at the building wall, there will be installed a testing link, the purpose of which is to measure, by the velocity method, the quantity of water flowing in the tube.

The entrances to the penstocks will be closed by cast iron headgates, and bar iron trash racks, the latter being provided for the purpose of preventing sunken débris from entering the penstocks and either clogging or breaking the turbine runner. The headgates will be raised and lowered by individual motors, which will be geared to rising stems attached to the gate casting. Control of each motor from the station switchboard will be effected by means of reversing contactors with interlocks, a limit switch, and a float switch, all operating automatically. The driving machinery and the motors will be housed in a small concrete gate house, erected upon the forebay wall directly over the gate recesses and trash racks. The gate house will be constructed for the present requirements of three headgates, and provision is made for a future addition of three more units.

The turbogenerator units are to be of the vertical type, the entire weight of the rotating element being suspended from an overhung thrust bearing, which is supported from the top shield of the generator. The water turbine proper will be of the spiral casting, one runner, Francis type, and is to be set in heavy masonry foundation. The water will enter the turbine through a tapering joint from the penstock and discharge into an increasing, elbow draft tube, made of ½-inch steel plates and will be imbedded in the concrete foundation. A section of the station, showing the arrangement of penstock, turbine, and draft tube, is illustrated in Figure 1. The turbine is rated at 2,250 kilowatts at a speed of 250 r. p. m. and will consume approximately 500 second feet of water at full load.

Superimposed upon the turbine casting is to be the generator, a distance ring, six feet in height, separating the two. The generator is to be rated at 2,000 kilowatts, and will deliver 3-phase 25-cycle current at 2,200 volts potential. The turbine, generator, and auxiliary equipment are to be of the best mechanical and electrical construction obtainable. The governor is to be mounted upon one side of the distance ring and is to be geared solidly to the main shaft.

The path of the electrical energy from the generator to the outgoing feeders is shown diagramatically by the heavy line in Figure 1. The leads emerge from the lower part of the generator and pass through a manhole at the base of the turbine into a duct line, which carries the cables to manholes in the cable vault; thence the leads are taken up the building wall in tile ducts to the generator reactances. The reactances are to give protection to the generators in event of severe and protracted short-circuit outside the machines and consist of air insulated coils mounted upon concrete cores; a reactance coil is inserted in each of the three phases of each generator.

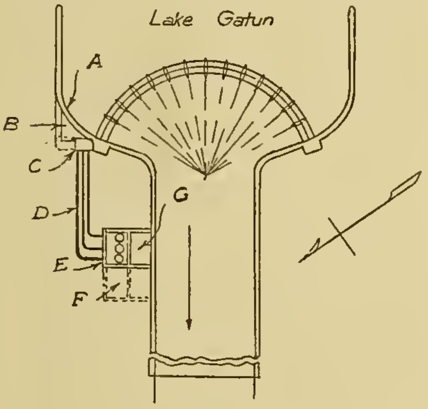

FIG 2—LOCATION PLAN.

A—Fender wall.
B—Forebay.
C—Gate house.
D—Penstocks.
E—Power house.
F—Possible extension.
G—Tail race.

Adjacent to the reactances is a concrete cabinet which contains small series and shunt transformers for energizing the instruments and protective devices on the main control switchboard. The generator leads next enter a concrete compartment which houses a pair of oil switches. The two switches permit a selection of connections to either of the duplicate buses, which are situated on the first gallery floor, directly underneath the generator oil switches. The buses are to distribute the energy among the several circuits, each of which is equipped with oil switches. The distributing circuit passes from the circuit switch to an instrument transformer compartment, which is quite similar to the generator instrument transformer compartment. From the instrument transformers, the circuit cables drop into the vertical duct shelves in the cable vault below; thence make an exit from the station through manholes at either end of the building into duct lines at the crest and toe of Gatun Dam. As far as practicable, the entire electrical equipment is in duplicate, and is designed with continuity of service, operating accessibility, and protection of human life as the prime considerations.

One feature of a well designed, modern power house is the remote control of all auxiliary machinery and equipment, particularly of the dangerous switching operations on high voltages. The control and the protecting devices of the Gatun station have been worked out carefully and will permit of an extremely flexible and reliable operation of the generators upon any probable condition of loading. A main control switchboard of the unit panel type is to be erected upon the second gallery floor, where the operator possesses a good view of the entire station. Command of all operations is obtained through master control switches, and indication thereof is procured by means of small pilot (signal) lamps. The operator at the switchboard remotely controls all switching operations, both on the high tension and the exciter buses, and, in addition, controls the headgates, the governors, the rheostats, and the field circuit breakers.

Besides the control switches, the main switchboard contains all indicating, integrating, and recording instruments, which are essential for an intelligent and economical operation of the station. Time limit relays are mounted upon the rear panels to serve as a protection to circuits and generators in case of overload. Continuity of the operating circuit for the control of switches will be obtained by the installation of a storage battery upon the first gallery floor, the switches being mounted upon one panel of the main control switchboard. A voltage regulator, which will automatically maintain a uniform bus pressure, will be assembled upon a smaller station panel at one end of the main board.

The Canal Commission will try one slight variation from standard practice in an attempt to secure the greatest reliability in the excitation system without the necessity of installing additional water turbine exciter sets. In any alternating current station, it is absolutely necessary that the fields of the alternators be supplied continuously with direct current, usually at 100 to 125 volts potential. When the station is running smoothly, this direct current supply is obtained most economically through motor-driven exciter sets, which are operated directly from the 2,200 volt buses. Two such units, each of 100 kilowatts capacity, will be erected in the Gatun station. Difficulty is encountered, however, when the station is inoperative, as no source of 2,200-volt energy is available to drive the exciter sets. It is customary practice in hydroelectric stations to install independent exciters, which are driven by small water turbines. The small water turbines are more complicated than motor-driven sets, requiring adjustment of governor and of valves, and also additional penstocks and gates, with the resulting complication of operation. At Gatun, each main unit will be equipped with a 50-kilowatt exciter mounted upon the vertical shaft in the 6-foot space which separates the turbine and the generator. When starting, after complete shut-down, the direct-connected, 50-kilowatt exciters will furnish the necessary excitation until such a time as the moter-driven exciter may be connected to the system. This selection of exciter equipment results in a very simple and easily operated, system which possesses ample capacity under all conditions of operation and exceptional reserve in event one exciter is accidentally damaged.

Lodge Recruiting Contest.

The result of the three months' contest in recruiting members for Isthmian Canal Rebekah Lodge No. 1, at Gorgona, was announced at the meeting on Friday evening, June 14. The contestants were the first and second officers of the organization. aided by a committee of members selected by each one. The total result was 14 new members, the honors to go to the second officer for securing nine names. The contestants' dinner took place at the lodge hall on Friday evening, June 28, when there were present the contestants and their committees; and the newly initiated members of the order.

PERSONAL.

Col. Geo. W. Goethals, accompanied by Mrs. Geo. R. Goethals, returned to the Isthmus on the United Fruit Company's steamer *Tivives* on Sunday, June 30, from a month's absence in the United States.

Red Cross Finances.

The financial statement of the Canal Zone chapter, American National Red Cross, for the month of May, 1912 is, as follows:

RECEIPTS.

May 1, On hand	$2,477.08	
31, Membership dues received during the month	3.00	
Total receipts		$2,480 08

DISBURSEMENTS.

May 4. Relief of American family at Empire	$10.00	
May 23, Postage for secretary	2.00	
May 25, Relief of American from Chiriqui province, stranded in Colon	25.00	
May 31, Relief of Jamaican in Colon Hospital who was deported	8.00	
Total disbursements		$45.00
May 31, Balance on hand		$2,435.08

JOHN L. PHILLIPS, *Treasurer.*

Approved:

C. A. DEVOL, *Chairman.*

Canal Zone Postal Savings Bank Transactions.

A statement of Canal Zone postal savings bank transactions at Canal Zone post-offices for the period of May 4 to June 1, follows:

NAME OF OFFICE.	Postal Savings Certificates Issued.	Postal Saving Certificates Paid.
Ancon	$8,017.00	$5,178.00
Balboa	6,575.00	4,870.00
Bas Obispo	885.00	120.00
Corozal	9,013.00	6,244.00
Cristobal	12,297.00	6,148.00
Culebra	14,446.00	12,414.00
Empire	13,758.00	2,495.00
Gatun	9,981.00	6,087.00
Gorgona	17,879.00	16,531.00
Las Cascadas	9,248.00	11,278.00
Matachin	881.00	436.00
Miraflores	4,549.00	2,030.00
Paraiso	4,354.00	2,870.00
Pedro Miguel	14,023.00	7,724.00
Cristobal, Station "A"	1,282.00	460.00
Cristobal, Station "B"	781.00	231.00
Total	$127,969.00	$85,116.00

Change in Date of Band Concerts at Hotel Tivoli.

Owing to the request of the management of the Panama Railroad Company, the concert of the Isthmian Canal Commission Band, which has usually been given at the Hotel Tivoli, Ancon, on the second Sunday of each month, will henceforth be given on the fourth Sunday.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The twenty-third week of the Ancon Study Club was closed with a program on Wagner, on Friday afternoon, June 28. The papers read consisted of a short biography of the composer followed by a synopsis of his operas, including *Der Rin des Niebelungen*, and *Parswal*. A discussion of the American production of the last-named work followed. The study of the operas currently produced will conclude with the meeting on July 12. The subject for the next course will be announced later.

Church Work.

The Woman's Altar Guild of St. Ferdinand's Church, Empire, will hold a card party in the parish house on Saturday evening, July 20. Refreshments will be served and a short musical program will be given.

A meeting of the delegates from the various chapters of the Brotherhood of Saint Andrew, an order connected with the Episcopal Church, was held at St. James' Church, Empire, on Sunday, June 23, the Rev. W. H. Decker presiding. The object of the meeting was to elect a delegate to represent the local churches at the annual international convention of the Brotherhood of St Andrew, to be held in Chicago, September 4 to 8. It was decided that efforts should be made to raise money to defray the expenses of a layman to the convention, one of the brotherhood men if possible. In case this is not found to be practicable, the brotherhood will be represented by one of the clergy who may be be on vacation leave in the United States at the time of the convention. The call for this meeting was issued at the instance of the chapter of St. Stephen's church, Gatun. The brotherhood work in the Canal Zone is confined to the West Indian section of the Panama mission. There are several chapters in connection with the local churches, as follows: St. Paul's, Panama; St Mark's, Culebra; St. James', Empire; St. Philip's, Las Cascadas; St. Andrew's, Gorgona; St. Stephen's, Gatun, and Christ Church By-the-Sea, Colon. The total membership is about 75.

The Gorgona Union Sunday school will celebrate Childrens' day on July 14. A program is being prepared in which the children of the school will participate.

Camp Fire Girls of America.

Thirteen Gorgona girls responded to a call issued by Mrs. Geo. Auer and Mrs. A. L. Hackenberg for a meeting to consider the organizing of a Canal Zone group of the Camp Fire Girls of America. The meeting was held on Friday evening, June 14. The object of the organization is to raise the ideal of girlhood and womanhood, to systematize and teach certain phases of domestic science, to inculcate principles of hygienic living, and to encourage a love of outdoor life. Its principles involve also the training of its members in matters pertaining to their relations to social life, and teaching the advantages of attaining high efficiency in mental and physical development. The organization was formed in the United States about one year ago. The Canal Zone chapter will affiliate with the central organization, thus affording to its members the privileges of obtaining the literature issued by the committee, and placing the group in touch with the work. A feature of the Gorgona group will be athletic training in the gymnasium of the Commission clubhouse under the physical director. Mrs. Hackenberg and Mrs. Auer are the heads of the Camp Fire movement.

Christian League Election.

At the monthly meeting of the Christian League of Gatun held on Thursday, June 27, the following officers were elected: President, B. F. Sisson; vice-president, A. H. Brown; secretary, C. O. Jones; treasurer, I. H. Andrews; chaplain, Rev. C. O. Purdy. The officers are to serve six months from July 1, with the exception of the chaplain, who serves for a period of one year.

I. O. O. F. Installations.

Mr. B. F. Sisson, district deputy grand sire of the Independent Order of Odd Fellows of the Canal Zone, has appointed the following deputies to install the newly elected lodge officers: Mr. Olof W. Johnson, past grand, to install the officers of Cristobal Lodge, No. 2, at Cristobal, on Monday, July 8; and the officers of Gatun Lodge, No. 5, at Gatun, on Friday, July 12. Mr. J. P. Mead, past grand, to install the officers of Canal Zone Lodge, No. 3, at Empire, on Saturday, July 6. Mr. Chas. H. Beetham, past grand, to install the officers of Isthmian Canal Lodge, No. 1, at Gorgona, on Tuesday, July, 9. Mr. E. E. Price, past grand, to install the officers of Pacific Lodge, No. 4, at Ancon, on Thursday, July 11. Mrs. Miriam Beetham, past noble grand, to install the officers of Isthmian Canal Rebekah Lodge, No. 1, at Gorgona, on Friday, July 12.

Examinations for the Philippine Service.

Examinations have been announced by the Civil Service Commission, which may be held at Culebra on September 1 and 2, for assistant (male), teacher (male and female), and industrial teacher (male) in the Philippine Service. A limited supply of the announcement of this examination—No. 459— has been received and persons interested should request a copy thereof. As the number received is small the announcement should be returned to this office without any delay, in order to insure its receipt by all persons desiring it. Applications will not be received in this office for the above examinations after August 8, this date may be changed if necessary.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., July 1, 1912.

Missing Men.

Any one having information regarding the whereabouts of the following men, who are supposed to be on the Isthmus, are requested to communicate with THE CANAL RECORD: James Gill, Thomas Schoomaker, Thomas McQuillan.

NOTE: The PEDRO MIGUEL-BALBOA train will run over west side from Dike siding, picking up all men on that route, and make connections with the PEDRO MIGUEL-ANCON train at Relocation (Miraflores). The PEDRO MIGUEL-ANCON train will run over the Central Division tracks, between Corozal and Miraflores in both directions. Relief train will run over new main line between Miraflores and Corozal Junction.

W. J. HOLMES, *Trainmaster.*

OFFICIAL CIRCULARS.

Employes Required to Remain Away from Panama and Colon During Elections.

CULEBRA, C. Z., June 27, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Please require all employes to remain away from Panama and Colon during the progress of the municipal elections on Sunday, June 30, and of the National elections on Sunday, July 14.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Panama Citizens Excused from Duty to Vote.

CULEBRA, C. Z., June 26, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Any citizen of the Republic of Panama in your employ who might otherwise be called upon to work on Sunday, June 30, or Sunday, July 14, may be excused from duty on those days for a sufficient length of time to enable him to cast his vote in the forthcoming elections.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Traveling Expenses.

CULEBRA, C. Z., May 14, 1912.

CIRCULAR No. 48. (Superseding CIRCULAR No. 20):

1. The following regulations concerning traveling expenses of officers and employes of the Commission are published for the information and guidance of all concerned. They do not refer to travel upon the Isthmus of Panama by officers and employes stationed upon the Isthmus, unless such travel is at the beginning, or at the termination of a journey extending beyond the Isthmus.

2. Before any expense is incurred in traveling upon business of the Commission, an order will be issued by competent authority. Travel orders may be either oral or written and shall state, when written, as specifically as circumstances will permit, the travel to be performed. When an officer or employe is at a distance from the official authorized to order travel and the necessity for immediate travel will not permit of the delay necessary to procure authority, or when other conditions render it impracticable to obtain authority without serious injury to the public interests, he may proceed without such order, reporting at once in writing to the head of his department the necessity for the travel without orders. When practicable all transportation and Pullman accommodations will be procured on regular official Isthmian Canal Commission transportation requests.

3. All travel must be by the shortest practicable routes, unless otherwise directed by the travel order, and must be without unnecessary delays. Proper and legitimate travel expenses include such as are usual and essential to the comfort of travelers, such as an employe would incur if paying his own expenses, and may embrace any of the following items:

(*a*) The usual one way, or where time limits are found to be ample, round trip fares on railroads, steamships, or other public conveyances and hire of special transportation where there are no regular means of conveyance. The use of commutation tickets or the acceptance of rebates in any form on fares is prohibited. Mileage books may be used when authorized by the Chairman. Charges for meals will not be allowed if the transportation charge includes meals. "Excess baggage" charges must be explained, and, to be allowed, must be for official papers or public property carried with the officer or employe. Travel on limited trains requiring excess fares will not be allowed, except when absolutely necessary, and the account shall contain a certificate setting forth this necessity.

(*b*) Street car, omnibus, or transfer coach fare between stations, docks, and hotels, and, when there are no such conveyances available, moderate or necessary hack or cab hire, not exceeding the usual and legal rates, and transfer of baggage. Street car fare, while on official business during the time spent in a city, will be allowed, but the necessity for employing a more expensive means of conveyance must be explained in the account for consideration of the Commission.

(*c*) Sleeping car fares for one double berth, parlor car seat, and fare for usual stateroom accommodations on vessels; also, fees to porters on sleeping and parlor cars, not exceeding 25 cents in one day, and reasonable fees to porters for handling baggage at stations, etc., when necessary. Where money is expended for parlor car seat, or berth, statement should be made as to which accommodation was secured. When Pullman accommodations are procured, report should state whether upper berth, lower berth, or parlor car seat was furnished, and Pullman receipt must be filed with expense report.

(*d*) Charges for meals and lodging not exceeding $5 for any 24 hours, whether meals are taken en route, or at hotels and restaurants, and reasonable fees to waiters, not exceeding 40 cents a day. Hotel bills should be so itemized as to show the number of days and the rate per day., When travel is by ocean steamer, reasonable fees to stewards, in the aggregate not exceeding an average of 75 cents for each 24 hours, or fraction thereof, will be allowed.

(*e*) Receipted bills for hotel expenses, showing the dates of entertainment, must be furnished; also, receipts for any expense exceeding $1, except that receipts are not required for transportation by railroad or vessel, for single meals, or for fees to porters, waiters, and stewards. The cost of each meal should be stated.

(*f*) All telegrams sent to the Commission should be marked "Collect of the Isthmian Canal Commission at Government rates," as none should be prepaid. If the telegram is not to the Isthmian Canal Commission, but nevertheless on official business, the toll should be prepaid at the rates fixed in the schedule of the Postmaster General. Whenever a telegram is paid for and charged in voucher, a pen or carbon copy of same must be attached to the voucher and the receiving agent of the telegraph company shall indorse receipt of the toll on such copy. Where an official telegram is received "Collect" by an officer or duly authorized employe of this Commission, receipt for payment should be indorsed on such telegram by the agent of the telegraph company, receipted telegram to be used as subvoucher in expense account. Expenses for telegrams relating to leaves of absence, payment of salary and expense vouchers, or any other matter of a personal nature, will not be allowed, and such telegrams must not be sent to the Commission "Collect." In preparing telegrams care should be observed that all unnecessary words, initials, and figures are omitted.

Employes should provide themselves with means of identification to satisfy the telegraph companies that they are officially connected with the Commission to enable them to get messages accepted for transmittal on the terms herein fixed. Official identification cards will be issued to employes whose duties require frequent transmission of telegrams.

4. When reimbursement for traveling expenses is to be made on the Isthmus, accounts will be rendered in duplicate on forms of vouchers approved by the Commission. Such vouchers shall be certified to by the officer or employe who performs the travel, and, with the original order for travel, if written, and all necessary explanatory statements in writing, shall be submitted to the Examiner of Accounts on the Isthmus.

When reimbursement for traveling expenses is to be made in Washington, reports of the official travel performed and the expenses in connection therewith will be submitted to the official directing the travel, who will endorse thereon his verification and such other notations as may be necessary, and forward same to the proper administrative officer at Washington for permanent record in the files of the Commission.

The voucher or report will be so stated as to show clearly and in proper sequence the movements of the traveler and detailed itemization of the expense incurred day by day. Hotel expenses, when extended over several days, should be stated in the voucher or report as of the date on which paid.

5. No officer or employe traveling under orders shall pay for transportation on a railroad, steamer, or other conveyance operated by the Panama Railroad Company, but shall use an order for transportation furnished by the Chairman of the Commission, or by his direction, at Washington, or by the duly authorized official on the Isthmus. An order for transportation shall also be issued, when practicable, for travel by any steamship line between ports on the Isthmus and ports in the United States, or other countries.

6. These regulations shall not apply in any instance where by law or by action of the Commission a per diem allowance for any items of expense is fixed for any officer or employe, but shall be superseded as to the expenses which may be stated to be included in the per diem allowance.

7. The limitations of these regulations as to maximum expenses allowed for any 24 hours for meals and lodging shall not apply to officers whose salaries are in excess of $5,000 per annum. Officers whose salaries range from $3,000 to $5,000, inclusive, annually may be allowed charges for meals and lodging not exceeding $7 per day, when their detail on special duty may warrant, and such fact shall be plainly stated in the travel order.

These regulations shall be effective from and after June 1, 1912. GEO. W. GOETHALS, *Chairman.*

TELEPHONE DIRECTORY CHANGES.

A new telephone directory has recently been issued by the Panama Railroad Company, corrected to May 15, Since then a number of additions, removals, and changes in numbers, have been made, a list of which is given below. Telephone subscribers are requested to make a note of these changes in their copy of the directory.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

A double joint debate was held on Wednesday evening, June 26, one at Cristobal clubhouse, and the other at Gorgona. The subject discussed was "Resolved, that the nations of the world should disarm in the interests of peace, the Gorgona team taking the affirmative, and Cristobal the negative. The teams at Cristobal consisted of Rev. Carl H. Elliott and C. J. Dinnin for Cristobal, and Messrs. Berner and Beetham for Gorgona; at Gorgona, Messrs, Matthews and Kromer for Cristobal, and Messrs. Morrison and Taylor for Gorgona. The judges gave a decision in favor of the affirmative in both places.

The next moving picture entertainment at Gorgona will be given on Friday night, July 5; at Cristobal, on Saturday evening, July 6.

COROZAL.

The Corozal bowling team will bowl the Gorgona team on the latter's alleys Saturday evening, July 5.

CULEBRA.

A simultaneous checker match was held on Saturday evening, June 29, when Mr. F. L. Bernsee played 18 men from Gorgona, Gatun, and Culebra, winning 34 games, losing two, and having two ties to his credit. A checker club has been organized, and those desiring to join are requested to hand their names to the secretary.

The high scores during the week in bowling were, as follows: Palmer, 108; Mengel, 103, 103, 107; Grier, 106.

The handball courts are ready. Members can play after 5 p. m., or after supper.

Volleyball is being played on Tuesdays and Fridays from 5.10 to 6.30 p. m.

EMPIRE.

Another team has been added to the local bowling tournament, making five teams in all.

On Monday, June 24, the Progressives bowled the Socialists, and the latter won two out of three games. On Friday, June 28, the Independents bowled the Progressives, the former winning three games. Hereafter, the tournament games will be bowled on Monday, Wednesday, and Friday nights.

GORGONA.

On Friday night a mock trial was held, Mr. Dan Kenny bringing the charge of vagrancy and slander against E. L. Emery. Attorneys for the plaintiff were Messrs. Ivanhoe and Keenen, and for the defendant, Messrs. Morrison and Deforce. R. H. Adams acted as judge. The result of the trial was a disagreement for the jury, seven to five in favor of acquittal. A new trial will be asked for.

GATUN.

During the absence of the permanent physical director, Mr. P. W. Brunner will conduct the gymnasium classes.

Louis DePoorter has returned from his annual leave and will again take up his duties as manager of the pool room.

Mr. C. Oettli won the pennant for the three highest games in tenpins during the month of June.

The Gatun dramatic club will give "Singbad the Sailor" in several of the clubhouses during the month of July.

Members may join the Spanish classes at any time by the payment of $2.50 in advance. Classes for ladies are held Tuesday and Thursday afternoons. Mens' classes are held Wednesday and Friday nights.

The 100 scores, or over, in duckpins for the month of June are, as follows: Huttlemaier, 119, 113, 109, 103; Wurster, 119; Teall, 111; Harper, 107; Kiernan, 103,101; Mack, 103.

CRISTOBAL.

On Saturday evening, June 29, a special team from Gorgona entered into a bowling contest with the Cristobal team on the local alleys. Cristobal took two out of three games by the following scores: Cristobal—738, 779, 821; Gorgona—750, 660, 709.

The students of the Gatun high school will present a musical operetta on Tuesday, July 9. Admission, members, free. Nonmembers, 50 cents.

On Thursday evening, June 27, Mr. F. L. Bernsee, champion checker player of the Isthmus, entertained 19 players at simultaneous checkers. Sixty-three games were played, with the following results: Mr. Bernsee won 59, lost two to Dr. Dunn of Culebra, and one to F. E. Herrington of Cristobal, and drew one with Mr. Henner. Refreshments were served during the play.

A fifteen-ball, all-bank, pool tournament will be started in July. Entrance fee is $1.50, to be paid to the secretary, or Mr. Beck, in charge of the pool room. All entrance fees must be paid before July 8.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission arrived at the ports of Cristobal and Colon, during the week ending June 29:

Turrialba, June 23, from New York, with 9 cases electrical material, for Mechanical Division; 50 crates galvanized buckets, 237 pieces pipe, 87 bundles pipe, for stock.

Prinz August Wilhelm, June 24, from New York, with 50 bundles washers, 7 cases transfer cases, 5 bundles steel, for stock; 632 pieces steel bolts, for Atlantic Division.

Ancon, June 25, from New York, with 120,680 bags cement, 75 cases coil springs, 67 pieces snubbing posts, for Pacific Division; 224 barrels compound, for Fortification Division; 6 cases copper wire, for Mechanical Division; 37 pieces steel beams, for Panama Railroad Company; 7 pieces steam shovel chains, 67 bundles baskets, 13 barrels range parts, 90 bales waste, 9 crates wrenches, 8 cases hardware, for stock.

Glenbridge, June 25, from New York, with 123,925 bags cement, for Pacific Division; 101 cases blasting caps, for stock.

Atenas, June 27, from New Orleans, with 50 cases limit switches, for superintendent of erection; 2,448 pieces of lumber, 1,244 bundles of lumber, for Mechanical Division, 58 rolls cotton duck, 511 bags feed, 82 barrels sea coal facing, 150 cases soap polish, 26 pieces piling, 81 pieces lumber, 12 cases hardware, for stock.

Manx Isles, June 27, from New York, with 12 cases fish oil, 200 cases nuts, for stock; 596 bundles structural steel, 327 cases rivets, for Panama Railroad Company; 1,100 car wheels, for Mechanical Division; 460 packages rack castings, 180 cases valve castings, for superintendent of erection.

Colon, June 27, from New York, with 166 cases washers, for Atlantic Division; 75 cases coil springs, for Pacific Division; 24 pieces castings, for superintendent of erection; 400 pieces brake beams, 30 cases electrical material, for Mechanical Division; 127 kegs bolts, 100 barrels castings, 160 bundles steel lathe, 56 pieces steel columns, for Panama Railroad Company; 5,941 bundles steel rods, for Fortification Division; 40 bales rubber hose, 156 cases soap, 200 bundles brooms, 30 cases napkins, 212 kegs bolts and rivets, 85 bales waste, 118 cases caustic soda, 50 cases lavatories, 24 cases paint, 20 bundles paper 24 cases chain blocks, for stock, and a miscellaneous cargo, the whole consisting of 8,576 packages, weighing 800 tons.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending July 10, 1912, (75th meridian time):

DATE.	Low	High	Low	High
	A.M.	A. M.	P. M.	P. M.
July 4	12.40	6.43	1.00	6.50
July 5	1.17	7.18	1.40	7.28
July 6	1.56	7.58	2.23	8.10
July 7	2.35	8.40	3.10	8.58
July 8	3.22	9.26	4 00	9.51
July 9	4.14	10.20	4.56	10.53
July 10	5.13	11.21	5.56	11.58

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, June 29, 1912. All heights are in feet above mean sealevel.

Panama railroad steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

McClellan Saddles For Sale.

The Depot Quartermaster has on hand at Mount Hope depot, five 12-inch and one 11-inch McClellan saddles, which have never been taken out of stock, and inasmuch as there is no likelihood of them being required for official use, same are available for sale.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, JULY 10, 1912. No. 46.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Lock Gates to be Lead Gray.

The upper guard gates for Gatun Locks, which are almost completed and will shortly be closed to keep the water of rising Gatun Lake from flooding the lower lock levels, are being coated with a final layer of heavy lead gray paint. The material for the gates was painted with a priming coat before it left the factory; at the time of erection it was covered with a coat of red lead, Navy standard; and the third and outer coat is the preparation of the Detroit Graphite Company. This paint was selected provisionally, after tests, though it is believed that only through long experience will the composition of the most satisfactory covering be ascertained. The tests were carried on in a tank and in the culverts below the locks, by painting plates with different kinds of paint, applying coats varying in number and thickness, and exposing in air and water. The light color was selected, in order to minimize the heating of the upper parts of the gates, the expansion from which might cause slight distortions which would interfere with the accurate adjustment of the leaves. This paint will be used on all of the lock gates, with the exception of the seawater gates, which will be covered with an antifouling paint to keep off barnacles.

Canal Work in June.

The grand total of Canal excavation to July 1 was 173,269,815 cubic yards, leaving to be excavated 22,053,564 cubic yards, or less than one-eighth of the entire amount necessary for the completed Canal.

The total for June was 2,339,770 cubic yards, as compared with 2,646,442 cubic yards in June, 1911.

The dry excavation amounted to 1,540,512 cubic yards, and was principally by steam-shovels. The dredges removed 770,590 cubic yards from the Canal prism, and 28,668 cubic yards from the site of the Balboa terminals, in addition to the amount pumped into Gatun Dam by suction dredges. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 456,864 cubic yards. Of this total, 24,280 cubic yards consisted of dry excavation near the Locks, and the remainder was wet excavation—343,804 cubic yards from the Atlantic entrance, and 88,780 cubic yards near the Locks.

The total excavation in the Central Division was 1,357,204 cubic yards, 1,348,780 cubic yards from the Culebra Cut section, and 8,424 cubic yards from the Chagres section.

In the Pacific Division, the total excavation was 525,702 cubic yards, 338,006 cubic yards of which were taken out by dredges at the Pacific entrance, and the remainder of the wet excavation from the site of the inner harbor. The total dry excavation in this division amounted to 159,028 cubic yards, 15,700 cubic yards from the locks, dams, and spillways; 23,140 cubic yards from the Balboa terminals, and the remainder, 120,188 cubic yards, from the Canal prism.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (ten stations), 10.84 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc., It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

DAM AND LOCK CONSTRUCTION.

Leasing Land Near Terminals.

In view of the inquiries made, and likely to be made, concerning leases of land for commercial purposes near the terminals of the Canal, the Chairman and Chief Engineer has appointed a committee, consisting of Col. H. F. Hodges, Mr. H. H. Rousseau, Judge Frank Feuille, and Mr. J. A. Smith, to report on the general subject of leasing lands in the vicinity of the Cristobal and Balboa terminals for private coaling plants, oil fuel plants, storehouses, and offices.

High Work on Gatun Spillway Dam.

A trestle is being built out from the north toe of the east wing of the Gatun Dam to extend over the Spillway dam and facilitate the placing of concrete in the upper levels of the Spillway dam, and the erection of the crest gates by which the flow of water over the ogee will be controlled. The top of the trestle is to be 95 feet above sealevel and will support three rails, combined to form tracks of Isthmian standard and 3-foot gage, the latter for trains from the concrete mixing plant. A large proportion of the concrete yet to be laid in the Spillway dam, amounting to about 23,000 cubic yards, will be placed from this trestle. The greater part of this will be used in the completion of the ogee to its final height of 69 feet above sealevel, a gap of 400 feet in the center of the dam having been left with its top at 50 feet above sealevel, after the completion of the end portions. This will allow a free escape of water from Gatun Lake after it reaches the 50-foot level and decrease the danger of flooding Culebra Cut over the dike at Gamboa. The gap will be filled during the next dry season. In addition to this, the 13 crest piers, between which the gates crowning the ogee will operate, will be built up to 115 feet above sealevel, rising 46 feet above the top of the ogee.

As the trestle is extended the successive piers will be built to about 94 feet above sealevel, so that the tracks may rest in part on them. The placing of the gates between the piers will be accomplished by the use of two wrecking cranes. Each gate is 45 feet wide,

NOTES OF PROGRESS.

(Continued.)

20 feet high, approximately four and one-half feet thick, and weighs 42 tons. Some of the material for the gates is lying in the erecting yard near the machine shops at Gatun, but the assembling, which is to be done by the forces of the McClintic–Marshall Company, is being deferred on account of the need of hastening the work on the upper guard gates in Gatun Locks. The flow of water over the ogee is to be controlled by raising and lowering the gates between the piers. The bottoms of the gates will rest on babbitted sills on top of the ogee when closed, and a stoppage to the elevation of slightly less than 89 feet above sealevel will thus be effected. If it is desired to allow water to escape, the gates, or as many as may be required, will be raised by means of chains running to the tops of the piers and over sheaves into the machinery tunnel. A description of the method of operation was published in THE CANAL RECORD of October 25, 1911.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 90 per cent completed, 202,511 cubic yards, out of a total of 225,000, having been placed at the close of work on July 6. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
July 1	104	6.30	1
July 2	104	5.30	1
July 3	3	.10	1
July 4 (Holiday)			
July 5	28	1.15	1
July 6	44	4 45	1
Total	283	18.10	1
Previously reported	202,228		
Grand total	202,511		

Notice to Mariners.

I am advised that the shoal on the east side of the channel, referred to in my notice which appeared in THE CANAL RECORD of December 20, 1911, where the drill barge *Teredo* is at present engaged, has been raised several feet by blasting, and now carries twenty-two (22) feet at mean tide, or only twelve (12) feet at extreme low tide. All vessels should pass this shoal on the west side of the channel. The two lighthouses on head of tangent No. 1 will admit of ships steering a safe course past this shoal.

Obstruction buoy will be placed as soon as possible, after which shipping should pass to the westward of the buoy.

J. ST. C. HUNT, *Port Captain.*

Balboa, C. Z., July 3, 1912.

Relief of Reservoir Shortage.

The amount of rainfall over the Canal Zone was much below normal during the period between the nominal end of the dry season and May 1. This resulted in a shortage of water in all reservoirs, except Agua Clara, which supplies Gatun, New Gatun, and the Spillway, and it was necessary to resort to emergency measures to maintain the supply of water to other villages, as reported in THE CANAL RECORD of May 15. During May and June, the rainfall was only slightly below normal, except over the relatively small portion of the Canal Zone between Pedro Miguel and Empire, an area lying for the most part near the continental divide. In this area, however, lie the watersheds of the Rio Grande and Camacho reservoirs. In consequence, while the hauling of water in barges to Cristobal was discontinued on June 24, the situation for the towns in the Central Division remained the same. Both reservoirs are rising slowly, but supplementing the supply from the Rio Grande with water from Cocoli Lake, and that from the Camacho, with water pumped from the Chagres River at Gamboa, continues far into the nominal rainy season. At the Rio Grande station, the rainfall recorded during the first six months of 1912 was nine inches, or about 35 per cent below normal. At Camacho station, during the same period, the precipitation was 10 inches, or about 40 per cent below normal. Repeated rains during the past few days, however, indicate that the drouth is broken over the area from Pedro Miguel to Empire, as well as over the rest of the Canal Zone.

CONCRETE WORK IN THE LOCKS.

Over 88 per cent of the concrete for the locks is in place, the amount at the close of work on July 6 being 3,804,267½ cubic yards, out of a total of approximately 4,302,563. A total of 15,688 cubic yards of concrete was laid in the locks during the week ending July 6.

GATUN LOCKS.

Over 94 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on July 6 being 1,882,059½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending July 6, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

EXECUTIVE ORDER.

Hours of Service of Laborers and Mechanics Employed Upon Work for the United States.

By virtue of the authority conferred upon me by Section 2 of the Act entitled "An Act limiting the hours of daily service of laborers and mechanics employed upon work done for the United States, or for any Territory, or for the District of Columbia, and for other purposes," approved June 19, 1912, the provisions and stipulations in said Act are hereby waived, until January first, nineteen hundred and fifteen, as to any contract or contracts entered into in connection with the construction of the Isthmian Canal.

WM. H. TAFT.

THE WHITE HOUSE,
June 19, 1912.
[No. 1547.]

The text of the Act above referred to is, as follows:

[PUBLIC—NO. 199.]
[H. R. 9061.]

An Act limiting the hours of daily service of laborers and mechanics employed upon work done for the United States, or for any Territory, or for the District of Columbia, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That every contract hereafter made to which the United States, or any Territory, or the District of Columbia is a party, and every such contract made for or on behalf of the United States, or any Territory, or said District, which may require or involve the employment of laborers or mechanics shall contain a provision that no laborer or mechanic doing any part of the work contemplated by the contract, in the employ of the contractor or any subcontractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work; and every such contract shall stipulate a penalty for each violation of such provision in such contract of five dollars for each laborer or mechanic for every calendar day in which he shall be required or permitted to labor more than eight hours upon said work; and any officer or person designated as inspector of the work to be performed under any such contract, or to aid in enforcing the fulfillment thereof, shall, upon observation or investigation, forthwith report to the proper officer of the United States, or of any Territory, or of the District of Columbia, all violations of the provisions of this Act directed to be made in every such contract, together with the name of each laborer or mechanic who has been required or permitted to labor in violation of such stipulation and the day of such violation, and the amount of the penalties imposed according to the stipulation in any such contract shall be directed to be withheld for the use and benefit of the United States, the District of Columbia, or the Territory contracting by the officer or person whose duty it shall be to approve the payment of the moneys due under such contract, whether the violation of the provisions of such contract is by the contractor or any subcontractor. Any contractor or subcontractor aggrieved by the withholding of any penalty as hereinbefore provided shall have the right within six months thereafter to appeal to the head of the department making the contract on behalf of the United States or the Territory, and in the case of a contract made by the District of Columbia to the Commissioners thereof, who shall have power to review the action imposing the penalty, and in all such appeals from such final order whereby a contractor or subcontractor may be aggrieved by the imposition of the penalty hereinbefore provided such contractor or subcontractor may within six months after decision by such head of a department or the Commissioners of the District of Columbia file a claim in the Court of Claims, which shall have jurisdiction to hear and decide the matter in like manner as in other cases before said court.

SECTION 2. That nothing in this Act shall apply to contracts for transportation by land or water, or for the transmission of intelligence, or for the purchase of supplies by the Government, whether manufactured to conform to particular specifications or not, or for such materials or articles as may usually be bought in open market, except armor and armor plate, whether made to conform to particular specifications or not, or to the construction or repair of levees or revetments necessary for protection against floods or overflows on the navigable waters of the United States: *Provided*, That all classes of work which have been, are now, or may hereafter be performed by the Government shall, when done by contract, by individuals, firms, or corporations for or on behalf of the United States or any of the Territories or the District of Columbia, be performed in accordance with the terms and provisions of section one of this Act. The President, by Executive order, may waive the provisions and stipulations in this Act as to any specific contract or contracts during time of war or a time when war is imminent, and until January first, nineteen hundred and fifteen, as to any contract or contracts entered into in connection with the construction of the Isthmian Canal. No penalties shall be imposed for any violation of such provision in such contract due to any extraordinary events or conditions of manufacture, or to any emergency caused by fire, famine, or flood, by danger to life or to property, or by other extraordinary event or condition on account of which the President shall subsequently declare the violation to have been excusable. Nothing in this Act shall be construed to repeal or modify the Act entitled "An Act relating to the limitation of the hours of daily service of laborers and mechanics employed upon the public works of the United States and of the District of Columbia" being chapter three hundred and fifty-two of the laws of the Fifty-second Congress, approved August first, eighteen hundred and ninety-two, as modified by the Acts of Congress approved February twenty-seventh, nineteen hundred and six, and June thirtieth, nineteen hundred and six, or apply to contracts which have been or may be entered into under the provisions of appropriation Acts approved prior to the passage of this Act.

SECTION 3. That this Act shall become effective and be in force on and after January first, nineteen hundred and thirteen.

Approved, June 19, 1912.

Largest Labor Train Divided.

On account of the preponderance of operations at Miraflores Locks, over that of Pedro Miguel Lock, the early morning labor train from Panama to Pedro Miguel, known as the largest labor train in the world, has been divided into two sections. One leaves Panama at 5.45 a. m., for Pedro Miguel, while the other leaves Panama ten minutes later and proceeds no further than Miraflores Locks. In the evening the return to Panama is effected by two trains, as before.

Immigration at Ports of Colon and Cristobal.

The number of persons who landed at Colon and Cristobal from foreign ports during the month of June was 3,513, consisting of 1,422 cabin, and 2,091 steerage passengers. The number of persons who embarked for foreign ports during the same period was 2,707, consisting of 1,252 cabin, and 1,455 steerage passengers. The number of persons who landed during the month, over those who embarked was 523. The persons who arrived "in transit" in June numbered 1,054.

PERSONAL.

Maj. James P. Jervey, and family; and Mr. H. A. A. Smith, and family, were among the passengers on the *Cristobal*, which docked at Cristobal on Tuesday, July 9.

Police Target Shooting.

Following pistol practice held in each of the four police districts of Ancon, Empire, Gorgona, and Cristobal, during the months of March and April, a competitive firing test was held at the Empire range on Saturday, April 6, in which all of the officers who had made a score of 95 points, or over, in the earlier practice tests, participated. The records made in the competitive shoot were, as follows:

Order merit.	NAME.	Rank.	SCORE.		
			Bulls-eye target.	Moving target.	Aggregate.
1	Leo A. McIntire........	Corporal...	69	47	116
2	Wm. J. Lawson........	1st. c. pol.	67	39	106

18	Lando Oliver..........	1st. c. pol...	52	18	70

Three medals of original design were awarded by the chief of police to the men with the three best scores. The medals are of bronze, the one for the high score having a superimposed Colt's revolver made of gold, and the one for the second best score having a revolver made of silver. These contests were begun in 1911, the one that year being held at the Gorgona pistol range on September 23. Officer John W. Maddera won first place in that contest, Corporal McIntire, second; and Officer John Acors, third.

Independence Day Banquet at Gorgona.

An Independence Day banquet was held at the Commission hotel on Wednesday evening, July 3, under the auspices of the Gorgona clubhouse. Col. Geo. W. Goethals was present as one of the guests. The past, present and the future were discussed. The cover of the menu contained the emblem of a shovel done in the national colors. A number of original verses were recited. The Marine band furnished music for the occasion.

Married.

WHITE-BRAUN—On June 23, in the Union Church of Cristobal, Ida Lovina Braun, to William Morse White, both of Brooklyn, N. Y., the Rev. Carl H. Elliott, officiating. Isthmian residence, Colon.

MEDICAL WORK IN SCHOOLS.

System of Inspection, Placed in Effect in Zone Schools in 1911, of Practical Value.

The medical inspection of the pupils of the Canal Zone public schools for white children, which was systematized and carried out with satisfactory results in 1911, has been continued during the school year, from October, 1911 to June, 1912. In order to place the report of the result of this work in permanent form for reference, the report cards of the physicians have been filed in the office of the Division of Schools with the record card of each student. The entire record thus obtained has been worked out in the following tables, which indicate to a certain extent the value of such examination, and the effect of treatment on the work of the pupil. The number of pupils examined was 1,020. Of this number 547, or 53.6 per cent, were found to be normal, and 473, or 46.4 per cent, were found to be detective. The tables below are based on the number of children passing and failing in the examinations for promotions at the end of June.

Table No. 1 indicates the relative numbers of normal children passing and failing, and the relative numbers of defectives, classified under four heads, passing and failing. Table No. 2 indicates the number treated and not treated, and the relative numbers passing and failing. Table No. 3 indicates the relative percentages of promotions and failures as based on the figures in Table No. 1. Table No. 4 indicates the relative percentages of promotions and failures as based on Table No. 2.

Table No. 1.

	Eyes.		Ears.		Nose and Throat.		Teeth.	
	Passed.	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*
Normal	460	87	460	87	460	87	460	87
Defective	146	51	40	9	132	45	215	59

Table No. 2.

	Eyes.		Ears.		Nose and Throat.		Teeth.	
	Passed.	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*
Treated	49	21	20	4	53	14	7	1
Not treated	97	30	20	5	79	31	208	58

Table No. 3.

	Eyes.		Ears.		Nose and Throat.		Teeth.	
	Passed.	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*
Normal	84	16	84	16	84	16	84	16
Defective	74	26	81	19	75	25	78	22

Table No. 4.

	Eyes.		Ears.		Nose and Throat.		Teeth.	
	Passed.	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*	*Passed.*	*Failed.*
Treated	70	30	84	16	79	21	87	13
Not treated	77	23	80	20	72	28	77	23

The comparatively small number treated makes any scientific conclusion impossible, but the figures are, at least, indicative. A number of children were found to be defective in respect to two or more of the general items listed in the table. It will be noted that of the total number of normal children 84 per cent passed, while of the total number of defectives 65.3 per cent passed.

Announcements of Examinations.

There will be inaugurated shortly the practice of posting on bulletin boards at Canal Zone post-offices and Commission clubhouses announcements of civil service examinations which will be held for appointment only in the apportioned Departmental Service (that is, for station in Washington, D. C,) and which, therefore, cannot be held in the Canal Zone. These examinations, however, may be applied for in the United States by persons in an unclassified status in the Canal Zone under the following ruling of the Civil Service Commission:

"Any citizen of the United States in the employ of the Federal Government on the Isthmus of Panama in an unclassified status (employes of the Panama railroad have been included in this provision) will be permitted to take an examination for the apportioned Departmental Service in Washington, D. C., in his home state at such time as he may be in such state on vacation. If he passes the examination his name will be entered upon the appropriate register, together with those examined in the open competitive examination of the same kind nearest in point of time to the date of his examination. To avail himself of the privilege extended by this regulation, an employe affected thereby must duly file the necessary application with the United States Civil Service Commission, Washington, D. C., (applications may be secured from the undersigned,) and in connection therewith establish domicile in the state claimed for at least one year immediately preceding, as required by the statute, but his Federal employment on the Isthmus will be held not to vitiate his claim to domicile in the state in which he was actually domiciled immediately preceding such employment on the Isthmus."

The announcements will be posted only for the information of persons in an unclassified status who may contemplate taking such examinations, and the notices will contain the following note: "Not to be held in the Canal Zone. For information only."

Announcements of examinations which may be held in the Canal Zone are posted at present in the seven Commission clubhouses, Ancon Hospital mess, and the Administration buildings at Ancon and Culebra. Their distribution will be extended to include the post-offices.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., July 5, 1912.

Knights of Pythias Ball and Banquet.

Cruces Lodge, No. 9, Knights of Pythias, will entertain all Knights and their families at their first annual ball and banquet, to be held at the Gorgona clubhouse, on Saturday evening, July 13. A special program has been arranged for those who do not wish to participate in the dancing. The banquet will be given at the Commission hotel at 9.30 o'clock.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending July 6:

Date.	Hours worked.	Cubic Yards.
June 24	8.05	3,276
June 25	8.10	2,854
June 26	7.45	2,781
June 27	7.45	2,672
June 28	8.00	3,173
June 29	8 10	2,798
Total	47.55	17.554
July 1	8.20	2,460
July 2	7.10	2,491
July 3	8.10	2,882
July 5	5.55	1,843
July 6	7.10	2,800
Total	36.45	12,476

Panama Auxiliary, No. 1, U. S. W. V.

The next regular meeting of the ladies of Panama Auxiliary, No. 1, United Spanish War Veterans, will be held at Empire lodge hall on Sunday, July 14, at 2.30 p. m. All members are urged to be present.

Pacific Division Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of June, follows:

Destination.	Number Cars.	Cubic Yards.
Pacific Division	3,376	57,288
Atlantic Division	11	267
Central Division	27	405
Fortifications	*27	1,121
Quartermaster's Department	3	75
Civil Administration	1	25
Lighthouse division	9	207
Panama railroad	5	125
Miscellaneous	1	25
Total	*3,460	59,538

*One barge load shipped.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration building, Ancon, on July 17. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration building at 8 a.m., on July 17, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability properly to operate an automobile, and must have the automobile with them.

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Toro Point, C. Z., Sunday, July 14, 1912, at 2.30 p. m. The program follows:

1. March—*Lance and Shield* .... Laurendeau

4. Overture—*Hungarian Lustspiel* ....Keler Bela
5. —*Everybody's Doing It Now*............Berlin
   —*Hula, Hula*........................Wernrich
6. Waltz—*Wedding of the Winds*.............Hall
7. Descriptive—*The Racket at Gilligan's*....De Witt
8. Selection—*Remick's Hits*...............Lampe
9. March—*Joe Weber*....................Appelles

CHAS. E. JENNINGS, *Musical Director.*

The next concert will be given at Empire, July 21, at 6 p. m.

THE CANAL ZONE FOURTH.

Large Attendance at Ancon Celebration—Winners of Prizes in Various Events.

The celebration of the Fourth of July at Ancon and Balboa was held successfully, each of the Canal Zone towns from Ancon to Cristobal contributing its quota in the attendance. The weather was all that could be desired up to about 6 o'clock in the afternoon, when a drizzle set in which continued throughout the evening, marring to some extent the enjoyment of the fireworks display, as a great many of the visitors took the first train for their homes after it began to rain. The out-of-town people found the slopes of the hill on which the Ancon schoolhouse stands an ideal one for a picnic ground, as well as furnishing a good view of the track and field events, which were held during the forenoon at the ball park. When the lunch hour arrived, the men, who were accompanied by their families procured refreshments, consisting of sandwiches, oranges, and ice cream, from a stand at the schoolhouse, and then gathered into groups on the greensward under the big trees, and had an old-fashioned picnic. The men, single, or unaccompanied by their families, were served in the space between the batchelor quarters and the ball park, in the rear of Hotel Tivoli. Refreshments were served to all Americans who had contributed to the cost of the celebration, upon presentation of tickets. Ice water, and hygienic and tin drinking cups, were available in different parts of the grounds.

In the afternoon, a large number of visitors journeyed to Balboa to witness the aquatic sports, held in front of the Panama railroad wharf, while others remained in Ancon to see the baseball game. The pyrotechnic display in the evening was held on the old reservoir hill, but was curtailed by reason of rain wetting some of the fireworks. The I. C. C., Marine, and Tenth Infantry bands furnished the music during the day, and in the evening the Tenth Infantry band gave a concert at the Hotel Tivoli. The festivities closed with a dance at Hotel Tivoli, which was well attended.

Both sides of the road leading to Hotel Tivoli, and the one past the fire station, were effectively decorated in the national colors, and three arches were erected, one on the Tivoli road, and two on the intersecting street. In the evening, the roads and the entrance to Ancon Hospital were electrically illuminated.

The results in the various events are, as follows:

TRACK EVENTS.

100-yard dash—R. H. Wetherbee, Empire, first; W. Whittles, Cristobal, second; H. S. Warner, Corozal, third. Time, 11 2-5 seconds.

220-yard run—F. P. Obee, Corozal, first; D. F. Edwards, Ancon, second; J. P. Marshall, Camp Elliott, third. Time 25 1-5 seconds.

440-yard run—M. Myers, Camp Elliott, first; F. P. Obee, Corozal, second; Private Alley, Company G, Camp Otis, third. Time 58 1-5 seconds.

880-yard run—K. Scherzberg, Ancon, first; W. Whittles, Cristobal, second; C. E. Mengel, Culebra, third. Time, two minutes, 20 2-5 seconds.

100-yard low hurdles—D. T. Ellsworth, Culebra, first; J. L. Zirkle, Camp Elliott, second; W. Whittles, Cristobal, third. Time 14 3-5 seconds.

Four-lap relay race,(Four men in each team)—Camp Elliott, first; Empire, second; Ancon, third.

Potato race, (eight potatoes)—C. R. Hilty, Gorgona, first; E. Roberts, Corozal, second; F. W. Hoff, Balboa, third. Time, 38 1-5 seconds.

FIELD EVENTS.

Running high jump—R. A. Koperski, Empire, first; 5 feet 3 inches; P. H. Chadbourne, Corozal, second, 5 feet 3 inches; C. H. Gerhardt, Camp Otis, third, 5 feet 2 inches.

Running broad jump—C. Herring, Gorgona, first, 21 feet ½ inch; H. L. Thompson, Camp Elliott, second, 20 feet 10¾ inches; B. Robinson, Gorgona, third, 19 feet 9½ inches.

12-pound shot put—C. Herring, Gorgona first, 46 feet 9½ inches; McDonald, Camp Otis, second, 43 feet ½-inch; A. Anderson, Camp Elliott, third, 42 feet 6½ inches.

The total of points, by towns, follows:

Position.	Town.	Points.
1	Camp Elliott	18
2	Gorgona	16
3	Corozal	15
4	Empire	13
5	Ancon	9
6	Cristobal	7
7	Culebra	6
8	Camp Otis	5
9	Balboa	1
10	Gatun	0

BOYS' EVENTS.

75-yard dash—Fred Whiston, Corozal, first; William Fraser, Cristobal, second; Arthur Farrell, Cristobal, third.

440-yard relay—Gatun, first; Cristobal, second; Ancon, third. Gatun won this race by default, the Corozal team actually being first, but was counted out on account of a boy from another town having been entered with the team.

SPECIAL EVENTS.

Wall scaling contest between Camp Elliott and Camp Otis—Won by Camp Elliott.

Equipment race, between Camp Elliott and Camp Otis—White, Camp Otis, first; Kline, Camp Elliott, second; Rowen, Camp Otis, third.

Sack race—White, Camp Otis, first; McKeown, Balboa, second; W. Bartlett, Corozal, third.

Three-legged race—Dolbee and Foy, Camp Otis, first; Burmeister and Sims, Gorgona, second; Bartlett and Parkis, Corozal, third.

Tug-or-war, between Camp Elliott and Camp Otis—Won by Camp Elliott, six feet in 54 seconds.

Fat man's race, 75 yards—Dr. Funk, Gorgona, first; Nimbrough, Camp Otis, second; Fouriner, Camp Elliott, third. Time, 9 1-5 seconds.

The officials in the athletic events were, as follows: Chairman, athletic committee, W. H. Warr; referee, William E. Burrell; assistant referee, G. W. Watson; clerk of course, Roy L. Dwelle; assistant clerk of course, C. B. Russell; starter, Lieut. T. S. Clark, scorer, I. H. Fleischman; timekeepers, G. W. Green; C. K. Weston, C. A. Armstrong, C. H. Volz; track judges, Lieut. L. H. Hohl, E. L. Emery, C. K. Weston, L. A. Poltrino; field judges, J. W. Tannehill, J. H. Doran, C. B. Ellington, J. A. Smith; inspectors, R. Kirkpatrick, L. A. Weller, J. W. Ford, C. A. Carter; announcer, W. K. Freeland; marshal, Lieut. G. W. Lewis.

TENNIS TOURNAMENT.

The Fourth of July tennis tournament finals in singles was won by Neely of Empire. The finals in doubles will be played off sometime this week by Herrick-Runyon, Ancon, and Edwards-Fechtig, Tivoli.

BASEBALL GAME.

The baseball game between the Culebra and Commissary-Subsistence teams resulted in a victory for Culebra by a score of 14 to 5. Batteries—For Culebra, Barnes and Cushing; for Commissary-Subsistence, Gufkie, Davis, and Beard.

AQUATIC EVENTS.

Life boat race, distance, three-fourths mile, six-oared and coxswain—Balboa Breezers, Capt. Roberts, first; Balboa Consuming Association, Capt. McKeown, second. Prizes, $25 and $15.

Gasoline boat race, second-class, below 10-horsepower, distance three miles—*U. S. No. 4*, Capt. J. Jones, first; *U. S. No. 5*, Capt. J. Siler, second. Prizes, $20 and $10.

Swimming contest for men, distance 100 yards—J. E. Carpenter, Gorgona, first; A. V. Mitchell, Corozal, second; L. W. Giavelli, Empire, third. Prizes, gold, silver, and bronze medals.

Panga race, one-half mile, two-oared and coxswain—Balboa Nonpareils, Capt. Lydon, first; Corozal No. 1 team, Capt. McBeth, second. Prizes, $15 and $10.

Swimming contest for boys, age limit 16 years, distance 100 yards—William Fraser, Cristobal, first; C. P. Gray, Gatun, second; Alfred Eriksen, Balboa, third. Prizes, gold, silver, and bronze medals.

High diving contest—The total prize money in this event was doubled, and the $80 evenly divided between the four contestants, Roy Nelson, Cristobal; H. R. Tucker, Balboa; George Cataldo, U. S. Marine Corps, Camp Elliott, and Frank Evans, Tenth Infantry, Camp Otis, who dived from the 85-foot platform.

Gasoline boat race, first-class, 10-horsepower and up—Launch *Flamenco*, Capt. Warren, first; launch *Snail*, Capt. Kelly, second. Prizes, $20 and $10.

Relay swimming contest, four-man teams, distance 200 yards—Gorgona team, Capt. Carpenter, first; Corozal team, Capt. Mitchell, second. Prizes, gold medals.

Fancy diving contest—H. H. Sollenberger, Empire, first; E. R. Parsons, Gatun, second; Roy Nelson, Cristobal, third. Prize, gold medal.

Tub race, with paddles, 100 yards—R. Kilcorse, Balboa, first; P. Illwitzer, Balboa, second. Prizes, $10 and $5.

Greased horizontal spar, 60 feet—Won by Capt. Lydon, Balboa. Prize, $15.

Exhibition fire and lifeboat drill—Won by tug *Bolivar*. Prize, $25.

The following events were eliminated: Four-round aquatic boxing contest, log-rolling contest, duck hunt, and obstacle swimming contest.

The officials in charge of the aquatic events were, as follows: W. J. Spalding, chairman; James Macfarlane, referee; J. E. Siler, starter; James F. Jones, scorer; R. H. Sturdivant, announcer; Ralph Finley, M. T. Ransom, J. A. Close, inspectors; W. I. Pender, X. D. Holt, Richard Roberts, E. B. McCormick, S. P. Hughlings, L. E. Williams, judges.

The Day Observed Elsewhere on the Isthmus.

In Panama, following the custom of the past three years, the Fourth of July was observed as a civic holiday, some of the schools, including the National Institute, closing for the entire day, and the remainder taking a halfday recess. At Palo Seco, Taboga sanitarium, and the principal Zone towns, there were fireworks displays in the evening.

Programs for Souvenirs.

Any person desiring extra copies of the Fourth of July programs as souvenirs can procure same by addressing Mr. C. L. Parker, assistant depot quartermaster, Mount Hope depot, Cristobal, C. Z.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, July 6, 1912. All heights are in feet above mean sealevel.

DAY AND DATE.	STATION.				
	Vigia	Alhajuela	Gamboa	Bohio	Gatun Lake

Zimmer, Mrs Jacob

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The Gatun dramatic club will give its comic opera "Singbad, the sailor" at places in the Canal Zone on the following dates: Camp Elliott, July 11; Empire, July 13; Corozal, July 16; Gatun, second engagement, July 18.

COROZAL.

The Corozal team will bowl in Gorgona, Saturday night, July 13.

The results of the Empire-Corozal bowling games at Corozal on Saturday night, July 6 were, as follows:

Empire.				Corozal.			
Pinney	146	203	182	Coonly	174	184	188
Danielson	168	116	146	Souder	170	153	224
Sawtelle	156	169	161	Sessum	147	151	154
Leon	192	124	193	Beal	214	134	131
Henry	144	184	202	Sims	191	150	
				Wilkins			127
Total	806	796	884		896	772	824

The highest bowling scores made so far this month are: Sims, 234; Souder, 224; Beal, 214. High scores for ladies: Mrs. McGeachey, 123; Mrs. LaMire, 119; Mrs. Benninger, 107; Mrs. White, 102.

CULEBRA.

The men of Culebra who are interested in bigpin bowling should get in shape for the tournament which will start shortly.

The high scores for the week in duckpins are, as follows: Palmer, 104; Case, 108; Brown, 100.

The basketball teams will play on Wednesday and Saturday of this week.

The chess team will go to Gatun on Saturday evening, July 13.

EMPIRE.

An order for new library books is to be sent to the United States shortly. Any one wishing to procure any special books will kindly hand in the names of same at the office of the secretary.

The Boy Scout movement is to be reorganized in Empire. All boys will be welcomed as members. Many useful "stunts" are in store for the wideawake boys who join. The first meeting will be held Friday, July 12, at 3 p. m

The standing of the local political tenpin tournament is, as follows:

	Won.	Lost.	P. C.
Suffragettes	4	2	667
Democrats	4	2	.667
Independents	6	3	667
Socialists	3	3	.500
Progressives	1	8	.111

GORGONA.

Regular calisthenic classes are scheduled for Mondays and Thursdays from 7.45 to 8.30 p. m.

The local basketball league will be organized with the idea of getting all of the members interested. The games will be played on Mondays and Thursdays at 8.30 p. m., immediately following the calisthenic classes.

GATUN.

Basketball practice has been started in Gatun. This week the nights will be Tuesday and Thursday. The gymnasium nights are Monday and Wednesday, with moving pictures on Friday night.

The first basketball game of the season will be played between a McClintic-Marshall team, and a team composed of I. C. C. employes on Saturday evening, July 13. The public is invited.

President Gartrell of the chess and checker club announces that he will be pleased to receive challenges for games between the local club and other clubs on the Isthmus.

On Wednesday night, July 3, the record in the pool room for a single day was broken, when 374 games were played on five tables. Arrangements are being made for a series of match games between the champion of Empire, Mr. Pierson, and the all-Isthmian champion, Mr. DePoorter. The games will probably be played in Empire, Gatun, and Cristobal.

CRISTOBAL.

On Wednesday evening, July 10, Mr. F. L. Bernsee, champion checker player of the Isthmus, will meet all comers at simultaneous checkers.

On Friday evening, July 12, a "smoker" will be given at the clubhouse. A special program has been arranged, including many new features, among which will be an exhibition in broad swords by Messrs. MacSparren and Fleming. The former is said to be the champion, in this art, of Scotland. The I. C. C. orchestra and the Cristobal quartet have also been procured and two wrestling matches are being arranged. Minstrels, comedy, and monologues will also feature in the evening's entertainment.

Rainfall from June 1 to 30, 1912, Inclusive.

WEATHER CONDITIONS, CANAL ZONE, JUNE, 1912.

Rainfall on the Isthmus during the month of June was generally above normal along the Atlantic coast and over the Chagres River basin, but below normal on the Pacific slope.

The average air temperature was about one degree above normal at each station, while the relative humidity and cloudiness were generally below normal.

There was an excess in wind movement, the prevailing direction being from the northwest, or west. During a wind and rain squall on the Pacific coast on June 15, the wind reached a velocity of 50 miles an hour from the south at Sosa, and 34 miles from the south at Ancon. During this squall, hail was reported on Naos Island.

OFFICIAL CIRCULARS.

Witnesses of Fourth of July Disturbance in Panama City.

CULEBRA, C. Z., July 6, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

I quote below letter from Capt. R. E. Ingram, Tenth Infantry, Camp E. S. Otis, in which he requests, as recorder of a board of investigation, statements from employes having personal knowledge concerning the disturbance which occurred in Panama city on the evening of July 4:

> "I have the honor to inform you that it is reported that a number of American civilians are competent witnesses and are ready to submit evidence, if called upon, concerning the disturbance which occurred in Panama city on the evening of July 4.
>
> Presumably some of them are employes of the Commission.
>
> Would you please make public throughout the Zone, as soon as practicable, the fact that any of the employes of the Commission having knowledge of, or present at the said disturbance, please make affidavit of all said facts and transmit same to Capt. R. E. Ingram, Tenth Infantry, Camp E. S. Otis, recorder of a board of investigation, on the disturbance.
>
> If any one desires to appear before the board instead they may do so at any time of the day at headquarters building, Camp E. S. Otis.
>
> If not convenient for any one desiring to submit testimony, to be sworn to their written statements right away, it is requested they send in to me written statements of what they are willing to swear to, and which swearing may be done later. Particular information is requested as to whether or not any soldiers or marines were armed, and if the means used by the police were justifiable."

GEO. W. GOETHALS, *Chairman.*

Visit of Pay Car in July Deferred Three Days.

EMPIRE, C. Z., July 6, 1912.

TO ALL CONCERNED:

The pay car, for the month of July only, will be deferred three days, the same schedule being adhered to, except that it will be carried out on the 15th, 16th and 17th, instead of the 12th, 13th, and 14th, respectively, as heretofore.

No pay certificates at present undelivered shall be delivered prior to Friday, July 12, and no payments, except in the case of persons who have left the service or are going on leave, will be made at any office Friday, Saturday, or Sunday, July 12, 13, or 14.

EDWARD J. WILLIAMS, *Disbursing Officer.*

Approved: GEO. W. GOETHALS,
Chairman and Chief Engineer.

Unauthorized Lights in Quarters.

CULEBRA, C. Z., July 3, 1912.

CIRCULAR No. 311-A.

The Quartermaster's Department is authorized to have removed at the expense of the individual responsible for their installation all unauthorized lights in quarters. Hereafter, in case any unauthorized installations are made, the employe responsible for same will be subject to proper disciplinary measures.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting General Foreman, Mechanical Department, P. R. R.

PANAMA RAILROAD COMPANY,
COLON, R. P., July 2, 1912.

TO ALL CONCERNED:

Effective July 3, Mr. J. P. Dovell, in addition to his duties as operator in charge of the Brown hoist, will act as general foreman of the Mechanical Department in place of Mr. J. H. Bryant, appointed acting general foreman during the absence of Mr. W. H. Readle, general foreman.

J. A. SMITH,
General Superintendent.

Acting Master of Transportation, P. R. R.

PANAMA RAILROAD COMPANY,
COLON, R. P., July 3, 1912.

TO ALL CONCERNED:

During the absence on leave of Mr. A. K. Stone, master of transportation, effective July 3, 1912, Mr. L. B. Maggard, in addition to his duties as chief dispatcher, is appointed acting master of transportation.

J. A. SMITH, *General Superintendent.*

The following ships arrived at, or departed from, the port of Balboa during the week ending July 6:

Arrivals—June 30, *City of Sydney*, from San Francisco; July 1, *Ucayali*, from Callao; July 4, *Huasco*, from Valparaiso.

Departures—July 1, *Guatemala*, to Valparaiso; July 1, *San José*, to San Francisco; July 1, *Quito*, to Guayaquil; July 4, *Peru*, to Guayaquil.

COMMISSARY DEPARTMENT.

The commissaries are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning July 11, 1912.

FRESH MEATS.	*Price.*

Pineapples, each	10
Watermelons, each	35

---

*Indicates reduction from last list.

**Indicates 5 cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weigh each about as follows: 3, 3½, 4, 4½ and 5 pounds. Prices are based accordingly; when size ordered is not in stock next lightest weight, is supplied and refund note sent for difference.

?Sold only from commissaries; no orders taken for delivery.

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon and Balboa, during the week ending July 6:

Aztec, June 29, from San Francisco, with 2 bales dredge sleeves, for Atlantic Division.

Tivives, June 30, from New York, with 62 pieces white oak lumber, for Mechanical Division; 2,906 bundles steel bars, for Fortification Division; 12 cases gaskets, 100 cases varnish, 100 cases toilet paper, 321 coils rope, 30 barrels rosin, 47 cases ink, 10 cases electrical material, for stock.

Prinz Sigismund, July 2, from New York, with 203 pieces steel rods, for Atlantic Division; 25 bundles coil springs, 9 cases tinware, for stock.

Zacapa, July 3, from New York, with 205 pieces steel plates, for superintendent of erection; 2,804 bundles steel bars, for Fortification Division; 75 bundles wheelbarrows, 50 pieces steel channels, 6 cases insulating tape, for stock.

Parismina, July 4, from New Orleans, with 19,918 pieces lumber, 74 pieces piling, 98 bags feed, 23 rolls cotton duck, for stock; 8 car wheels, 3,818 pieces lumber, for Mechanical Division; 293 bundles castings for superintendent of erection.

Advance, July 4, from New York, with 67 barrels flour, 76 bundles staves and hoops, 8 cases trucks, 46 cases soap, 15 crates valves, 113 cases paint, 18 pigs tin, 20 kegs horseshoes, 58 pieces steel beams, 12 reels wire rope, 222 kegs nuts, 20 barrels pipe-fittings, 2,477 pieces sewer pipe, 38 pieces steel channels, 300 cases linseed oil, 7 crates pipe, for stock; 50 barrels insulators, 28 reels cable, for superintendent of erection; 9 crates galvanized pipe, 14 reels cable, 150 cases coil springs, for Pacific Division; 50 barrels enameled brick, 88 pieces steel beams for Panama railroad; and a miscellaneous cargo, the whole consisting of 4,285 packages, weighing 460 tons.

Sachsenwald, July 5, from Hamburg, with 15 cases castings, for superintendent of erection.

McClellan Saddles For Sale.

The Depot Quartermaster has on hand at Mount Hope depot, five 12-inch and one 11-inch McClellan saddles, which have never been taken out of stock, and inasmuch as there is no likelihood of them being required for official use, same are available for sale.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; or the Royal Mail Steamship Packet Company; of the Hamburg-American Line, and of the United Fruit Company's line:

Panama railroad steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m., for New Orleans via Limon, on Thursdays, at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 11 a. m.; for Bocas del Toro, on Mondays and Tuesdays at 5 p. m.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, JULY 17, 1912. No. 47.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of June is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

New Wharf in Commercial Use.

The new lumber wharf of the Panama railroad received its first commercial ship on July 13, when the *Cuzco* berthed with a cargo of 650,000 feet of lumber, consigned to the Isthmian Canal Commission from Seattle. The *Cuzco* is a twin-screw steel steamship of approximately 4,000 tons, and is registered in Tonsberg, Sweden. Since its first arrival at the port of Balboa, on August 23, 1910, it has been regularly engaged in carrying lumber from Puget Sound ports to the Canal Zone, making about four round trips a year.

The channel to the new wharf draws 40 feet at mean tide, The wharf will be in regular use for lumber laden vessels, which will unload with their own gear, until it is relinquished as a part of the repair dock in the permanent terminal arrangements.

Progress in Culebra Cut.

Cross sections of Culebra Cut indicate that to the balance of 7,400,000 cubic yards carried forward as remaining to be excavated at the close of the fiscal year on July 30, there should be added 4,600,000 cubic yards to cover slides, silting, and material yet to be moved to lessen the load on the tops of banks. The total estimated amount of material to be removed from the Cut, from the beginning of the fiscal year 1912, in order to complete the Canal is thus 12,000,000 cubic yards. The Central Division has been able to keep down the unit cost of excavation to such an extent that it is believed that the 12,000,000 cubic yards can be taken out at a division cost no greater than that formerly estimated.

It is planned to keep all of the 38 steam-shovels now employed in the Central Division at work as long as possible. With the present equipment, no difficulty is anticipated in finishing the excavation by July 1, 1913, unless large slides should develop only a short time before that date.

The latest slide development is on the west bank, a little south of Las Cascadas station. Slides near both ends of the former Whitehouse storage yard are threatening the tracks. It is believed that some of the six parallel yard tracks will have to be torn up, but the advance of the work to completion in the adjacent sections of the Cut has made the Whitehouse yard relatively unimportant, and a part of it can be abandoned without inconveniencing the operations of dirt and labor trains. A total of about 700,000 cubic yards of material is in motion in the two slides.

Riprapping Embankments on Relocated Line.

The embankments of the relocated line on the Panama railroad, from Gatun to Dump 6, passing through the proposed Gatun Lake region, are being riprapped with rock from Culebra Cut in anticipation of the rise of the lake. An average of six trainloads of rock is used daily. Some of the fills through swamps were made with considerable difficulty, but during the five months in which the line has been used for all traffic between Gamboa and Gatun, they have stood up satisfactorily.

Scraper Grading at Gatun Locks.

The work of grading at the upper end of the east backfill at Gatun Locks is being carried on by means of dismounted wheelscrapers, actuated by a two-drum hoisting engine. It is intended to finish this face of the backfill to a 1-on-3 slope. A natural clay knoll extends beyond the plain of the finished slope, and the grading consists in cutting off this knoll and carrying the clay to the outer edge of the fill. The engine is located on the top of the finished backfill, and operates the head and back-haul cables, which pass through anchored pulleys. The pulleys can be adjusted in position, so as to conduct the scrapers to any desired location for cutting or dumping. Two scrapers are used, each of ½-cubic yard capacity, and they are permanently attached, in tandem, to the hauling cables in such a manner as to enable the filling and dumping to be done without detaching either cable. The average haul is about 200 feet, and the scrapers move about 125 yards per day, at a cost of about 20 cents per yard.

Improved Levers for Motor Cars.

An improved system of levers, used to apply and release the band brakes on Isthmian Canal Commission motor cars Nos. 6, 7, and 8, has been devised by the inspector of motor cars at the Culebra garage and tested on cars Nos. 6 and 7. It has been found to render the brakes approximately fifty per cent more effective, and is being installed on car No. 8. The system is composed of one lever and two rods, instead of a lever, three rods, and an equalizing bar, as used heretofore.

Heated Rock Phenomena in Culebra Cut.

On the phenemena of heated rock in Culebra Cut, opposite station No. 1862, north of Paraiso slide, the Commission geologist has reported that the rock of the area affected is a limy sandstone, or marl, in beds from an inch to a foot, or more, in thickness, overlying a mass of intruded basalt. Between the beds are soft, friable partings, some of which contain, in addition to lime, a considerable proportion of volatile hydrocarbonic material. When several pounds of this were panned down to a few ounces the concentrate showed a rather large proportion of finely divided pyrite. Under the microscope, some of the crystals measured less than .1 millimeter in diameter.

The starting point of the heating is the atmospheric oxidation of this finely divided pyrite. Oxidation begins as soon as the pyrite-bearing layers are exposed to the worm, moist atmosphere. The heat generated is sufficient in a short time to promote rapid oxidation of the large pyrite crystals, which, in turn, raises the temperature beyond the kindling point of the volatile hydrocarbons in the rock, and these begin to burn in a smoldering way. When all of the oxidizable material is consumed the rock cools. The section affected has practically burned itself out.

Construction of Emergency Dams.

Erection of the emergency dams for the locks has been retarded by delays in shipment of material, due to the wharfmen's strike in Baltimore, and has been confined to the dam for the east chamber of Gatun Locks. Consignments received to the first of this week, however, have brought the total of material on hand to about 2,000 tons, of which 700 tons are pig iron to be used as counterweight on the short arm of the dam. The wicket girders of the dam for the east chamber of Gatun Locks are being assembled in temporary position in a pit next the side wall, and close by the concrete base on which the swinging bridge of the dam is to be pivoted. The long arm of the bridge is to be built out over the pit, and the girders will be raised and attached to it. The pivot base and the concrete quadrant, around which the short arm of the bridge is to swing, have been placed by the Isthmian Canal Commission. All of the steel work, including a track over the quadrant for the passage of rollers, is to be done by the contractor. The contract is in the hands of the United States Steel Products Company, the fabrication and erection being done by the American Bridge Company. The force engaged on the work at present numbers 12 men, under the direction of a resident engineer.

Work on the dams for the Pedro Miguel and Miraflores locks will not be begun until the greater part of that at Gatun has been

NOTES OF PROGRESS.

(Continued.)

completed. The dams for Miraflores Locks will be somewhat lighter than the others. A total of approximately 12,000 tons of material will be used at the three locks.

Canal Laborers Going to Guatemala.

The Chief Quartermaster has received a statement from the United Fruit Company showing that 1,339 laborers, formerly employed on the Canal works, have been sent by that company to Guatemala during the past few months to work on its plantations there. Of this number, 446 were West Indians, 250 were Greeks, 473 were Spaniards, and 170 were Hindoos.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 90 per cent completed. 202,939 cubic yards, out of a total of 225,000, having been placed at the close of work on July 13. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
July 8	24	1.00	1
July 9	32	2.00	1
July 10	72	4.00	1
July 11	112	6 00	1
July 12	112	6.30	1
July 13	76	4.30	1
Total	428	24 00	1
Previously reported	202,511		
Grand total	202,939		

Central Division Unloaders for June.

The following statement shows the number of trains and lidgerwood cars unloaded by the Central Division during the month of June:

Location.	No. of unloaders.	No. of trains.	No. of cars.
Balboa	4	1,340	26,800
Miraflores	2	534	10,680
Gamboa	3	883	18,533
Totals	9	2,757	56,013

Balboa Hotel Abandoned.

The Commission hotel at Balboa was abandoned on July 16, and will be torn down to make way for the terminal improvements. The steward in charge has been transferred to the hotel at East Balboa, the steward of the latter being transferred to Porto Bello.

Examination for Levelman and Transitman.

An examination of candidates for promotion to the grades of levelman and transitman will be held at Culebra on Sunday, August 11, 1912, at 9 a. m.

Employes who desire to take the examination will please make application through the head of the department in which they are serving, to A. B. Nichols, chairman of the examining board, Culebra.

Candidates attending the examination should bring with them tables of the circular functions, and triangles.

Victim of Yellow Fever.

Orella Fioilan, cook on board the steamship *Chile* of the Pacific Steam Navigation Company, was admitted to Santo Tomas Hospital, Panama, about 5 p. m., Tuesday, July 9, suffering from yellow fever, from which he died about noon, Sunday, July 15. The *Chile* left Guayaquil near midday, July 3, and reached Culebra Island quarantine near midnight, July 6. Her passengers, and such of her crew who had been ashore at Guayaquil were detained at the station, while the officers and the crew who had not been ashore were released from quarantine about 7 o'clock, Sunday morning, July 7.

I. B. of S. S. and D. M.

Local No. 19, I. B. of S. S. and D. M., will hold its regular meeting at 12.15 p. m., on Sunday, July 21, at the Empire lodge hall. All members are requested to attend as there is business of importance to be discussed.

Owing to the congestion in accommodations for bachelors, a type-18 house has been removed from Empire and is being reconstructed at Corozal. It will take care of 48 men.

Sailing of the Cristobal.

The sailing date of the steamship *Cristobal* has been set for Saturday, July 20, from Pier 11, Cristobal, C. Z., at 3 p. m.

CONCRETE WORK IN THE LOCKS.

Over 89 per cent of the concrete for the locks is in place, the amount at the close of work on July 13 being 3,823,159½ cubic yards, out of a total of approximately 4,302,563. A total of 18,892 cubic yards of concrete was laid in the locks during the week ending July 13.

GATUN LOCKS.

Over 94 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on July 13 being 1,883,726½ cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending July 13, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
	Cu. Yds.			*Cu. Yds.*			*Cu. Yds.*

*The 13 yards shown for the portable mixer, are reinforced concrete, placed on July 13.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 97 per cent completed, 863,462 cubic yards, out of a total of 889,827, bucket measurement, having been placed at the close of work on July 13. The record for each of the working days of last week, follows:

Date.	Auxiliary Plant.						Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

MIRAFLORES LOCKS.

Over 76 per cent of the concrete for the system of two twin locks at Miraflores was in place July 13, the total amount on that date being 1,075,971 cubic yards, bucket measurement, out of a total of approximately 1,412,736. The record for each of the six working days of last week, follows:

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant.							Total.
				2-cubic yard mixers.			½-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers	Large stone.

CANAL WORK IN JUNE.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., July 12, 1912.

The Honorable the Secretary of War,
Washington, D. C.

Sir: I have the honor to submit the following report of operations on the Isthmus for the month of June, 1912.

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	24,280	1,357,204	159,028	1,540,512
Work excavation, wet	Cubic yards	432,584	....	366,674	799,258
Total work excavation	Cubic yards	456,864	1,357,204	525,702	2,339,770
Plant excavation, dry	Cubic yards	....	....	....	....
Plant excavation, wet	Cubic yards	....	....	....	....
Total plant excavation	Cubic yards	....	....	....	....
Total Canal excavation	Cubic yards	456,864	1,357,204	525,702	2,339,770
Material placed in dams	Cubic yards	353,798	....	53,074	406,872
Concrete placed in locks and dams	Cubic yards	8,717	....	78,559	87,276
Explosives used	Tons (Gross)	42 33	183.43	29.23	254.99
Rock drilled	Feet	34,158	386,954	59,411	480,523
Tracks removed	Miles	....	12.21		12.21
New tracks laid	Miles	2.69	11.05	6 28	20.02
Rock crushed	Cubic yards	....	....	68,462	68,462
Cement used	Barrels	13,459	175	80,169	93,803
New roads built	Miles	.34	....	....	.34
Water mains laid	Feet	250	....	696	946
Sewers laid	Feet	280	296	2,144	2,720
Open drains and ditches dug	Feet	37,750	45,783	900	84,433
Average daily force		5 332	7,281	6,421	19,034
Average rainfall	Inches	15.22	10.40	7.78	10 80

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. Work was continued on the grinding of fixed irons and preparing valve chambers for the installation of the valves and bulkheads, which work is being done under supervision of this office. This subdivision is also charged with general inspection of masonry work of all the locks.

LOCK GATES AND PROTECTIVE DEVICES.

Up to June 20, a total of 52,322 tons of structural material was accepted at the rolling mills, in addition to 1,414 tons on replace orders, of which 1,509 tons were accepted between May 20 and June 20. This nearly completes the material required, excepting for the spare parts. A total of 39,139 tons of structural riveted steel had been shipped from the Rankin shops, or about 76 per cent of the total contract weight of this class. Of this last item, 3, 093 tons were shipped between May 20 and June 20. About 50 per cent of the material for the gates in the intermediate lock at Gatun, and about 15 per cent of that for the 77-foot upper and middle gates in the upper lock at Miraflores remain to be shipped; also, practically all of the steel for the safety and lower gates in the upper lock, and for all the gates in the lower lock at Miraflores.

LOCK GATE ERECTION.

Gatun—Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive—The work on these leaves during the month consisted principally of fitting fender angles, odd riveting, and repairing the same for water test. The riveting and calking were practically completed. *Leaves Nos. 37 and 38*—Air chambers were tested for watertightness and accepted as satisfactory, with the exception of bulkheads in leaf No. 37, which have not been tested. These leaves were closed to a mitering position during the month. The bottom girder and sheathing on the upstream side of leaf No. 38 were given one coat of red lead paint. The principal work necessary for the completion of these gates is the aligning and babbitting of the bearing plates along the quoin and miter posts of all four leaves; also, the attachment of the water seals and water testing on leaves Nos. 39 and 40. A small amount of fitting, riveting, and miscellaneous work remains to be done. The footwalks and handrailings are not in place on any of the leaves, and practically no field painting has been done. The erection of these four leaves began May 27, 1911.

Upper gates, 77 feet high, leaves Nos. 33 to 36 inclusive—The work during the month consisted of riveting on the sheathing and grinding the ends for the placing of reaction castings. On leaf No. 36, the end reaction castings were placed. Practically all material, except castings, is in place, and about 85 per cent of the rivets have been driven. The erection of these leaves began October 9, 1911.

Middle gates, upper lock, 77 feet high, leaves Nos. 29 to 32, inclusive—With the exception of reaming of holes, nearly completing the same, and the placing of false work framing, very little work was done during the month on these leaves. Practically all the structural steel is in place, but no sheathing rivets have been driven. The erection of these four leaves began January 27, 1912.

Safety gates, upper lock, 77 feet high, leaves Nos. 25 to 28, inclusive—The interior framing of these leaves is practically riveted. Three-quarters of these rivets were driven before June 1. The sheathing is assembled complete, with the exception of the downstream sheathing, which would be in the way of the footwalk. However, the sheathing plates are not fully bolted, and practically no reaming has been done, nor rivets driven through the sheathing. The erection of these leaves began April 1, 1912.

Middle gates, lower lock, 77 feet high, leaves Nos. 9 to 12, inclusive—The skeletons of these leaves have been erected practically to their full height. About 25 per cent of this material was erected prior to June 1. About 15 per cent of sheathing has also been erected, all of it during the month of June. The second set of erection bridges is engaged on these leaves. The erection of these leaves began April 12, 1912.

The first set of erection bridges was moved to the site of leaves Nos. 21 to 24, inclusive (lower gates, upper lock,) and the bottom girders of three leaves were placed.

Pedro Miguel—Upper guard gates, 54 feet 8 inches high, leaves Nos. 50 to 53, inclusive—The riveting of these leaves was practically completed during the month. About 50 per cent of the grinding of end plates for the reception of reaction castings has been accomplished. The erection of these leaves began August 7, 1911.

Upper gates, 79 feet high, leaves Nos. 54 to 57, inclusive—A small amount of reaming was about the only work accomplished on these leaves during the month. The work was delayed on account of not having bolts to bolt up same.

The erection bridges have been moved from this site for the erection of the intermediate gates, leaves Nos. 58 to 61, inclusive.

Safety gates, 79 feet high, Nos. 62 to 65, inclusive—The status of work on these leaves stands as reported for the month of May, with the exception of fitting a few doubling plates, and a small amount of reaming and riveting. The erection of these leaves began December 15, 1911.

Lower gates, 79 feet high, leaves Nos. 66 to 69, inclusive—The erection of the skeletons of these leaves was completed, and the riveting of same is 98 per cent completed. About 50 per cent of the sheathing has been erected. The erection of these leaves began about May 1, 1912.

Lower guard gates, 47 feet 4 inches high, leaves Nos. 70 to 73, inclusive—The skeletons of these leaves were erected to their entire height. The heel and upper pintle castings on leaves Nos. 72 and 73 were fitted and secured to bottom girders. Work on these leaves was delayed, due to lack of material. The erection of these leaves began April 9, 1912.

Miraflores—No material has been erected in these locks.

The total tonnage of lock gates erected on the Canal to July 1, was, without regard to its being fully reamed or riveted, about 19,631 tons, out of a total of about 58,000 tons, or about 34 per cent. Of this, 3,759 tons, or about 6½ per cent, were erected during the month of June. The total of field rivets driven was 963,500, or about 16 per cent, of which 183,500, or about 3⅛ per cent, were driven during the month of June.

The tonnage erected and the number of rivets driven were greater than in any preceding month. The riveting, particularly, is still far behind the program.

LOCK GATE RECESS COVERS.

All recess covers (36) have been erected at Gatun, 35 riveted and 20 grouted. At Pedro Miguel, all of the 20 covers have been erected and riveted.

CHAIN FENDERS.

From a report received from the assistant engineer in the United States, in charge of inspection of this work, dated June 5, it is noted that the greater part of the material for one chain fender had been completed up to that time, and it is understood that same will be shipped about July 10. A second test of one of the resistance valves was also under way during the month.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection, as follows:

(*1*) *For the rising stem and cylindrical valve machines, motors, and limit switches, purchased under Circular No. 614*—The two trial rising stem gate valve machines, Nos. 260 and 261, were completely installed and both were tested out satisfactorily during the month, the motor and control wiring being temporarily connected. Preliminary tests were made on rising stem gate valve machine No. 261, with valve disconnected from crosshead. After operating machine light for a number of cycles, the valve stem and roller train were connected to crosshead and valve operated complete. The operation of the valve and machine was entirely satisfactory. This machine is erected complete, excepting the babbitting of the bottom seal and installation of permanent wiring and control.

Twenty-nine rising stem gate valve machines have been shipped from the works of the contractor. To date, nineteen machines have been received on the Isthmus. Machines Nos. 245, 247, and 249, received on June 1, are to be installed at Gatun Spillway.

Satisfactory progress is being made in the delivery of the various groups named in the contracts as parts not required to be tested.

Twenty-two of the 118 cylindrical valve machines were received during the month, making a total of 32 machines received to date. Forty-four machines have been shipped from the works of the contractor.

Three auxiliary culvert valve machines were received during the month.

Satisfactory progress is being made on the frames and shafts for the rising stem gate valve machine motors at the works of the contractors.

At the works of the contractor, all parts of all limit switches have been completed and shipment has commenced. Fifty limit switches, out of a total of 232 ordered, have been received to date.

(*2*) *For the gate and girder hoisting machinery for the emergency dams, purchased under Circular No. 616*—The first gate hoisting machine was tested in the forepart of the month at the works of the Otis Elevator Company, and operated satisfactorily. The motor on the gate hoisting machine operated satisfactorily without excessive heating. Advice was received that the first girder hoisting machine would be ready for test at the works of the contractor about June 18.

(*3*) *For the rack railway and other material relative thereto, purchased under Circulars Nos. 619, 636–D, 628–635, 647, 666, and 688*—Out of the 57 items of all of the above circulars, 29 items are 100 per cent completed and satisfactory progress was also made on the balance of the items under these circulars.

(*4*) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, and motors for same, Classes 3 and 4, purchased under Circular No. 627*—Miter gate moving machine No. 37 was operated without strut and found to operate satisfactorily. The gate was connected to machine by strut and gate was swung in air on June 13. Owing to scaffolding on recess side of gate, the gate was not swung through entire stroke.

Miter forcing machine No. 918 was given a preliminary trial before placing machine on lock gate for final try out of machine.

Satisfactory progress was made on shipments of material applying on the miter gate moving machines.

(*5*) *For the hydroelectric station equipment, purchased under Circular No. 648*—One generator was completed at the works of the contractor during the month and is now ready for test. Work on the equipment progressed satisfactorily during the month.

(*6*) *For the electric towing locomotives, purchased under Circular No. 650*—Work progressed satisfactorily on the trial electric towing locomotive. Award has not yet been made for the remaining 39 locomotives.

(*7*) *For the Spillway gate machines and pumps, purchased under Circular No. 661*—Work on these machines and pumps progressed satisfactorily during the month.

(*8*) *For locomotive cranes for erection plant of machinery and electrical equipment, purchased under Circular No. 662*—All cranes, eight in number, with auxiliary hooks and lines, are now on the Isthmus and in service.

(*9*) *For control apparatus for all locks, purchased under Circular No. 679*—Drawings under this circular are being submitted by the contractor.

(*10*) *For motors, pumps, float switches, and starters purchased under Circular No. 681*—Work on this equipment progressed satisfactorily during the month.

(*11*) *For crossovers, purchased under Circular No. 688*—Drawings have been submitted by the contractors, which have been approved, and they have begun casting this material.

The following is a summary of the work accomplished in the field by the erecting forces:

Atlantic Division Locks—The force installing machinery and electrical equipment on the Isthmus assembled 888 feet of towing track, including the assembly of rack sections, channels, anchor bolts and T rails, and bonding of the same. (This does not include the installation of conductor rails, conductor slot covers, and brackets.) A total of 5,502 feet of towing track has been placed and partly finished to date.

Miter gate moving machine No. 37 was completed. The work of installing cylindrical valve machines Nos. 540 to 548, inclusive, is 75 per cent completed. Valve leaves were installed and all fixed steel finished and lined in guard valves Nos. 264 to 269, inclusive. For steel in valves Nos. 262 to 263, all lining was finished and valve leaves were lowered in chamber ready for seals. The work of placing the lining plates on caisson sills at the south end of the east and west chambers, upper locks, was started, and about 75 per cent completed during the month.

During the month, 482.3 cubic yards of concrete were placed; 170.8 cubic yards were placed for rising stem gate valve machines, 51.1 cubic yards for cylindrical valve machines, 207.4 cubic yards for rack railway, 35.6 cubic yards for recess covers, and the balance for emergency dams, west wall intake, miter gate moving machines, manhole cover seats, etc. Previously reported, 1,333.1 cubic yards; total amount placed to the end of the month, 1,815.4 cubic yards.

Pacific Division Locks—The quantity of material received to date has not permitted work at the Pacific Division locks to advance with any appreciable degree of rapidity, except for towing locomotive track. All activity in this division, so far as the erection work is concerned, has been at Pedro Miguel. During the month, bulkhead frames were installed for valves Nos. 331 and 332; 14 sets of anchor bolts were installed for cylindrical valve machines; and 1,900 feet of towing track were installed. The total amount of this towing track laid to date at Pedro Miguel Locks is 3,712 feet. Sixty-four cubic yards of concrete were placed during the month.

EMERGENCY DAMS.

At the mills, the following material was manufactured during the month: Nickel steel, 308 tons; riveted structural steel, 174 tons; turning and wedging machinery, 73 tons; pig iron (for counterweight) 700 tons.

At the shops, the following material was fabricated during the month: Nickel steel, 278 tons; riveted structural steel, 387 tons; turning and wedging machinery, 53 tons.

The condition of the work for each dam is, as follows:

Gatun, east dam—Nickel steel, 100 per cent completed; structural carbon steel, including gates, 95 per cent punched, 90 per cent assembled, 95 per cent riveted, 80 per cent finished; turning and wedging machinery, 100 per cent completed.

West dam—Nickel steel, 88 per cent completed; structural carbon steel, with exception of gates, 95 per cent punched, 90 per cent assembled, 85 per cent riveted, 80 per cent finished; gates, 80 per cent completed; turning and wedging machinery, 65 per cent completed.

Pedro Miguel, east dam—Nickel steel, 99 per cent rolled; structural steel, 96 per cent rolled; turning and wedging machinery, 75 per cent completed in foundries, and at present being machined in shops.

West dam—Nickel steel, 99 per cent rolled; structural steel, 96 per cent rolled; turning and wedging machinery, 99 per cent completed at foundries, and at present being machined in shops.

Miraflores, east dam—Nickel steel, 40 per cent rolled; structural carbon steel, 35 per cent rolled; turning and wedging machinery, 20 per cent completed at foundries.

West dam—Nickel steel, 40 per cent rolled; structural carbon steel, 35 per cent rolled; turning and wedging machinery, 20 per cent completed at foundries.

INSPECTION ON ISTHMUS.

In the report for the month ending May 20, it was stated that the contractor expected to begin erection by the middle of June, at which time 1,100 tons of material were expected to reach the Isthmus. Owing to delays in shipment, this material has just arrived. When this material is delivered at the dam sites, the contractor will have sufficient material on hand to begin erection. Contractor expects to begin erection by the middle of the present month.

AIDS TO NAVIGATION.

Construction—Range No. 9–11, Pacific Division—Same status as when last reported. The AGA acetylene outfits at these two towers had not been working satisfactorily, the supply of gas having been exhausted before the estimated time. Slight leaks in the connections and at some of the valves were discovered, to which a representative of the AGA Company, on the Isthmus, attributed the early exhaustion of the gas. These leaks were remedied and notes made for some improvements in the connections to prevent corrosion. It was also found that the sun valve was not absolutely moisture proof, the interior of it having shown signs of corrosion. The representative of the company advised that it would be useless to clean it and it was left as it was. The gas was shut off from it and it is not now in use. The leaks discovered in the valve in range tower No. 9 were at the filter, manifold, sun valve, and pressure regulator. Those discovered in the valve in range tower No. 11 were at the pressure regulator only.

Range No. 1–2—Pacific Division—Same status as when last reported.

Range No. 13–14—Pacific Division—Same status as when last reported.

Range No. 4–5—Atlantic Division—Same status as when last reported.

Range No. 21–22—Gatun Lake section—Same status as when last reported.

Range No. 24–25—Gatun Lake section—Same status as when last reported.

Range No. 1–2, Gatun Lake section, front tower—The entrance door was hung, the concrete stairway was completed, the wrought iron gallery railing was set up, the ball ventilator was set in place, and the reinforced concrete railing around the base of the tower was 50 per cent completed.

Range No. 5–6—GatunLake section—Sixty-yards of crushed rock, 60 yards of sand, a hoisting engine, steel forms, and other material were delivered at the site of the front tower; a temporary landing was constructed, and an A-frame cableway is being rigged up.

General plant of lighthouse subdivision at Balboa—The following reinforced concrete material was cast during the month: Ten beacon roofs, two foundations for beacons, twenty-four 48 by 48-inch buoy sinkers, two 24 by 24-inch buoy sinkers. On June 20, the gang at this point was transferred to the work on the west breakwater caisson at Mount Hope dry dock, where they were employed until the end of the month.

West Breakwater light—Limon Bay—The wooden forms for the reinforced caisson foundation were completed, and on the 20th of June, they were set up in the Mount Hope dry dock, the reinforcing was placed, and 360 yards of concrete poured, thus completing the caisson up to a height of 13 feet. The caisson is 46 by 46 feet in plan, containing 16 compartments, and the total height will be 35 feet.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month, three shovels were engaged in the borrow pit excavation for the locks backfill and construction tracks, 97,195 cubic yards of material being removed.

Backfill—Backfilling behind the side and center walls of the locks was continued. The quantity placed during the month aggregated 86,416 cubic yards. The total placed to July 1 amounted to 1,554,175 cubic yards, which was 85.16 per cent of the entire backfill.

Receiving and issuing material—The receipts of sand exceeded the issues by 27,005 cubic yards; the consumption of cement exceeded the issues by 5,192 barrels; the issues of rock amounted to 10,248 cubic yards, no rock being received.

Mixing and placing plants—Plant No. 1 and all portable mixers were kept in satisfactory operation during the month.

Concrete work—There was a decrease of 1,650½ cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 25 working days was 244 cubic yards, as compared with a daily average of 287 cubic yards during May. The total amount of concrete placed during the month was 6,095 cubic yards. The bucket measurement exceeded the place measurement by 166 cubic yards. Of the total, 3,117 cubic yards were placed in the upper lock, 968 cubic yards in the middle lock, and 2,010 cubic yards in the lower lock. The concrete work for the entire lock system was 93.78 per cent completed at the end of June.

OPERATION OF THE PERMANENT CONCRETE CONSTRUCTION PLANT.

Length of working day (hours)	9 00
Average number of hours per day worked, per strand of cableway laying concrete (actual working time)	.55
Average number of mixers per day	2.10
Average hourly output per mixer (actual working time) cubic yards	58.34
Average amount of concrete laid per hour, per strand of cableway (actual working time) cubic yards	21.26
Concrete laid (cubic yards) cableways	3,475.00
Concrete laid (cubic yards) derricks	2,631.00
Concrete laid (cubic yards) portable mixers	155.00
Total amount of concrete laid (cubic yards)	6,261.00

GATUN DAM.

Construction during the month increased the total fill, as determined by cross sections of the material in place, by 353,728 cubic yards, making the total amount in place 19,818,979 cubic yards. On July 1, the Dam was 92.18 per cent completed.

Hydraulic fill—The dredges increased the hydraulic fill by 160,688 cubic yards, making the total hydraulic fill in place June 30th, 9,955,078 cubic yards.

Dry fill—The material received from the steamshovels, amounting to 193,110 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 9,863,901 cubic yards.

GATUN SPILLWAY.

Backfill—Backfilling was not extended during the month, the total remaining at 16,236 cubic yards.

Concrete—The work of placing concrete was continued, the amount placed during the month aggregating 2,622 cubic yards. The concrete work for the Spillway was 90 per cent completed.

Excavation—During the month, there were 848 cubic yards of earth and rock removed in preparing foundations, the total Spillway excavation on June 30 being 1,591,086 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the Ocean to Mindi—Four dredges removed 284,760 cubic yards of earth, and 59,044 cubic yards of rock from the Canal prism. In addition, the dredge *Mindi* removed 29,811 cubic yards of rock from the Panama railroad Cristobal terminal docks. On June 30th, 40 feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 4 plus 3,000 feet, 30 feet to mile post 4 plus 3,150 feet, and 20 feet to mile post 5 plus 5,100 feet.

Approach to Gatun Locks—Two dredges removed 74,091 cubic yards of earth and 14,689 cubic yards of rock from the Canal prism.

PORTO BELLO.

During the month, 7,219 cubic yards of rock were shipped to Toro Point for use in the construction of the breakwater.

ROCK AND WATER SERVICE.

In connection with this service, plant steamed 4,805 miles, handled 336 barges, and carried 2,060 passengers.

WEST BREAKWATER, COLON.

During the month, 19,742 cubic yards of material were excavated, of which 19,092 cubic yards were dumped from the trestle and 650 cubic yards furnished to fortification work. The single track trestle was extended 32 feet. On July 1, the trestle extended 10,927 feet from shore. Seven thousand three hundred and sixty-five cubic yards of Porto Bello rock were unloaded, making the total to July 1st, 65,133 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work. Work was continued on the Colon street improvements.

Central Division.

During the month of June, the total amount of material excavated in the Central Division was 1,357,204 cubic yards, of which 297,237 cubic yards were classified as earth and 1,059,967 cubic yards as rock. The entire quantity was removed by steamshovels. The total—1,357,204 cubic yards—was primary excavation for the Canal prism.

The daily average number of steamshovels at work during the month was 40.10, and the total number of shovel days was 1,002½, as compared with 40.54 at work during the month of May, with 1,054½ shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W'k'g days.	Av. yards per shovel day
		Rock.	Earth.			
1911:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
June	1,401 016	1,282,811	118,205	40.92	26	1,316.22
1912:						
June	1.357 204	1,059 967	297,237	40 10	25	1,355.81

Raintall at Empire: 1911, 5.92 ins.; 1912, 8.50 ins

The above table shows the average output per shovel to be 2.92 per cent greater in June, 1912, than in the corresponding month of 1911.

The total amount of material excavated from the prism in the Culebra section of the Central Division in June, 1912—1,348,780 cubic yards—was the highest record in that section for the month of June, except June, 1911, when 1,401,616 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division, according to revised estimate of July 1, 1911, was 101,801,296 cubic yards, and up to July 1, 1912, a total of 94,401,681 cubic yards had been removed, leaving 7,399,615 cubic yards to be removed, in order to complete all excavation in the Central Division. From these figures it will be seen that 92.73 per cent of all excavation in the Central Division had been accomplished up to the close of the month of June, and 7.27 per cent remained unaccomplished.

Considering the two sections which compose the Central Division, the excavation completed and that to be completed at the close of June operations was, as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	82,017,802
To be completed	7,426,203
CHAGRES SECTION.	***Cu. Yds.***
Completed	12,383,879

From the above figures it will be seen that the Culebra section, locally known as "Culebra Cut," was 91.70 per cent completed, with 8.30

per cent to be completed. The Chagres section was completed so far as dry excavation is concerned, but it is estimated that it will be necessary to remove about 300,000 cubic yards of wet excavation in this section.

During the month, 41,042 cubic yards of material were dumped in the embankment for the new roadbed for the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,237,576 cubic yards.

During the month, no material was furnished to the Atlantic Division for use in the construction of the Gatun Dam, the total amount remaining at 5,374,310 cubic yards.

There was also furnished to the Panama railroad 11,366 cubic yards of material for the terminals in Colon.

The daily average number of laborers at work on the whole division during the month was 6,588, while the daily average number of gold employes was 693.

Pacific Division.

DISTRICT NO. 1—LOCKS AND DAMS.

Excavation—The total excavation during the month amounted to 135,888 cubic yards, of which 98,413 cubic yards were classified as earth and 37,475 cubic yards as rock.

Filling and Embankment—During June, 15,304 cubic yards of dry filling were added to the prism on the west dam at Pedro Miguel, increasing the total amount of material in place at the close of the month to 582,841 cubic yards. The backfill at Pedro Miguel was increased by 25,837 cubic yards, the total amount in place at the end of the month aggregating 654,537 cubic yards.

At Miraflores, 37,770 cubic yards were added to the dry fill in the toes of the west dam. The total quantities of dry and hydraulic filling in place at the end of the month were 1,241,624 cubic yards and 661,048 cubic yards, respectively. The backfill was increased by 69,022 cubic yards, the total aggregating 625,287 cubic yards at the end of the month.

Pedro Miguel Lock—Excavation in the Canal prism between the Pedro Miguel and Miraflores locks was continued, two steamshovels being employed. One steamshovel was engaged during the month in excavating the high ground along the east side of the locks, and one shovel was used to excavate the foundation for the northwest wing wall. The spoil from these four shovels was utilized for backfilling behind the lock walls, for topping the west dam, and for filling the south guide wall. The amount of iron placed in the masonry aggregated 458,872 pounds.

Concrete work—The total amount of concrete and large stone laid at Pedro Miguel was 10,061 cubic yards, as compared with 10,736 cubic yards during May. The concrete was placed, as follows: Four thousand five hundred and eighty-one cubic yards in the north center guide wall; 1,714 cubic yards in the northwest wing wall; 839 cubic yards in the east wall; 281 cubic yards in the center wall; 768 cubic yards in the west wall; 570 cubic yards in the southwest wing wall; 782 cubic yards in the northeast wing wall; 121 cubic yards in the south center guide wall; 269 cubic yards in the floors; and 136 cubic yards around ducts, 113 cubic yards of which were placed in operating tunnel A, and 23 cubic yards in operating tunnel B.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	4.32
Average number of mixers per day	5.96
Average hourly output per mixer (actual working time) cubic yards	13.34
Large stone laid, cubic yards	....
Concrete laid, cubic yards	10,061.00
Total concrete laid, cubic yards	10,061.00

Mixing plant consisted of one 2-cubic yard mixer, and a daily average of 4.88 half-yard mixers. Placing plant consisted of a daily average of 4.88 half-yard mixers discharging directly into forms. Output of one 2-cubic yard mixer was placed by a daily average of 2.44 cranes and derricks.

Miraflores Locks—The work of sinking and filling concrete caisson foundations for the north center guide wall was continued; likewise the construction of the reinforced concrete wall base girders and the concrete wall proper. Dry excavation, principally in the Canal prism south of the locks, was continued, six steamshovels being employed, and the spoil utilized for backfilling behind the east and west lock walls and for filling the Miraflores west dam. The work of removing chamber crane No. 2 from the upper to the lower lock chamber was commenced and about four-fifths completed at the end of the month. The crane is being lowered bodily. The amount of iron placed in the masonry aggregated 506,819 pounds.

Concrete work—The total amount of concrete and large stone laid at Miraflores was 68,498 cubic yards, as compared with 92,085 cubic yards during May. The concrete was placed, as follows: Four thousand five hundred and seventy cubic yards in the north center guide wall; 10,615 cubic yards in the east wall; 34,760 cubic yards in the center wall; 15,944 cubic yards in the west wall; 455 cubic yards in the southeast wing wall; 100 cubic yards in the west dam core wall; 1,958 cubic yards in the floors; and 96 cubic yards around ducts, 60 cubic yards of which were placed in operating tunnel A, and 36 cubic yards in operating tunnel C.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	12.00	12.00
Average number of hours per day laying concrete and large stone (actual working time)	5.04	5.77
Average number of mixers per day	6.52	8.56
Average hourly output per mixer (actual working time) cubic yards)	37 01	30.85
Average amount of concrete and large stone laid per hour per berm or chamber crane. (actual working time) cubic yards	62.94	....
Large stone laid	....	....
Concrete laid (cubic yards)	56,150.00	12,386.00
Total concrete laid (cubic yards)	56,150 00	12,386.00

Permanent plant consisted of four berm and three chamber cranes. Auxiliary mixing plant consisted of three 2-cubic yard mixers and eight ½-cubic yard mixers. Auxiliary placing plant consisted of a daily average of 3.48 ½-cubic yard mixers discharging directly into forms, and a daily average of 3.36 locomotive cranes and derricks.

DISTRICT NO. 2—DREDGING.

The following is a statement of the output of the six dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*

Grand total	....	306,219	31,787	51,866	....	389 872	

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 59,500 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours)	8.00
Average number of hours per day (actual working time)	7.35
Average number of cubic yards crushed per hour per working day	304.28
Average number of cubic yards crushed per working hour	372.48
Total output for the month (cubic yards)	68,462.00

Relocation of Panama Railroad.

During the month, 5,362 cubic yards of material were excavated, increasing the total excavation at the close of the month to 10,182,498 cubic yards. Thirty-three thousand five hundred and ninety-nine cubic yards of material were placed in embankment, increasing the total for this purpose to 16,500,553 cubic yards.

No temporary trestle was driven during the month. At the end of the month, there were 64,512 linear feet of 70-pound, and 163,908 linear feet of 90-pound track. The force averaged 447 men.

Quartermaster's Department.

LABOR.

During the past few months, 446 West Indians, 250 Greeks, 473 Spaniards and 170 Hindoos left the Isthmus for Guatemala to work for the United Fruit Company.

QUARTERS.

The addition to the Hotel Tivoli was completed during the month, the total cost of the same being $57,819.

The construction of the terminals at Balboa has necessitated the abandonment of the Commission settlement of old Balboa. Only three buildings remain above the line of excavation, and the removal of these buildings will probably be necessary at a later date. In order to accommodate families whose removal from old Balboa was required, the old labor camp in the vicinity of Ancon corral is being converted into gold married quarters, and likewise the buildings at the laborers' camp near Ancon cemetery. A number of other buildings from the Spillway at Gatun, and from old Balboa, are being moved and re-erected in the former camp. The upper floor of the hotel at East Balboa is being converted into bachelor quarters, and the police station at old Balboa will be moved to East Balboa and utilized as bachelor quarters.

MATERIAL AND SUPPLIES.

The value of material received during the month was $1,182,453.30. Supplies were delivered by 39 steamers, the total weight of cargo exclusive of lumber, ties, and piling being 41,438 tons. Cement deliveries have been reduced. Lumber receipts have fallen off considerably.

Subsistence Department.

The operation of European laborers' messes, colored laborers' kitchens, and line hotels showed a net profit of $3,081.05. The operation of the Hotel Tivoli showed a net profit of $721.14. The net profit on subsistence operations was $3,964.01.

Department of Civil Administration.

COURTS.

During the month, 37 civil and 34 criminal cases were disposed of in the Circuit Courts, and 94 civil and 510 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for June amounted to $345,598.43, and the fees to $1,657.96. Receipts from stamp and card sales; and newspaper postage, aggregated $7,388.79. The total collection of revenues made by the division was $45,489.35, and the collection on account of court fines, costs, and fees $2,792.29.

Twenty-four vessels entered at, and 25 cleared from the port of Ancon; and 25 vessels entered at, and a like number cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 496, of whom 439 were men and 57 women. Twenty-four nations, or forty separate states and dependencies, were represented. The total number of arrests for the month was a decrease of 185, as compared with the month of May. Six convicts were committed to the penitentiary and seven were discharged, leaving 141 convicts in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,682.57, and the value of their work on Canal Zone roads was $2,451.05.

DIVISION OF FIRE PROTECTION.

Eight fires were reported in the Canal Zone during the month. The damage to Commission property was $700.

DIVISION OF PUBLIC WORKS.

In the city of Panama the average consumption of water was 1,309,107 gallons, and in Colon 1,382,783 gallons.

The usual inspection and maintenance work in this division was performed during the month.

DIVISION OF SCHOOLS.

The net enrollment in the white schools during the month was 1,245, and the average daily attendence 849.1, or 94 per cent of the enrollment; in the colored schools, the net enrollment was 1,535, and the average daily attendance 669.1, or 84 per cent of the enrollment. Forty-five white and 28 colored teachers employed on June 28; the schools were closed on that date for the summer vacation. There were five members in the graduating class.

Department of Sanitation.

The total number of deaths from all causes among employes was 28. These were divided, as follows: From disease 16, from violence 12, giving the annual average per thousand of 3.91 and 2.93, respectively, on the basis of the number of employes estimated by the Department of Sanitation. The annual average death rate per thousand among employes for the month of June, 1911, was 12.61.

The annual average death rate per thousand in the Canal Zone and in the cities of Colon and Panama, including both employes and nonemployes, based upon the population as estimated by the Department of Sanitation, was 22.88. The annual average death rate per thousand among the same classes of population for the month of June, 1911, was 25.33.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes, was: For whites, 5.92; blacks, 3.25, giving a general average for disease of 3.91. For the same month during 1910 the annual average death rate per thousand from disease among whites, was 3.60; blacks, 10.93, giving a general average of 9.04; and for the same month during 1911, whites, 11.19; blacks, 8.82, giving a general average of 9.40.

Among employes during the month, deaths from the principal diseases were, as follows: Abscess of liver, amœbic, 1; dysentery, 2; hæmoglobinuric fever, 1; malaria fever, E. A., 2; pneumonia, 2; tuberculosis, 2; leaving six deaths from all other diseases, and 12 from external violence.

No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus during the month.

Respectfully,

GEO. W. GOETHALS, *Chairman.*

PERSONAL.

Mr. Maurice H. Thatcher, accompanied by Mrs. Thatcher, returned on the *Allianca*, on Tuesday, July 16, from a leave of absence spent in the United States.

Mr. J. A. Smith left on the *Panama*, on Monday, July 15, on his annual vacation, which he will spend in the United States.

Lieut. Frederick Mears, accompanied by Mrs. Mears, returned to the Isthmus on the *Allianca*, which docked at Cristobal on Tuesday, July 16.

Col. J. P. Fyffe has tendered his resignation as chief of the Canal Zone police to take effect at the expiration of his leave of absence. He left on Wednesday, July 17, on the steamer *Acapulco* of the Pacific Mail Steamship Company on a trip to Central America, at the conclusion of which, he will return to the United States. Capt. Charles W. Barber, formerly assistant chief of police, has been appointed to the position of chief.

Mr. L. K. Rourke of Boston, Mass., formerly assistant division engineer in the Central Division, arrived on the Isthmus on the *Cristobal*, Tuesday, July 9, on a sightseeing trip.

Mr. Frank A. Gause leaves on Thursday, July 18, on the steamship *Almirante* of the United Fruit Company, on his annual leave of absence, which he will spend in the United States.

Obituary.

Mr. Thomas Riley, employed by the Pacific Division at Pedro Miguel, died in Ancon Hospital on July 10. He was 25 years of age, single, and had been on the Isthmus a little over a year. He is survived by a brother, Michael Riley, living at Pedro Miguel.

Alman R. Proctor, who was employed on the Isthmus as a sanitary inspector up to the time of his resignation, effective on May 14, after eighty-four days' leave, died at his home in Rodney, Michigan, on June 6. Mr. Proctor was 40 years of age, married, and had been on the Isthmus five years. He is survived by his wife and four children.

Harry Morrise, a member of Company D, Tenth Infantry, Camp E. S. Otis, Las Cascadas, died at Ancon Hospital on Wednesday, July 10, as the result of a compound fracture of the skull inflicted in Panama on the evening of July 4. He was buried in Ancon cemetery.

Rainfall from July 1 to 13, 1912, Inclusive.

Married.

TAYLOR-NOONAN—On June 30, in St. Luke's Chapel, Ancon, Lillian Noonan to William D. Taylor, the Rev. Carl H. Elliott officiating. Canal Zone residence, Pedro Miguel.

CLARK-URBAN—Grace Elmina Urban, to Dr Harry Ainsworth Clark, both of Boston, Mass., on Wednesday, July 10, in the Union Chapel of Cristobal, Rev. Carl H. Elliott, officiating. Isthmian residence, Colon Hospital grounds.

Commissary Prices.

Retail prices of cold storage provisions remain unchanged from last week.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

The local handicap billiard tournament is drawing to a close, with Triblet, White, and Thompson tied for first place.

The high scores for tenpins during the past week are, as follows: Sims, 234; Souders, 211, 224; Beall, 214; in duckpins, Roberts, 102.

The Gatun bowling team will bowl the local team on Saturday, July 20, at Corozal.

CULEBRA.

The next moving picture show will be held on Thursday, July 18.

The boys have oranized a bowling tournament, and will play every Wednesday afternoon.

The high scores in bowling this week are, as follows: Silver, 102; Fox, 101; Case, 102; Mengel, 117; Geo. Holden, boys' department, 100.

A game of volleyball was played between the Chief Engineer's office team, and the Quartermaster's team on Friday evening, July 12, resulting in a victory for the former by a score of 3 to 2

The checker club will meet on Tuesday and Friday of each week.

EMPIRE.

In the local tenpin tournament the following are the results of games played during the past week: Progressives won two out of three games from the Democrats; Suffragettes won two out of three games from the Socialists; Socialists won two out of three games from the Independents. The standing to date of the teams, follows:

TEAM.	Won.	Lost.	P. C.
Suffragettes	6	3	.667
Independents	7	5	.583
Democrats	5	4	.556
Socialists	6	6	.500
Progressives	3	9	.250

A local basketball tournament has been organized. All wishing to play please hand their names to Mr. Russell.

GORGONA.

The regular gymnasium classes on Monday and Thursday nights are followed by the men playing recreative games affording diversion after the day of labor. The men are taking great interest in these games.

There is a special gymnasium class for night employes, on Wednesdays, from 2 to 3 p. m.

The "Car Knockers" bowled the "Machinists" on Tuesday evening, July 9. Scores: "Car Knockers"—652, 763, 613; "Machinists"—710, 795, 700.

Corozal played Gorgona on the local alleys Saturday evening, July 13. Scores: Corozal—710, 781, 799; Gorgona—829, 816, 659.

Gatun played Gorgona on the Gorgona alleys on Saturday evening, July 13. Scores: Gatun—744, 804, 761; Gorgona—765, 760, 645.

GATUN.

Gatun took two out of three games in the tenpin match at Gorgona on Saturday night, July 13.

A chess match between Culebra and Gatun occurred at the clubhouse on Saturday, July 13. Gatun took seven out of ten games, Culebra winning the other three. Score:

Gatun.	Won.	Lost.	Culebra.	Won.	Lost.
Chatfield	2	0	Dubois	1	1
Stewart	2	1	Newman	1	1
Gartrell	1	0	Vogel	1	1
Kallock	1	0	Minner	0	2
Shropshire	1	1	Warner	0	2
Feige	0	1			

A series of games will be arranged between DePoorter of Gatun and Pierson of Empire who are tied for the greatest number of games won in the recent pool tournament. The games will be played at Corozal, Empire, Gatun, and Cristobal.

The Camp Elliott team will bowl duckpins at Gatun, Friday, July 19, and the Gorgona team will bowl tenpins Saturday, July 20.

A basketball game was played between I. C. C. employes and McClintic-Marshall men on Friday evening, the former winning by a score of 20 to 4.

A class in Spanish, for beginners, was started on Wednesday evening, July 17.

Mr. M. L. Meyer has taken the place of Mr. John H. Shadrick as office assistant.

CRISTOBAL.

On Wednesday evening, July 10, Mr. F. L. Bernsee won 40 out of 46 games at simultaneous checkers.

A "smoker" was given on Friday night, July 12, with an attendance of over 300. Mr. Putnam, who left for the United States on the 15th, was given a "Round Robin" memorial signed by 100 persons, Rev. Carl H. Elliott making the presentation speech. A purse of $100, made up by members of the Cristobal clubhouse, was presented by Judge Thomas E. Brown, president of the local council. The program follows: Music by the I. C. C. orchestra; Cristobal male quartet; Messrs. Cogan and Evans in a singing and dialogue act; Orient minstrels of Colon in songs and dances; broadsword contest between Messrs. MacSparren and Fleming; music by orchestra; buck and wing dance by Orient minstrels; wrestling bouts between Messrs. Greening and Andrews; and Whittles and Huber; illuminated club swinging by Mr. Kramer of Culebra; cake walk by the "Cake walk kids" of the Orient minstrels; Cristobal male quartet; orchestra selection. Refreshments, consisting of cake, punch, peanuts, and cigars, were served.

A large silver loving cup was presented to the Cristobal team winning the trophy in the pentathlon meet at Empire on February 22, 1912. Two handsome shields were also presented to the bowling teams winning the Thanksgiving Day, 1911, and New Year's Day, 1912, Isthmian tournaments.

OFFICIAL CIRCULARS.

Telephone Conversations Limited.

CULEBRA, C. Z., July 12, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

The general superintendent of the Panama railroad invites attention to the fact that, in order to handle increasing business without delay, it will be necessary to limit conversations over telephone lines to five minutes, except for such few lines as might be excepted from this rule and be given unlimited service. It is desirable to confine this unlimited service to 'phones of the heads of departments and divisions and to chief clerks of departments and divisions. If there are any circumstances which, in your opinion, render it necessary to extend unlimited service to other 'phones in your department or division, please advise me at once.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Daily Reports of Work Performed.

CULEBRA, C. Z., July 8, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

Instances have been reported of the failure of foremen and similar employes to report accurately on their daily reports the amount of work performed. It is important that this information should be correct, and any carelessness of inaccuracies cannot be permitted. Please advise all concerned that any employe guilty of submitting misleading or incorrect reports of work will be subject to dismissal therefor.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Conventional Signs, U. S. Geographic Board.

CULEBRA, C. Z., July 10, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

The conventional signs recently recommended by the United States Geographic Board, and adopted, will hereafter be followed by the Isthmian Canal Commission and Panama Railroad Company in the preparation of maps. Copies will be furnished upon application to this office.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Chief of the Division of Police and Prisons.

ANCON, C. Z., July 10, 1912.

TO ALL CONCERNED:

Effective this date, Capt. C. W. Barber, assistant chief of the Division of Police and Prisons of the Department of Civil Administration, is appointed chief of the Division of Police and Prisons, vice Mr. J. P. Fyffe, resigned.

(Sgd.) H. H. ROUSSEAU,
Acting Head, Department of Civil Administration.

Approved: (Sgd.) GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting General Superintendent, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF PRESIDENT,
CULEBRA, C. Z., July 15, 1912.

TO ALL CONCERNED:

Effective July 16, 1912, Lieut. F. Mears will act as general superintendent during the absence of Mr. J. A. Smith, on leave.

GEO. W. GOETHALS, *President.*

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Empire, C. Z., Sunday, July 21, 1912, at 6 p. m. The program follows:

1. March—*Niebelungen* .... Wagner
2. Selection—*The Prince of Pilsen* (By request) ...... Luders
3. Intermezzo—*After Sunset* .... Pryor
4. Overture—*Hungarian Lustspiel* .... Keler Bela
5. Tango—*El Mimito* .... Villanueva
6. *Ballet music from Faust* .... Gounod
7. Flower song—*Hearts and Flowers* .... Tobani
8. Medley selection—*Remick's Late Hits* ..... Lampe
9. March—*Lance and Shield* .... Laurendeau

CHAS. E. JENNINGS, *Musical Director.*

The next concert will be given at Hotel Tivoli, Ancon, July 28, at 8 p. m.

MOVEMENT OF OCEAN VESSELS.

Sale of Public Buildings in Las Cascadas—Bas Obispo District.

OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., July 11, 1912.

Sealed proposals will be received at this office until 3 p. m., Monday, July 22, 1912, and then opened, for the purchase of any or all of five buildings located in the Las Cascadas-Bas Obispo district. List of buildings and full information will be furnished upon application to any district quartermaster, or to this office. Proposals must be accompanied by five percentum (5%) of amount bid. Envelopes containing proposals should be endorsed "Proposal for purchase of buildings," and addressed to Col. C. A. DEVOL, Chief Quartermaster, Culebra, C. Z.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, JULY 24, 1912. No. 48

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Wharf Improvements at Balboa.

The framework for six of the eight new cranes to be erected on the Panama railroad wharf at Balboa has been carried to full height, 62 feet above the tops of the supporting rails. One of the cranes is complete, except for portions of the electrical wiring. Its 78-foot boom projects about 40 feet beyond the edge of the wharf, in horizontal position, and the crane will be capable of lifting 4 tons in a load, and carrying it up and along the boom at the rate of 600 feet a minute. The crane is to be capable of moving along the face of the dock at the rate of 120 feet a minute. It weighs 60 tons, and is equipped with one 25-horsepower, and two 115-horsepower, 220-volt, 25-cycle alternating current motors. Those yet to be completed will be identical in construction with the first.

In connection with the installation of the new cranes and the construction of trackway to carry them along the face of the wharf, the outer side of the wharf is being converted from wooden to concrete structure. For a depth of about 20 feet from the outer edge, the floor is being torn up, and after the girders have been reinforced with additional plates, a heavy reinforced concrete floor, with embedded track, will be laid, in place of timber. The work also involves removing a portion of the roof over the wharf, to give room for the new and larger cranes.

Transfer of the Tug "Phœnix" to New York.

The tug *Phoenix*, which is equipped with fire-fighting apparatus, and has been in the service of the Panama Railroad Company at Colon and Cristobal for several years, has been ordered transferred to New York City, where it will be used in handling lighters, and shifting and docking Panama railroad vessels. Before starting on its voyage, it will be stripped of its fire-fighting apparatus, and thoroughly inspected and overhauled. The apparatus will be placed on the tug *Porto Bello* of the Atlantic Division fleet. The *Phoenix* was built in 1905 at Tottenville, New Jersey, and christened the *W. J. Dailey*. It has a wooden hull, is of 161 tons net register, 112 feet in length, 24 feet in breadth, and 12 feet in depth. It was purchased by the Panama Railroad Company in 1906, and came to the Isthmus under its own steam, where it was renamed the *Cristobal*. When the *Tremont* was acquired by the Canal Commission, it was decided to name the vessel the *Cristobal*, and for that reason the name of the tug was changed to *Phoenix*.

Dredge to be Transferred Across Isthmus.

Pipeline suction dredge *No. 85*, which has been working on the lake side of Gatun Dam, is to be dismantled and hauled by rail to the Pacific side of the Isthmus, where it will be rebuilt and used in excavating for the inner harbor at Balboa. The work of removing the machinery was begun on July 18. When the machinery has been taken off, the hull will be stripped of the superstructure and knocked down for shipping. Similar transfer from the Pacific side to the Atlantic side was made in the early part of 1910, of the pipeline suction dredge *Sandpiper*, which is practically identical in construction with *No. 85*.

Dredge *No. 85* has been working on the south side of Gatun Dam since April, 1910, when it was moved through the West Diversion just before closing same permanently, from the north side of the Dam. It was towed out to sea and along the coast to the mouth of the Chagres River, about eight miles, thence eight miles up the Chagres to a point beyond the site of the present spillway in Gatun Dam. It has supplied a great part of the hydraulic fill for both wings of Gatun Dam, and has for the past six-months been engaged in pumping a supporting fill along the south toe of the west wing, near its junction with the hills.

Precautions Against Plague.

On the Atlantic side of the Isthmus, bubonic plague exists in Venezuela and the islands of Trinidad, Grenada, Cuba, and Porto Rico. Colon is in communication with these places by six lines of steamers. Vessels calling at Colon are not allowed to go to the wharf in any of the plague ports, except La Guayra, Venezuela, where a special United States health representative keeps the vessels under the strictest supervision while in port. Vessels are not allowed to take cargo at plague ports, except cigars or cigarettes; passengers are allowed, but the baggage of steerage passengers must be disinfected and certified by the United States health representative at port of departure. Upon arrival at Colon all passengers from plague ports are detained in the quarantine station to complete seven days from the time the vessel left the infected port. If there is no sickness on board and the regulations at infected ports have been strictly complied with the vessel is not detained. Jamaica forbids ships calling there to accept passengers from plague-infected ports and this affords the Isthmus some temporary protection as the same vessels usually call at Colon, but Jamaica relaxes its restrictions much sooner after the last case of plague is reported than the Zone authorities, who continue to enforce the same regulations for a long time after the last reported case of human plague, as the disease may continue to be present among the rats.

Proposals for Mail Service via Panama Route.

The Post-Office Department is advertising for proposals for ocean mail service between designated cities on the Atlantic and Pacific coasts of the United States and the Isthmus of Panama. Contracts will be made for ten years, the service to begin not later than January 1, 1915. Vessels of the second and third classes will be employed. Following is a schedule of routes for vessels of the second class:

New York to Colon, biweekly, calling at Key West; time, New York to Colon, 6½ days.

New Orleans to Colon, biweekly; time to Colon, four days.

San Francisco to Panama, weekly, calling at San Pedro and San Diego, at election of the Post-Office Department; time, San Francisco to Panama, 10 days.

The schedule for vessels of the third class, follows:

Boston to Colon, once every 28 days, calling at Charleston and Brunswick, at election of Department; time, Philadelphia to Colon, 7½ days.

Baltimore to Colon, once every 28 days, calling at Norfolk and Charleston, at election of Department; time, Baltimore to Colon, 7½ days;.

Seattle to Panama, about twice every month, 26 trips a year, calling at San Francisco, San Pedro, and San Diego, at election of Department; time, Seattle to Panama, 16 days.

Portland to Panama, once every 28 days, calling at San Francisco, San Pedro, and San Diego, at election of Department; time, Portland to Panama, 16 days.

The Postmaster General reserves the right to require the steamers on each route, whenever they may continue their voyage to a port at the opposite end of the Panama Canal, to carry any portion of their mails to such port without additional compensation. Bids will be received until 4.30 p. m., October 15, 1912.

Assembling Gates for Spillway Dam.

The work of assembling the gates for Gatun Spillway dam is in progress in the erecting yard in the abandoned borrow pit near the machine shops, east of Gatun Locks. The contract for these gates, with the McClintic-Marshall Construction Company, covers the complete assembling, riveting, testing, and painting at the erection yard. After completion, the Canal Commission will haul them to the Spillway and put them in position with two locomotive cranes.

Each gate is 47 feet 4 inches wide, 19 feet high, and 4 feet 6½ inches thick. The general type of construction is similar to the lock gates, except only the upstream side is

NOTES OF PROGRESS.

(*Continued.*)

sheathed and made watertight. Each gate contains four horizontal girders and will weigh completed about 43 tons. The eight gates for Miraflores Locks are exactly alike and are covered by the same contract. Nearly all material for these is received and assembling will be started in about six weeks.

Postal Savings Bank Transactions.

A statement of Canal Zone postal savings bank transactions at Canal Zone post-offices for the period of June 3 to June 29, follows:

Name of Office.	Postal Savings Certificates Issued.	Postal Savings Certificates Paid.
Ancon	$5,744.00	$4,243.00
Balboa	11,089.00	5,374.00

Cristobal, Station A	271.00	142.00
Cristobal, Station B	800.00	405.00
Total	$105,841 00	$67,342.00

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 90 per cent completed, 203,295 cubic yards, out of a total of 225,000, having been placed at the close of work on July 20. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
July 15	58	3 30	1
July 16	64	3.00	1
July 17	66	5.00	1
July 18	12	.30	1
July 19	76	6.30	1
July 20	80	7.15	1
Total	356	25.45	1
Previously reported	202,939		
Grand total	203,295		

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending July 20:

Date.	Hours worked.	Cubic Yards.
July 8	7.45	2,016
July 9	7.00	2,304
July 10	8.10	3,001
July 11	8.15	2,478
July 12	7.25	2,307
July 13	7.50	2,610
Total	46.25	14,716
July 15	6.45	2,385
July 16	3.45	1,893
July 17	7.45	2,636
July 18	7.00	2,444
July 19	3.40	925
July 20	7.20	2,627
Total	36.15	12,910

New Borrow Pit at Gatun Dam.

An area of slightly over 14 acres of land, lying to the north of the Spillway hotel, is to be devoted to a borrow pit for supplying clay for both wings of the Gatun Dam. After the toes have been brought to full height on either side of the hydraulic fill, they are to be brought together by filling inward on the top of the hydraulic material. When the embankments have come within twenty-five feet of each other, the remaining fill is to be made with selected clay. The new borrow pit will supply clay for this purpose, and for blanketing the lake side of the hills embraced by the dam at its western extremity. Steam-shovel No. 134 has begun excavation in the new pit, and shovel No. 117 will shortly be added.

Postal Business and Canal Zone Revenues.

The total amount of money orders issued in the Canal Zone during the month of June was $345,598.43, of which $279,362.95 was payable in the United States, $65,555.28 in the Canal Zone, $644.70 in Martinique, and $35.50 in Costa Rica. The number of orders issued was 17,146, and the average value was $20.15. Money order fees amounted to $1,657.96, and the amount paid and repaid was $86,638.99. Postal sales amounted to $7,374, and newspaper postage to $14.79.

Revenue collections during the month of June were, as follows: Bicycle and chauffeur licenses, $53; motor vehicle licenses, $1,026; steamboat inspection, $70; and taxes, licenses, etc., $35,504.35; total, $36,653.35.

CONCRETE WORK IN THE LOCKS.

Over 89 per cent of the concrete for the locks is in place, the amount at the close of work on July 20 being 3,842,543 cubic yards, out of a total of approximately 4,302,563. A total of 19,294½ cubic yards of concrete was laid in the locks during the week ending July 20.

GATUN LOCKS.

Over 94 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on July 20 being 1,885,832 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending July 20, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.

STEAMSHOVEL RECORDS.

Work of Central Division Shovels in June.

During the month of June the total amount of material excavated in the Central Division was 1,357,204 cubic yards, of which 297,237 cubic yards were classified as earth, and 1,059,967 cubic yards as rock. The total—1,357,204 cubic yards—was removed by steamshovels.

The high record for the month was made by shovel No. 207, working 24 days in the Culebra district, which excavated 68,643 cubic yards of rock and earth.

The second best record for the month was made by shovel No. 212, working 24 days in the Culebra district, which excavated 54,520 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 25 days in the Culebra district, which excavated 40,925 cubic yards of earth.

Shovel No. 207, working in the Culebra district, made a high record for one day by excavating 3,819 cubic yards of rock on June 6.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best record for the month and for one day are shown below:

Quarterly Meeting of the Isthmian Sunday School Association.

The quarterly meeting of the Isthmian Sunday School Association was held in the Commission chapel at Gorgona on Sunday, July 14, at 2.15 o'clock. The attendance was the largest of any quarterly meeting for more than three years. Mr. E. A. Putnam, who has served as secretary for the past year, spoke on "Sunday school work as I have seen it on the Isthmus," and Mr. W. N. Windes of Gatun read a paper on "The essential qualification of a teacher." The semiannual election of officers resulted, as follows: President, Rev. A. A. Nellis, Empire (reelected); vice-president, W. H. Kromer, Cristobal; secretary, W. N. Windes, Gatun; treasurer, J. B. March, Gorgona (reelected.)

The steamship *Portland* of the California-Atlantic Steamship Company arrived at Balboa from San Francisco on July 22, with 3,000 tons of cargo. This is the first trip of the *Portland* to Balboa, but it will ply regularly, hereafter, between the Isthmus and north Pacific ports. The vessel was recently converted from coal to oil burning.

Invitation to American Public Health Association.

The Chief Sanitary Officer will extend, in the name of the Isthmian Canal Commission, an invitation to the American Public Health Association to hold its annual meeting for 1913 in the Canal Zone. The invitation is to be presented at the next meeting, to be held in Washington next September. The association is the leading international sanitary organization in the Western Hemisphere.

PERSONAL.

Mr. Joseph Bucklin Bishop, accompanied by Mrs. Bishop, is a passenger on the *Ancon*, scheduled to arrive at Cristobal on Friday, July 26.

Red Cross Finances.

The financial statement of the Canal Zone chapter, American National Red Cross, for the month of June, 1912 is, as follows:

RECEIPTS.

June 1.	On hand	$2,435.08	
June 5.	Interest on money in bank for April and May.	8.28	
June 30.	Membership dues received	2.00	
	Total receipts		$2,445 36

DISBURSEMENTS.

June 15.	Relief of family of American employe drowned near Chepo	$100.00	
June 18.	Relief of American from Honduras stranded in Colon	20 00	
June 26.	Relief of destitute American, deported from Colon.	10 00	
June 26.	Purchase of hotel coupon book to be used in furnishing meals for destitute persons while awaiting action of the Red Cross	15.00	
	Total disbursements		$145.00
June 30.	Balance on hand		$2,300.36

JOHN L. PHILLIPS, *Treasurer.*

Approved:

C. A. DEVOL, *Chairman.*

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on July 31. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8 a. m., on July 31, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability properly to operate an automobile, and must have the automobile with them.

Costa Rican School Teachers on Visit to Canal.

Mr. Juan Francisco Echeverria, C. E., of the public works of Costa Rica, accompanied by a party of Costa Rican school teachers, arrived on the *Prinz Eitel Friedrich* on Monday, July 15, on a tour of inspection of the Canal works.

Tenth Infantryman Found Dead near Bas Obispo.

Luther McCullah, a private in the Tenth Infantry, Camp E. S. Otis, belonging to the mounted detachment, was found dead on the Mandingo River bridge on the Gorgona road, not far from Bas Obispo, on the morning of Tuesday, July 16, with two bullet wounds, one in the head, and the other in his body. The discovery was made by James Stewart, an elderly colored man, living near one end of the bridge. A coroner's jury was empaneled, but has not yet concluded its findings.

Pacific Masonic Club Election.

At the regular meeting of the Pacific Masonic Club, held at Ancon on Saturday, July 20, the following officers were elected for the ensuing term: President, Emil J. Rall; first vice-president, E. E. Price; second vice-president, John Mergendaller; secretary-treasurer, David R. Wolverton.

Fatal Accident at Pedro Miguel Locks.

Lephus Erik Skeel-Gjedsted, an employe of the McClintic-Marshall Company, was killed on July 16 in the west chamber of the Pedro Miguel locks by a falling manhole ring weighing 200 pounds. He was born in Copenhagen, Denmark, in 1883, and is survived by his father who lives at Verteminde, Denmark.

Killed in Attempting to Board Engine.

Fitzgerald Harper, a Barbadian, check No. 15550, employed in the transportation department, fell under the wheels and was killed, on Tuesday, July 9, while attempting to board engine No. 658 in the Cristobal railroad yard.

Missing Men.

Any one who can furnish information respecting Percival Ranson Curtis, Englishman, who arrived at Colon in 1911, is requested to communicate with the British Consul, Colon.

Any one having information regarding the whereabouts of Mr. Albert W. Stevens, who is supposed to have come to the Isthmus from Hackensack, New Jersey, is requested to communicate with the Chief Sanitary Officer, Ancon.

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., Sunday, July 28, 1912, at 8. p. m. The program follows:

1. March—*Lance and Shield*	Laurendeau
2. Selection—*Dr. De Luxe*	Hoschna
3. Reverie—*Thoughts of Home*	Jennings
4. Overture—*Poet and Peasant*	von Suppe
5. Tango—*El Mimito*	Villanueva
6. Selection—*The Fortune Teller*	Herbert
7. Ballet Music from Faust	Gounod
8. Medley Selection—*Remick's Late Hits*	Lampe
9. March—*I Want to Be In Dixie*	Berlin & Snyder

CHARLES E. JENNINGS, *Musical Director.*

The next concert will be given at Gorgona, Augus 4, at 6 p. m.

Family Quarters.

Applications for married quarters on file on June 30, 1912, were, as follows:

Toro Point	1	3
Total	6 (2)	691 (153)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhousekeeping family quarters at stations other than those at which applications are filed.

CANAL ZONE CENSUS.

Enumeration Completed on March 31 and Results have been Compiled.

The work of enumeration in connection with the Canal Zone census was begun on February 1, 1912, and concluded on March 31. It was in charge of the Department of Civil Administration, and was under the immediate direction of Mr. Edward W. Koch, an expert from the Bureau of the Census at Washington, and Mr. C. L. Luedtke, assistant chief clerk of the Department of Civil Administration. Their report, with accompanying tables, has been approved by the Chairman and ordered printed in pamphlet form.

The territorial scope of the census comprised, in addition to the Canal Zone proper, the Canal Commission settlements at Porto Bello, Nombre de Dios, Colon beach, including Colon Hospital, the Taboga sanitarium, and the floating equipment at Punta Chamé. Although not included in the Canal Zone figures, the enumeration took into account all employes of the Canal Commission and Panama railroad who resided in the cities of Panama and Colon. The enumeration of the United States forces at Camp E. S. Otis, and Camp Elliott, was made by persons who were appointed as special enumerators for the purpose. The enumeration of the inmates of the Canal Zone penitentiary and prison stockade was performed by an officer specially designated. Thirty enumerators were employed on the Zone census proper.

The total number of persons enumerated was 71,682, of whom 8,661 were employes of the Canal Commission and the Panama Railroad Company, and 211 of contractors, who, while employed in the Zone, resided in Panama and Colon, which placed the total population of the Canal Zone, embracing the territorial scope above described, at 62,810. Of that number, 19,413 were white; 31,525 were black; 10,323 were mixed; 521 were yellow, consisting of 516 Chinese and five Japanese; 378 were Hindoos, and two were Filipinos. There were also 648 persons reported as Indians, nearly all of whom, however, could have been included in the "mixed" classification, known under the Spanish ethnographic term of mestizo, a mixture of some European racial stock (in this case Spanish) with the aborigines, or native Indian race. The above figures, however, do not represent the number of persons of that race, as many were reported by the enumerators as mixed, which, according to the instructions,

*Employes of the Isthmian Canal Commission and Panama Railroad Company, working in the Canal Zone and residing in the cities of Panama and Colon, including 21 employes of the McClintic-Marshall Construction Company. †Ancon district.

was defined as including all persons of mixed blood, irrespective of the nature of the mixture. The last census of the Canal Zone, prior to this one, was taken as of June 23, 1908. The population of the Zone at that time was reported at 50,003, so in the interval since then there has been an apparent gain of 12,807 inhabitants.

Classified by citizenship, Great Britain leads in the present census, with 30,859; United States, second, with 11,850. The countries represented will be found in table No. 2. Of the 11,850 American citizens, 9,770 were born in the United States. By states, Pennsylvania, leads with 1,375; New York, second, with 1,372; Ohio, third, with 692; Illinois, fourth, with 453; Massachusetts, fifth, with 386; Indiana, sixth, with 382; Kentucky, seventh, with 369; Virginia, eighth, with 338.

United States	8,199	3,651	11,850
Venezuela	39	5	44
Total	45,163	17,647	62,810

The population not included in the towns was placed at 11,677, which, distributed by administrative districts was, as follows: Ancon, 1,057; Empire, 4,821; Gorgona, 4,428, and Cristobal, 1,371. These figures, however, included many of the more thickly settled localities and native settlements, but which, because of the lack of well-defined geographic limits, it was impossible to correctly classify. The population, outside of the settlements located in the territory contiguous to the Canal and railroad, was approximately 5,000. The total number of persons reported as having arrived in the Canal Zone, prior to February 26, 1904, which was the date of the ratification of the treaty with Panama, was 8,963.

Gatun, which includes the native settlement of New Gatun, is shown to be the largest Canal Zone settlement, with Empire a close second; Cristobal, third; Gorgona, fourth, and Paraiso, fifth.

The report shows that the total number of employes of the Canal Commission and the Panama railroad at the time of the enumeration was 41,174, of whom 32,513 resided in the Canal Zone, and 8,661 in Panama and Colon. The number employed by the Canal Commission was 33,241; by the Panama railroad 7,933. In comparing the number of employes enumerated—41,174—with the number of employes shown on the payrolls for February—49,830—it was found that the payrolls showed 8,656 more than were actually enumerated. That discrepancy, however, was not regarded as a real one, the difference in the main being accounted for, first, by deducting the names appearing on the payrolls more than once, caused by reason of transfers between gangs, divisions and departments, as well as the discharge and reemployment of many persons during the period covered by the roll, and, second, for the reason that there were found in the Zone 5,960 male nonemployes, 15 years of age, or over. This number was exclusive of the persons employed by the contractors and those stationed at Camp Otis and Camp Elliott. As the census period covered nearly two months, and it was impossible to enumerate all persons during the month of February, many persons, although employed on February 1, subsequently severed their connection as employes, and when found by the enumerators, were reported as nonemployes. On the other hand, many persons were enumerated as nonemployes, who, subsequent to February 1, became employes of the Commission or railroad, so that many persons were enumerated as nonemployes whose names nevertheless were included in the number of employes as shown by the payrolls. As an illustration, it may be cited the enumeration of the employes of the McClintic-Marshall Construction Company, who reported as having 1,012 men employed during the month of February, when it was only possible to enumerate 878 persons, a difference of about 13 per cent. An allowance should be made also, for those employes who did not come within the territorial scope of the census, namely, those who resided and were employed in the cities of Panama and Colon. This would include, for instance, practically all of the laborers upon the docks at Colon, and the American wharf and freight house and railroad yards at Panama. The number of persons so employed during February was placed by the Panama railroad at 1,000.

Owing to the fact that the scope of the census comprehended the enumeration of all employes working in the Zone, special methods had to be adopted for their enumeration, which in the Ancon and Cristobal districts involved the enumeration of the men while at work. This, however, afforded an opportunity for observing the constant change of the labor forces, which resulted in duplicating the names upon the timebooks and payrolls. To insure as accurate a count as it was possible to make under these conditions the enumerators secured access to the timebooks, and, in many instances, prepared lists therefrom, and then checked the employes enumerated. A large proportion was always found to be absent from various causes, necessitating personal search for those persons.

In the Atlantic Division at Gatun, it was possible to obviate to a large extent the field enumeration by having the enumeration cards partly filled out in the office from the payrolls in advance of the date set for the issuance of the pay certificates, which, by special direction of the division engineer, were issued from the office, instead of being distributed on the field. Thus, by detailing enumerators from other districts, it was possible to carry on the work of enumeration in conjunction with the issuance of pay certificates, and by this method, 4,200 laborers were enumerated during three afternoon periods. A similar method was adopted in the enumeration of the forces employed by the contractors. In the Pacific Division, also, the census cards were partly filled out in the time office, but, as the pay certificates had already been issued and the men paid, it was necessary to enumerate on the work. The enumeration of the American employes was made in quarters as far as possible, which was also the method followed in the enumeration of the silver employes in the Empire and Gorgona districts.

To obtain as far as possible the correct number of employes, there were secured from the various departments on the Isthmus, lists of all silver employes whose names appeared upon the February payrolls. The gold employes were checked against the timebooks and timerolls for the month of February. The result of this check demonstrated that it was impossible to arrive at what might be called an exact number of employes. The number shown by the weekly force report was, of course, less than the average employed during any one month, while the number of employes shown on the payrolls, on the other hand, was too high. With due regard, therefore, for the various methods adopted to secure accuracy in the number of employes, as well as for the other reasons offered in explanation of the difference, it is believed that the number of employes enumerated—41,174—with an allowance of 1,000 covering those employes who work and reside in the cities of Panama and Colon, or a total of 42,174, may be safely placed as the number of employes of the Canal Commission and the Panama Railroad on February 1, 1912.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending July 13:

Median, July 7, from Liverpool, with 300 barrels carbolic acid, for stock.

Nicholas Cuneo, July 6, from Bridgeton, with 11,000 cases dynamite, for stock.

Prinz Joachim, July 7, from New York, with 21 cases safety fuse, 10 cases hardware, for stock.

Sixaola, July 7, from New York, with 10 cases varnish, 562 pieces channels, for stock; 55 cases machinery, 16 cases brass nuts, 181 cases castings, for superintendent of erection; 96 pieces steel channels, for Mechanical Division; 2,408 pieces steel bars, for Division of Fortifications.

Thelma, July 8, from St. Mary's, Ga., 1,085 pieces piling, for stock; 3,176 pieces lumber, for Mechanical Division.

Remembrance, July 7, from Newport News, with 124 tons blacksmith coal, for stock.

Bylands, July 8, from New York, with 105,896 bags cement, for Pacific Division.

Almirante, July 10, from New York, with 39 pieces steel plates, 7 bundles fittings, for superintendent of erection.

Cristobal, July 10, from New York, with 120,000 bags cement, 44 snubbing posts, 75 cases coil springs, for Pacific Division; 26 crates steel lathe, 348 packages crane parts, for Panama Railroad Company; 541 bundles conduit, for superintendent of erection; 145 pieces iron pipe, 10 cases hardware, for stock.

Abangarez, July 11, from New Orleans, with 100 cases soap, 26 pieces steamshovel castings, 2,754 bundles lumber, 2,538 pieces lumber, 92 pieces piling, for stock; 2,269 pieces lumber, for Mechanical Division.

Westlands, July 11, from New York, with 297 cases machinery, 205 packages rack castings, 185 packages valve material, for superintendent of erection; 358 bundles structural steel, 167 pieces steel girders, for Panama Railroad Company; 50 kegs nails, for stock.

Panama, July 10, from New York, with 675 pieces steel bars, 91 pieces car couplers, for Pacific Division; 106 cases castings, for superintendent of erection; 95 cases drugs and sundries, for Sanitary Department; 50 pigs tin, 28 cases rubber hose, 200 pigs lead, 201 bags tie plugs, for stock; and a miscellanous cargo, the whole consisting of 1,950 packages, weighing 175 tons.

OFFICIAL CIRCULARS.

Rules and Regulations Governing Leave of Absence.

CULEBRA, C. Z., July 3, 1912.

CIRCULAR NO. 132-L (Cross file also as 297-D.):

The following compilation of the rules and regulations governing the granting of leaves of absence to employes is published for the information and guidance of all concerned:

Service required to earn leave with pay—1. In computing the service of an employe which entitles him to leave with pay, the following time is not counted as such service:

(*a*) Suspensions.

(*b*) Leave of absence without pay.

(*c*) Absence on account of illness or injury due to the employe's own fault or misconduct, particularly alcoholism and venereal diseases.

(*d*) Absence on account of illness or injury not the fault of the employe, in excess of sixty days in twelve months.

Service for the required number of months, exclusive of the above deductions, must be rendered to entitle an employe to leave with pay.

2. An employe is entitled to no leave for service of less than six months.

3. For service of six months and less than ten months, a monthly employe is entitled to leave at the rate of 3½ days, and an hourly employe 2⅓ days for each full month's service upon discharge on account of reduction of force or resignation, but not when discharged for cause.

4. After serving 10 months on the monthly roll, an employe may, in the discretion of the head of the department or division in which he is employed, or of the Chairman and Chief Engineer, be granted leave for one year's service, viz: 42 days with pay, and, after 10 months on the hourly roll, an employe may be granted 28 days with pay. (When part of his service is on the monthly roll, and part on the hourly, Section 22 will govern.)

Accumulative leave—5. After an employe has completed 12 months' service (exclusive of deductions described in Section 1) without taking a leave with pay, additional leave may be earned at the rate of 3½ days for each month's service, in the case of monthly employes, and 2⅓ days for hourly employes, and will be granted in case of resignation or discharge on account of reduction of force, but not when discharged for cause; however, if the employe completes 10 months' service in the second year, he becomes entitled to leave for an additional full year's service, or a total of 84 days for monthly employes, and 56 days for hourly employes.

6. A monthly employe cannot accumulate more than 84 days with pay, nor an hourly employe more than 56 days.

7. When an employe who has accumulated leave for two years' service expects to take leave at about the end of the two years, he must enter on same within four months after leave for the second year becomes due. Otherwise, his service between the completion of the second year and the date he finally enters on leave will earn no leave.

Only leave which has become due on or after January 1, 1911, may be accumulated, in the case of monthly employes, and on or after November 1, 1910, in case of hourly employes.

Forfeiture of leave—8. Leave is not a vested right and may be forfeited, at the discretion of the head of the department or division, or of the Chairman and Chief Engineer, if an employe's services is terminated on account of unsatisfactory workmanship or flagrant misconduct; provided, however, that, after the employe has given proper notice that he intends to accumulate leave which has become due, such leave shall not thereafter be forfeited.

9. When an employe desires to accumulate leave which is due he should give written notice to the head of his department or division of his intention. The leave of monthly employes accumulates without such notice if the four months' period within which monthly employes may enter on leave has passed.

Time of taking leave—10. Monthly employes may enter on leave within four months after it becomes due, at the convenience of the head of the department or division. Exceptions to this rule may be made only by the Chairman and will be limited to cases of necessity.

11. Hourly employes may enter on leave at any time after it becomes due, subject to the approval of the head of the department or division.

12. Except at termination of employe's service, leave only becomes due him once a year, i. e., he must complete 10 months' service each year before leave becomes due.

Amount of leave which may be granted—13. At the termination of an employe's services he may be granted all leave due him under the preceding rules.

14. Not more than 42 days with pay may be granted any employe, except at termination of service. An employe having less than 42 days with pay due may, if desired, be granted extra days without pay to make a total leave of 42 days. Additional days without pay in excess of 42 days will be granted only in cases of necessity. Department and division heads will ascertain the facts in such cases and make recommendation to the Chairman accordingly.

15. The rule heretofore in force that leave remaining to an employe's credit to accumulate must be two weeks or a multiple of two weeks, is hereby abolished. An employe applying for leave will hereafter be granted all leave due him, provided it does not exceed 42 days. If it exceeds 42 days, any balance remaining will accumulate to his credit.

To whom leave with pay may be granted—16. Leave with pay may be granted to employes whose salaries are fixed on an annual or monthly basis and who are not accustomed to a tropical climate; to American citizens employed on the gold hourly roll during the year 1910; and to all employes not accustomed to a tropical climate on the gold hourly roll subsequent to January 1, 1911.

17. Employes born in the tropics are considered to be accustomed to a tropical climate, unless they have spent the greater part of their lives in the temperate zones.

Where leave may be spent—18. Leave with pay, at the expiration of which the employe expects to return to duty, must be spent in a locality which affords the necessary change of climate.

19. Such leave may be spent anywhere outside the tropics, or within the tropics at the following places which have an altitude sufficient to afford the necessary change of climate: Honda, Colombia; Lima and Callao, Peru; Boquete and Santiago, Republic of Panama; Cartago, Alajuela, and San José, Costa Rica; Guatemala City, Guatemala; Yirasol, San Salvador; and the parishes of St. Elizabeth, Manchester, St. Ann's, and St. Andrews, Jamaica.

20. Leave with pay, at the expiration of which the employe's service is to terminate may be spent wherever the employe chooses.

Computation of leave—21. In computing the annual leave due an employe, first ascertain how many days are to be deducted from his service (under Section 1) since he last was granted leave. The date of his service year will be delayed by that number of days. That is, if his service year originally dated from January 15, and 35 days are charged against him, his year will date from February 19. Ten months after February 19 his annual leave will be due, or December 19.

22. In computing leave earned by service in both 1910 and 1911, or on both the hourly and monthly rolls, the following rules will govern:

(*a*) Leave will be due any time after ten months' continuous service, computing the leave as if the employe had served a full year of twelve months.

(*b*) For each full month on the hourly gold roll in 1910 count one and one-sixth days' leave.

For each full month on the hourly gold roll in 1911, and subsequently, count two and one-third days' leave.

For each full month on the monthly gold roll count three and one-half days' leave.

(*c*) It should be noted that only American citizens are entitled to leave for service on the hourly gold roll in 1910, but for service after 1910, citizenship is not considered.

23. No leave will be computed on a fraction of a month. When computation of leave results in a fraction of a day, a halfday, or over, will count as one day. No credit will be given for less than a halfday.

Return from leave—24. Employes are expected to report for duty at the expiration of their authorized leave. In case of unavoidable delay, the employe will be allowed time in addition to the leave authorized in which to report, not to exceed fifteen days. An employe not reporting for duty within this fifteen-day period will forfeit pay for his leave and may be discharged.

Payment for leave—25. Payment for the leave of an employe will be made the first pay period after the employe returns to the Isthmus and reports for duty.

26. When service terminates at the expiration of leave, the employe will be paid for the full period of his leave without returning to the Isthmus.

27. On and after October 1, 1912, a cash payment for leave due an employe whose service is terminated will be made to him when he leaves the service, or to his estate in case of his death, equivalent to the amount the employe would have received for the full period of leave which would have been granted. This applies only to cases where the leave is to begin on or after October 1, 1912, or where the employe's death occurs on or after that date.

This rule is at present in force for Panama railroad employes and the date named does not, therefore, apply to them.

GEO. W. GOETHALS,
Chairman and Chief Engineer, I. C. C.
President, Panama Railroad Company.

Standard Oils and Lubricants.

CULEBRA, C. Z., July 1, 1912.

CIRCULAR NO. 314-I. (Superseding CIRCULAR NO. 314-G:)

The following list of illuminating oils, and lubricating oils and greases will be considered as standard for the Isthmian Canal Commission and Panama Railroad Company, and will be used only for the purposes indicated, excepting only as noted in the last paragraph of this order. All requisitions on the Quartermaster's Department shall specify the oil or lubricant desired, either by the I. C. C. number given below, or by name or by both, and no name other than that given below for each particular oil or lubricant shall be used in designating the same on requisitions, etc. No oils or lubricants will be requisitioned for unless the same are included in the following list, until after application for authority to procure same, showing the necessity therefor, has been first submitted to and approved by me.

The metal drums in which most of the lubricating oils are furnished have to be returned to the oil contractor in good condition. Care should, therefore, be exercised in their handling to prevent both damage and loss of oil, and in no case should they be used as a continuous container for the same or any other oils, but when empty should be returned promptly to the Quartermaster's Department.

The prices given below indicate the actual cost to the Commission and Panama Railroad Company of all oils and lubricants, delivered at Cristobal, under the present contract, (cost of drums not included) and are

CLASSIFIED EXPENDITURES.

A statement of classified expenditures of the Isthmian Canal Commission to May 31, 1912, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering	General Items.	Fortifications.	Total.
To June 30, 1909	3,427,090.29	....	9,673,539.28	69,622,561.42	78,022,606.10	....	160,745,797.09

not intended to supersede the prices given in the price book of the Quartermaster's Department, and should not be used in the material accounts.

Cost per Gal.
I.C.C NO. *Drums. Cans.*

1 Valve oil.......... .195 ......

For the internal lubrication of steam valves and cylinders on all classes of equipment. For use on the crank case of Westinghouse vertical compound engines.

2. Air compressor cylinder oil.......... .15 ......

For the internal lubrication of air cylinders of air compressors, and for pneumatic hammers and drills.

3. Marine engine oil.......... .275 ......

For marine engines, but not in crank cases, where it would be agitated and mixed with water, for, being a compound oil, it would emulsify if so used; also, for the block bearings of suction dredges.

4. Stationary engine oil.......... .13 .....

For stationary engines, electric dynamos, and motors, wood and metal working machinery, and for the general lubrication of machinery; also, for dies of bolt cutters, turret lathes, etc., except where the use of lard oil is permitted. (See note under lubricant No. 11).

5. Locomotive engine oil.......... .11 .....

For all locomotives, running gear of all locomotive cranes, deck machinery of dredges (except engines,) and for cold saws in machine shops.

6. Turbine engine oil.......... .13 ....

For all step bearings of turbines in the Miraflores and Gatun power plants only. This oil is also known as step bearing oil.

7. Gas engine oil.......... .23 ......

For the cylinders of internal combustion engines.

9. Car oil.......... .10 .....

For the journals of all cars, passenger coaches, locomotive tenders, and rolling stock generally; for steamshovel bearings where not equipped with grease cups, and for tripod drills and switches.

10. Transformer oil.......... .28 ......

For use in the electrical subdivision in air-cooled transformers only.

11. Lard oil.......... ..... .80

For hand torches for illuminating purposes only on marine equipment. On land, for shop use on pipe-threading machines; and it may be substituted for stationary engine oil (I. C. C. No. 4) when necessary, on dies of turret machines and on bolt cutters, when working refined iron or tough machinery steel. The use of this oil should be minimized to the greatest possible extent on account of its high cost.

12. Ammonia cylinder oil.......... .35 .. ...

For the internal lubrication of cylinders of ammonia compressors only.

In bbls.

13. Crude oil.......... .0262

For the lubrication of steamshovel chains, cables where designated, and general purposes where oils and greases have been used as a preservative.

LUBRICATING GREASES.

Cost per Lb.
In bbls.

20. Nonliquid oil.......... ..... .05

This is an oil of the consistency of vaseline for the lubrication of sheaves of carriages on the Lidgerwood cableways at Gatun, for air brake cylinders and triple valves, and such pneumatic drills and motors as may be equipped for the use of grease.

In cons.

21. Cup grease (yellow).......... ..... .06

For all classes of lubrication where grease is used in compression cups. This grease is being received in two consistencies, No. 3 and No. 5, the No. 3 of lesser consistency to be used on machinery subject to normal temperature, and the No. 5 of heavier consistency to be used on machinery subject to higher temperatures.

22. Gear grease.......... ..... .0275

For all classes of lubrication requiring grease for which compression cups are not adapted. This includes the center and side bearings of cars, cranes, and steamshovels, also wire cables, both standing and running, etc.

In bbls.

23. Cable grease.......... ..... .0275

For the "Interlocked-wire" track cables of the Gatun cableways exclusively.

24. Crank pin grease.......... ..... .085

For use on locomotive crank pins only where pressure cups are used. Care should be exercised not to confound this grease with cup grease Nos. 3 and 5 (I. C. C. No. 21.) which is not suitable for this purpose.

ILLUMINATING OILS.

Cost per Gal.
Drums Cons.

30. Signal oil.......... ..... .37

For use in railroad lanterns only, and in the cab lights of engines.

31. Kerosene oil.......... .1225 .1425

For use in locomotive headlights, passenger coach, and similar lamps, ordinary lanterns, and for cleaning purposes.

GASOLINE.

40. Gasoline.......... .217 .24

For use on gasoline launches, motor cars, blow torches, cleaning, etc.

Standard hand oilers and oil cans should be used as provided in Circular No. 338–C.

A copy of this circular shall be posted in all stationary plants, shops, engine houses, oil houses, on all marine equipment, and in such other places as may be necessary to insure the cognizance of same by all concerned.

Substitutions of cheaper grades of the standard I. C. C. and P. R. R. lubricants given above, may be approved by the traveling engineers wherever practicable, the above circular defining in a general way their accepted uses.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

TELEPHONE DIRECTORY CHANGES.

The following additional changes have been made in the list of subscribers published in the Panama Railroad Company's telephone directory as of May 15, 1912. Telephone subscribers are requested to make a note of these changes in their copy of the directory:

Express Shipments of Heavy Castings.

CULEBRA, C. Z., July 17, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

You are referred to the Acting Chairman's circular letter to heads of departments and divisions dated March 19, 1909, reading, as follows:

> "Attention has been called by the Panama Railroad Company to the fact that express shipments of heavy castings and large packages have caused delays in the time of passenger trains. In future, shipments of this nature will not be handled on passenger trains, except in cases of absolute necessity. If advance notice is given, the Panama Railroad Company will arrange to handle emergency shipments on freight trains without delay. Please issue the necessary instructions to all concerned."

The General Superintendent of the Panama railroad complains that the shipment of I. C. C. material by passenger trains has resulted in considerable delay at stations in unloading, and renders it difficult to maintain schedule.

In the future you will limit your requests for shipment of material by passenger trains to strictly emergency cases, and under no circumstances must requests of this nature be made unless the urgency of the situation fully justifies the same.

Respectfully,
GEO. W. GOETHALS,
Chairman and Chief Engineer.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, July 20, 1912. All heights are in feet above mean sealevel.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

A local volleyball tournament was organized last week with three teams, the "Whites," the "Reds," and the "Blues," six men on each team. During the week ending Saturday, July 20, they played three games with the following results:

Team.	Won.	Lost.	P. C.
Blues	6	4	.600
Whites	5	5	.500
Reds	4	6	.400

The members of the teams are, as follows: *Whites*—Baumer, captain; Sjoblom, Becklem, Worsley, Hainsley, Hostetter.

Reds—Kaufmann, Hoffmann, Palmer, captain; Herrington, Armstrong, Stillwell.

Blues—Warner, captain; Van Zandt, Mitchell, Garrison, Coppin, Cook.

An all-around team will be picked from the players later.

A local bigpin bowling league will be organized. Every one interested is requested to come out and join and get in shape for the all-Isthmian league. Prizes for bowling in August will be a pair of shoes for high score, and a pennant for the greatest number of games played. The days set aside for bigpins are Mondays, Wednesdays, Thursdays and Saturdays.

The Gatun checker club will play the Culebra club on Saturday evening, July 27. The clubhouse has procured a carom board for the members who enjoy a game of that kind.

High scores in duckpins during the past week were, as follows: Judge, 106; Silver, 101; Hanley, 102.

EMPIRE.

Three match games were bowled in the local bowling league during the week of July 14, as follows: On Monday, July 15, the Democrats won two games from the Suffragettes; on Wednesday, July 17, the Independents won two games from the Democrats; on Friday, July 19, the Progressives won two games from the Socialists. Half of the league games have been bowled and the Independents have a slight lead.

On Saturday, July 20, the Cristobal tenpin team lost two games to the Empire team on the latter's alleys.

On Friday night, July 19, the local basketball league was started, when the "Germans" won from the "English" by the score of 13 to 3.

The June pool tournament was won by F. G. Miller.

The Corozal bowling team will be at Empire Saturday, July 27.

GORGONA.

Mr. Booz, who has been in the hospital for the past week, is expected to return within the next few days. He leaves for the United States on July 28.

The sunset song services at the clubhouse on Sunday evenings at 7 o'clock continue to be well attended.

The gymnasium work is being followed with great interest. New members are invited to join.

"Woman suffrage" was discussed pro and con at the meeting of the current topics club last Wednesday evening. The ladies of Gorgona were invited, and refreshments were served.

GATUN.

Three-hundred and forty-four people attended the return engagement of "Singbad the Sailor" at the Gatun clubhouse on Thursday evening, July 18. In addition to the opera, vocal solos were given between acts by Dan Stahley, and Mrs. A. P. Boyd of Corozal. The Tenth Infantry orchestra furnished the music.

The physical classes are still being conducted under the direction of a volunteer leader, Mr. P. O. Brunner. Handball will be given special attention for the next few weeks. Two nights each week will be devoted to basketball practice in preparation for the Isthmian league which opens up the first part of September.

A farewell reception was given at the clubhouse on Friday evening, July 19, in honor of Mrs. Chas. Harris and daughter Miss Eva, who leave soon for the United States. Mrs. Harris was presented with an ivory umbrella handle by the dramatic club, and Miss Harris was given a gold watch by the Lock City club of Gatun.

Gatun took two out of three games of tenpins from Gorgona on Saturday evening, July 20.

CRISTOBAL.

On Saturday night, the Empire bowling team was defeated by the Cristobal team by the following scores:

Empire.				Cristobal.			
Drake	155	167	167	Beattie	139	183	199
Spinks	166	114		Restock	158	156	147
Sawtelle	121		129	Orr	118		146
Danielson	129	153	136	Burns, T.	148	134	
Henry	154	147	149	Barrett	187	188	195
Pinney		159	171	Peterson		147	110
Total	725	740	752		750	808	797

The next in the series of moving picture entertainments will be on Monday, July 29.

Thursday night, at a meeting of the basketball players, it was decided to organize a local league with four teams in the contest. There were 20 men out to practice.

COMMISSARY DEPARTMENT.

The commissaries are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Cold Storage Prices.

The following changes have been made in the list of cold storage articles as of July 21:

Pot roast advanced to 15 cents per pound.
Eggs advanced to 27 cents by the dozen.
Cabbage reduced to 4 cents per pound.
Tomatoes reduced to 5 cents per pound.
Cherres at 20 cents per pound added.
Peaches at 8 cents per pound added.

Rainfall from July 1 to 20, 1912, Inclusive.

Sale of Public Buildings at Nombre de Dios.

OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., July 19, 1912.

Sealed proposals will be received at this office until 3 p. m., Monday, August 19, 1912, and then opened, for the purchase of any or all buildings, including plumbing, owned by the Commission at Nombre de Dios. List of buildings and full information will be furnished upon application to any district quartermaster, or to this office. Proposals must be accompanied by five per centum (5%) of amount bid. Envelopes containing proposals should be endorsed "Proposal for purchase of buildings," and addressed to Colonel C. A. DEVOL, Chief Quartermaster, Culebra, C. Z.

Sale of Lumber at Public Auction at Porto Bello.

OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., July 20, 1912.

There will be sold at public auction, by the district quartermaster at Porto Bello, at his office, at 1 p. m., Monday, August 5, 1912, to the highest bidder for cash, the following Isthmian Canal Commission property: 15,000 feet, board measure, lumber, second hand. The Government reserves the right to accept or reject any or all bids. For further information apply to the district quartermaster, Porto Bello.

C. A. DEVOL, *Chief Quartermaster.*

FOUND—At Gatun, on July 7, an eighteen-foot Mullin steel gasoline boat equipped with a three horse-power engine. Owner will please communicate with R. B. Johnson, Gatun.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans, via Limon, on Thursdays, at 5 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.

The following ships arrived, at or departed from, the port of Balboa during the week ending July 20:

Arrivals—July 15, *Urubamba*, from Callao; July 16, *Naraja*, from San Francisco; July 16, *Peru*, from Guayaquil; July 17, *Aysen*, from Valparaiso; July 19, *Manavi*, from Buenaventura; July 20, *San Juan*, from San Francisco.

Departures—July 16, *Chile*, to Guayaquil; July 16, *Mexico*, to Valparaiso; July 16, *Ecuador*, to Guayaquil; July 18, *Cuzco*, to San Francisco; July 19, *Acapulco*, to San Francisco; July 19, *Barracouta*, to San Francisco.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, JULY 31, 1912. No. 49.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Highest Daily Steamshovel Record.

Steamshovel No. 120 (T. P. Kelleher, engineer, and L. P. Bonnell, craneman,) working in the west borrow pit for Gatun Dam, loaded 202 large Oliver dump cars containing 3,434 cubic yards in the working day of eight hours on July 6. This is 119 cubic yards more than the previous daily Isthmian record for a 70-ton shovel, made by the same shovel and crew on April 2, 1912.

Contract for Panama Coffee.

The Commissary-Subsistence Department has contracted for the delivery of 50,000 pounds of coffee, grown by an American planter at El Boquete, in Chiriqui province, Republic of Panama. This is a high grade coffee, its use having been decided upon after careful test in the laboratory at Cristobal. Delivery will be made in two shipments, and 28,000 pounds have been received. It is stored in tin-lined compartments in the raw material warehouse, and will be roasted, ground, and packed as required. During the fiscal year ending June 30, 1912, 341 780 pounds of coffee were roasted, producing 280,909 pounds of roasted coffee. The value of the product was $64,220.98.

Laying Towing Track on Lock Walls.

Rack track, for the use of the electric towing locomotives in guiding vessels through the locks, has been laid on the greater part of the completed walls at Gatun and Pedro Miguel Locks. None has been placed at Miraflores Locks, and probably will not be until the work at Pedro Miguel is well toward completion. At Gatun, towing track has been laid on the center wall, from the upper guard gates, in the approach to the locks, to the incline between the upper and middle locks, while on the side walls it has been laid from the downstream piers of the emergency dams to the intermediate gates in the middle lock. A total of 7,326 feet had been placed at Gatun up to July 20, leaving 14,619 feet to be placed. On the single lift lock at Pedro Miguel, practically all of the track for the side and center walls proper has been laid, and the force is ready to extend the work on the approach and flare walls as they are brought to completion. A total of 5,526 feet, 22 per cent of which is on recess covers, had been laid to July 20, leaving 7,687 feet yet to be placed.

As each section of track is laid it is tested with a truck, on which a cogwheel engages the rack in the manner of the driving cog of the locomotive. The interworking of the cog and rack is carefully observed, and slight variations in the pitch of the rack subject the section to condemnation.

Incorporation in the Canal Zone.

In response to inquiry from Americans resident on the Isthmus, the Department of Law has expressed the opinion that there is no permissive law in the Canal Zone under which corporations may be created, and no incorporation could be had without an act of Congress, since under the United States system of government, corporations can be created only by special act of legislature or under a general legislative enactment permitting incorporation. The Colombian or Panamanian laws on the subject, together with other laws political in character, ceased to be operative in the Canal Zone after the change of sovereignty.

Contracts for Transformer Equipment.

Award has been made on the bids for supplying the electrical equipment for the transformer rooms within the lock walls. The requisite equipment, of which advertisement was made in Circular 705, from the Washington office of the Isthmian Canal Commission, was described in the THE CANAL RECORD of April 10, 1912. Award for 72 power transformers, 39 lighting transformers, and 36 oil-switch banks was made to the General Electric Company. The award for 36 switchboards has been held up, pending investigation. Miscellaneous equipment, consisting of ground plates, copper bars, tape, cable bells, and various accessory fixtures, is to be purchased from the Standard Underground Cable Company, the G. & W. Electrical Specialty Company, the Westinghouse Electric and Manufacturing Company, and the General Electric Company.

Use of Cableways at Lower End of Gatun Locks.

Preparations are being made to extend to the north the two pairs of tracks on which the towers of the duplex cableways across Gatun Locks are moved, in order that the system may be used for placing the concrete in the lower approach and flare walls. Since the span of the cables is 800 feet, of which 390 feet extend to the east of the axis of the locks, and 410 feet to the west, the front, or inner trucks of the towers will clear by at least 90 feet the outermost corners of the flare walls. The sites of the track extensions have been excavated to fairly firm strata of clay and argillaceous rock by the dredges, which have been excavating for the approach and flare walls, and fills of heavy rock are being built upon these strata to support the tower tracks. The fill on the east side is well toward completion, while on the west side, a pile trestle is being driven from the north toward the present west backfill, and the placing of rock has been begun. The stresses on the towers, placing a pressure of 425,000 pounds on the wheels of the front track of the head tower, require an unusually firm track bed. A part of the support at the lower end of the present backfill was so weakened by the excavation at the lower end of the locks that the towers had to be moved back for about one hundred feet above the point at which they were placing concrete. A hopper and Decauville cars were used for carrying concrete to the places which could not be reached directly by the cableways.

Dredges to Excavate 7t Feet Below Sealevel.

The dipper and pipeline suction dredges, which have been engaged in excavating at the lower end of Gatun Locks for the guide and flare walls, have carried the excavation to 41 feet below sealevel. In order that they may uncover the solid rock for the wing wall foundations. which drilling has indicated to lie about 70 feet below sealevel. the channel through which the site was flooded has been dammed, and, as the suction dredge continues pumping out the silt-laden water in which the spoil is carried away, it will lower the surface of the water in the lagoon. By such means the dredges will be lowered as far as necessary, probably about 30 feet below the level of the sea.

Inasmuch as the pipeline suction dredge carries away about four times as much water as earth in its discharge, it is necessary to supply the lagoon with additional water. By this means the level of the water may be regulated so that the dredges may work to best advantage. A special outfit was assembled at the dry dock shops for pumping the required water. It consists of a 16-inch centrifugal pump, with direct connected engine, supplied with steam from an old boiler taken out of the tug *Bohio*, all mounted on a small, flush-deck steel barge. The pump and engine are part of the equipment of a suction dredge originally used in sand excavation at Nombre de Dios and wrecked at that place during a storm. This dredge was made up with equipment from various sources, installed in an old French hull. The outfit in which the pump is now installed is stationed in the East Diversion and pumps about 7,000 gallons of water a minute, through an 18-inch pipeline, maintaining the water in the lagoon at the desired level.

Dredge *No. 4* is doing the suction excava-

NOTES OF PROGRESS

(Continued.)

tion, while the dipper dredge *Chagres* continues with the removal of the material which cannot be handled by the suction dredge. The material excavated by the *Chagres* is loaded into barges and towed by the tug *De Lesseps* across the lagoon, where the barges are dumped into a pit made for this purpose by the pipeline suction dredge. Steamshovels could not be used for the excavation for the wall sites, on account of the softness of most of the material to be removed.

Sold Property to be Marked "ICS."

In order to avoid confusion, property of the Isthmian Canal Commission, which is sold locally, will be branded *ICS*, indicating "Inspected, condemned, and sold." This method, in vogue at the sale of government property in the United States, has been in effect on the Isthmus for some time to the extent of branding animals on the neck with the mark, and will hereafter be extended to all local sales.

CONCRETE WORK IN THE LOCKS.

Over 90 per cent of the concrete for the locks is in place, the amount at the close of work on July 27 being 3,864,156 cubic yards, out of a total of approximately 4,302,563. A total of 21,613 cubic yards of concrete was laid in the locks during the week ending July 27.

GATUN LOCKS.

Over 94 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on July 27 being 1,887,896 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending July 27, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.

MIRAFLORES LOCKS.

Over 78 per cent of the concrete for the system of two twin locks at Miraflores was in place July 27, the total amount on that date being 1,107,098 cubic yards, bucket measurement, out of a total of approximately 1,412,736. The record for each working day last week, follows:

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant.							Total.
				2-cubic yard mixers.			½-cubic yard mixers.

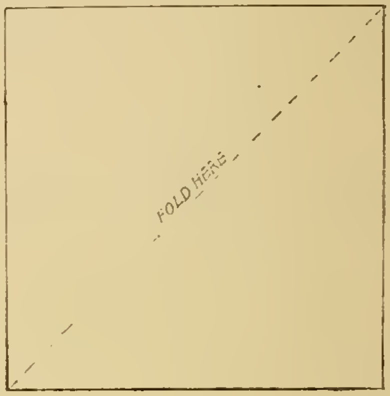
SANITARY DRINKING CUP.

Made from Ordinary Sheet of Paper in a Few Seconds.

An individual drinking cup, which is watertight and portable, can be made in a few seconds from an ordinary sheet of letter paper, or other paper available.

To begin with, the paper should be square. If not so, turn over an edge or tear off a strip to make it square. As shown in Figure 1, fold into a triangle, with edges even. Having once folded, at any stage, do not unfold.

As shown in Figure 2, lay over each of the points at the acute angles of the triangle until it rests near the middle of the opposite edge. The result of this folding is outlined in Figure 3. Fold down the flaps at the top, one on either side, as in Figure 4, and the cup is completed.



THE PAPER—FIG. 1.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

Among the resolutions adopted at the biennial meeting of the General Federation of Women's Clubs, held at San Francisco June 25 to July 6, was the following:

> "That the federation unite with the Government in erecting a monument at Panama in commemoration of the completion of the Panama Canal."

Mrs. Percy V. Pennybacker, formerly president of the Texas State Federation, was elected president of the General Federation. On July 5, the death occurred in San Francisco of Mrs. Sarah Platt Decker, a former president of the General Federation. Mrs. Decker was taken ill during the early days of the biennial and died in the hospital from the effects of an operation.

The Ancon Study Club has completed its study of the stories of the standard and modern operas; this course included short biographical studies of the composers and librettists. The next course will consist of readings of seven of the Shakespearian plays, beginning with "Hamlet." Among the plays selected are: "The Merchant of Venice," "King Lear," "As You Like It," "Julius Cæsar," and "King Richard II." The setting and source of each play will be considered. The club has purchased a second hand, 15-volume edition of the Encyclopedia Britannica, edition of 1906. The books will be placed in the club library. The next meeting, with which the Shakespeare study begins, will be held at the home of Mrs. Wanson, Bishop's Hollow, on Friday, August 2, at 3 p. m.

The election of officers for the ensuing term for the Isthmian Chapter of the Daughters of Rebekah, Gorgona, was held early in July with the following result: Noble grand, Mrs. W. E. McCann; vice-grand, Mrs. J. C. Jansen; secretary, Samuel B. Bewlay; financial secretary, Mrs. L. E. Perry; treasurer, Mrs. William J. Vickery; chaplain, Mrs. J. W. Myers; right supporter to the noble grand, Henry Lotz; left supporter to the noble grand, Mrs. R. W. Babbitt; right supporter to the vice-grand, Mrs. Martin Wago; left supporter to the vice-grand, Richard Stoddard; inside guardian, B. F. Henckel; outside guardian, R. E. Gaul; warden, Mrs. Harry Rhodes.

The Order of the Eastern Star, Orchid Chapter, No. 1, Gorgona, has procured the Commission lodge hall for its meetings, and, beginning in August, the regular business meetings will be held at this place on the first Saturday evening in each month. Up to the present time the order has held its meetings in the chapel. The new arrangement will tend to increase the effectual work of the organization

Miscellaneous Notes.

At the Commission clubhouse at Culebra, a private dance was given on Saturday evening, July 13, and another private dance is scheduled for an early date in August. The Culebra dancing club will hold its monthly dance on Saturday evening, August 3. On August 20, there will be a general social evening at the clubhouse. A concert will be given by the orchestra from the steamship *Prinz August Wilhelm* of the Hamburg-American Line. Refreshments will be served. The entertainment will be open to all residents of the village.

The commencement number of *The Zonian*, the Canal Zone high school paper, was issued at the end of June. The number contains the usual contributions, consisting of short articles, essays, verses, photographs, and pen sketches; and class and department notes. Three prizes were offered for the best contributions and these were awarded, as follows; For a pen and ink drawing, by John J. Loulan, class '13; for a child story, by Helen Michaels, class '12, and a parody on Cicero's orations, by Ruth Hanna, class '12. The cover design is a girl's head by Master Delevante, a former student in the school.

Church Notes.

Owing to the removal of the majority of the American families from Balboa, and the removal of the Commission hotel building at that place, the Methodist Sunday school, which has been conducted by Deaconess Elsie Keyser for the past year, was formally disbanded at the close of the session on Sunday, July 14. Each pupil in the school was presented with a Bible. In accordance with the desire of the pupils, the money in the treasury was used for the purchase of articles of clothing for the babies' ward in Santo Tomas Hospital, in the city of Panama. The clothing was made by the older girls of the school under the supervision of their teacher. In 1911, two Sunday schools were organized, one at Balboa, and the other at East Balboa, by Miss Keyser, in response to a general request of the American families. Later, the two schools were consolidated. From the beginning, the work was successful and the enthusiasm and good spirit were maintained to the close.

The missionary study class in connection with the Woman's Foreign Missionary Society of the Methodist Episcopal Church, is occupied with the study of the countries of South America. The next meeting will be held on August 1, at the home of Mrs. Stetler, corner of Fourth of July street and the Ancon boundary road.

The Rev. Harry Compton, pastor of the Methodist Episcopal Church, has returned from his annual leave of absence spent in the United States and resumed his duties at the seawall church, Panama.

The Woman's Guild of St. Luke's Hospital Church, Ancon, will meet in the ladies' writing room at the Hotel Tivoli on Tuesday morning, August 6, at 9.30 o'clock.

The monthly meeting of the Woman's Altar Guild of Christ Church, Colon, will be held in the church on Tuesday, August 6, at 9 p. m.

The Woman's Altar Guild at Gatun meets in the Commission chapel on the first Thursday in each month at 10 a. m.

LABOR FORCE AND QUARTERS IN JUNE.

On June 26, there were 34,927 employes actually at work on the Canal and the Panama railroad, and of that number, 28,539 were Canal employes. The gold force on the Canal work, composed almost entirely of white Americans, was 4,125. The force report for June 26, 1912, was, as follows:

Department.	Silver employes.*

QUARTERS.

On June 30, there were 23,382 occupants of Commission quarters. Of these, 8,908 were white Americans, of whom 5,035 were men, 1,960 were women, and 1,913 were children. There were 5,558 Europeans of the laborer class, of whom 4,926 were men; 241 were women, and 391 were children. There were 8,915 West Indian negroes, of whom 6,698 were men; 941 were women, and 1,276 were children.

SALES OF CANAL SCRAP.

Statement of Quantities Sold and Revenues Derived Therefrom.

A statement of the sales of old French and American scrap iron in the United States is given below. It does not include sales for scrap rubber, rope, copper screening, belting, cable, old typewriters, etc., the gross receipts from the sale of which amounted to approximately $33,000 during the period from March, 1909, to May, 1912, inclusive. Sales of such scrap made prior to that period are not considered, as the proceeds were deposited in the Treasury as miscellaneous receipts, United States funds, and lost to Canal appropriations.

It will be noted that the last shipment of French scrap was made on August 1, 1911. On September 26, 1911, contract was entered into with the Chicago House Wrecking Company for the sale of all remaining French material not previously taken into property records for Commission use, for the lump sum of $215,000, the wrecking company to bear all expense of assembling and shipment, and to make payments at the rate of $8 the net ton, manifest weights, f. o. b. steamships at Canal Zone ports.

Removal of Special Masonry Work Used in Lock Gate Construction.

The concrete pedestals used to support the upper guard gates at Gatun Locks in the course of erection are to be removed. Allowing them to remain, for use in contingent repairs to the gates, was considered, but it was decided that the lodgment against them of the waterlogged timbers or other débris might result in interference with the operation of the gates. It was to obviate such difficulties that the large sumps, 144 feet long, 13⅓ feet deep, and of the full width of the lock chambers, were made between the emergency dam sills and the sills for the upper guard gates.

Concrete installed on the lock walls at Gatun, for the support of the construction bridge over the sites of three sets of gates, extends beyond the proper limits of the walls and is being cut away, in order to afford a proper bond of the finished coping. This relatively small task occupies considerable time, as work can be carried on only between 4.30 and 6.30 p. m., because of the danger to men working on the gates below.

COLON WATER SUPPLY.

Plans for New Waterworks and Purification Plant have been Approved.

Plans for a new water works and purification plant at Mount Hope, in connection with the improvement of the Colon water supply, have been approved by the Chairman, with a single exception, that of a tunnel designed to carry water from Gatun Lake. The preliminary work, consisting of clearing the site at Mount Hope, and of ordering the necessary material, is under way, and efforts are being made to the end that the pumping station and clear water basin may be available for use during the next dry season. The work of clearing the site involves the removal of houses Nos. 342 to 352, inclusive, and No. 819, together with a number of small shacks.

The plans, in general, as prepared in the drafting office of the division engineer at Gatun, contemplated the construction of a tunnel through the ridge separating the watershed of Gatun Lake from that of Brazos Brook, for a distance of approximately 600 feet, and at an elevation of 65 feet above sealevel, so that with the lake level at 70 feet, the supply of water would be ample. It was proposed to locate this tunnel at a point three miles east of Quebrancha, a siding on the Panama railroad relocation about two miles out of Gatun. In referring to this feature of the work, the Chairman stated that he regarded it objectionable; first, because of the uncertainty of the material through which the tunnel must pass, and the difficulties that would probably be encountered from slides; and, second, because of the undesirability of cutting this opening through the hills below the general lake level. He requested, however, that further consideration be given to this feature, and that a report be submitted giving alternate estimates of cost of construction and operation based on carrying a 20-inch pipe line over the divide in an open cut; also, whether or not there would be an appreciable difference in cost by raising the tunnel not more than 15 feet above the lake level. A crew of diamond drill runners is engaged in determining the character of the ground in the vicinity of the proposed tunnel, and a report of the findings will be made later. In connection with the construction of the tunnel, the plans called for the laying of a 20-inch main inside of it, so that the water from Gatun Lake could be carried into the Brazos Brook reservoir, and automatically controlled, in such a manner that the level of the reservoir would never fall below 48 feet above sealevel. Other work planned is the laying of a 20-inch main from the Brazos Brook headgate to Mount Hope; the construction of an aeration chamber, mixing box, and head house; sedimentation basin; filter building, including clear water well; and pump station. The filtration plant is to be the modern, rapid, mechanical gravity type, designed for a normal maximum capacity of approximately 6,000,000 gallons a day.

The plan is to first aerate the water in the aeration chamber, and then pass it through the mixing boxes, where an aluminum sulphate solution is to be applied, thence allowing it to flow into the sedimentation basin, where sedimentation for a period of eight hours will take place. From the sedimentation basin the water will pass into the gravity filters, thence discharging directly into a clear water basin, which will form the basement of the filter building. The water from this basin, which is to have a capacity of approximately 500,000 gallons, will then flow into sumps situated beneath the floor of the pumping station, immediately alongside of the filter plant, thence will be pumped by the steam pumps directly into the main which feeds the city of Colon.

It is purposed to install in the pump house the steam pump and boiler equipment in the present pumping station, using it to furnish water for all normal consumption. In addition, there will be installed two 3,000-gallon per minute centrifugal pumps, electrically driven, so arranged that by simply throwing the pumps into operation, by closing a switch, 6,000 gallons of water a minute can be delivered into the mains at a pressure, at the lower end of Colon, of 70 pounds to the square inch, and providing for from 15 to 18 streams of water in case of fire, it being planned to use these pumps only in times of fire. The steam pumps are so arranged as to pump automatically into the main the required amount of water to maintain pressure at all times, except during a fire, of approximately 45 pounds to the square inch, and, in case of the fire pumps being thrown on the line, the steam pumps will automatically close down; and with the throwing off of the main of the electric fire pumps, the steam pumps will automatically start up.

It is planned to construct the clear water basin and the power house, and to install the electrical fire pumps as soon as possible; also, to so arrange the present standpipe and steam pumps at Mount Hope that there will be available approximately 900,000 gallons of water for use, at high pressure, in case of a fire in the quantity of approximately 6,000 gallons a minute. The shortage of water at Colon during the past dry season, when the Brazos Brook reservoir practically went dry, and water had to be carried in barges to Cristobal from Gatun, or pumped from the Mindi River, itself an uncertain source of supply, makes an adequate and permanent store imperative for the next dry season. At the present time over 3,000,000 gallons of water each day is required for Cristobal and Colon, including wash water for the pressure filters. The new plant has been designed with a view of supplying, if necessary, twice this amount. The present pipe line between Brazos Brook and the plant at Mount Hope, with the reservoir at elevation 48 feet, would furnish the maximum amount needed for Colon at present, but future increases would require the laying of an additional pipe line.

The estimate of cost for the new filtration plant, exclusive of land, is about $18,000 per million gallons of filtered water capacity, and on the same basis, the original cost of the Agua Clara plant at Gatun was about $16,300. The difference between the cost per million gallons for Agua Clara, and the proposed plant, is accounted for by twice the length of the sedimentation and the aeration of the water, together with the fact that the foundation of the filter building at Mount Hope will be on piles. It is believed from past experience that thorough aeration of the water will result in an approximate saving of about 15 per cent of aluminum sulphate, or a saving, taking 6,000,000 gallons as a basis, of about $2 a day.

In drawing up the plans for the new plant, estimates were prepared of both the mechanical gravity and pressure type of filter plants. With a pressure plant, it is necessary to force the water through the filter at an approximate net pressure of 10 pounds to the square inch. The additional daily cost in fuel oil alone for this additional work, based on the present operation at Mount Hope, would amount, on 6,000,000 gallons a day, to $4,175 a year, or, based on the average of 3,000,000 gallons of water a day, with a plant having a maximum capacity of 6,000,000 gallons a day, the daily additional cost would be $8.58 a day, or $3,131.70 a year. This amount represents the saving to be effected by the mechanical gravity type, which would be practically eight per cent on the additional investment.

Swimming Pool on Colon Beach Closed Temporarily.

The operations of the municipal engineering department of the Atlantic Division, in cleaning out the north end of the D street sewer, have made it necessary to close temporarily the swimming pool on Colon Beach, near the residence of the General Superintendent of the Panama railroad. It will probably be closed the greater part of a month.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending July 27:

DATE.	Hours worked.	Cubic Yards.
July 22	7.35	2,545
July 23	6.40	2,028
July 24	8.10	2,218
July 25	7.30	3,000
July 26	9.00	3,333
July 27	7.05	2,712
Total	46.00	15,836

Empire Christian League.

The Empire Christian League held a business meeting and social in the I. C. C. chapel, Wednesday evening, July 24, at which a musical and literary program was given. The semiannual election of officers resulted, as follows: President, H. A. A. Smith; vice-president, E. P. Beck; secretary-treasurer, E. H. Ash; chairman of music committee, H. W. Dormann; chairlady of special committee, Mrs. Phil Kelly. The report of the various departments showed the work to be in a healthy condition.

Verdict of Coroner's Jury.

The coroner's jury empaneled in the case of Luther McCullah, private, Company K, Tenth Infantry, Camp Otis, who was found dead at the Mandingo River bridge, near Bas Obispo, on the morning of July 16, has submitted findings to the effect that his death was caused by two gunshot wounds, one through the chest, and the other through the head, at the hand of person or persons unknown.

Sailing of the Ancon.

The departure of the steamship *Ancon* has been set for Tuesday, August 6, from Dock 11, at 3 p. m.

A supply of sanitary drinking cups has been received on the Isthmus and these are again provided free in the coaches of Panama railroad trains. They are placed in small cabinets on the wall at either end of each coach.

ANCON HOSPITAL GARDENS.

Microcosm of Trees and Plants that Grow in Panama.

A brief history and description of Ancon hospital gardens, together with a classified list of the trees and plants which had been catalogued up to that time, was published in The Canal Record of August 3, 1910. Since May, 1910, about 2,000 trees have been planted in the gardens, this number being divided approximately, as follows: Six hundred plantains, 600 bananas, 700 papayae and about 250 Royal palms. The present list contains the trees, plants and flowering bushes as catalogued up to date. The work of cataloguing and classifying has been greatly assisted by Prof. H. A. Pittier of the Bureau of Plant Industry, Department of Agriculture at Washington.

Plants and shrubs have been received at Ancon from Director Wilder of the Botanical Gardens at Honolulu, from the Director of Hope Gardens, Kingston, Jamaica, and from the Department of Agriculture in Washington, D. C. In 1911, Mr. Wilder visited the Isthmus and aided in the identification of some of the plants and trees.

The following list is revised from the list formerly published in The Canal Record, with the addition of several hundred specimens which have, since the publication, been classified and catalogued.

Palms—Wine palm (Acrocomia sclerocarpo vinifera); palm (Actinorhytis calloparia); Cogolillo palm (Astrocaryem polystachium); Sugar palm (Arenga saccharifera); Sago palm (Cycas revoluta); Sago palm (2) (Cycas circinalis); Fern palm (Caryota urens); Panama hat palm (Carludovica palmata); Porto Rican Royal palm (Oreodoxa Borinquena); Date palm (Phoenix dacty lifera); Fan palm (Prichardii pacifica); Palm Honolulu (Pritchardia gaudichaudi); Curly palm (Kentia belmoreana); Travelers' Tree (Ravenola Madagascariensis); Oil palm (Elaesis melancocca) Corogo Colvolo; Royal palm (Oredoxa regia); Cuba; Royal palm sp. (Oredoxa oleracea); Thatch palm (Thrinax parviflora); Thorny palm (Guiliema utilis) (Pison); Fan palm (Latania Borbonica): Palma real.

Fruits and Nuts—Mamey Sapote (Achras mamosa); Sapodilla (Achras sapota); ——— (Allamanda cathartica); Madrono de Comer (Alibertia edullis); Cashew (Anacardium occidentale); Anacardium rhinocarpus, espave, Anacardicease; Sour sop (Anona muricate); Sugar apple, custard apple (Anona squamosa); Aristotelia macqui); Chili); Custard apple (Anona reticulata. *Anonaceae*); Cocoanut (Cocos nucifera); Jock fruit (Artocarpus intergrifolia); Achote, Anatto (Bixa crellana); Coffee (Caffea Zanzabarensis); Palo Maria (Calophyllum calaba); Papaya(Carica papaya); Lime (citrus acida); Sweet orange (Citrus aurantium dulcis); Tangerine (Citrus dancy nobilis); Grapefruit (Citrus decumena); Lemon (Citrus limonum); Edible fig (Ficus carica); Cluster fig (Ficus sp.); Mangosteen (Garcimia mangostana); Plantain (Musa Paradiaca); Banana (Musa Sapientium); Avocado (Persea Gratissima); Guava (Paidium guava); Pomegranate (Punica granatum, *Myrtaceae*); Plum (Spondias edulis); Yellow plum, Hag plum (Spondias lutea); Red plum (Spondias purpurea, *Circuelo*); Bofug nut (Sterculia foetida, Philippines); Soap berry (Sapindas saponaria); Tamarind (Tamarindus Indica); Chocolate (Theobrom cacao); Vanilla chica (Selenipedium); ——— (Anona palustris) not edible; Marking nut (Semecarpus anacardium); Kafir orange (Strychnos spinosa, Africa) Mamey (Mamea Americana, *Guttiferae*); Guava real (Inga spectabilis); Macaws (Guadopalin, *Diphisa robinioidies*); Yam (Dioscorea alata); Kafir plum (Harpephyllum caffrum); Mango (Mangifera Indica, *Anocardioceae*); Klat, Arabia (Catha deulis); Medicine nut (Jatropba curas, *Euphorbiceae*).

Miscellaneous Trees, Plants and Roots—Rubber tree (Ficus elasticus); Indian rubber tree (Ficus Indica); Para rubber (Hevea, sp.); ——— (Eucalyptus botryoides); Silk oak, (Grevillea robusta); Guacimo (Guazuma ulmifolia); Cola (Cola acumuiata); Japanese bamboo (Bambusa argentea); ——— (Bambus arundinacea); Bastard teak (Butea frondosa); Ornamental ash (Phoenix reclinata); Rain tree (Pithecolobeum saman); Umbrella tree, Japanese varnish (Steranlia platonifolia); ——— (Yucca elephantipes); Mahogany (Swietonia mahogani); Teak wood (Tectona grandos); ——— (Pamdanus veitchii); Cassava (Manihot aipi, *Euphorbiceae*); Calabash (Cresentia cujete); Arrow root (Maranta arundinacea); Crow tree (Hermesias grandiceps);Sand box (Iluraxcrepitans, *Euphorbiceae*); Native rubber (Castilla panamensis); Camphora(; Snake wood (Cecropia palmata); Job's tears (Coix lacrymo Jobi); Jamaican Elder (Cedrela odorata); Soap berry (Sapindus saponaria); Ciruelo chino (Spondias dulcis, *Anocardioccae*); Dragon tree (Dracaena lindeni); Grape tree (Cocobolo, *uvifero*); ——— (Ficus altissima, *urticacae*); Bread fruit (Artocarpus incisa, *urticaeae*); Snake wood (Cecropis palmata, *Urticaeae*); Marango (Moringa oleifera); Algaroba (Hymenea courbaril).

Flowering Bushes and Plants—Sapote (Lucuma Mammosa, *Sapotaceae*); India Kale, Calocesias atrovikus (Xanthosoma); Spanish lily (Crinum evubesceur); Kirkie (Cavanillesis platanifolia, *Stereubiaceae*); ——— (Corozo galleraze, *Attalia gomphoese*); Australian pine (Casurarina, squisedifolia); ——— (Achras Ingesto, *Pittier*); ——— (Xanthosoma violaceum); Tree fern (Polypodium); Screw pine (Pandamus utilis); ——— (Chlorphora tinctoria, *Madusa Fustie*); ——— (Acalpha Mosiaca, *Euphoridcaeae*); Poroporo (Cochlospermum hibiscodes); Fustie (Chlorophora tinctoria, Machura tinctoria); Sterculiaeae (Cavanillesia plantanifolia); ——— (Calophyllum kunsterli longifolium); Bala (Gliricidia maculata); Bougainvillea (Glabra Sanderiana); ——— (Garcinia Xanthochyma); Gamboge (Garcinia morella); Cape jessamine (Gardenia Florida); "Jagua" (Genipa carute); Cacho de venado (Gilibertia arborea); ——— (Gynandropsis pentandra (Gilibertia arborea); ——— (Gynandropsis pentandra); Membrilla (Gustavia augustifolia); Coreza (Arabia guilfoylei); ——— (Arabia); Cerizo (Bunchosia glauea); Nance (Byreonima crassifolia); Cana fistala (Cassia leiantha); Mazano-Salamo (Calycophyllum candidissium); Otaheita gooseberry (Cacca disticha); Pito (Erythrina corallodendron); Pavilla (Didymopanax morototoni); Amaryllis lily (Hippeastrum equestre); ——— (Hibiscus rosa); Ginger lily (Hedychium coronarium); Yellow morning glory (Ipomoea tuba rosa); ——— (Ixora sp.); ——— (Jasminum gracillimum); Spanish jessamine (Jasminum grandiflorum); Hardy jessamine (Jasminum officianale); ———(Guacimo colorado, *Tilaceae*); ——— (Luhea rufescens); Crepe myrtle (Lagerstroemia Indica); Langsat, Java (Lansium domesticum); Anacimo blanco (Luebea sp.); ——— (Tabernaemontana coronaria); Red croton (Xanthosoma sp.); Malagueto grande (Xylopia grandiflora); ——— (Xanthosoma violaceum); (Indica kali-coloceasia); Agati (Sesbania grandiflora); Panama (Sterculia carthargesms); ——— (Plumbago capensis); ——— (Pentaclethana); Job de iguana (Phyllanthus sp. *euphorbiceae*); Lace plant (Pilea *urticaeae*); Cola (Cola acuminalta); Rose apple *myrthaceae* (Eugenia jambos); ——— (Biguonia); ——— (Erythrina sp.); Sangvillo (Croton panamensis) Poinsettia (Euphorbia pulcherrima); ——— (Pachira Barrigon); ——— (Panax excelsum); Spanish lily, white (Pancratium ovatum); ——— (Pachira macrocarpa); La Viuda (Petrosa volubilis, *verbenaceae*); ——— (Feijoa selloniana, Brazil); ——— (Panax plumatum); Frangi pani (plumeria); Cun de Amor (Momordica charantia); Acacia Farnesiana (Flor de Aroma); Century plant (Agave Americana); Coral vine (Antigonon leptopus, Cadena de Amor, *Bellissemia*); Laurel (Cordia gerascanthus); Coleus; Cola (cola Acumniata); Crotons (Codieaum variegatum); Cabbage tree (Andiva inermis); Cope Grande (Clusea rosea); Calladium; Canna; Rose apple, Hawaii (Caryophylus malaccensis); ——— (Clerodendron Balfouri); Pigeon pea (Caianus Indicus); Dwarf poinciana, *Gallito* (Caeaslpunia pulcherrima); Furcraea; Pink (Garcinia Livingstonei); Royal poinciana (Delouix regia); Suminam cherry (Eugenia uniflora, *mythaceae*); Loquat (Eriobotystia japonica); Fern sp. Glichenia); Moon flower (Iopnica bona nox); Sweet William (Ipomoea quamoclit); Henna (Lawsonia alba); Sensitive plant); (Mimosa pudica); Four o'clock (Mirabilis jalapa); Oleander (Nerinm); Spider lily, white (Pancicatium ovatum sp.);Maria (Thespesia populea); ——— (Tradescantia discolor); ——— (Vinca rosea); ——— (Zingiber officionale); Wandering Jew (Zabrina pendula); Chenille plant (Acalypha sanderi), Cado de venado (Gilbertia arborea); ——— (Jatropha aconitfolia); Snowflake, var. Rosea picta (Puallanthus nervoeus, *Euphorbiceae*); Biviba (Rollinia orthopotala, Brazil); Flamboyant Blaues (Bauhinia purpurea, *Leguminosoe*); Corteza (Apeiba Tobourou, *Tiliaceae*); ——— (Phyllanthus emblica, *euphobiceae*); ——— (Phyllanthus acuminatus, *euphorbiceae*): ——— (Duranta plumieri, *verbenaceae*); ——— (Cuscuta, *convolulacoe*); Corotu (Enterolobium cyclocarpym); ——— (Philodendrom); Coruntia pyramilata (Palo cuadrodo); Dancy (Cytharexylum candatum, *verbenaceae*); Leaf of Life, Leaf of the Air (Bryophyllum calycinum, *crassolaceae*); ——— (Foijoa sellowiana, Brazil); ——— (Pachira Barrigon); China berry (Melia Azedarach); ——— (Murrya exotica); (——— Myroxylon); Dragon's eye, China (Nephelium longana Myroxylon); Dragon's eye, China (Nephelium longana); ——— (Piper cordoncilla); ——— (Phyllanthus acuminatus); ——— (Pentoclethra); ——— (Paico), ——— (Pachira macrocarpa); ——— (Pachira fendleri); ——— (Ordinancia); ——— (Ocotca): ——— (Rheo bicolor); (Rhinacanthus nasutus); Biniba (Rillimis orthopotala, Brazil); ——— (Schizolobium excelsium); ——— (sapium Mortizium); ——— (Strychnos nux vomica); ——— (Thevetia nitida); ——— (Thrichilia); ——— (Visiia panamensis); ——— (Vinca rosea); ——— (Vernonia); Red Croton (Xanthoseoma sp.); Malagueto grande (Xylopia grandiflora); Star apple (Phrysophillum Caimito); Grendilla (Passiflora quadrangularis); Fabaceae, East Indies (Agati grandiflora); Four winged bean, Saguidillas (Botor tetragonoloba, *Fabaceae*); Calladium colocasia, Taro (Calocasis esculentum, *Araceae*); (Didymopanax morototoni); Pito (Erythrina colallodendron); Rubiaceae, native (Hamelia patens); ——— (Lantana camara, *Verbenaceae*); ——— (Philodendron, *Aroideae*) Tube rose (Poliantheas pancratium tuberosa, *Lilliacee*); (Thevetia nerifolia, *Apocyneae*); Indian kale (Xanthosoma atrovirens, *Araceae*); Zepher lily (Zephyranthes. amaryllis rosea, *Lilliaceae*); Psidium guava, *myrthaceae*.

Fabaceae, East Indies (Agati grandiflora) Four winged bean, Saguidillas (Botor tetragonoloba, *Fabaceae*); 'Calladium colocasia, Taro (Colocasis esculentum, *Araceae*); (Didymopanax morototoni); Pito, Erythrina colallodendron); ——— (Lantana camara, *Verbenaceae*);——— (Philodendron, *Aroideae*); Tube rose (Polianthes pancratium tuberosa, *Lilliaceae*); (Thevetia nerifolia, *Apocyneae*); Indian kale (Xanthosoma atrovirens, *Araceae*); Zepher lily (Zephyranthes, amaryllis rosea, *Lilliaceae*); Psidium guave *Myrtaceae*.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 90 per cent completed, 203,593 cubic yards, out of a total of 225,000, having been placed at the close of work on July 27. A statement of the amount laid each working day last week, and of the total in place, follows:

Date.	Concrete Laid.	Hours worked.	No. Mixers.
July 22	36	4.00	1
July 23	28	6.00	1
July 24	96	7.75	1
July 25	40	5.00	1
July 26	30	5.00	1
July 27	68	5.00	2
Total	298	33 15	1 17
Previously reported	203,295		
Grand total	203,593		

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending August 7, 1912, (75th meridian time):

Date.	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.
August 1		5.40	11.55	5.50
August 2	12.10	6.12	12.28	6.23
August 3	12.43	6.44	1.06	6.57
August 4	1.17	7.20	1.44	7.35
August 5	1.56	7.59	2.28	8.18
August 6	2.38	8.43	3.18	9.10
August 7	3.31	9.37	4.17	10.12

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Gorgona, C. Z., Sunday, August 4, 1912, at 6 p. m. The program follows:

1. March—*From Ocean to Ocean via Panama*. Murphy
2. Selection—*The Pink Lady* (by request)....Caryl
3. Intermezzo—*After Sunset*..................Pryor
4. Overture—*Hungarian Lustspiel*.......Keler Bela
5. (*a*)—*Everybody's Doing It*..................Berlin
   (*b*)—*Hulo, Hulo*.........................Wenrich
6. Grand fantasie—*Home, Sweet Home, the World Over*..........Lampe

   Note.—In this selection the composer describes in the various movements how "Home, Sweet Home" might be presented when adapted to the music of different countries. First, we have the melody as originally written; second, it comes in the form of the landler of Germany; third, the valse of Spain; fourth, the polacca of Russia; fifth, the aria of Italy; sixth, the strathspey of Scotland; seventh, the czardas of Hungary; eighth, an imitation of Chinese music; ninth, the jig of Ireland, and lastly the rag of the United States.
7. Tango—*El Mimito*..................Villanneva
8. Medley selection—*Remick's Late Hits*....Lampe
9. March—*Niebelungen*..................Wagner

Charles E. Jennings, *Musical Director*.

The next concert will be given at Pedro Miguel, Sunday, August 11, at 4.30 p. m.

OFFICIAL CIRCULARS.

Oxygen and Acetylene Gas Tanks.

CULEBRA, C. Z., July 20, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

All employes having occasion to use or handle tanks containing compressed oxygen and acetylene gas are directed to see that all valves are tightly closed before shipping same, regardless of whether they are empty or not. It is further directed that acetylene gas be not drawn from tanks to a pressure below ten (10) pounds, as when the pressure is reduced below this point the acetone passes off with the acetylene gas and an insufficient amount of acetone in tank is liable to cause an explosion.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Organization Statements.

CULEBRA, C. Z., July 23, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

I am directed by the President to furnish the Commission on Economy and Efficiency a statement of the organization of the various departments and divisions of the Commission, in the form attached hereto.

The organization used should be the authorized organization of June 30, 1912, and this should also be used by you in preparing your detailed estimates for the fiscal year 1914. In preparing these statements, please use the same size paper as that used for the Annual Report, forwarding four copies to this office.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Sale of Public Buildings at Nombre de Dios.

OFFICE OF THE CHIEF QUARTERMASTER,

CULEBRA, C. Z., July 19, 1912.

Sealed proposals will be received at this office until 3 p. m., Monday, August 19, 1912, and then opened, for the purchase of any or all buildings, including plumbing, owned by the Commission at Nombre de Dios. List of buildings and full information will be furnished upon application to any district quartermaster, or to this office. Proposals must be accompanied by five per centum (5%) of amount bid. Envelopes containing proposals should be endorsed "Proposal for purchase of buildings," and addressed to Colonel C. A. DEVOL, Chief Quartermaster, Culebra, C. Z.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

A local bigpin bowling tournament will start this week.

The class in Spanish that has been held for the past 10 weeks will be continued for another term of similar length, with nine members. If there are any persons in Culebra who would like to join the class, their names may be left at the secretary's desk. The class meets on Saturday evenings from 7 to 8 o'clock.

The Gatun chess club played the Culebra club on Saturday evening, July 27, with the following results:

Gatun.	Won.	Lost.	Culebra.	Won.	Lost.
Stewart		2	Dubois	2	....
Rollock		2	Meiner	2	....
Gartrell	1	1	Warner	1	1
Zimmerman	1	1	Newman	1	1
Shropshire		2	Thompson	2	....
Total	2	8		8	2

During the week, three games of volleyball were played between contesting teams, as follows: Blues vs. Reds; Whites vs. Reds; Blues vs. Whites. The standing is, as follows:

Team.	Won.	Lost.	P. C.
Blues	12	8	.600
Reds	11	9	.550
Whites	7	13	.350

Three more games will be played this week.

EMPIRE.

The standing of the local tenpin bowling league is, as follows:

Team.	Won.	Lost.
Independents	12	6
Socialists	10	8
Democrats	9	9
Suffragettes	7	11
Progressives	7	11

Games will be bowled on Monday, Wednesday, and Friday nights of each week until the tournament is closed.

The standing of the local basketball tournament to date is, as follows:

Team.	Won.	Lost.
Germans	1	1
English	1	1
Americans	1	1

League games will be played Tuesday and Friday nights of this week.

The barber shop has been reopened.

The usual Sunday evening song service will be held on August 4, at 8.30 o'clock.

GATUN.

Pictures of the participants in the comic opera "Singbad, the sailor," which were taken at the last performance, are on sale at the clubhouse at 50 cents each.

Mr. C. E. Vierbuchen won first prize in the local individual duckpin tournament which was held this month. He will receive a gold medal.

Crsitobal and Gatun broke even in a match game of duckpins and tenpins held at the Gatun clubhouse on July 27. Scores:

Duckpins.

Gatun..... 422 440 452 Cristobal.. 435 457 431

Tenpins.

Gatun..... 805 858 833 Cristobal... 862 769 722

The 100, or over, duckpin scores for the week ending July 27, are: Vierbuchen, 111; Huttlemaier, 111, 100, 112, 109, 105, 100; Mack, 105; Claherty, 100; Martin, 100.

New pool and billiard cloths have been ordered.

A local tenpin tournament was started on July 29. There are 10 teams entered, and each team is named after a state. Music will be furnished several evenings each week by the Gatun mandolin and guitar club.

Louis DePoorter defeated all comers in a recent tournament, held under the auspices of the Camp Elliott association.

CRISTOBAL.

Twenty of the prospective basketball players were out to a hard practice on Wednesday night, July 24. A number of men from Mount Hope had organized, challenged all comers, and won a game against their opponents. Preliminary steps were taken for the organization of a local league during the month of August.

On Thursday night, the Oriental Trio gave a sleight-of-hand entertainment. The company is composed of Hindoos.

At a meeting of the committee of five, selected by the various basketball players, it was decided to organize a three-team league. Each player is to vote for three captains, who are to choose the members of their teams from the available material. The three-team league is to start August 1, or not later than August 6.

COMMISSARY DEPARTMENT.

The commissaries are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

NOTES OF PROGRESS.

Guard Gates Ready for Rise of Lake.

The upper guard gates in the east chamber of Gatun Locks were closed by the contractor on July 31, and are now ready to keep the waters of Gatun Lake from flowing into the lower levels of the locks. The same gate in the west chamber was closed on August 6. The only work remaining to be done on these leaves by the McClintic-Marshall Construction Company is the erection of the footwalk and hand rails on top, though a subcontractor, the Bitumastic Enamel Company, is engaged in applying its patented material to the inner surfaces. The First Division has reopened the gates for the purpose of making minor modifications of alignment and connections with the operating machinery, but this work is such that the gates can be closed on short notice. Erection of these leaves was begun on May 27, 1911.

The sluice gates in the ogee of Gatun Spillway dam, by which the elevation of the lake surface is controlled, were closed on July 27, after having been open since July 3. When the water had risen approximately two feet, the hull of pipeline suction dredge *No. 85*, which is being dismantled for shipment across the Isthmus, was slid on shipways, and the sluice gates were reopened on August 5, in order to leave the hull in the clear. When the hull has been taken apart, and some minor concrete work on the lake side of the ogee finished, the gates will again be closed.

Floating Pumping Plants for Locks.

Plans are being prepared for the construction of two floating pumping plants, one to be used at Gatun Locks, and the other at the Pedro Miguel and Miraflores locks, as auxiliaries to the pumping plants, which will be installed in the lock caissons for unwatering the various sumps. Each plant is to consist essentially of four motor-driven 20-inch centrifugal pumps, or their equivalent, for operation under heads varying from five to 50 feet at Gatun and Pedro Miguel, and from five to 70 feet at Miraflores, mounted on one or two barges. Construction equipment already on the Isthmus, in use, or in storage, will be utilized as far as possible in the plants, and investigation is being made of available material.

A description of the pumps and actuating motors to be installed in the locks was published in THE CANAL RECORD of February 21, 1912. It is intended to use the floating pumping plants to unwater the locks, when for any reason, it is not advisable to use the floating caisson to close the tailbay.

Planning Permanent Buildings.

Mr. Austin W. Lord, the architect employed by the Isthmian Canal Commission to prepare plans for the permanent buildings to be erected in the Canal Zone for the use of the maintenance and operation force of the Canal, sailed for the United States on August 6, after spending the time since July 10 on the Isthmus in preliminary investigation. During his stay, Mr. Lord made a careful study of the topography and other local conditions affecting the general design of the structures, and consulted with officials in charge of divisions for which permanent buildings are to be erected. With the information acquired, he will devise a scheme in which all of the permanent buildings from Toro Point to Taboga Island will be of prevailing style, probably a modification of the Spanish renaissance, with appropriate adaptation of adjacent landscape. He will draft at once preliminary sketches for the buildings on which it is desired to begin work first, and proceed with the development of the designs for the superstructures. During the construction, Mr. Lord will visit the Isthmus every two or three months, and an assistant, Mr. F. W. Reynolds, will be here continuously to supervise the work. Mr. Lord is senior member of the firm of Lord, Hewlett, and Tallant of New York, and head of the department of architecture in Columbia University.

Approach Walls at Pedro Miguel Lock.

The upper approach wall at Pedro Miguel Lock, extending 1,154 feet into the southern end of Culebra Cut from the upper end of the center wall proper, has been brought to full height throughout its entire length. The remainder of its construction will consist of filling with earth and rock the cells into which the interior of the wall was divided by counterforts, and placing the reinforced concrete decking. Each of the 78 cells is 15 feet wide by about 54 feet long and 62 feet deep, requiring about 1,800 cubic yards of filling, so that the total amount of earth and rock to be used for this purpose will be about 140,000 cubic yards. The decking will be of reinforced concrete, approximately six inches thick, covering the wall for its entire length and to its full width of 55 feet eight inches, between inner faces of side walls at coping.

The lower approach wall, which is to reach 1,200 feet into Miraflores Lake, has not been extended beyond the 950-foot length at which it was stopped on account of railway tracks which crossed its site, leading to the west side of the lock. The tracks have now been removed, and steamshovels are excavating the embankment with the view of completing the wall. The work on the wall at present consists of the erection of counterforts in the hollow interior, and filling with earth and rock. The original construction comprised the erection of two long monoliths, back to back, with vertical faces, and distinct stepping-in of the interior sides, so that the space between walls had a V-shaped appearance and was unobstructed through the length of the wall. The counterforts being built at intervals of 15 feet are to support the towing tracks on either side of the wall, They are designed to have a depth of six feet on a level with the top of the wall, and conform accordingly to to the stepped-in side on which they are erected. The return track will be supported on reinforced concrete. As the counterforts are completed the filling of the wall follows.

Operations at Pacific Entrance.

The output of the dredges, working in the Pacific entrance to the Canal, for the month of July, amounted to 399,229 cubic yards, of which 307,511 cubic yards were removed from the Canal prism, and the balance—91,818 cubic yards—were dredged from the site of the inner harbor, and from the channel in front of the sand dock. At the end of July, there remained to be taken out in the Pacific entrance by dredges a total of 4,472,181 cubic yards, which is about two-thirds of all the excavation remaining to be done within the limits of the Pacific Division. The channel is now completed from the sea end to the dike which separates it from the zone of hydraulic operations, a distance of about eight miles, to a minimum depth of 30 feet below mean tide. From the sea end of the channel to a point opposite the shipways, the original excavation has been finished for some time, while the remainder of the distance is to varying depths, but not less than 30 feet below mean tide in any part.

At the present time the work in the channel, in original excavation, north of the Panama railroad wharf, is largely confined to the west bank. This section is down to grade in places; at other points, there are rock patches to be removed, and the dredge *Corozal* is at work on these. Working at 40 feet, and below, in this class of material, the output is naturally curtailed, but the dredge loads a barge once on an average in every half hour. One day recently one of the *Corozal's* buckets scooped up a huge piece of rock weighing several tons, and carried it to the top tumbler. It was however, too large to be dumped, and it was forced out of the bucket and fell on the deck, fortunately without doing much damage beyond splitting the planking.

The *Marmot* is also working on the west bank to the depth of its ladder. The suction

NOTES OF PROGRESS.

(Continued.)

dredge *Culebra* is engaged in cleaning up the bottom out at sea, and the dipper dredge *Cardenas* is removing a rock patch also in the outer channel. The *Mole* is stationed temporarily at the Punta Chamé sand bed, relieving the *Gopher*, which is tied up for repairs. The *Badger* is making a cut in the mud spit in front of the office of the resident engineer, which is included in the excavation for the inner harbor. The digging here is comparatively easy, only a small amount of rock having been encountered to date. The transfer of pipeline dredge *No. 85* is in progress, and its crew was turned over to the Pacific Division last week. The services of the men will be utilized temporarily in reassembling the parts of the vessel, and in making some necessary changes.

CONCRETE WORK IN THE LOCKS.

Over 90 per cent of the concrete for the locks is in place, the amount at the close of work on August 3 being 3,885,396 cubic yards, out of a total of approximately 4,302,563. A total of 21,240 cubic yards of concrete was laid in the locks during the week ending August 3.

GATUN LOCKS.

About 95 per cent of the concrete for the system of three twin locks at Gatun has been laid the amount in place at the close of work on August 3 being 1,889,709 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending August 3, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 97 per cent completed, 871,105 cubic yards, out of a total of 889,827, bucket measurement, having been placed at the close of work on August 3. The record for each of the working days of last week, follows:

MIRAFLORES LOCKS.

Over 78 per cent of the concrete for the system of two twin locks at Miraflores was in place August 3, the total amount on that date being 1,124,582 cubic yards, bucket measurement, out of a total of approximately 1,412,736. The record for each working day last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT.							Total.

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of July.

During the month of July, the total amount of material excavated in the Central Division was 1,336,366 cubic yards, of which 259,147 cubic yards were classified as earth, and 1,077,219 cubic yards as rock. Of the total, 1,335,590 cubic yards were removed by steamshovels, and 776 cubic yards by hand.

The high record for the month was made by shovel No. 207, working 26 days in the Culebra district, which excavated 58,412 cubic yards of earth.

The second best record for the month was made by shovel No. 208, working 24 days in the Culebra district, which excavated 53,822 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 26 days in the Culebra district, which excavated 50,561 cubic yards of earth.

Shovel No. 207, working in the Culebra district, made a high record for one day by excavating 3,211 cubic yards of earth on July 18.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best record for the month and for one day are shown in the following table:

BEST RECORDS FOR THE MONTH.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 90 per cent completed, 203,895 cubic yards, out of a total of 225,000, having been placed at the close of work on August 3. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.

SOCIAL LIFE OF THE ZONE.

Woman's Clubs, Fraternal Orders, Etc.

The Empire Woman's Club will hold an exhibit of the art collection of the Canal Zone Federation of Woman's Clubs at the Commission clubhouse on Thursday afternoon, August 29. The members of the Ancon Study Club will be its guests on that date.

A girls' sunshine society has been organized at Empire, with 22 members between the ages of 12 and 16. The society has four officers and a director. The meetings are held in the Commission chapel every Monday evening. They consist of a short prayer meeting, followed by a business meeting. Once a month a "sociable" is held, when the girls entertain their friends. The money of the society is forwarded to the national headquarters in New York to be used for the work among the blind babies.

There was an unusually large attendance at the meeting of the Grand International Auxiliary, the women's branch of the order of the Brotherhood of Locomotive Engineers, on Friday afternoon, July 26. Following the business meeting, which was held in the lodge hall at Las Cascadas, the members adjourned to the home of Mrs. Hutton, who entertained with cards. Refreshments were served.

The masonic order of the Knights Templar, Canal Zone Commandery, N. D., was organized at Las Cascadas in July, with 60 members. F. W. Walraven is the eminent commander.

The order of Pythian Sisters holds its meetings at Las Cascadas on the first and third Thursday afternoons in each month. The order is growing steadily, new members being added at each meeting.

The members of the ladies' auxiliary, Panama Lodge, No. 1, United Spanish War Veterans, are invited to attend the meeting to be held in the Empire lodge hall on Sunday, August 11, at 3 p. m. At this meeting, members badges will be distributed, and printed copies of the rules and regulations of the order will be given out.

Church Notes.

The Rev. William H. Decker of Empire will sail for New York on the *Advance*, on August 27, for two months' leave of absence. At the expiration of this period he will resign from the work on the Isthmus and enter upon his duties as priest in charge of the Episcopal church at the Isle of Pines, under the Bishop of Cuba. This post was made vacant by the recent death of the Rev. Thomas Bury. The mission consists of the church at Santa Fé, with several smaller missions in the outlying districts. Its members are American families who are engaged in fruit growing on the island. Mr. Decker has been in charge of the Episcopal work at Empire, together with the missions at Las Cascadas, Bas Obispo, and Gorgona, for the past three and one-half years. During his pastorate, he has baptized 800 children, and presented 250 candidates for confirmation.

The Ladies' Aid Society, in connection with the Empire Christian League, is arranging to hold a missionary convention at Empire on Friday, October 25. This will be the first convention of women engaged in Christian work to be held in the Canal Zone, and it is planned for the purpose of promoting a missionary spirit among the women, and of broadening the knowledge of the work that is being carried on by Christian churches in all lands. Especial emphasis will be laid on the method and need of teaching missionary work in the Sunday schools. The organizations that will be asked to participate in this congress are: The Ladies' Aid Society of the Cristobal Union Church, the Woman's Altar Guild of Christ Church, Colon, the Ladies' Aid of the Union church and the Woman's Altar Guild of Gatun, the Woman's Altar Guild of St. Mary's Church, Empire, the Woman's Foreign Missionary Society of the Methodist Episcopal Church, Panama, and the Woman's Altar Guild of St. Luke's Hospital chapel, Ancon. These societies have among their members women residing in Culebra, Gorgona, Paraiso, Pedro Miguel, Las Cascadas, and Corozal, with a total membership of approximately 150.

The Woman's Altar Society of St. Ferdinand's Church, Empire, held a card party and entertainment at the parish house on Saturday evening, July 20. The rooms were decorated with palms and potted plants, and hung with flags and bunting. In the social hall, on the ground floor there were five card tables. The prizes given were two silk umbrellas, a Wedgwood candlestick, gold cuff links, a piece of embroidered linen, and a Chinese ash tray. Refreshments were served in the large hall in the basement of the building. During the intermission, a musical program was carried out by Mrs. Lewis, Miss Smith, and Mr. Dohrmann. The entertainment netted over $75. The altar society is making arrangements to hold a bazaar for the sale of fancy work in December.

Preaching services are held in the recreation hall at Camp Otis every Tuesday evening, the usual attendance ranging from 250 to 300. The Commission chaplains, Rev. Carl H. Elliott of Cristobal, the Rev. A. A. Nellis of Empire and Culebra, and the Rev. H. O. Purdy of Gatun alternate in presiding at the services.

Bishop Homer C. Stuntz of the Methodist Episcopal Church, has been elected to the charge of the work of the church in South America, which includes the district of Panama. It is expected that the bishop will pay his first visit to the church here in December of this year.

The semiannual meeting of the officers of the Cristobal Union Church was held in the chapel at the close of the evening service on Sunday evening, July 21. Dr. Claude C. Pierce, the president of the executive council, presided. The reports showed that the church services have been well attended, and that interest in the Sunday school has been maintained. Under the jurisdiction of the executive council, social service extension has been a feature of the church work. This includes a class in English for Chinamen, which has an enrollment of 20, a handicraft club for boys, which meets two evenings in each week for elementary instruction in woodwork, having 15 members, while a third activity is a club of 10 girls for outdoor and indoor sports and exercises, modeled after the camp fire girls in the United States.

Fatal Accident in Culebra Cut.

James Hunt, check No. 137600, and Cecil Goring, check No. 136316, Barbadian laborers, working in Culebra Cut, were killed on July 30 by a falling rock. In the same accident, Edwin E. Burke, a Jamaican laborer, received a fractured skull and was sent to Ancon Hospital. The men were working on a berm of the Canal about 40 feet from the bottom of Gold Hill, and the rock, evidently loosened by a heavy rain previous to the accident, fell in the midst of the men.

Alterations to Hotel Tivoli.

Extensive alterations will be made to the lower front veranda of the Hotel Tivoli. The wall of the building on the dining room side will be removed, and pillars substituted. The veranda will be widened 13 feet, making its total width after enlargement 23 feet. The pillars will give it the effect of being a part of the dining room, and it will be so used when found convenient. The veranda on the right side of the porte cochére will likewise be widened to 23 feet, in order to give the entire lower front a symmetrical appearance, but the wall between it and the ballroom will probably be allowed to remain as it is. The added space, however, will provide greater comfort for the hotel guests. A rearrangement will be made also in the office. The manager's private office will be enlarged, taking up some of the space now used for general purposes; additional counter space will be provided, although within the same limits as at present, and it will be so arranged that not only can the clerks work to better advantage, but they will be able to obtain an improved view of the lobby.

PERSONAL.

Maj. Chester Harding sailed for the United States on the steamer *Ancon* on Tuesday, August 6, on his annual leave of absence.

Mr. J. W. Sneed, superintendent of construction in the Chagres district has resigned, effective August 19. He will engage in the promotion of an engineering and construction company, with headquarters on the Isthmus.

Dismantling Mixer Plant.

The auxiliary mixing plant in the east side wall of the upper level of Miraflores Locks, using two 2-cubic yard mixers, electrically driven, is being dismantled. One of the mixers had previously been transferred to a similar plant set in the east wall of the lower level; the other will be retained. The heavy masonry work for the walls of the upper lock is practically completed, with the exception of the gap in the east side wall, occupied by the auxiliary mixing plant. Filling this will require about a thousand yards of concrete, which will be furnished by narrow-gage trains from the plant in the lower lock, and placed by the one chamber crane which remains on the upper level. The crane will also be used for handling the filling of earth and screenings to be placed in part of the center wall.

Pacific Division Sand Service.

A report of sand cars loaded and shipped from Balboa during the month of July, follows:

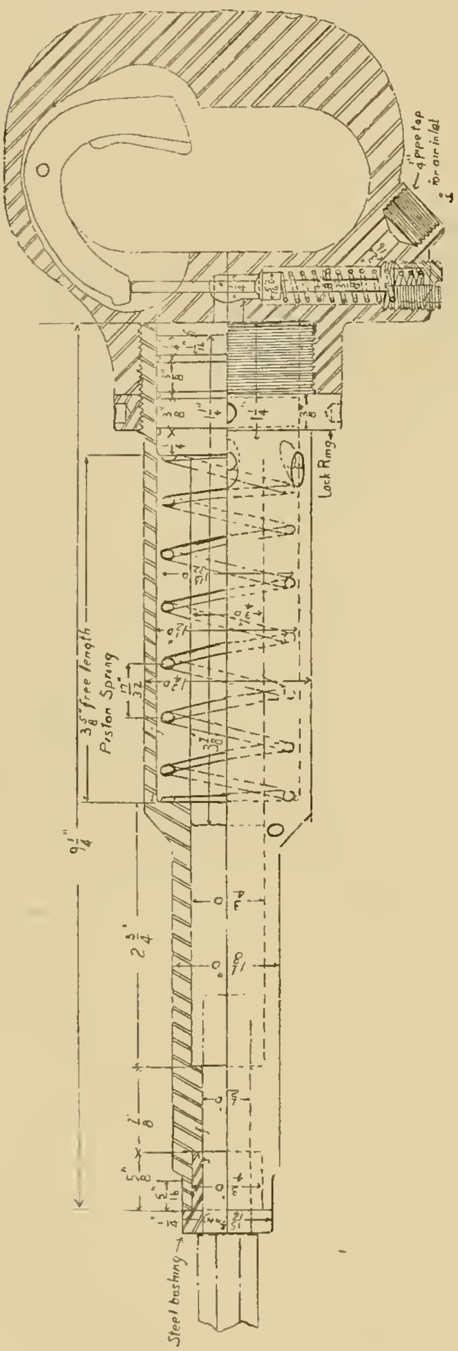
DESTINATION.	Number Cars.	Cubic Yards.
Pacific Division	2,707	47,213
Atlantic Division	26	522
Central Division	31	465
Fortifications	*87	2,931
Quartermaster's Department	3	75
Civil Administration	1	25
Lighthouse division	3	61
Balboa terminal	3	53
Miscellaneous	5	125
Total	*2.866	51,470

*Including two barge loads.

PNEUMATIC HAMMER.

Description of Practical Invention of Canal Commission Employe.

The "Panama" pneumatic hammer, designed and manufactured at the Empire shops, has given uniform satisfaction in use on various parts of the Canal work and is believed to be superior in several respects to the hammers heretofore supplied. It excels in speed and simplicity. Under the standardized air pressure of from 80 to 100 pounds to the square inch it delivers 3,500 blows per minute, while the other hammers tested under similar conditions delivered a maximum of 2,200 blows per minute. The "Panama" hammer is made up of 11 parts, exclusive of the tool. Other hammers average about 23 parts.



"PANAMA" PNEUMATIC HAMMER.

A longitudinal section of the hammer, or "gun," is shown in the accompanying diagram. Connection with the air hose is made on the under side of the handle, through a ¼-inch pipe thread. Passing from the connection through a hole 3-16-inch in diameter, the air is regulated by a form of bevel seated valve. This valve is kept closed when the hammer is not in use by a spring pressing up against its base. The operation of the valve is controlled by the trigger in the upper part of the handle. When the hammer is gripped for use, the pressure of the fingers draws one end of the pivoted trigger back into a recess in the handle, and the other end of the trigger is forced down upon the upper end of the valve stem, opening the valve. The air enters a chamber behind the piston by which the tool is actuated. The piston is forced forward against the resistance of the piston spring, striking the tool, and causing it to move forward and do its work. As the piston nears the end of its stroke, its head passes the exhaust holes. Instantly the pressure in the piston chamber is reduced to that of the atmosphere, and the compressed piston spring causes the piston to fly back to original position, closing the exhaust. The air pressure immediately forces the piston forward again and the strokes are thus repeated in rapid succession.

The parts of the hammer, named in order from the tool end, are the bushing, the barrel, piston spring, piston, lock ring, valve, valve spring, screw plug, handle, trigger, and trigger fulcrum pin. The free length of the piston spring is 3⅝ inches, and the length of the piston travel is about 2 inches. The length of the hammer, exclusive of the tool, is 12¾ inches, and its weight is 5½ pounds. It is made entirely of steel and finished all over. It is the invention of Mr. Fitz James Lewis of Empire, who has applied for a patent on it.

Canal Zone School Year.

A summary of the work of the public schools of the Canal Zone during the seventh year of their existence, which closed on June 28, and of the Canal Zone High school is, as follows:

Twenty-four schools were opened at the beginning of the school term on October 1, 1911, with an enrollment of 2,105 children, 1,174 in the 10 white, and 931 in the 14 colored schools. The highest enrollment during any one month was in June, 1912, when 1,556 pupils were enrolled in the white schools, and 1,765 in the colored schools. The total enrollment for the school year was 3,321 pupils, of which number 1,556 attended the white schools, and 1,765 the colored schools. New buildings were erected, or old buildings converted for school purposes, as follows: Mandinga, one room, Ancon, four rooms; Miraflores, one room; and Cucaracha, one room, all for colored children, while the schoolbuilding at Tabernilla for white children was reerected at Mount Hope for colored children. An addition of one room was made to the schoolbuilding at Pedro Miguel for white children. The attendance for the year was the highest in the history of the Canal Zone schools.

The number of buildings used by the Division of Schools for school purposes on June 30, 1912, was 26, eleven schools for white children and 15 for colored children. Twenty-three of these are buildings especially constructed or converted for school purposes, while of the three remaining schools, one for white children was conducted in a room of the Las Cascadas hotel building, and another in a room in building No. 52 at Porto Bello, while the school at Majagual was maintained in the native church building.

The system of medical inspection of children in the schools, begun in 1911, was continued during the year, and the result of this service is set forth in THE CANAL RECORD of July 10, 1912.

A school garden was maintained in connection with the colored school at Empire, and the value of the products grown, which were given to the pupils, is estimated at $218.64.

A tuition fee of $4, United States currency, per month in the graded schools, and $8, United States currency, per month in high schools, is charged for all pupils attending the Canal Zone schools whose parents are nonresidents of the Zone, and are not employed by the Isthmian Canal Commission or the Panama Railroad Company. During the year, the sum of $694 was collected in tuition fees, as compared with $576 derived from the same source during the preceding fiscal year.

In addition to the graded schools, a fully equipped high school was maintained at Gatun, with a total enrollment during the year of 38 pupils, while at Ancon a branch high school, embracing the two lower grades was conducted with an enrollment of 18 pupils.

The following five pupils were graduated from the High school on June 30: Miss Ruth Hackenberg of Gorgona, Miss Edith Stevens of Gorgona, Miss Myrtle Lindersmith of Cristobal, Miss Catherine C. Francis of Empire, and Miss Helen Michaels of Empire.

As an incentive for the attainment of high scholastics, prizes were offered by individuals interested in the schools, and awarded, as follows:

1. To the High school pupil submitting for publication in *The Zonian*, the High school paper, the best contribution, $5. Won by John C. Loulan of Gatun.
2. To the High school pupil procuring the best general average during the school year, $5 gold. Won by Miss Catherine C. Francis of Empire.
3. To the pupil in the grammar school grades (white) procuring the best general average for the school year, $5 gold. Won by Myron Weaver of Cristobal.
4. To the pupil in the colored, or native schools, procuring the best general average during the school year, $5 gold. Won by Pancho Betancu of Empire.

Prizes of $2.50 gold each for the next best contributions to the June issue of *The Zonian*, were won by Miss Ruth Hanna of Gatun, with a poem, and Miss Helen Michaels, of Empire, with a child story.

Obituary.

Charles F. Locks, an employe of the Mechanical Division at Gorgona, dropped dead from heart failure while at his work in the Gorgona machine shop on August 2. He was 36 years of age, married, and had been on the Isthmus nearly three years, coming here from Vilas, Pa. He is survived by his wife, who lives at Gorgona.

Local No. 677, I. B. E. W.

On August 11, at 2.30 p. m., there will be a business meeting of Local No. 677, I. B. E. W., at Gatun, following which there will be a "smoker." All members are requested to be present, and all electrical workers in the Zone are invited to attend.

H. V. HOWARD, *Acting Secretary.*
Gatun, C. Z., August 2, 1912.

CRISTOBAL DOCKS.

Extension of Breakwater Authorized—Progress on Foundations.

In the plans for the permanent terminal docks at Cristobal, provision was made for two docks and five piers in connection with a breakwater. It was contemplated that present requirements only called for the construction of two docks and one pier, or about 3,500 lineal feet of dock front, and work on this part of the project has been in progress since July, 1911. The plans called for the construction of a breakwater 2,000 feet long, and authority has recently been granted by the Chairman and Chief Engineer for the extention of this breakwater 1,200 feet, which will bring its total length to 3,200 feet. The extension is made primarily for the purpose of affording additional protection to the end of Pier 17 in periods of rough weather, and it will also serve as a means of connection with the other piers when it becomes necessary to build them at some future time. The extension of the breakwater can be accomplished more economically now than when the present work is completed and the organization disbanded. There is plenty of suitable material still available in the borrow pits which have been opened up east of the Cristobal railroad yard.

The sinking of the 4-foot steel caissons on Dock 16, and the filling of these cylinders with concrete, is approximately complete, and the two back walls along the face of this dock are also practically finished. The inner wall is three feet wide, rests on a solid concrete base five feet wide, and is surmounted by a parapet 1½ feet wide. Supports, or haunches, of reinforced concrete stand out from this wall at regular intervals to aid in the support of the heavy iron floor beams, which rest on the wall. Here, as well as in other parts of the docks, Chagres River gravel has been substituted for crushed rock in the making of concrete. The outer wall, which is separated from the inner wall by a distance of 12 feet, differs somewhat in construction. A concrete base was made and upon this, spaced at set intervals, have been placed large concrete blocks, formerly used in the protection of the Cristobal sea front. All of these blocks have now been put to use. Many of them, including a number of those made during the French times, were dumped on the outside of the sea wall in front of the new Hotel Washington, and others have been used along the sea front of the mole at the terminal docks.

Over 400 steel cylinders have been sunk on the site of the docks to date. They are all in place on Dock 16, practically all on the mole, and about 50 per cent of them on Dock 17. The depth which it has been found necessary to sink them to reach bed rock varies from 60 to 80 feet, and the length of the cylinders, when bolted together, ranges from 70 to 90 feet. The floor of the rock lies at different angles, hence, it occasionally happens that in sinking the caisson, one part of the edge will reach rock, and the remainder will still be in soft material. This is remedied by sinking the cylinder until it rests on solid rock all around. The cylinders are placed in position by locomotive cranes, and driven by steam hammers, of which there are two used on the work. These machines are operated by steam supplied from the boiler of locomotive cranes, and have been modified to meet the special requirements of this work. The buffer, or cap, which sets on the top of the cylinder while the hammer is working, has been made an integral part of the equipment, and the whole is handled as one piece. As soon as the complete cylinder is in position, the water is pumped out with Nye pumps, having a capacity of about 250 gallons per minute, five of which, in two sizes, are in use on the work. This operation usually takes about 15 minutes. The next step is to remove the material from the inside of the cylinder, and this is done by the bucket method, one man at a time working inside of the caisson. In some places over the area covered by the docks considerable coral rock was encountered; in others, the material consisted mostly of mud. As the caisson is practically watertight, the mud is hard and compact and easy to excavate by hand digging, compared with the excavation for the piers of the Panama railroad lumber dock at Balboa, where the material was excessively soft and hard to handle. The first step in concreting is to seal the lower section of the cylinder to the rock. This is accomplished by lowering concrete in a bucket, containing perhaps one-eighth of a cubic yard. The bucket is fitted with a valve in the bottom, which is operated by a cord from above. This allows the concrete to flow out and settle uniformly around the rim of the cylinder. After this sets, concrete is poured in until the top is reached. At the present time, the method is employed of constructing a small, square concrete column, built up in the center of the cylinder upon which to carry temporarily the steel I-beams, or floor girders. Later, the tops of the caissons will be filled up by means of steel forms, so that the concrete can all be bonded together, including the I-beams, the haunches, and the reinforcing rods. These forms, 12 in number, were built at the Gorgona shops. The reinforcement of the concrete in the cylinders consists of 70-pound rail, four in each.

About 30 per cent of the steel floor system was in place on Dock 16 on August 2, and the work will be continued steadily from now on. No concrete has been placed in the cylinders on the mole to date. The 3-foot cylinders, which will form the foundation for the small boat landing, are ready for driving, and this work will be started shortly. The last trestle forming the false work on the west side of Pier 17 has been begun. No concrete has been placed in the cylinders on this pier.

The estimate for dredging the slip between Dock 16 and Dock 17 amounts to 310,000 cubic yards. The dipper dredge *Mindi* had taken out to the first of the month about 72,000 cubic yards, or 23 per cent.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending August 3:

DATE.	Hours worked.	Cubic Yards.
July 29	8.10	3,067
July 30	8.05	2,719
July 31	7.40	2,861
August 1	7.30	2,430
August 2	8.20	3,129
August 3	8.20	2,854
Total	48.05	17,060

Missing Man.

Any one having information regarding the present address of Mr. Harvey Dodd, American, formerly with the Subsistence Department, later with an attorney in Colon, is requested to communicate with the superintendent of construction, Chagres district, Bas Obispo, C. Z.

Bachelor Accommodations at Corozal.

On account of the larger number of men working in the Pacific Division for the Isthmian Canal Commission and the McClintic-Marshall Company, bachelor quarters at Corozal have recently been increased by accommodations for 112 men in the building formerly used as the lodge hall at Culebra, a remodeled French house, and one type-18 house. The capacity of the Commission hotel is being enlarged by the removal of a partition at the north end of the dining hall. This will increase the length of the hall by 40 feet, adding about a thousand square feet of floor space, in which ten tables, seating six each, will be placed. Twenty-six tables are now used in the hotel, and about 750 meals are served daily.

Fortune Island Laborers Returned.

The steamer *Advance*, which sailed from Cristobal on Saturday, August 3, will make a stop at Fortune Island on its way to New York, to land 25 Fortune Island laborers, the last from this locality in the employ of the Isthmian Canal Commission. The Fortune Islanders were among the first of the West Indian contract laborers to be recruited, and altogether 500 of them were brought to the Isthmus to work on the Canal and the Panama railroad. About 200 of this number left the service, or quit one job and took another under a different name, leaving about 300, all of whom have now been repatriated. Experience has shown that the negroes from Fortune Island are outranked by those from a number of other West Indian islands, so far as efficiency is concerned.

Colon Residence Erected by Commission Force.

A force of the Constructing Quartermaster is engaged in the erection of a residence for Mr. Porfirio Melendez, a former governor of the province of Colon, on lots 8 and 9, block 3, Third street, Colon. Mr. Melendez formerly resided at Bohio, and his house there, a two-story frame structure, was the largest in the settlement. With the filling of Gatun Lake, it became necessary to vacate the site, and an agreement was reached whereby the Canal Commission undertook to erect and furnish the material for a new house for him in the city of Colon. The house will be a two-story frame building, 35½ by 55 feet in size, and will contain 10 rooms, including office, kitchen, and servants' quarters.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examinations for pilots, mates, masters, and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on August 14. All applicants for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms of application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8 a. m., on August 14, with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability properly to operate an automobile, and must have the automobile with them.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Mr. H. N. Sollenberger, who has been secretary at Porto Bello, has accepted a position as physical director of the Y. M. C. A. at Bogalusa, Louisiana. He left for his new field on Thursday, August 1. Mr. C. B. Russell has been appointed acting secretary of the Porto Bello clubhouse.

Mr. W. T. Compton, a graduate of Ohio Wesleyan University, has been engaged as special secretary for a few months during vacation season.

A moving picture film showing views of the steamship *Titanic* as the vessel left the dock on its initial trip was shown at the clubhouses during the week.

CULEBRA.

A six-team bowling tournament has been organized, and will open on Monday evening, August 5. It will continue for five weeks. Games are scheduled to be played on Mondays, Wednesdays, and Fridays.

The volleyball tournament will close on Tuesday night, when the "Blues" will play the "Reds" On Tuesday, July 30, the "Whites" played the "Reds," resulting in a score of 5 to 0 in favor of the "Reds." On Friday evening, the "Whites" played the "Blues," resulting in a score of 3 to 2 in favor of the "Whites." The closing games will decide the championship of the league. Each man on the winning team will receive a sweater as a prize.

The standing of the teams on Monday, August 5, is, as follows:

	Won.	*Lost.*	*P. C.*
Reds	16	9	.640
Blues	14	11	.560
Whites	10	20	.333

A basketball tournament is being organized.

John Leonard of the boys' department made a high score of 107 in duckpins last week.

EMPIRE.

The local tenpin bowling league tournament ended in favor of the Independent team, which won 16 out of 24 games. The other teams have three games to bowl before the final results are known.

There will be no bowling for about two weeks as the alleys are closed for repairs. New tenpin balls have been ordered from the United States.

The August pool tournament will start on Monday, August 12. All wishing to enter are requested to register before that time.

The standing of the local basketball league is as follows:

	Won.	*Lost.*	*P. C.*
English	2	1	.750
Americans	1	1	.500
Germans	1	2	.250

Games will be played Monday, August 5, and Thursday, August 8.

GORGONA.

Gorgona won two out of three games from the Cristobal bowling team on Saturday, August 3. The scores follow:

Cristobal				Gorgona.			
Gibson	118	163	167	Sims	194	141	170
Wurdeman	149	146	121	Bentley	136	116	156
Humphrey	142	146	133	King	204	178	161
Rosteck	177	116	127	Haldeman	156	125	138
Barrett	160	198	137	Davis	154	186	176
Total	746	769	685		844	746	801

The following high scores were rolled on the local alleys during the week: Bigpins—Gebherd, 224, Davis, 200, 204, 200, 224, 210; Lowe, 200; Roper, 202, 200; Sims, 206, 200; King, 214.

Duckpins—Arnold, 111; Sims, 109, 102, 115; Ruchte, 104; Davis, 100; Simka, 100; Burmeister, 107; Seeht, 104, 103, 100; King, 102.

A local bigpin tournament will start on Monday, August 5, with five 4-men teams.

The Culebra chess club defeated the local players on August 3, by the score of 10 to 2. The individual records were:

Gorgona.	Won.	Lost.	Culebra.	Won.	Lost.
Strong	1	1	Dubois	1	1
Morehead	1	1	Bartlett	2	0
Flam		2	Brown	2	
Byrne		2	Connor	1	1
Nagel		2	Minner	2	
Taylor		2	Warner	2	

GATUN.

At the one-night checker tournament held on Saturday evening, August 3, F. L. Bernsee of Cristobal, the champion checker player of the Isthmus played nineteen local men simultaneously. Seventy-two games were played. F. D. Gartrell, president of the local club, won three games out of the five he played with Mr. Bernsee; R. E. Chatfield is credited with two draws; J. Scott, one draw, and B. Clearwater one draw. Mr. Bernsee's record, therefore, for the evening was: Won 65 games; drew 4, and lost three. The men who played Mr. Bernsee were Dr. Kalloch, R. Robertson, Dr. Dunn, F. D. Gartrell, J. Scott, R. E. Chatfield, G. J. McFarland, W. J. West, T. Smith, G. N. Kane, . O'Neil, B. Clearwater, F. G. Smith J. A. Vance, H. Stall, C. Ourand, F. M. Noble, P. J. Claherty, T. H. Dickson.

Mr. P. Brunner will continue to take charge of the gymnasium classes until the new physical director arrives.

Two nights each week will be devoted to basketball practice. From the present outlook Gatun will have an unusually strong team for the Isthmian tournament.

The local tenpin tournament is now under way with ten teams entered, each of which is named after a state

G. A. Barte won first prize for three high games in tenpins for the month of July. P. J. Claherty won the prize for three high games in duckpins.

CRISTOBAL.

The next moving picture show will be held on Saturday night, August 10.

During the past week a schedule was made for the tri-team basketball league beginning Tuesday night, August 6. Messrs Schlager, Howe, and Johnson were chosen captains by the players, the teams being named the "Schlagerites," "Howeites," and "Johnsonites," respectively. The league will consist of a series of six games played by each team. The schedule follows:

Tuesday, Aug. 6, Howeites vs. Johnsonites.
Thursday, Aug. 8, Schlagerites vs. Johnsonites.
Tuesday, Aug. 13, Howeites vs. Schlagerites.
Thursday, Aug. 15, Johnsonites vs. Howeites.
Tuesday, Aug. 20, Schlagerites vs. Johnsonites.
Thursday, Aug. 22, Howeites vs. Schlagerites.
Tuesday, Aug. 27, Johnsonites vs. Howeites.
Thursday, Aug. 29, Schlagerites vs. Johnsonites.
Tuesday, Sept. 3, Howeites vs. Schlagerites.

Gatun defeated the Cristobal bowlers at Cristobal on Saturday evening, August 3, by the following scores:

Cristobal	776	757	787	Gatun	881	809	919

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending August 14, 1912, (75th meridian time):

DATE.	High	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.	P.M.
August 8	......	4.34	10.42	5.22	11.25
August 9	......	5.47	11.53	6.28	......
August 10	12.38	6.57	1.04	7.33	......

Supplies for Canal Work.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Balboa, Cristobal, and Colon, during the week ending August 3:

Tivives, July 28, from New York, with 762 pieces steel rail, 83 bundles scoops, seven cases paint, 15 cases zinc, 30 barrels rosin, 12 cases wire, 930 bundles iron pipe, 1,095 pieces iron pipe, 800 kegs bolts, for stock; nine cases electrical material, for Atlantic Division; 28 reels cable, 21 cases machinery, for superintendent of erection; 163 pieces car couplers, four cases electrical material, for Mechanical Division.

Clyde, July 28, from New York, with 98 pieces steel angles, for Panama Railroad Company.

Pennsylvania, July 29, from San Francisco, with 143 pieces pine lumber, for stock.

Advance, July 30, from New York, with 10 kegs nails, 205 kegs bolts, 36 reels wire rope, 68 cases caustic soda, 20 cases brushes, 10 cases files, for stock; 24 barrels insulators, for superintendent of erection; and a miscellaneous cargo, the whole consisting of 480 packages, weighing 115 tons.

Prinz Sigismund, July 30, from New York, with 220 pieces steel bolts, for Atlantic Division; 16 cases fuse, for stock.

Zocapa, July 31, from New York, with 25 bales rubber hose, 380 pieces steel rail, for stock; 165 reels steel rope, for superintendent of erection.

Abangarez, August 1, from New Orleans, with 39 pieces white oak lumber, for Pacific Division; 2,282 pieces white oak lumber, 3,651 pieces yellow pine lumber, for Mechanical Divison; 136 pieces piling, 511 bags feed, 3,201 pieces sewer pipe, 300 barrels fire brick, 24 pieces dipper teeth, 3,278 pieces lumber, for stock; 183 cases limit switches, 395 bundles castings, for superintendent of erection.

Rainfall from July 1 to 31, 1912, Inclusive.

WEATHER CONDITIONS, CANAL ZONE, JULY, 1912.

Normal conditions of rainfall, cloudiness, and relative humidity prevailed during the month of July.

The rainfall was well distributed over the Isthmus, but heaviest on the Atlantic Coast. Heavy general rains occurred around the 16th, 17th, and 30th of the month. The maximum precipitation recorded during 24 consecutive hours was 6.15 inches at Brazos Brook on the 16th and 17th. Monthly totals ranged from 8.37 inches at Miraflores to 24.21 inches at Porto Bello.

Monthly mean temperatures were nearly one degree above the July averages for past years, while the average hourly wind movement was slightly above normal at each station. During a wind squall at Culebra, on the 30th the wind attained a maximum velocity of 36 miles an hour from the northeast.

There was a notable decrease in night fogginess compared with June conditions. Of the fogs observed, 54 per cent were dissipated by 6.30 a. m., 84 per cent by 7.30 a. m., and 98 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month.

OFFICIAL CIRCULARS.

Shop Expense Percentage.

CULEBRA, C. Z., August 5, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

In accordance with the provisions of Circular No. 169-E the following shop expense percentage for each shop is hereby fixed, effective August 1, 1912, and will be applied until further orders, to the distributed labor used in all shop work, in accordance with the provisions of Circular No. 264-A, viz.;

DIVISION OR SHOP.	Shop expense percentum.
Mechanical Division	40
Drydock shop	40
Balboa shop	50
Porto Bello	50
Toro Point shop	45
Panama railroad shop	30

Circular letter from this office dated May 3, 1912, is revoked.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Estimates for Fiscal Year Ending June 30, 1914.

CULEBRA, C. Z., August 1, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

1. The detailed estimates of all departments and divisions for the fiscal year ending June 30, 1914, for submission to Congress, will be forwarded to me not later than August 27, 1912, in sextuplicate, except that the divisions of the Department of Construction and Engineering may submit their estimates in quadruplicate. They must be prepared and submitted in accordance with section 5 of the Act of Congress approved June 25, 1910, reading, as follows:

> "Section 5. Hereafter there shall be submitted under each item of appropriation, proposed in the annual estimates for construction of the Isthmian Canal, notes giving in parallel columns information which will show the number, by grade or classes, officers, employes, and skilled and unskilled laborers proposed to be paid under each of said appropriations for the ensuing fiscal year and those being paid at the close of the fiscal year next preceding the period when said estimates are prepared and submitted; also, in connection with each item for material and miscellaneous purposes, other than salaries or pay for personal services, the amounts actually expended or obligated for like purposes during the entire fiscal year next preceding the preparation and submission of said estimates."

2. The estimates for salaries and wages of officers and employes and skilled and unskilled labor will be prepared on form C. E. 279-2.

The estimates for material, supplies, plant and equipment to be purchased under item 5 will be prepared on form C. E. 280-2.

The estimates for item 2 "Incidental expenses in the United States," item 9, miscellaneous material for the Department of Civil Administration and Law, and item 12, miscellaneous material for the Department of Sanitation, will be typewritten on blank paper the same size as forms mentioned above, in the same manner in which the details are printed on pages 4, 49, and 59 of the book of estimates for the Isthmian Canal for 1913.

3. Estimates for officers and employes, items 1, 3, 7, and 10:

The estimates for salaries of officers and employes in the United States (covered by item 1,) of the departments of Quartermaster's, Subsistence, Disbursements, and Examination of Accounts (all covered by item 3,) Civil Administration and Law (covered by item 7,) and Sanitation(covered by item 10,) shall be prepared in accordance with the form as printed in the book of estimates of the Isthmian Canal for 1913.

The estimates for officers and employes for the several divisions of the Department of Construction and Engineering (covered by item 3,) shall be prepared along the lines and arranged in the order as printed on pages 7 to 12 of the estimates for 1913.

4. Estimates for skilled and unskilled labor, items 4, 8 and 11:

The estimates submitted by each department or division for skilled and unskilled labor should be arranged in one alphabetical list in conformity with the method adopted in the estimates for 1913. In fixing the annual rate for hourly men the table printed in Circular 451 must be followed. Where a designation carries more than one rate of pay, for example: Blacksmith at $1,872 each, will be followed by blacksmiths at $1,800, each, and so on to the lowest rate of pay.

5. Under "Approved organization as of June, 1912," you must set forth your approved organization of that date, and, in making your estimate for the fiscal year ending June 30, 1914, you should take as a basis your authorized organization for the present fiscal year, making such changes as you consider necessary on account of anticipated requirements of the work. Your estimate should include only designations and rates of pay authorized by Circulars 229 and 299 revised to date, unless a different class of work is to be undertaken. In such case you should give a concise statement of the reasons for the change on a separate paper attached to the estimate.

6. If an increase in any item is submitted, either in number of employes or rate of pay, concise reasons for the increase must immediately follow the item or group of items affected.

Under each appropriation item for salaries and wages, that is, under your estimate for officers and employes and for skilled and unskilled labor, a statement of increases and decreases must be submitted on separate sheets the same size as the form used under the following headings:

Designation and rate of pay.	Increase.		Decrease.		Amount.	
	Men No.	Salary Am't.	Men No.	Salary Am't.	Increase	Decrease

7. Each sheet must be totaled separately, both as to number of men and amount. Where more than one sheet is used for the estimate the totals of each sheet will be carried to a summary statement on a separate sheet.

8. Overtime and longevity will be estimated ior separately as lump sum items, and the comparison will be with the actual overtime and longevity for the fiscal year ending June 30, 1912. These items will be added after the totals on the summary statement.

9. There will be deducted from the total footings for each appropriation item the estimated charges against other departments and divisions and for work done for employes. This item will be compared with the actual similar charges for the fiscal year ending June 30, 1912.

10. Estimates for material, supplies, plant, and equipment, item No. 5:

(*a*) The comparison opposite each item of material, etc., estimated for 1914, will be made with the amounts actually expended or obligated for like purposes during the fiscal year ending June 30, 1912. A statement of the reasons for any differences must be given. Any large items must be itemized and the necessity for the same must be explained on a separate statement. These estimates will be consolidated by the Chief Quartermaster, and you should consult him as to the exact form in whichth is estimate is to be submitted if it is not understood.

(*b*) *Cost of inspection of material and paying traveling expenses incident thereto:*

Each office in the United States will submit through the Washington office an estimate on form used for other items of salaries and wages to cover these items for the fiscal year 1914, in general accord with the instructions given under paragraph 3. These estimates will be revised, if necessary, by the Assistant Chief Engineer who will prepare an additional estimate on the same lines covering expenses on the Isthmus, except for such items as are under the Chief Quartermaster, who will submit an estimate for similar items under his jurisdiction.

11. The estimate submitted by each department or division will cover the total number of employes which such department or division will employ and the total amount of material and supplies to be used. In order that the estimates may be properly consolidated and deductions made for the value of work done by other departments estimated for under separate appropriations, and for work done for and material sold to employes, the Panama Railroad Company, Canal Zone Government, and outside parties, a separate statement in detail must be submitted showing for each department and division the amount of work it will bave done by other departments or divisions, the Panama Railroad Company, Canal Zone Government, employes, and outside parties.

12. Estimates relating to the funds of the Government of the Canal Zone:

In view of the provisions of section 6 of Bill H. R. 25069, as reported to the Senate, July 15, 1912, the Department of Civil Administration will submit an estimate as provided in that section which is substantially in accordance with section 5 quoted above.

13. All departments and divisions will, in addition to the consolidated estimate provided for above, submit, in quadruplicate, on form C. E. 279-2, an estimate by subdivisions of the work compared with the subdivisions in the approved organization of June 30, 1912. The total organization for each subdivision will be grouped together, headings only being used to show which are officers and employes under each subdivision, and which are skilled and unskilled labor. The subdivisions used will conform to the organization charts submitted for printing with annual report. The totals, both in designations of employes and amounts, must agree with the consolidated estimates for each department and division required above.

14. The consolidated regular estimates should be written in double space. The estimates under paragraph 13 should be single spaced, except that there should be a short space between each subdivision.

15. Except as specified under paragraph 9, the estimates will be consolidated in the office of the Examiner of Accounts who should be consulted if these instructions are not understood.

Any further information will be furnished upon request to this office.

Forms will be furnished as soon as received from the printer.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Member, Board of Local Inspectors.

CULEBRA, C. Z., August 1, 1912.

(Through Division Engineer, Atlantic Division.)

Mr. A. G. KITCHEN,
Drydock, Cristobal, C. Z.

Sir: Under authority conferred upon me by Executive Order of the President, No. 1131, dated October 2, 1909, you are hereby appointed a member of the Local Board of Inspectors to serve during the absence of Mr. C. J. Anderson on leave.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Monthly Schedule of I. C. C. Pay Car.

The following is the new monthly schedule of the I. C. C. pay car, effective August, 1912.

SCHEDULE FOR THE 12TH OF THE MONTH.

Leave Empire at 6 a. m.
Balboa dump, 7 a. m.
Balboa yard, 7.40 to 8.20 a. m.
Ancon crusher, 8.30 to 8.45 a. m.
Balboa terminal, 9 to 9.40 a. m.
Ancon dumps, 9.45 to 10 a. m.
Corozal, 10 to 10.20 a. m.
Miraflores dumps, 10.30 to 10.40 a. m.
Miraflores power house, 10.45 to 10.50 a. m.
Pedro Miguel, 10.55 a. m., to 12.50 p. m.
Miraflores, 12.55 to 1.10 p. m.
Miraflores Locks, east side, 1.15 to 2.20 p. m.
Miraflores Locks, west side, 2.25 to 3 p. m.

SCHEDULE FOR THE 13TH OF THE MONTH.

Leave Empire 6 a. m.
Culebra, 6.05 to 6.20 a. m.
Culebra to Rio Grande, 6.20 to 6.45 a. m.
Bridge 57½, 7 a. m.
Bridge 57½ through the "Cut" to Matachin, 10.30 a. m.
Bas Obispo, 10.40 a. m.
Las Cascadas, 10.50 to 11.50 a. m.
Gorgona, 12.05 to 12.55 p. m.
Gorgona shops, 1 to 2 p. m.
Empire, 2.30 p. m.

SCHEDULE FOR THE 14TH OF THE MONTH.

Leave Empire 5.30 a. m.
Gatun, 7.15 a. m., to 12.45 p. m.
Monte Lirio, 1.10 p. m.
New Frijoles, 1.25 p. m.
Caimito Junction to Gamboa, 1.40 to 2.40 p. m.

(Sgd.) EDWARD J. WILLIAMS,
Disbursing Officer.

Approved: GEO. W. GOETHALS.
Chairman and Chief Engineer.

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Pedro Miguel, C. Z., Sunday, August 11, 1912, at 4.30 p. m. The program follows:

Total construction cost, Pacific Division		$3,375,075.88			$26,125,146 02			$29,500,221.90	
76 Plant and equipment to be absorbed in construction costs after June 30, 1912								$2,211,073 05	
Total expenditures, Pacific Division								$31,711,294.95	
77 Lighting and buoying canal		$30,835.72			$119,392.82			$150,228 54	
Total expenditures, constr. and eng'nr'g.								$152,298,242.76	

Item 22—There has been deducted from amount shown under Fourth Quarter $37,293.10, adjustment of difference in cement stock in prior periods. The unit cost shown includes this amount.

Item No. 36—Central Division, Dredging Excavation Prism, Preliminary Surveys.

Item No. 38—Represents operation of cement gun used in facing walls of the Cut.

Item No. 41—Pacific Division Division, Dredging Excavation Prism. The total cost of dredging plant was absorbed with the accounts for the month of April ,1911.

Item No. 44—Pacific Division, Pedro Miguel Dam, dry filling. Quantities shown to March have been reduced 90,573 cubic yards to adjust errors in previous periods.

Item No. 54—Pacific Division, Miraflores West Dam, dry filling. Quantities shown to March 31, 1912, have been reduced 11,495 cubic yards to adjust errors in previous periods.

Item No. 55—Pacific Division, Miraflores Dam, hydraulic filling. Expenditures represent cost of pipe line, flumes, etc. 661,048 cubic yards have been deposited in the dams from dredges and hydraulic dredging in locks chambers and in prism below the locks. The total expenses therefor have been charged to excavation.

Item 71, 72 and 73—Pacific Division, Laboca Locks and Dams. This expense was incurred prior to the adoption of Miraflores as the site for the lower locks and dam at the Pacific entrance of the Canal.

Item 33, 39 and 76—The expenditures for the plant and equipment are absorbed in the construction costs on the basis of estimated cost of the plant and estimated quantities of work to be done. The amounts shown under these items represent the balances which are to be absorbed into construction costs after June 30, 1912.

General—When excavated material is used for filling, such as dams, back filling, etc., the costs of dumping only is charged to the item benefited, other expenses being charged to Excavation.

DAM CONSTRUCTION.

*Denotes credit.

The credit shown in June, under "Dumps"—Central Division, is due to credit for excess cost of dumping excavated material at Naos Island Breakwater from October 1908, to June 1912, inclusive, $95,347.25. Eliminating this credit, "Dumps" would show a cost of $0.0433 for June, and $0.0447 for the quarter and "Total Cost" for June would be $0.4916, and for the quarter $0.5005.

*Denotes Credit.

Note.—The production of crushed rock at Porto Bello ceased on April 30, 1912. Quantity shown in June is correction of amount reported in January. During May and June various charges and credits were made to the account for adjustments etc., hence averages shown for quarter do not agree with averages for April.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, AUGUST 14, 1912. No. 51.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Revised Estimate of Excavation.

The estimates of excavation remaining to be done after July 1, 1912, in order to complete the Canal, show an increase of 16,903,000 cubic yards over the estimate of July 1, 1911.

In the Atlantic Division, the increase is 295,000 cubic yards, chiefly to provide for silting in the finished channel not covered by the estimate of July 1, 1911.

In the Central Division, an increase of 4,615,000 cubic yards is made to provide for an extension of slides, and changes in the Obispo Diversion.

The Pacific Division has an increase of 11,993,000 cubic yards, of which 3,199,000 cubic yards are to cover excavation in the Canal prism, in the locks and dams, and silting in the finished channel, which has become necessary since the estimate of July 1, 1911. The remainder—8,794,000 cubic yards— is for the newly begun excavation for the drydock, coaling station, and terminal at Balboa.

Canal Work in July.

The grand total of Canal excavation to August 1 was 175,901,052 cubic yards, leaving to be excavated 36,325,948 cubic yards, or about one-sixth of the entire amount necessary for the completed Canal. This shows an increase over the amount reported to be remaining at the end of June. and is due to additions made to the total of Canal excavation as set forth in another place in this issue of THE CANAL RECORD.

The total excavation for July was 2,633,437 cubic yards, as compared with 2,518,982 cubic yards in July, 1911.

The dry excavation amounted to 1,584,540 cubic yards, and was principally by steam-shovels. The dredges removed 872.079 cubic yards from the Canal prism, and 89,618 cubic yards from the site of the Balboa terminal, in addition to the amount pumped into Gatun Dam by suction dredges, while 85,000 cubic yards were taken out south of Miraflores Locks by monitors. The progress on the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 584,173 cubic yards. Of this total, 19,605 cubic yards consisted of dry excavation near the Locks, and the remainder was wet excavation—495,398 cubic yards from the Atlantic entrance, and 69,170 cubic yards between the open water channel and the Locks.

The total excavation in the Central Division was 1,336,366 cubic yards, 1,329,510 cubic yards from the Culebra Cut section, 776 cubic yards from the Chagres section, and 6,080 cubic yards from the Obispo Diversion.

In the Pacific Division, the total excavation was 712,898 cubic yards, 307,511 cubic yards of which were "work" excavation taken out in the Pacific entrance, 2,200 cubic yards consisted of plant excavation removed from the entrance, 89,618 cubic yards represented material dredged from the inner harbor at Balboa, and 85,000 cubic yards monitor excavation south of Miraflores Locks. The total dry excavation aggregated 228,569 cubic yards, 152,555 from the prism south of Miraflores Locks, 67,070 from the terminal site, and 8,944 cubic yards at the locks, dams, and spillways.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

Total	2,631,237	2,200	2,633,437

Mean rainfall along Canal (ten stations), 10.92 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as a prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc., It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed such as prism, diversions, locks, etc.

DAM AND LOCK CONSTRUCTION.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*
Concrete laid in locks.	8,093	77,506	85,599
Concrete laid in dams and spillways	1,357	529	1,886
Fill placed in dams	315,868	53,970	369,838

Timber for Lock Gate Sills.

Greenheart timber from Demerara, a county in British Guiana, will be used for the miter sills of the lock gates. This timber, which combines to unusual extent the qualities of strength, durability and resistance to the attacks of the teredo and other marine borers, was adopted after comparison with white oak from the United States, iron bark wood from Australia, and other hard woods. A total of about 140,000 feet, board measure, will be used for all of the gates.

Lock Machinery Model at Culebra.

The lock machinery model, which was exhibited by the Isthmian Canal Commission at the International Navigation Congress, held in Philadelphia from May 23 to 28, 1912, has been returned to the Isthmus and placed in a screened enclosure under the Administration building at Culebra. A description of the model was published in THE CANAL RECORD for March 13, 1912. Electrical and hydraulic connections for the operation of the machinery have been made at Culebra and the apparatus will be exhibited to visitors. The model, which was constructed at Gorgona shops, attracted much interest at the navigation congress and afforded an easy explanation of the machinery especially designed for the operation of the locks.

Further Relocation of East Diversion Channel.

Further relocation of the east diversion of the Obispo River from the Canal has been necessitated by three slides opposite Empire, near the point at which the Las Cascadas plantation road crosses the Diversion in its approach to the suspension bridge. The new diversion channel will describe an arc subtended by the present straight channel and approximately bisected by the Las Cascadas plantation road, crossing under the road through a concrete culvert to be constructed for the passage of the Masambi River, one of the two principal tributaries to the Obispo on the east side of the Canal. It will be about 2,000 feet long and about 360 feet east of the present channel, or

NOTES OF PROGRESS.

(Continued.)

800 feet east of the axis of the Canal, at the crown of the arc. Trestle work, similar to that used in relocating the east diversion opposite the Whitehouse yards, will be required at both ends of the new section to prevent obstructing the present channel until the relocation is completed. A piledriver is engaged in the construction of the south trestle. At the northern end, the trestle is completed, and steamshovel No. 124 has begun excavation on the 30-foot channel, the largest cut in which will be about 26 feet deep. Approximately 35,000 cubic yards of earth excavation and 26,000 cubic yards of filling will be required.

Congestion of Quarters Around Pacific Works.

All available gold quarters at Ancon, East Balboa, and Corozal are occupied at the present time, and there is a large waiting list. Additional employes sent down by the McClintic-Marshall Construction Company for work on the gates at Pedro Miguel and Miraflores locks, gold employes added to the work on the Balboa terminal, and the removal of the quarters at old Balboa have, in part, been responsible for the congestion. The work of removing the buildings at old Balboa is practically completed, with the exception of building No. 27, which houses 72 bachelor employes, and cannot be dismantled until the conversion of the upper part of the East Balboa hotel, and of the police station, formerly at old Balboa, now at East Balboa, into bachelor quarters, has been effected. The removal of the type-18 house from Empire to Corozal helped to relieve the congestion at the latter place. It was dismantled, shipped and reerected in 32 days.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 90 per cent completed, 204,192 cubic yards, out of a total of 225,000, having been placed at the close of work on August 10. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked.	No. Mixers.
August 5	44	2.30	1
August 6	9	1.30	1
August 7	52	4.00	1
August 8	80	6.00	1
August 9	44	3.30	1
August 10	68	5.30	1
Total	297	23.00	1
Previously reported	203,895		
Grand total	204,192		

Civil Service Examinations.

A supply of the Manual of Examinations for the fall of 1912 has been received.

Examinations for the following named positions are scheduled to be held at Culebra, probably on September 15: Apprentice plate cleaner, transferrer, and engraver, Bureau of Engraving and Printing; assistant inspector of boilers, assistant inspector of hulls, Steamboat Inspection Service; clerk, Isthmian Canal Service; copyist topographic draftsman, topographic draftsman, nonapportioned Departmental Service; junior engineer draftsman, engineer department at large; electrician, nonapportioned Departmental Service; kindergarten teacher, Indian Service; local inspector of boilers, local inspector of hulls, Steamboat Inspection Service; matron, Indian Service; physician, all services, except Philippine; teacher, Indian Service; veterinarian, nonapportioned Departmental Service. Women will be admitted only to the examinations for copyist topographic draftsman, topographic draftsman, kindergarten teacher, matron, and teacher mentioned above.

Applications for the abovenamed examinations will not be received in this office after August 20. This date will be changed if necessary. In requesting information, the kind of examination desired should be specifically mentioned.

All instructions found in application forms and in the Manual of Examinations concerning an examination desired should be carefully read and understood before filing application. In answering question 4 in applications, residence must be shown in a State, and county thereof, of the United States, up to the time of making application. The date of examination should be omitted in application forms.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., August 10, 1912.

CONCRETE WORK IN THE LOCKS.

Over 90 per cent of the concrete for the locks is in place, the amount at the close of work on August 10 being 3,905,159 cubic yards, out of a total of approximately 4,302,563. A total of 19,763 cubic yards of concrete was laid in the locks during the week ending August 10.

GATUN LOCKS.

About 95 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on August 10 being 1,890,959 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending August 10, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 2-cubic yard mixers.			Large stone.	Total.

SOCIAL LIFE OF THE ZONE.

Church Work.

The seventh annual missionary campaign of the Wesleyan Methodist church in Panama and the Canal Zone was begun on Monday evening, August 12, at Colon, with the Rev. E. A. Pitt of Costa Rica, as special deputy preacher. During the week, services will be held in all the mission churches of the mission, and during the campaign, a service will be conducted each evening at one of the missions.

Ground was broken on Monday, August 12, in the lot between 15th and 16th streets, in the city of Panama, for the erection of a new building in connection with the Wesleyan church to be used for parish house and school. The structure will be built of rubble masonry, similar in style to the church directly back of which the building will stand. The kitchen, servants' room, lavatories, and offices will occupy the basement; in the second story will be the schoolroom, a hall 77 by 38 feet; and the pastor's residence will be in the upper story. The cost of the building will be about $10,000, United States currency. Of this sum, $2,500 has been raised by the local mission, and the remaining $7,500 will be paid by the church in England as a loan, with the understanding that the sum is to be reduced year by year until the amount is paid. It is expected that the building will be ready for occupancy in November, or December. It is the purpose to open a parochial day school if a sufficient number of pupils is registered to warrant the expense.

On Sunday morning, August 18, the Rev. Father William Rojas, apostolic administrator to the bishopric of Panama, will be consecrated bishop by the Right Reverend, the Bishop of Costa Rica. The ceremony will take place in the cathedral at 9 o'clock. Father Rojas was appointed temporary administrator in Panama by the Vatican on the death of Monseigneur Javier Junguito, the Bishop of Panama, in November, 1911. Later, this appointment was ratified, and after his consecration, Father Rojas will continue to be episcopal administrator to the see of Panama. Prior to his call to Panama, the new bishop was the parish priest at St. Catejan's Church, Gorgona.

Miscellaneous Notes.

On Saturday evening, August 31, Orchid Chapter, No. 1, Order of the Eastern Star, will hold a dance in the Commission clubhouse at Gorgona. Master masons and members of masonic clubs, and the wives, daughters, and relatives of such members, as well as all members of the Eastern Star are cordially invited to attend. This is the first entertainment to be held by the order.

The Woman's Altar Society of Christ Church, Colon, will hold an entertainment at the Commission clubhouse on Saturday afternoon, August 17. The program will consist of an informal talk on Central America by Mrs. W. H. Bell, and music. Refreshments will be served. Tickets are on sale at 50 cents each. The proceeds of the entertainment will be devoted to the society's fund for the purchase of a marble altar for Christ Church.

Rifle Match.

The Canal Zone Rifle Club held a shoot at Pedro Miguel on August 4 for the annual medal offered by the National Rifle Association. The match is shot by all affiliated organizations of the National Rifle Association, and is at the 200, 300, and 500-yard ranges. The winner this year was W. W. John of Ancon. The scores of the ten men shooting were, as follows:

W. W. John	131
F. W. Walraven	128
J. N. Haynes	127
G. C. Ferris	126
W. L. Greene	125
W. M. Taylor	115
A. E. Darling	103
Max Boggs	101
Samuel Hutton	98
C. H. Cammack	96

A miss by Mr. Walraven at the 500-yard range lost him the medal, as he finished his score by making 43 out of 45.

Unveiling of Bust of Lieutenant Wyse.

The unveiling of a bronze bust of Lieut. Lucien Napoleon Bonaparte Wyse, the first Panama Canal concessionaire, who died in France, in June, 1909, took place on Sunday afternoon, August 11, at 4 o'clock, on that part of the seawall in Panama, known as Las Bovedas. The ceremony was attended by the members of the municipal council of the city of Panama, Panama government officials, and some of the diplomatic corps, including Mons. H. A. M. Barre-Ponsignon, the French charge d'affaires. The speech of acceptance on the part of the city was given by Mr. Enoch Adames V, president of the municipal council, and the response was made by Mr. Federico Boyd, who represented the son of the promoter in turning over the gift to the city, as he could not be present in person.

The bust rests on a square pedestal of white marble, six feet high, mounted on a concrete base in the form of three steps, situated at the outermost point of the seawall. It faces due west, and in this position, overlooks the Pacific entrance to the Canal. On one side of the marble pedestal there is the following inscription: "1911. El Municipio de Panama. Al ilustre ingeniero Francés. L. N. Bonaparte Wyse;" on the other, the following: "Lucien Bonaparte Wyse. Teniente de Navios. Promotor de la apertura del Canal Interocéanico. 1844-1909." A brief description of the activities of Lieutenant Wyse in connection with the early Panama Canal project was published in THE CANAL RECORD of June 23, 1909.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending August 10:

DATE.	Hours worked.	Cubic Yards.
August 5	7.35	2,833
August 6	6.35	2,655
August 7	7.00	2,424
August 8	8.25	2,971
August 9	8.30	3,679
August 10	7.50	2,523
Total	45.55	17,085

LABOR FORCE AND QUARTERS IN JULY.

On July 31, there were 35,169 employes actually at work on the Canal and the Panama railroad, and of that number, 28,382 were Canal employes. The gold force on the Canal work, composed almost entirely of white Americans, was 4,196. The force report for July 31, 1912, was, as follows:

DEPARTMENT.	SILVER EMPLOYES.*													Total silver.	Total gold.	Grand total.

WORK AT BALBOA TERMINAL.

Increased Activity in Preparing Site for Permanent Plants.

The scope of the preliminary work at the site of the Balboa terminal has been considerably enlarged during the past two weeks, and about 1,100 men are now employed at that point. Two steamshovels are continuing the excavation in the side of Sosa Hill, and have made a cut clear through to the tide water flat near the Panama railroad wharf, across which a fill is being made to the higher ground on which the wharf buildings stand. The excavation is mostly earth mixed with loose boulders, but at two points solid rock masses are encountered. The line of excavation as originally planned has been extended farther back into the hill on account of a change in the plans lengthening the drydock.

The greater part of the spoil from Sosa Hill is dumped between the toes of the old Sosa dam to form the site of the new railroad yard. It was found that the east toe of this dam was considerably higher than the established grade and a pick and shovel gang is engaged in lowering the embankment. The work of razing the remainder of the shacks that formerly constituted the native settlement at old Balboa is in progress, and the removal of the dredge parts and various odd pieces of machinery, some obsolete, others serviceable, that at present encumber the site of the drydock, will be begun shortly. The dredge parts and other material that can be used at Balboa will be moved to a convenient point near the shipways, and the remainder will be shipped to where it can be used to the best advantage. Tracks are being laid for a fill about west of the bend in the road leading into Balboa on which a new field office will be erected. Temporary office quarters have been established in a two-story house formerly occupied by the "La Boca Hotel."

Progress in Gate Erection.

Excepting the leaves for the lower guard gate in the west chamber of Pedro Miguel Lock, all of the leaves for the six sets of gates, 24 leaves in all, for the two chambers of the lock, have been brought to full height. The two erection bridges of the first set have been dismantled and are being transferred to Miraflores Locks, where none of the material for the gates, with the exception of parts of the hinges, set in the concrete walls, is in place. The lower guard gates at Pedro Miguel are only 47 feet four inches high, and their erection is being carried on with the use of a locomotive crane, working on the lock floor. Erection of the gates for Pedro Miguel Lock began on August 7, 1911, at the site of the upper guard gates. The upper guard gates are practically completed, only a slight amount of riveting and calking remaining to be done.

At Gatun Locks, also, six sets of gates, with 24 leaves, have been brought to full height. Note of the completion of the upper guard gates was made in the CANAL RECORD of August 7, 1912. Five of the gates for each chamber of the upper level, and one in each chamber of the lower level, comprise those of which the skeletons are completed. During this month, work will be begun in the middle lock, and on the lower guard gates. It is expected that all of the leaves in Gatun Locks will have been erected to full height by January 1, 1913, though a considerable amount of riveting, calking, and adjustment will remain to be done after that date.

The force of the McClintic-Marshall Construction Company, numbering about 1,500 men, approximately one-seventh of whom are white, or "gold" employes, was augmented on August 8 by 18 white men, seven machinists and eleven bridgemen, who arrived from New Orleans on the steamship *Atenas*. They were assigned to work in the Pacific locks.

August Borrow Pit Excavation, Gatun Dam.

The shovels working in borrow pits for the Gatun Dam excavated a total of 277,156 cubic yards, place measurement, during the month of July, or an average of 2,099 cubic yards per shovel per day.

The following table classifies the material excavated, and indicates the yardage by place measurement for each shovel:

Shovel No.	Cubic Yards.			Working Days.	Location.
	Earth.	Rock.	Total.		
116	9,893	42,100	51,993	25	West borrow pit.
117	28,570	....	28,570	22	Hydroelectric plant and red clay pit.
120	....	*65,510	65,510	26	West borrow pit.
125	....	8,021	8,021	5	West borrow pit.
134	32,244	....	32,244	21	Red clay borrow pit.
257	31,595	45,327	76,922	26	West borrow pit.
263	....	13,896	13,896	7	West borrow pit.
	102,302	174,854	277,156	132	

*This exceeds by 532 cubic yards the monthly Isthmian record for a 70-ton shovel, made by the same shovel in April, 1912.

Street Railway Progress.

Tracklaying on the line of the Panama Tramways Company, on the paved streets in the city of Panama, was begun on July 25, on North avenue, near the American wharf, and on Saturday, August 10, the crew had reached Central avenue at the intersection of Thirteenth street. From this point operations will be extended past Santa Ana park, and down C street to Sixteenth, thence on Sixteenth street to the Balboa road, and out the latter thoroughfare toward East Balboa. On all streets in the city of Panama where there is a concrete foundation to the pavements, steel ties are being used; where the foundation is crushed rock and sand only, creosoted cypress ties are substituted. On brick paved streets the "Trilby" rail is used; on others, the ordinary "T" rail. The rails laid by the former company on C street, and on the Balboa road, do not meet the requirements in the present construction, and will be removed and stored. The side hill excavation near East Balboa is practically completed, and the material removed has been utilized in making a broad fill on each side of the hill, paralleling the dirt road.

The Balboa terminal of the tramway has not been definitely fixed, but the company has been furnished with a sketch of the proposed townsite, and has been accorded the privilege of constructing its lines along the main street of the new city, which will extend nearly on a line from the East Balboa commissary across the fill toward the East Balboa hotel. To date, approximately two and one-half miles of track have been laid by the company, including a line on North avenue paralleling the Panama railroad yards to Calidonia street, thence out Calidonia to a point on the Sabanas road near the old quarry. The section of the line extending to the Hotel Tivoli has been built to the Canal Zone boundary, and the spur to the hospital reservation is laid. The pole construction will begin shortly, having been held up on account of delay in shipment of material. The company has over 500 men in its employ, and, at the present rate of progress, the work will probably be completed ahead of the schedule.

It has been practically determined that the company will be supplied with power from the Miraflores plant of the Canal Commission, and a committee, consisting of Edward Schildhauer, H. K. Smith, and Hartley Rowe, has been appointed to consider the requirements for furnishing this service. That part of the work appertaining to the replacing of pavements and the proper care of street and roads is under the supervision of the superintendent of public works, in the city of Panama, and a representative of the Pacific Division, in the Canal Zone.

International Brotherhood of Steamshovel and Dredge Men.

Local No. 19, I. B. of S. S. & D. M., will hold its regular meeting on Sunday, August 18, at Empire lodge hall, at 12.15 p. m. All members are requested to attend.

A. EDMONSON,
Secretary-Treasurer.

Empire, C. Z., August 9, 1912.

Obituary.

James Ransom Strock, an employe of the Mechanical Division at Gorgona, died at Ancon hospital on August 8. He was 50 years old, married, and had been on the Isthmus five years. He is survived by a son, W. T. Strock, living at Gorgona. Funeral services were held at St. Luke's Hospital chapel on Sunday, August 11.

Joseph Henry Painter, an employe of the Atlantic Division at Gatun, died at his home in Gatun on August 7. He was 36 years of age, married, and had been on the Isthmus a little over four years, coming here from Cleburne, Texas. He is survived by his wife, living in Gatun.

Fredericka Duvall, the two-year old daughter of Mr. Fred A. Duvall, died on August 4 at Gorgona. She was born in Ancon Hospital on July 18, 1910.

Work of Central Division Unloaders for July.

The following statement shows the number of trains and lidgerwood cars unloaded by the Central Division during the month of July:

Location.	No. of unloaders.	No. of trains.	No. of cars.
Balboa..............	4	1,351	27,020
Miraflores...........	2	549	10,980
Gamboa.............	3	885	18,565
Totals.............	9	2,785	56,565

Eugenio Rios, a Spaniard employed in the Pacific Division, check No. 122101 was run over and killed by I. C. C. engine No. 102 at Miraflores on Monday afternoon, August 12.

Horatio McLenan, a Jamaican, employed in the Pacific Division, check No. 127237 was killed at Miraflores Locks on Sunday, August 11, by the falling of a form from one of the lock walls which carried him along with it. Two other laborers fell at the same time and were injured.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

During the absence of Mr. Dwelle, who is confined to the hospital with fever, Mr. W. T. Compton is in charge of the work at Corozal.

The next moving picture exhibition will be held Friday evening, August 16.

CULEBRA.

The local bigpin tournament started off Monday evening, August 5, with six teams entered, as follows: "Exploders," "Wreckers," "Piledrivers," "Track shifters," "Unloaders," and the "Spreaders." The standing, follows:

	Won.	Lost.	P. C.
Track shifters	2	1	.667
Unloaders	2	1	.667
Spreaders	1	1	.500
Piledrivers	1	1	.500
Wreckers	1	2	.333
Exploders	1	2	.333

Empire opposed Culebra in bowling on Saturday evening, August 10, when the former took two out of three games, as follows:

Culebra.				Empire.			
MacRae	135	143	142	King	165	130	155
Warner	180			Gus	159	129	185
Herrington	172	158	122	Warr	162	150	173
Tuley	122	179	158	Whelan	157	147	189
Anderson	165	149	180	Edwards	204	180	200
Hobart		143	104				
Total	774	772	706		847	736	902

A basketball game was played between Empire and Culebra on Friday evening, August 9, resulting in a score of 16 to 8 in favor of Empire.

A three-team local basketball league has been organized. The following are the teams: "Pirates," "Tigers," and "Athletics." Each team will play the other team twice. The league opened on Tuesday evening, August 6.

The volleyball league closed on Tuesday evening, August 6, when the "Reds" defeated the "Blues." The final standing is, as follows:

Name.	Won.	Lost.	P. C.
Reds	19	11	.633
Blues	16	14	.533
Whites	10	20	.333

The following are the names of the men that were chosen by the committee on the all-Culebra volleyball team: Mr. John Warner, server; Mr. Van Zandt, center; Mr. Mitchell, net; Mr. Herrington and Mr. Stillwell (tie), net; Mr. Armstrong and Mr. Cook (tie), guard; Mr. Hoffman, back center.

EMPIRE.

The standing of the local basketball league is, as follows:

Name.	Won.	Lost.	P. C.
English	3	1	.750
Americans	2	2	.500
Germans	1	3	.250

GORGONA.

The standing and lineup in the local bigpin tournament to date is, as follows:

Team No. 1—Reitman, Johnson, Cogan, M. Van. Won 1; lost 2.

Team No. 2—Lowe, Regan, Ferguson, H. Otis. Won 4; lost 5.

Team No. 3—Burmeister, Calloway, Wright, Sims. Won 4; lost 2.

Team No. 4—Miner, Darling, Bentley, King. Won 1; lost 2.

Team No. 5—Rhodes, Gebhard, McCain, Davis. Won 2; lost 1.

Mr. T. S. Booz, who has been confined in the hospital since July 12, has returned and will leave for the United States on August 21.

CRISTOBAL.

On Friday night, a simultaneous checker match was held at which a number of local players and invited guests played Mr. F. L. Bernsee. There were 23 present and 43 games were played. Mr. Bernsee won 41 games, drew one with Mr. Fleming, and lost one to Mr. Gartrell of Gatun.

On Wednesday night, the Trio Oriental Company will give a return engagement at the clubhouse. An entire change of program will be given, with the exception of the "Tank of Neptune" mystery, which will be repeated.

A local bowling league was started in tenpins during the past week. Six teams have been entered. During the week ending August 10, the following high scores, were made on the local alleys: Buser, 237, 204, 211, 201 200; Bullard, 214; Gibson, 255; Russell, 205; Collins, 212; Barrett, 210; Chamberlain, 215, 220; Witmer, 203.

GATUN.

The medals for the recent duckpin tournament arrived and were given out to the winners at the moving picture entertainment on Wednesday evening, August 14.

The Hindoo magical trio will give a return engagement on August 20.

The work of replaning the bowling alleys of the clubhouse was begun on Wednesday, August 14.

The membership is steadily increasing, 388 having been reported on August 1. An effort is being made to bring the number up to 400 by September 1.

A large number of new books, mostly recent fiction, were added to the library during the past week.

Interest in bowling is on the increase. The receipts for the month of July were the highest in over six months. Gatun took the last two games in the match with Empire on Saturday evening, August 10. The scores were:

Gatun.				Empire.			
Swallow	154	171	163	Pinney	170	162	150
Dickson	101	159	147	Sawtelle	188	164	149
Barte	174	186	165	Goolsby	144	170	159
Hodges	147	147	184	Danielson	153	175	145
Oettli	156	178	182	Drake	146	150	156
Total	732	841	841		801	821	759

The standing of the local tenpin tournament on August 10 was, as follows:

Team.	Won.	Lost.	P. C.
Illinois	5	1	.833
Pennsylvania	4	2	.666
Washington	3	3	.500
New Jersey	3	3	.500
New York	3	3	.500
Ohio	3	3	.500
Missouri	2	4	.333
Oklahoma	1	5	.166

PORTO BELLO.

A farewell reception was tendered Mr. Sollenberger by the members of the Porto Bello clubhouse upon the eve of his leaving for the United States.

Under the auspices of the Porto Bello chess club three prizes were offered the winners of the recent handicap chess tournament. The first was won by Mr. Joseph Mackintosh, the second by Mr. C. D. Morgan, and the third by Mr. C. K. Rogers, who won from Mr. C. W. Morgan, the last two tying for third place. The prizes were: First, a set of chessmen; second, a club pin, and third, a pocket chess board wallet. The following rules governed the playing: Handicaps were based on the results of the previous tournament. Handicaps ranged from one move to a queen and one pawn. Eighty per cent of the games had to be played to be eligible for prizes.

The boy scout movement has been started in Porto Bello.

The handball court is soon to be enlarged. This will provide a good opportunity for all men interested in handball to get in condition for a tournament which will be begun soon.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending August 21, 1912. (75th meridian time):

DATE.	Low	High	Low	High	Low
	A.M.	A.M.	A.M.	P.M.	P.M.

Wilkins, H. E.
Wilson, Miss Ida

Auction Sale of Calves and Dairy Cow at Ancon Hospital Dairy.

On Saturday, August 24, at 10 a. m., there will be sold at public sale at the Ancon Hospital dairy, ten calves between the ages of one and two and one-half months, and one dairy cow about five years old. Terms of sale, cash.

The dairy is located near the insane asylum buildings in the rear of the hospital grounds.

CHAS. F. MASON, *Superintendent.*

OFFICIAL CIRCULARS.

Labor Day, a Holiday.

CULEBRA, C. Z., August 7, 1912.

CIRCULAR No. 454:

Labor Day, Monday, September 2, 1912, will be observed as a holiday throughout the Canal Zone, and, as far as possible, all work will be suspended on that day.

GEO. W. GOETHALS, *Chairman.*

Itemized Bills.

CULEBRA, C. Z., August 9, 1912.

CIRCULAR No. 455:

All bills issued hereafter by the Isthmian Canal Commission, except those issued by one department or division against another department or division, and except those issued against the Canal Zone Government and the Panama Railroad Company, should be fully itemized, as follows:

Bills for material—Dates of sale or use, quantity and kind of material, unit and total prices, and the rate and amount of surcharges should be given.

Bills for labor—Dates work was done, designation of employes engaged and number of each, units of time in hours or days, the rate of pay and total amount for each rate, and the rate and amount of surcharge added to total labor charge.

Bills for other service—On bills for electric light, switching, rental of equipment, or other miscellaneous service, show dates of service, unit and total prices, and basis on which charge is made.

The extensions of all items should be made and the bills should be properly totaled.

The detailed data required herein may be given on Form X-140, or on other forms, but such data must accompany all copies of bills.

Care must be taken to give on each bill the correct name and address of the responsible party.

Bills against employes must show on their faces the lodge or club, etc., for which the material or service is furnished, if not furnished solely for the employe himself.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Malicious Interference with Boundary Marks.

CULEBRA, C. Z., August 9, 1912.

CIRCULAR No. 332-A:

Section 429 of the Penal Code of the Canal Zone provides, as follows:

> Every person who either:
>
> 1. Maliciously removes any monument erected for the purpose of designating any point in the boundary of any lot or tract of land, or a place where a subaqueous telegraph cable lies; or
> 2. Maliciously defaces or alters the marks upon any such monument; or
> 3. Maliciously cuts down or removes any tree upon which any such marks have been made for such purpose, with intent to destroy such marks,
>
> is guilty of a misdemeanor.

Section 436 of the same Code, as amended, provides, as follows:

> Every person who wilfully injures, defaces, or removes any signal, monument, building, or appurtenances thereto, placed, erected, or used by persons engaged in the United States Coast Survey, or Isthmian Canal Commission, or any public service company within the Canal Zone, knowing the same to be a boundary or survey monument, is guilty of a misdemeanor.

Articles 908, 909 and 910 of the Penal Code of Panama, imposing a penalty on any person who removes or alters boundary monuments are, as follows:

> ARTICLE 908. Every person who knowingly removes any monument, tree, wall, border, fence, ditch, palisade, landmark, or any other sign placed or known as a point in the boundary limit between the land, field, or any other property and that belonging to some other person; and every person who removes any of the said monuments shall be liable to arrest for a period not less than six days nor more than one month, and a fine of from ten to eighty pesos; such person being under the obligation of replacing the monument which was destroyed or removed; and in case this is not possible, he shall erect a like monument.
>
> ARTICLE 909. Every person who knowingly commits any such offense with respect to the property of another shall be liable to a fine amounting to one-half of the abovementioned penalties.
>
> ARTICLE 910. Every person who knowingly takes away or removes any monument erected for the purpose of designating the boundaries of a department, province, district, police district, or any other territorial division, as provided by the Constitution and by-law, shall be liable to arrest for a period not less than ten days nor more than two months, and to a fine of from twenty to one hundred pesos.

The above provisions of the laws of the Canal Zone and the Republic of Panama are quoted for the information and guidance of all concerned.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Stopovers on Twenty-Four Trip Tickets.

CULEBRA, C. Z., August 6, 1912.

HEADS OF DEPARTMENTS AND DIVISIONS:

In the future no stopover privilege will be allowed on employes' 24-trip tickets, this action having become necessary on account of continued abuse of the privilege.

GEO. W. GOETHALS, *Chairman.*

Roadmaster of the Panama Railroad.

COLON, R. P., August 9, 1912.

All Concerned: Effective this date, Mr. M. B. Connolly is appointed roadmaster of the Panama railroad. He will report to the engineer of maintenance, and have general charge of the construction and maintenance of all tracks of this company.

F. MEARS,
Acting General Superintendent.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon, during the week ending August 10:

Panama, August 3, from New York, with seven kegs lamp parts, for Atlantic Division; 12 cases machinery, 600 pieces steel bars, for Pacific Division; 45 barrels repair parts, 500 pieces steel plates, 24 pieces brake beams, 48 bundles brake heads, for Mechanical Division; 10 cases brass tubing, for superintendent of erection; 12 pieces girders, 442 barrels tiling, for Panama Railroad Company; 37 kegs bolts, 26 cases babbitt metal, 15 cases warehouse trucks, 10 cases range parts, 71 cases sales books, 25 bales waste, 251 pigs lead, 252 pieces steel angles, 10 kegs wire nails, 18 cases mining machinery, 100 bundles wrapping paper, 10 cases nuts, for stock; and a miscellaneous cargo, the whole consisting of 2,740 packages, weighing 400 tons.

Odenwald, August 3, from Hamburg, with 31 cases thrust screws, for superintendent of erection.

Greenbrier, August 4, from New York, with 11 cases tape, 14 cases packing, 610 pieces steel rails, for stock.

Prinz Joachim, August 6, from New York, with 15 kegs galvanized unions, 12 bundles steel, for stock.

Almirante, August 7, from New York, with 11 cases tape, 50 bundles galvanized sheets, 10 cases paint, for stock; 23 cases incandescent lamps, for Mechanical Division; 13 cases valve machinery, 110 cases gate machinery for superintendent of erection.

Atenas, August 8, from New Orleans, with 8,336 pieces lumber, for Mechanical Division; 122 pieces lumber, for Pacific Division; 3,048 pieces lumber, 137 pieces piling, 450 cases fire brick, 300 packages switch parts, 22 drums oils, 160 drums kerosene, 199 cases kerosene, for stock.

Sverre, August 9, from Baltimore, with 48 pieces maple lumber, 17 cases glass, 1,080 bundles splice bars, for stock; 1,128 bundles steel bars, for Pacific Division; one pile driver hammer, 112 pieces steel girders, for Panama Railroad Company; 1,575 car wheels, for Mechanical Division; 1,596 bundles structural steel, 92 cases castings, 141 packages rack castings, 27 cases valves and parts, 739 cases valve machinery, 85 cases lock gate machinery, for superintendent of erection.

Allianca, August 9, from New York, with 300 cases linseed oil, 995 pieces lumber, 75 cases nuts, 88 bundles galvanized sheets, 131 cases air brake material, for stock; 133 packages structural steel, for Panama Railroad Company; 156 cases coil springs, for Pacific Division; and a miscellaneous cargo, the whole consisting of 2,680 packages, weighing 725 tons.

Rainfall from August 1 to 10, 1912, Inclusive.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays, at 10 a. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers leave Colon for New York, via Kingston at 10 a. m., on sailing dates. The *Prinz August Wilhelm* and *Prinz Joachim* sail at 2 p. m., and call at Santiago de Cuba, on both outward and homeward voyages.

United Fruit Company's ships for New Orleans direct, leave on Thursdays, at 3 p. m.; for New Orleans, via Limon, on Thursdays, at 2 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 2 p. m.

The following ships arrived at, or departed from the port of Balboa during the week ending August 10:

Arrivals—August 5, *Ecuador*, from Guayaquil; August 5, *Quilpue* from Valparaiso; August 6, *Peru* (P. S. N.), from Guayaquil; August 7, *Mantaro*, from Callao; August 10, *City of Panama*, from San Francisco.

Departures—August 4, *Manavi* to Buenaventura; August 5, *Portland*, to San Francisco; August 5, *Chile*, to Guayaquil; August 5, *Pachitea*, to Callao; August 5, *Limari* to Valparaiso; August 8, *Pennsylvania*, to San Francisco; August 8, *Stanley Dollar*, to San Francisco.

CANAL RECORD

Volume V. ANCON, CANAL ZONE, WEDNESDAY, AUGUST 21, 1912. No. 52.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of July is published in full in other columns of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Break in Obispo Diversion.

A portion of the Obispo Diversion was carried away by a slide of 300,000 cubic yards on the east bank of the Culebra Cut, between 10.40 and 10.45 a. m., August 20, and the diversion has since been flowing into the Cut. The break occurred about 150 yards north of the concrete flume through which the diversion passes, near Station 1645, about three miles from the north end of the Cut. To stop the flooding of the Cut to the south, a temporary dike will be thrown across it opposite the toe of the slide, which extends about halfway across the channel.

The portion of the Cut between the slide and Gamboa will be flooded during the time necessary for relocating the diversion to the east of the break, but the pumps at Gamboa will be worked to capacity to prevent, if possible, a rise of water beyond a depth of 10 feet in the flooded channel.

Contract for Hydroelectric Station Equipment.

Award has been made on the bids for supplying the auxiliary equipment required for the Gatun hydroelectric station, which is to be situated near the Spillway in Gatun Dam. The requisite equipment, of which advertisement was made in Circular 715 from the Washington Office of the Isthmian Canal Commission, was described in THE CANAL RECORD of July 3, 1912. Award has been made to the General Electric Company for the control switchboard, station panel, circuit-breaker, switchboard, light and power switchboard, gatehouse switchboard, 2,200-volt switching group, light and power transformers, and station battery. A small quantity of crane trolley material was awarded to the Niles-Bement-Pond Company. No award for the air compressor will be made.

At present, work on the hydroelectric station consists of excavating for the building footings and machine foundations. It is expected that this excavation will be completed about September 1, 1912. The materials for the headgates and the penstocks have been delivered upon the Isthmus and erection will be begun soon.

Pacific Entrance Excavation.

In order to allow the ladder dredge *Corozal* to be moved up into Culebra Cut about July 1, 1913, for excavating at the bottoms of slides and removing silt, it has been decided to make a greater portion of the excavation for the Pacific entrance channel in the dry.

To this end, locomotives Nos. 101, 106, 108, 113 and 121 are shortly to be transferred to the pit south of Miraflores Locks, from the service of the Panama railroad, and two locomotives of 201 or 301-class will be transferred from the Central Division. At the same time, a total of 66 steel dumps cars will be transferred from the Panama railroad and from work at Mount Hope and Toro Point. Before September 1, dumping on the mole at the Cristobal piers will be discontinued, in order to enable the transfer of thirty 12-yard steel dump cars and a 70-ton steamshovel from the Mount Hope borrow pit. During October, the equipment now in use for supplying backfill for Gatun Locks will be transferred in its entirety. As further equipment can be spared from the work in Culebra Cut, it will also be put at work in the Pacific Division. Prior to these changes, six steamshovels have been excavating south of Miraflores Locks.

The spoil of the additional dry excavation will be dumped in the flats between the Rio Grande Diversion and Corozal, assisting the monitor pumps in the reclamation of contiguous swamps. Spur tracks are being laid from the Balboa sand track to the site of the new dumps.

Signal Lights on Colon Breakwater.

CULEBRA, C. Z., August 15, 1912.

Major F. C. BOGGS, *Chief of Office*,
Washington, D. C.

SIR: I am in receipt of the following communication from the division engineer of the Atlantic Division:

"For several months past two gas buoys showing white lights have marked the eastern part of the Colon breakwater, having been placed there, in order that ships would not cross that part of the breakwater where dumping from scows has been going on. The trestle has been extended to within 375 feet of the extreme end of the breakwater, and it has been necessary to remove the westerly gas buoy. This leaves the breakwater marked at the present time with one white light at the extreme end, and two red lights, one six feet above the other, at the extreme end of the trestle."

Please convey this information to the various departments and bureaus interested.

Respectfully,
GEO. W. GOETHALS, *Chairman*.

Gatun Dam Spillway.

The concrete work in the Spillway of Gatun Dam is over 90 per cent completed, 204,444 cubic yards, out of a total of 225,000, having been placed at the close of work on August 17. A statement of the amount laid each working day last week, and of the total in place, follows:

DATE.	Concrete Laid.	Hours worked	No. Mixers.
August 12	68	5.30	1
August 13	12	1.00	1
August 14	54	5.15	1
August 15	70	8.00	1
August 16	36	4.15	1
August 17	12	1.00	1
Total	252	26.00	1
Previously reported	204,192		
Grand total	204,444		

Steamship Sunk by Collapse of Wharf.

A section of wharf at Balboa, about 185 feet in length, collapsed at half-past one in the morning of August 17, and the steamship *Newport*, moored alongside, sank. No one was killed or injured. The *Newport*, which belongs to the Pacific Mail Steamship Company, and is registered in New York, is a single-screw iron steamship of 2,735 tons gross register, 326 feet long, 38 feet two inches beam, 23 feet nine inches in depth, and was built at Chester, Pennsylvania, in 1880. It was loaded with about 1,500 tons of general cargo, consigned for the most part to ports of Central America and Mexico, and was due to sail during the afternoon of the 19th. A committee, consisting of Mr. S. B. Williamson, chairman, Lieut. F. Mears, and Mr. W. G. Comber, is investigating the cause of the accident.

The section of wharf which collapsed is a part of the "angle annex," extending at an angle from the land end of the "steel pier" to the coal wharf. The wharf is 60 feet wide, with heavy timber flooring, and is supported on piles. It was built by the Panama Railroad Company in 1905. Two railway tracks, paralleling it on the land side, are included with it under the corrugated roof and sides. The electrically operated cranes are mounted on a 10-foot track along the outer edge.

After the first crashing of collapse was heard the structure sank steadily. Within about two minutes, two of the steel cargo-handling cranes, which had been opposite the bow of the *Newport*, toppled over. One fell inward, toward the center of the collapsing section, while the other fell across the vessel, forward of the wheelhouse. Only the masts, the funnel, and the superstructure of the wheel-

NOTES OF PROGRESS.

(Continued.)

house are visible above water at high tide. Immediately on noticing the collapse of the wharf, the policeman on patrol aroused the crew of the *Newport*, who escaped to safety. The policeman then reported the disaster to headquarters, from which a report was transmitted to the Chairman and Chief Engineer, and by three o'clock, men and equipment were being assembled for the work of reclamation. Three railway wrecking cranes and derrick barge *No. 19* have been engaged in the removal of débris, and a diver has been ascertaining conditions within and about the submerged vessel.

Notice to Mariners and Others.

The Island of Perico in the Bay of Panama is now a military reservation, and mariners and the public generally are warned against trespassing thereon for the purpose of beaching boats, or for any other purpose.

Construction work will soon begin and mariners and others are warned against coming within range of danger from blasts.

(Sgd.) Geo. W. Goethals,
Chairman and Chief Engineer.

Civil Service Examinations.

A supply of the Manual of Examinations for the fall of 1912 has been received.

Examinations for the following named positions are scheduled to be held at Culebra, probably on September 29: Apprentice plate printer, Bureau of Engraving and Printing; electrotyper molder, Government Printing Office; guard, U. S. Penitentiary Service; pressman Government Printing Office; stereotyper, Government Printing Office.

Applications for the abovenamed examinations will not be received in this office after September 6. This date will be changed if necessary. In requesting information, the kind of examination desired should be specifically mentioned.

All instructions found in application forms and in the Manual of Examinations concerning an examination desired should be carefully read and understood before filing application, to avoid unnecessary returning for correction. In answering question 4 in applications, residence must be shown in a State, and county thereof, of the United States, up to the time of making application. The date of examination should be omitted in application forms.

Isthmian Civil Service Board.
Culebra, C. Z., August 17, 1912.

Construction Costs.

Referring to the statement of construction costs published in a supplement in The Canal Record of August 7, the unit cost shown under "Naos Island breakwater" should be $0.2467, instead of $2.4673. Although this work is shown under "Pacific Division," being at the Pacific end of the Canal, it is wholly done by the Central Division.

Pilots, Mates, Masters, Engineers, Chauffeurs.

Examination for pilots, mates, masters and engineers; and for chauffeurs, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, August 28, 1912, at 8 a. m. All applications for licenses as chauffeur must secure from the Department of Civil Administration, Executive Office, Ancon, forms for application, and information respecting the filling out of the same, not later than the day previous to the examination. All applicants for examination must be present at the Administration Building at 8 a. m., on the abovementioned date with papers in proper form. In addition, applicants for chauffeurs' licenses must demonstrate their ability properly to operate an automobile, and must have the automobile with them.

PERSONAL.

Lieut.-Col. D. D. Gaillard sailed for New York on the steamer *Cristobal* on Tuesday, August 20, on leave of absence.

Mr. S. B. Williamson sailed for the United States on the steamer *Colon* on Wednesday, August 21, on his annual leave of absence.

Mr. Henry Goldmark sailed for the United States on the *Colon* on August 21, to spend his annual leave.

CONCRETE WORK IN THE LOCKS.

Over 90 per cent of the concrete for the locks is in place, the amount at the close of work on August 17 being 3,924,048 cubic yards, out of a total of approximately 4,302,563. A total of 18,889 cubic yards of concrete was laid in the locks during the week ending August 17.

GATUN LOCKS

About 95 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on August 17 being 1,892,342 cubic yards, out of a total of 2,000,000. A statement of the amount of concrete placed in the locks each working day of the week ending August 17, and of the total follows: and a similar statement for the work in the Spillway at Gatun Dam is published elsewhere in this issue.

Date.	Construction Plant. 2-cubic yard mixers.			Auxiliary Plant. 2-cubic yard mixers.			Large stone.	Total.
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers		
	Cu. Yds.			*Cu. Yds.*			*Cu. Yds.*

August 14	98	1.38	2					102
August 15	302	5.02	3					302
August 16	118	1.58	2					118
August 17	342	5.42	3					342
*Portable mixers on band				7				
Total	1,376	22.56	2.67	7				1,383
Previously reported								1,890,959
Grand total								1,892,342

*The seven yards shown under "portable mixer and hand" are reinforced concrete, and were placed on the following dates: August 12, one yard; August 13, two yards, portable mixer; August 14, four yards, hand.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is over 98 per cent completed, 874,302 cubic yards, out of a total of 889,827, bucket measurement, having been placed at the close of work on August 17. The record for each of the working days of last week, follows:

Date.	Auxiliary Plant.						Large stone.	Total.
	2-cubic yard mixers.			⅓-cubic yard mixers.				
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

CANAL WORK IN JULY.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., August 17, 1912.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of July, 1912.

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the Atlantic, Central, and Pacific Divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	Pacific.	Total.
Work excavation, dry	Cubic yards	19,605	1,336,366	228,569	1,584,540
Work excavation, wet	Cubic yards	564,568	...	482,129	1,046,697
Total work excavation	Cubic yards	584,173	1,336,366	710,698	2,631,237
Plant excavation, dry	Cubic yards	...	...	...	...
Plant excavation, wet	Cubic yards	...	...	...	...
Total plant excavation	Cubic yards	...	...	2,200	2,200
Total Canal excavation	Cubic yards	584,173	1,336,366	712,898	2,633,437
Material placed in dams	Cubic yards	315,868	...	53,970	369,838
Concrete placed in locks and dams	Cubic yards	9,450	...	78,035	87,485
Explosives used	Tons (Gross)	38.98	184.87	33.46	257.31
Rock drilled	Feet	35,561	416,251	76,451	528,263
Tracks removed	Miles	...	6.61	...	6.61
New tracks laid	Miles	2.15	8.81	4.67	15.63
Rock crushed	Cubic yards	...	...	61,053	61,053
Cement used	Barrels	16,176	175	79,739	96,090
New roads built	Miles	.20	...	...	.20
Water mains laid	Feet	300	228	3,348	3,876
Sewers laid	Feet	696	...	1,389	2,085
Open drains and ditches dug	Feet	66,608	67,755	600	134,963
Average daily force	...	4,700	6,725	6,868	18,293
Average rainfall	Inches	12.48	10.50	10.65	10.92

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineers and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF RISING STEM GATE VALVES.

The work of preparing rising stem gate valve chambers and installation of valves, etc., is progressing satisfactorily, the following work having been completed to the end of the month:

Gatun—Of the six side wall intake valve chambers, all have been completed and the valves have been installed. Of the 28 sets of operating valves, three sets have been completed, including installation of valves. The work on nine of the remaining 25 sets of valve operating chambers has been about 20 per cent completed.

Pedro Miguel—Work is proceeding in 11 of the 12 sets of operating valve chambers, but no valves have yet been placed.

Miraflores—No work has been done in any of the 18 sets of operating valve chambers in the locks at this point.

INSPECTION OF SPILLWAY GATES AND CAISSONS.

Gatun—The work of erection of the 14 Spillway gates was commenced on July 8, 1912, and the following work has been completed: The estimated tonnage assembled and bolted up is approximately 435 tons, out of a total of 532 tons, which includes the four horizontal girders, two end posts, all cross frames and intercostals, the two bottom rows of sheathing plates with their horizontal and vertical cover plates, and back bracing in all the 14 gates for the Spillway at this point. The reaming of the rivet holes for the connection between the ends of intercostals and bottom girders has been done on all gates, and the reaming of the holes for the similar connection to the next girder above has been done on four gates. The gates have all been releveled and riveting will probably be begun in the very near future, as soon as the remaining top row of sheathing plates has been placed and properly bolted. No work has been done on caisson. Erection, not including riveting, is about 82 per cent completed.

Miraflores—No work has been done on the erection of the eight spillway gates and caisson at this point.

LOCK GATES AND PROTECTIVE DEVICES.

Up to the 20th of July, a total of 55,352 tons of steel plates and shapes was accepted at the rolling mills, of which 1,616 tons were accepted between June 20 and July 20. This practically completes the material required, except for the spare parts. A total of 42,163 ton of riveted structural steel has been shipped from the Rankin shops, or about 83 per cent of the total contract weight of this class. Of the last item, 3,024 tons were shipped between June 20 and July 20. About 30 per cent of the material for the gates in the intermediate lock at Gatun and about six per cent of that for the upper and middle gates in the upper lock at Miraflores remain to be shipped; also, about 75 per cent of the steel for the safety and lower gates in the upper lock, and nearly all of the steel for the gates in the lower lock at Miraflores.

LOCK GATE ERECTION.

Gatun— Upper guard gates, 54 feet 8 inches high, leaves Nos. 37 to 40, inclusive—During the month, the aligning and babbitting of the bearings and sills was completed, so that the only work remaining on the four leaves on August 1 was the cementing of leaves Nos. 39 and 40, the testing for watertightness of leaf No. 40, some painting, and the erection of the footwalks on the leaves. The erection of these leaves began May 27, 1911.

Upper gates, 77 feet high, leaves Nos. 33 to 36, inclusive—All structural material was in place before July 1, and nearly all rivets driven. A small amount of riveting was done during the month, so that all sheathing rivets have now been driven in the leaves of the west chamber, and 85 per cent of those of the east chamber. Besides this, the castings were attached to the quoin end of leaf No. 35 and partly fitted. The quoin end of leaf No. 33 is ready for castings, but the quoin end of leaf No. 34, and the miter ends of all four leaves have not yet been ground. The erection of these leaves began October 9, 1911.

Middle gates, upper lock, 77 feet high, leaves Nos. 29 to 32, inclusive—All structural material was in place, all interior rivets had been driven, and nearly all holes in the sheathing reamed before July 1. During the month, only a small amount of reaming and riveting was done; but very few rivets had been driven in the sheathing by August 1. The erection of these leaves began January 27, 1912.

Safety gates, upper lock, 77 feet high, leaves Nos. 25 to 28, inclusive—All structural material on these leaves had been put in place at the beginning of the month, and all interior rivets driven. Since then, the bolting up of the sheathing has been completed in all the leaves, and about half of the holes for rivets in the sheathing reamed, but none of the sheathing rivets driven. The erection of these leaves began April 1, 1912.

Lower gates, upper lock, 77 feet high, leaves Nos. 21 to 24, inclusive—The erection of these leaves began June 29, 1912. Since then, skeletons of all four leaves have been erected to their full height and a small amount of interior reaming and riveting done. Thirteen per cent of the upstream sheathing has also been put in place.

Middle gates, lower lock, 77 feet high, leaves Nos. 9 to 12, inclusive—On July 1, the skeletons were in place, a small amount of interior riveting had been done and about 15 per cent of the sheathing raised, but not reamed or riveted. By August 1st, 70 per cent of the interior rivets had been driven, 64 per cent of the sheathing raised, but no work done on the reaming or riveting. The erection of these gates began April 12, 1912.

Pedro Miguel— Upper guard gates, 54 feet 8 inches high, leaves Nos. 50 to 53, inclusive—All structural material was in place and the reaming and riveting was practically completed before July 1. Half of the end plates had been ground, but no castings attached. By August 1st, 70 per cent of the plates had been ground and the end castings secured and partly fitted to the quoin posts of leaves Nos. 50 and 53. The erection of these leaves began August 7, 1911.

Upper gates, 79 feet high, leaves Nos. 54 to 57, inclusive—The structural work was all in place before July 1, and all interior rivets driven; eight per cent of the holes in the sheathing had been reamed, but no rivets in the sheathing driven. During the month, a small amount of bolting and reaming, but no riveting, was done, raising the reamed holes to 17 per cent of the total in the four leaves. No grinding for end castings has been done. The erection of these leaves began January 29, 1912.

Middle gates, 79 feet high, leaves Nos. 58 to 61, inclusive—By July 1st, 65 per cent of the skeletons had been raised. By August 1, the skeletons had been completely erected, 27 per cent of all the sheathing plates attached, and about 40 per cent of the interior rivets had been driven. No holes were reamed in sheathing, nor rivets driven. The erection of these leaves began June 18, 1912.

Safety gates, 79 feet high, leaves Nos. 62 to 65, inclusive—All structural work was in place prior to July 1, and all interior rivets driven, 70 per cent of the holes in the sheathing had been reamed and 27 per cent of the rivets driven. By August 1st, 94 per cent of these rivet holes were reamed and 47 per cent of the rivets driven. No ends were ground nor castings attached. The erection of these leaves began December 15, 1911.

Lower gates, 79 feet high, leaves Nos. 66 to 69, inclusive—By July 1, the skeletons were completely erected and 98 per cent of the interior rivets driven. About 50 per cent of the sheathing had been attached, but none of it reamed nor riveted. ByAugust 1, the interior riveting was completed and all the sheathing in place, but none of it reamed or riveted. The erection of these leaves began May 1, 1912.

Lower guard gates, 47 feet 4 inches high, leaves Nos. 70 to 73, inclusive—No work was done on these leaves during July. The skeletons of leaves Nos. 70 to 71 are erected to their full height, but not reamed or riveted.

Miraflores—Material for one set of erection bridges has been moved to the upper end of the lock from Pedro Miguel, but was not in place by the end of the month.

The total tonnage of lock gate material erected on the Canal to August 1, without regard to its being fully reamed or riveted, was 23,102 tons, out of a total of 58,000 tons, or about 40 per cent. Of this, 3,471 tons, or about six per cent was erected during July. The total number of field rivets driven was 1,173,230, or 20 per cent, of which 209,736, or about 3.64 per cent, were driven in July.

The tonnage erected was about 10 per cent less than in the preceding month, which was due, in part, to the taking down and moving of one set of erection bridges.

The number of rivets driven was 23 per cent in excess of the highest previous record, but is still below the rate of progress necessary to complete the gates on contract time.

LOCK GATE RECESS COVERS.

All recess covers (36) at Gatun have been erected and riveted and 21 grouted in place, one being riveted and one grouted in July. At Pedro Miguel, all of the 20 covers have been erected and riveted and twelve grouted in place.

CHAIN FENDERS.

The material manufactured by the contractor for one complete chain fender, and some of the hawsepipe castings for other fenders, was shipped from the United States during the latter part of July.

INSPECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The force of this subdivision, reporting directly to this office, has cared for the technical matters relating to inspection, as follows:

(*1*) *For the rising stem and cylindrical valve machines, motors, and limit switches, purchased under Circular 614*—Rising stem gate valve machine No. 260 was tested during the month. The valve and machine were erected complete at the permanent location in the west lock wall at Gatun. The valve machine was raised and lowered through the 18-foot stroke of the valve, and the operation of the valve and machine was satisfactory. No leakage or hydraulic test was made on this machine during the month. Forty-one rising stem gate valve machines have been shipped from the works of the contractor, and, to date, 25 machines have been received on the Isthmus, in addition to the two trial machines. The various groups, stated in the contracts as spare parts not required to be tested, are being delivered in satisfactory order.

Sixty cylindrical valve machines have been shipped from the works of the contractor, and, to date, 53 machines have been received on the Isthmus, in addition to the two trial machines.

Six auxiliary culvert valve machines have been shipped from the works of the contractor, four of which have been received on the Isthmus to date.

All the contractor's drawings in connection with the electrical equipment ordered under Circular 614 have been approved, and it is expected that the manufacture will proceed at a rapid rate.

The contractors for the limit switches have completed the manufacture of all material for this class, and it was expected that the limit switches would be shipped from the United States by July 15. The 232 limit switches, completing those ordered under Circular 614, have all been received.

The material under the various contracts with the Wheeling Mold and Foundry Company is still being shipped from Wheeling, West Virginia, via New York, owing to the strike on the docks at Baltimore.

Observations of the insulation of the trial motors purchased under this circular were continued during the month.

(*2*) *For the gate and girder hoisting machinery for the emergency dams, purchased under Circular 616*—The test of the first hand operating mechanism for the gate hoisting machine, held on July 20, was not satisfactory. The tests on the first girder hoisting machine were completed at the works of the manufacturer and were satisfactory. Notice was received that the second gate hoisting machine, as well as the first hand operating gear for this machine, would be ready for test about the middle of July.

(*3*) *For the rack railway and other material relative thereto, purchased under Circulars 619, 636-D, 628, 635, 647, 666, and 688*—Out of the 59 items of all of the above circulars, 42 items are 100 per cent completed and satisfactory progress is being made on the delivery of the balance of the items.

(*4*) *For the gate operating machines, Class 1, and miter forcing machines, Class 2, and motors for same, Classes 3 and 4, purchased under Circular 627*—Shipments of material applying on the miter gate moving machines are now being made to the Isthmus from the works of the contractor. A group system for shipments on these machines, similar to that used by the contractors for the rising stem gate valve machines, was put into effect.

(*5*) *For the equipment for the hydroelectric station, purchased under Circular 648*—The first turbine was submitted for inspection by the contractors on July 17, and was, on test, found to be satisfactory. The contractors have shipped the last 12 sections of the penstocks, which have been received on the Isthmus, completing the order for this class of material.

Two of the 100-k. w., direct-connected exciters have been set up with a temporary shalt and run through preliminary heat runs. Three motor-driven exciters were tested at Schenectady. The second generator has been practically completed.

Shipments of the sluice gates and headgate electrical equipment have begun.

(*6*) *For electric towing locomotive, purchased under Circular 650*—The work is progressing slowly on the first locomotive.

(*7*) *For the Spillway gate machines and pumps, purchased under Circular 661*—The first set of chains for the Spillway gate machines has been completed at the works of the contractor and passed satisfactory proof tests. It is expected that the contractors will have the first machine ready for test within a short time. The three motors under this circular are to be submitted by the contractors for final test.

(*8*) *For control apparatus for all locks, purchased under Circular 679*—Drawings for material to be supplied under this circular are being submitted by the contractors.

(*9*) *For motors, pumps, float switches, and starters, purchased under Circular 681*—Work is progressing satisfactorily. No deliveries, however, have been made to date.

(*10*) *For crossovers, purchased under Circular 688*—Practically all drawings of the crossovers have been completed, and the work is progressing satisfactorily at the works of the contractors.

(*11*) *For cable, purchased under Circular 695*—Fifty-three thousand feet of 3-conductor, varnished cambric insulation, lead-covered, 2300 volt cable were received during the month. This applies on the order for 170,000 feet placed the latter part of April. On July 23, 1912, the General Purchasing Officer was authorized to award to the General Electric Company additional cable, as follows: Two hundred and thirty thousand feet of 5-conductor, and 420,000 feet of 8-conductor.

The following is a summary of the work accomplished in the field by the erecting forces.

Atlantic Division locks—The force installing machinery and electrical equipment on the Isthmus assembled 1,824 feet of towing track, including the assembly of rack sections, channels, anchor bolts and T-rails, and bending of the same. (This does not include the installation of conductor slot covers and brackets.) A total of 7,326 feet of towing track has been placed and partly finished to date.

Work of installing rising stem gate valve machines Nos. 262 and 263 is 25 per cent completed. The work on valve machines Nos. 256 and 257 is 15 per cent completed. During the month, work was in progress on the installation of 16 rising stem gate valves. Work on the installation of 20 cylindrical valve machines, Nos. 540 to 559, excepting No. 549, is 75 per cent completed. Work on the installation of four auxiliary culvert valve machines, Nos. B-1 to B-4, is 20 per cent completed. The floors and pedestals for 10 miter gate moving machines have been placed.

Pacific Division locks—Bulkhead forms were placed at eight rising stem gate valves; roller train track was permanently installed in two of the rising stem gate valves. Nineteen cylindrical valve machines were cleaned, set up and leveled, and templates were placed in nine of these valves. Sixteen hundred and fourteen feet of towing track were installed, making the total to date 5,526 feet.

EMERGENCY DAMS.

At the mills, the following material was manufactured during the month: Nickel steel, 696 tons; structural carbon steel, 609 tons; turning and wedging machinery, 41 tons.

At the shops, the following material was fabricated during the month: Structural carbon steel, 272 tons; turning and wedging machinery, 126 tons.

The condition of the work for each dam is, as follows:

Gatun, east dam—Nickel steel, 100 per cent completed and shipped; structural carbon steel, including gates, 100 per cent punched, 100 per cent assembled, 98 per cent finished, and 82 per cent shipped; turning and wedging machinery, 100 per cent completed and shipped.

West dam—Nickel steel, 99 per cent completed and shipped; structural carbon steel, with exception of gates, 100 per cent punched, 100 per cent assembled, 98 per cent riveted, 98 per cent finished, and 82 per cent shipped; gates, 90 per cent completed; turning and wedging machinery, 99 per cent completed and shipped.

Pedro Miguel, east dam—Nickel steel, 99 per cent rolled, 25 per cent punched, 10 per cent assembled, and five per cent riveted; structural carbon steel, 90 per cent rolled, including gates; turning and wedging machinery, 85 per cent completed in foundries. and now being machined in the shops.

West dam—The stage of manufacture of this dam is the same as for the east dam at Pedro Miguel.

Miraflores, east dam—Nickel steel, 60 per cent rolled; structural carbon steel, with exception of gates, 40 per cent rolled; turning and wedging machinery, 30 per cent completed in foundries, and now being machined in shops.

West dam—The stage of manufacture of this dam is the same as for the east dam at Miraflores.

INSPECTION ON THE ISTHMUS.

Gatun, east dam—Material delivered at site, 1,482 tons. All wicket girders, and rack and track segments for turning quadrant, have been placed in temporary position.

Gatun, west dam—Material delivered at site, 673 tons.

AIDS TO NAVIGATION.

Construction—Ranges Nos. 1-2, 9-11, and 13-14, Pacific Division—Same status as when last reported, with the exception that wrought iron gallery railings were placed on each of the towers during the month.

Range No. 5-6, Atlantic Division—Same status as when last reported, excepting that the wrought iron gallery railing has been placed on the front tower during the month.

Ranges Nos. 21–22 and 24–25, Gatun Lake section—Same status as when last reported.

Range No. 1–2, Gatun Lake section—The reinforced concrete railing around the base of the front tower was completed, and the wrought iron gallery railing was placed during the month.

Range No. 5–6, Gatun Lake section—The cableway was completed, forms made for the submarine foundation, concrete laid in the bottom slab, and in the first 12 feet of submarine foundation for the front tower.

Range No. 3–4, Gatun Lake section—The site for the front tower was located during the month.

General plant of Lighthouse Subdivision at Balboa—The following reinforced concrete material was cast during the month: Thirty-six buoy sinkers 48 by 48 inches; 33 buoy sinkers 24 by 24 inches; two foundations for beacons, and 15 reinforced concrete piles were driven for three beacon foundations in the Pacific Division.

West breakwater light, Limon Bay—The reinforced concrete caisson was completed up to a height of 19 feet and then floated out of the drydock to the powder dock at Mindi, where it was completed up to a height of 25 feet. The work at Mindi was carried on from a barge carrying the concrete mixer and all material.

Atlantic Division.

GATUN LOCKS.

Excavation—During the month, three shovels were engaged in borrow pit excavation for the locks backfill and construction tracks, 116,646 cubic yards of material being removed.

Backfill—Backfilling behind the side and center walls of the locks was continued. The quantity placed during the month aggregated 112,670 cubic yards. The total placed to August 1 amounted to 1,666,845 cubic yards.

Receiving and issuing material—The receipts of sand exceeded the issues by 18,278 cubic yards; the consumption of cement exceeded the receipts by 5,896½ barrels; the issues of rock amounted to 10,880 cubic yards, no rock being received.

Mixing and placing plants—Plant No. 1 and all portable mixers were kept in satisfactory operation during the month.

Concrete work—There was an increase of 1,996½ cubic yards in the amount of concrete laid, as compared with the figures for the preceding month. The daily average for the 26 working days was 311 cubic yards, as compared with a daily average of 244 cubic yards during June. The total amount of concrete placed during the month was 8,092½ cubic yards. The bucket measurement exceeded the place measurement by 18 cubic yards. Of the total, 3,150½ cubic yards were placed in the upper lock, 2,200 cubic yards in the middle lock, and 2,742 cubic yards in the lower lock. The concrete work for the entire lock system was 94.19 per cent completed at the end of July.

OPERATION OF THE PERMANENT CONCRETE CONSTRUCTION PLANT.

Length of working day (hours)............	9.00
Average number of hours per day worked, per strand of cableway laying concrete (actual working time)..................	1.07
Average number of mixers per day.........	1.80
Average hourly output per mixer (actual working time) cubic yards...............	57.68
Average amount of concrete laid per hour, per strand of cableway (actual working time) cubic yards.....................	21.75
Concrete laid (cubic yards) cableways.....	5,090.00
Concrete laid (cubic yards) derricks.......	2,975.00
Concrete laid (cubic yards) portable mixers	44.50
Total amount of concrete laid (cubic yards)	8,110.50

GATUN DAM.

Construction during the month increased the total fill, as determined by cross-section of the material in place, by 315,868 cubic yards, making the total amount in place 19,674,899 cubic yards. On August 1, the dam was 90.9 per cent completed.

An arbitrary reduction of 65,000 cubic yards has been made for slow consolidation in those sections of the Dam not covered by monthly cross-section. Of this, 50,000 cubic yards has been charged against dry fill, and 15,000 cubic yards against wet fill. This is an increase of 25,000 cubic yards over the monthly arbitrary reduction heretofore made, such increase having been shown to be necessary by the semiannual survey.

The regular semiannual survey of the whole Dam was completed in June, and office work finished during the past month. Although an arbitrary reduction of 40,000 cubic yards has been made each month to allow for slow consolidation outside of the limits of the monthly cross-sections, the complete survey shows it necessary to make a still further allowance of 144,080 from the monthly to agree with the net yardage in place above the original surface. With this correction, the total net yardage in place amounted to 19,674,899 cubic yards. The semiannual survey also shows that the total yardage of the completed Dam will amount to 21,994,111 cubic yards.

Hydraulic fill—The dredges increased the hydraulic fill by 62,749 cubic yards, making the total hydraulic fill in place on July 31st, 10,017,827 cubic yards.

Dry fill—The material received from the steamshovels, amounting to 109,039 cubic yards, was placed on the north and south toes of the Dam, east and west of the Spillway, making the total dry fill in place 9,972,940 cubic yards.

GATUN SPILLWAY.

Backfill—There were 259 cubic yards of material placed in the backfill during the month, making the total backfill, behind the Spillway walls, on August 1st, 16,495 cubic yards.

Concrete—The work of placing concrete was continued, the amount placed during the month aggregating 1,357 cubic yards. The concrete work for the Spillway was 90.56 per cent completed.

Excavation—There was no excavating done during the month, the total remaining at 1,591,086 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the Ocean to Mindi—Five dredges removed 360,655 cubic yards of earth and 53,508 cubic yards of rock from the Canal prism. In addition, the dredge *Caribbean* removed 20,470 cubic yards of earth from the approach channel to dock No. 11. The dredge *Mindi* removed 3,851 cubic yards of earth from the *Caribbean's* berth at the water dock, and 14,575 cubic yards of coral rock from the slip at the Cristobal terminal docks of the Panama railroad. On July 31, 1912, 40 feet of water could be carried from zero to zero, plus 2,100 feet, 35 feet to mile post 4, plus 3,100 feet; 30 feet to mile post 4, plus 3,150 feet; 20 feet to mile post 6, plus 1,900 feet.

Approach to Gatun Locks—Three dredges removed 141,125 cubic yards of earth, and 9,280 cubic yards of rock, from the Canal prism.

PORTO BELLO.

During the month, 7,805 cubic yards of rock were shipped to Toro Point for use in construction of the breakwater.

ROCK TRANSPORTATION SERVICE.

In connection with this service, plant steamed 1,965 miles, handled 163 barges, and carried 1,590 passengers.

WEST BREAKWATER, COLON.

During the month, the single track trestle was extended 220 lineal feet. On August 1, the trestle extended 11,147 lineal feet from shore; 8,678 cubic yards of Porto Bello rock were unloaded, making the total to August 1st, 73,811 cubic yards.

MUNICIPAL ENGINEERING.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work.

Work was continued on the Colon street improvements.

Central Division.

During the month of July, the total amount of material excavated in the Central Division was 1,336,366 cubic yards, of which 259,147 cubic yards were classified as earth, and 1,077,219 cubic yards as rock. Of the total quantity excavated, 1,335,590 cubic yards were removed by steamshovels, and 776 cubic yards by hand.

The daily average number of steamshovels at work during the month was 38.71, and the total number of shovel days was 1,006½, as compared with 40.10 at work during the month of June, and 1,002½ shovel days.

For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table has been prepared:

Period.	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W'kg days.	Av. yards per shovel day
		Rock.	Earth.			
1911:	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds.*			*C. Y.*
July....	1,337,833	1,194,420	143,413	40.70	25	1,314.82
1912:						
July....	1,335,590	1,077,219	258,371	38.71	26	1,327.73

Rainfall at Empire: 1911, 4.00 ins.; 1912, 9.15 ins.

The above table shows the average output per shovel to be .98 per cent greater in July, 1912, than in the corresponding month of 1911.

The total mount of material excavated from the prism in the Culebra section of the Central Division in July, 1912—1,335,590 cubic yards—was the greatest record in that section for the month of July, except July, 1911, when 1,337,833 cubic yards were removed.

The total estimated amount of material to be removed in the Central Division, according to the revised estimate of July 1, 1911, was 101,801,296 cubic yards. On July 1, 1912, the total estimated amount of material (dry excavation) to be removed from the Canal prism was increased by 4,314,925 cubic yards, on account of slides and removal of material on higher levels for the prevention of slides, making the total estimated amount of material to be removed 106,116,221 cubic yards. On August 1, 1912, 95,738,047 cubic yards had been removed, leaving 10,378,174 cubic yards yet to be taken out, in order to complete all dry excavation in the Central Division. Thus it will be seen that 90.22 per cent of all excavation in the Central Division was accomplished at the close of the month of July, and that there remained 9.78 per cent yet to be removed.

Considering the two sections which compose the Central Division, the excavation completed, and that to be completed at the close of July operations was, as follows:

CULEBRA SECTION.	*Cu. Yds.*
Completed	83,353,392
To be completed	10,378,174
CHAGRES SECTION.	*Cu. Yds.*
Completed	12,384,655

From the above figures, it will be seen that the Culebra section, known locally as "Culebra Cut," was 88.93 per cent completed, with 11.07 per cent to be completed. The Chagres section was completed so far as dry excavation is concerned, but it is estimated that it will be necessary to remove about 300,000 cubic yards of wet excavation in this section.

During the month, 71,421 cubic yards of material were dumped on the embankment for the new roadbed for the relocation of the Panama railroad, increasing the total amount used for this purpose to 4,308,997 cubic yards.

During the month, no material was furnished to the Atlantic Division for use in the construction of the Gatun Dam, the total amount remaining at 5,374,310 cubic yards.

There were furnished to the Panama railroad 11,171 cubic yards of material for the terminals in Colon.

The daily average number of laborers at work on the whole division during the month was 6,145, while the daily average number of gold employes was 580.

Pacific Division.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation during the month amounted to 161,499 cubic yards, of which 76,823 cubic yards were classified as earth, and 84,676 cubic yards as rock.

Filling and embankment— During July, 16,150 cubic yards of dry filling were added to the prism of the Pedro Miguel west dam, increasing the total amount of material in place at the close of the month to 598,591 cubic yards. The backfill at Pedro Miguel was increased by 13,588 cubic yards, the total quantity in place at the close of the month aggregating 668,125 cubic yards.

At Miraflores, 37,820 cubic yards were added to the dry fill in the toes of the west dam. The total quantities of dry and hydraulic filling in place at the end of the month were 1,279,444 cubic yards, and 661,048 cubic yards, respectively. The backfill was increased by 79,287 cubic yards, the total aggregating 704,574 cubic yards at the end of the month.

Pedro Miguel Lock—At Pedro Miguel, the construction of the north center guide wall was practically completed during the month. Excavation in the Canal prism between the Pedro Miguel and Miraflores locks was continued, two steamshovels being employed. Excavation on the high ground along the east side of the locks was carried on during the month with one steamshovel, and one steamshovel was used to excavate the foundation for the northeast wing wall. The spoil from these four shovels was utilized for backfilling behind the lock walls, for topping the west dam, and for filling the south guide wall. The amount of iron placed in the masonry aggregated 150,014 pounds.

Concrete work—The total amount of concrete and large stone laid at Pedro Miguel was 11,959 cubic yards, as compared with 10,061 cubic yards during June. The concrete was placed, as follows: Three thousand eight hundred and ninety-five cubic yards in the north center guide wall; 2,512 cubic yards in the northwest wing wall; 414 cubic yards in the east wall; 122 cubic yards in the center wall; 279 cubic yards in the west wall; 3,154 cubic yards in the northeast wing wall; 764 cubic yards in the southeast wing wall; 248 cubic yards in the south center guide wall; 30 cubic yards in the floors; 62 cubic yards around ducts, 56 cubic yards of which were placed in operating tunnel A, and six cubic yards in operating tunnel B; and 479 cubic yards in the core wall of the west dam.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete and large stone (actual working time)	4.84
Average number of mixers per day	5.85
Average hourly output per mixer (actual working time) cubic yards	14.49
Large stone laid, cubic yards	25.00
Concrete laid, cubic yards	11,934.00
Total concrete laid, cubic yards	11,959.00

Mixing plant consisted of one 2-cubic yard mixer, and a daily average of 4.85⅓-cubic yard mixers. Placing plant consisted of a daily average of 2.23 locomotive cranes or derricks, and a daily average of 4.81⅓-cubic yard mixers discharging directly into forms.

Miraflores Locks—Dry excavation, principally in the Canal prism, southof the locks, was continued with seven steamshovels, the spoil being used for backfilling behind the east and west lock walls, and for filling the west dam. Work was continued on the construction of the north center guide wall, and creosoted piles were driven in the foundation of the northeast wing wall. The basin on the east side of the locks was pumped out and preparations were started for the excavation of a portion of the spillway dam foundation. The lowering of chamber crane No. 2 from the upper to the lower lock chamber was completed during the early part of the month, and this crane has since been placing concrete in the center wall of the lower lock. The amount of iron placed in the masonry aggregated 452,494 pounds.

Concrete work.—The total amount of concrete and large stone laid at Miraflores was 66,076 cubic yards, as compared with 68,498 cubic yards for June. The concrete was placed, as follows: Three thousand five hundred and eighty-five cubic yards in the north center guide wall; 6,004 cubic yards in the east wall; 36,614 cubic yards in the center wall; 13,656 cubic yards in the west wall; 50 cubic yards in the southeast wing wall; 140 cubic yards in the northeast wing wall; 210 cubic yards in the northwest wing wall; 5,645 cubic yards in the floor; 122 cubic yards around ducts, 74 cubic yards of which were placed in operating tunnel A and 48 cubic yards in operating tunnel B; and 50 cubic yards in the core wall of the west dam.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8 & 12.00	8 & 12.00
Average number of hours per day laying concrete and large stone (actual working time)	7.03	6.51

Average amount of concrete and large stone laid per hour per berm or chamber crane, (actual working time) cubic yards	48.45	....
Large stone laid	....	....
Concrete laid (cubic yards)	49,664.00	16,490.00
Total concrete laid (cubic yards)	49,664.00	16,490.00

Two berm cranes, four chamber cranes and two 2-cubic yard mixers worked twelve hours a day. Auxiliary mixing plant consisted of three 2-cubic yard mixers, daily average 2.58, and eight ⅓-cubic yard mixers, daily average 6.15. Auxiliary placing plant consisted of a daily average of 3.77 ½-cubic yard mixers discharging directly into forms, and a daily average of 3.88 locomotive cranes or derricks.

DISTRICT NO. 2—DREDGING, BALBOA SHOPS, AND SHIPWAYS.

The following is a statement of the output of the five dredges which were in operation during the month, and of the amount of material excavated hydraulically:

DREDGE.	Type.	WORK.		PLANT.		Total.	Remarks.
		Earth.	Rock.	Earth.	Rock.		
		Cu. Yds.	*Cu. Yds.*	*Cu. Yds.*	*Cu. Yds,*	*Cu. Yds.*	
Cardenas	Dipper	2,000	16,550	2,200	....	20,750	Place measurement
Corozal	Ladder	28 345	45,472	....	....	73,817	Place measurement
Marmot	Ladder	4,092	12,680	....	....	16,772	Place measurement
Badger	Ladder	....	....	86,123	3,495	89,618	Place measurement

Total	....	232,809	74,702	88,323	3,495	399,329	
Hydraulic excavation	....	85,000*	....	....	....	85,000	Place measurement
Grand total	....	317,809	74,702	88,323	3,495	484,329	

*Excavated from Canal prism, south of Miraflores lock site.

CHAMÉ SAND EXCAVATION.

Approximately 51,470 cubic yards of sand were excavated at Punta Chamé and delivered at Balboa.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

The reservoirs, water mains, sewers, and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.

Length of working day (hours)	8.00
Average number of hours per day (actual working time)	7.25
Average number of cubic yards crushed per hour per working day	260.91
Average number of cubic yards crushed per working hour	323.87
Total output for the month (cubic yards)	61,053.00

Relocation of Panama Railroad.

During the fiscal year 1912, the original line from Gatun to Gamboa and the Gold Hill line were turned over to the Panama Railroad Company. The small amount of work remaining to be done on June 30, 1912, consisted of riprapping the submerged embankments through the Gatun Lake section and installing the bascule bridge at Monte Lirio. The relocation organization was accordingly abolished on that date, and any further work necessary, properly chargeable to the relocation, will be accomplished by the maintenance of way forces of the Panama Railroad Company.

Quartermaster's Department.

Labor—There was some shortage in unskilled labor during the month. The Central Division was in need of pick and shovel laborers.

Buildings—Work on the removal of the Balboa settlement was continued. All families at old Balboa were removed to Ancon. Seventy-two bachelors are still quartered in house No. 27. This building will be removed and reerected. The men will be quartered at East Balboa in the old police station, which has already been removed and reerected, and in the upper floor of the hotel which has been converted into bachelor quarters.

Quarters—Quarters remain congested at Corozal and Ancon. At the former place, all gold quarters are crowded, due to a number of additional men brought to the Isthmus by the McClintic-Marshall Construction Company.

Material and supplies—The value of material received during the month was $975,863.58.. Supplies were delivered by 42 steamers, the total weight of cargo, exclusive of lumber and piling; being 33,268 tons. Reduced cement deliveries have continued. Two cargoes of lumber, aggregating nearly 4,000,000 feet, were received from the Pacific Coast.

Subsistence Department.

The operation of the European laborers' messes, colored laborers' kitchens, and line hotels showed a net profit of $3,627.21. The operation of the Hotel Tivoli showed a net profit of $2,012.98. The net profit on subsistence operations was $5,829.30.

Department of Civil Administration.

During the month, 28 civil and 39 criminal cases were disposed of in the Circuit Courts, and 66 civil and 479 criminal cases in the District Courts.

DIVISION OF POSTS, CUSTOMS, AND REVENUES.

Money order sales for July amounted to $409,873.29, and the fees to $1,936.04. Receipts from stamp and card sales and newspaper postage aggregated $6,089.09. The total collection of revenues made by the division was $18,232.35, and the collection on account of court fines, costs, and fees $2,898.48.

Twenty-seven vessels entered at and a like number cleared from the port of Ancon, and 22 vessels entered at and 23 vessels cleared from the port of Cristobal.

DIVISION OF POLICE AND PRISONS.

The total number of persons arrested was 477, of whom 410 were men and 67 women. Twenty-four nations, or 46 separate states and dependencies, were represented. The total number of arrests for the month was a decrease of 19, as compared with the month of June. Eight convicts were committed to the penitentiary and 14 were discharged, leaving 135 convicts in confinement at the close of the month. The cost of guarding and subsisting the convicts was $2,575.34, and the value of their work on Canal Zone roads was $2,414.20.

DIVISION OF FIRE PROTECTION.

Five fires were reported in the Canal Zone during the month. The damage to private property was $350.

DIVISION OF PUBLIC WORKS.

In the city of Panama, the average daily consumption of water was 1,335,863 gallons, and in Colon, 1,334,255 gallons. The usual inspection and maintenance work in this division was performed during the month.

DIVISION OF SCHOOLS.

The schools were not in session during the month.

Department of Sanitation.

The total number of deaths from all causes among employes was 42. These were divided, as follows: From disease 32, from violence 10, giving the annual average per thousand of 7.88 and 2.46, respectively, on the basis of the number of employes estimated by the Department of Sanitation. The annual average death rate per thousand among employes for the month of July, 1911, was 14.06.

The annual average death rate per thousand in the Canal Zone, and in the cities of Colon and Panama, including both employes and nonemployes, based upon the population as estimated by the Department of Sanitation, was 23.55. The annual average death rate per thousand among the same classes of population for the month of July, 1911, was 26.53.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: For whites, 6.98; blacks, 8.18, giving a general average for disease of 7.88. For the same month during 1910, the annual average death rate per thousand from disease among whites was 9.51; blacks 9.16, giving a general average of 9.25; and for the same month during 1911, whites 10.37; blacks, 10.27, giving a general average of 10.29.

Among employes during the month, deaths from the principal diseases were, as follows: Dysentery, entamœbic, one; hæmoglobinuric fever, one; lobar pneumonia, six; malaria fever, E. A., two; tuberculosis, nine; leaving 13 deaths from all other diseases, and 10 deaths from external violence.

One case of yellow fever on a ship from Guayaquil, Ecuador, was isolated in Santo Tomas Hospital, the patient dying there on July 14. With this exception, no case of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus, during the month.

Respectfully,
GEO. W. GOETHALS, *Chairman.*

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

CULEBRA.

A return engagement of the Hindoo entertainment company has been arranged for Friday evening, August 23. An entirely new program will be given. Numbers will be repeated by request.

The bowling games played during the week were, as follows: Tuesday, August 8, "Wreckers" vs. "Spreaders"; Wednesday, August 8, "Exploders" vs. "Piledrivers"; Friday, August 16, "Track shifters" vs. "Unloaders."

The standing of the teams at the close of the week was, as follows:

Team.	Won.	Lost.	P. C.
Track shifters	4	2	.667
Wreckers	3	3	.500
Piledrivers	3	3	.500
Unloaders	3	3	.500
Spreaders	3	3	.500
Exploders	2	4	.333

The Gorgona chess team played the Culebra chess team on Saturday evening, August 17, with the following result:

Gorgona.	Won.	Lost.	Culebra.	Won.	Lost.
Dr. Levy	0	2	Dubois	2	0
Varenkamp	0	2	Minner	2	½
Strong	½	1½	Warner	1½	1
Bravo	1	1	Beaman	1	½
Taylor	2	0	Newman	0	2
Moorehead	½	1½	Conner	1½	0
Total	4	8		8	4

GORGONA.

Mr. Watson has returned from the sanitarium and assumed his duties as acting secretary.

A farewell reception was given on Tuesday, August 20, in honor of Mr. T. S. Booz, who has resigned from the service. Local talent provided an evening's entertainment. The members of the clubhouse purchased a Howard watch, which was presented to Mr. Booz.

The moving picture show will be held on Friday, August 23.

The pool tables have been recovered and are in excellent condition.

Fourteen new phonograph records were added recently.

GATUN.

The work of replaning the bowling alleys is progressing satisfactorily. It is expected that the work will be finished in about two weeks.

On Monday, August 12, a movement was initiated to obtain 400 members by September 1. This number has already been realized, and the membership is still increasing.

CRISTOBAL.

The next moving picture show in the series will be held on Saturday night, August 24.

The gymnasium floor will be clear for handball Tuesday and Thursday afternoons from 5 to 7 p. m., and basketball from 8 to 10 p. m.

The ladies' afternoons for bowling are on Wednesdays and Fridays from 2 to 5 o'clock. A prize pennant is offered for the lady making the highest score this month.

Empire defeated the local bowlers two out of three games on Saturday night, August 17, with the following scores:

Empire.				Cristobal.			
Gustavson	246	138	170	Barrett	212	175	156
Gorham	164	152	171	Gibson	150	153	160
Edwards	157	155	204	Collins	176	178	189
Pearson	233	185	177	Buser	148	141	209
Huson	149	169	172	Bullard	191	157	157
Total	949	799	894		877	804	871

During the week, the following high scores were made on the local alleys:

Tenpins—Rosteck, 203; Buser, 202, 231, 200, 216; Gibson, 216, 202; Vanderburg, 211; Bullard, 213; Collins, 210; Beattie, 208; W. Burn, 203; Louch, 201.

Duckpins—Carpenter, 101; Bullard, 102; Barrett, 107; Weidman, 100; Herrington, 100.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending August 28, 1912. (75th meridian time):

DATE.	High	Low	High	Low
	A.M.	A.M.	A.M.	P.M.
August 22	......	5.14	11.25	5.52
			P.M.	
August 23	12.27	6.30	12.40	7.00
August 24	1.38	7.35	1.45	7.57
August 25	2.30	8.27	2.35	8.42
August 26	3.07	9.10	3.20	9.23
August 27	3.40	9.45	3.50	9.58
August 28	4.10	10.18	4.20	10.32

OFFICIAL CIRCULARS.

Sanitary Work by Construction Divisions.

CULEBRA, C. Z., August 16, 1912.

CIRCULAR No. 183-F-5:

The rules governing the performance of work by the construction divisions for the Department of Sanitation, dated December 1, 1911, are amended, effective this date, as regards "maintenance of drains and ditches," by the addition of the following to paragraph 12 of this order:

> This is not intended to prevent the removal of minor obstructions in unlined sanitary ditches by the regular oiling gangs of the Sanitary Department, with the understanding that this applies only to such work as can be conveniently and economically done by the oiling gangs without increase of the force allotted to each station, and that the regular clearing and grading of ditches shall be performed by the construction divisions.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Promotion for Steamshovel Cranemen.

CULEBRA, C. Z., August 19, 1912.

CIRCULAR No. 387-A:

Steamshovel cranemen will not hereafter be eligible for promotion until they have been satisfactorily tried out as engineers on both Bucyrus and Marion shovels.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Division Engineer, Central Division.

CULEBRA, C. Z., August 19, 1912.

CIRCULAR No. 456:

Effective August 20, 1912, Mr. A. S. Zinn will act as division engineer of the Central Division during the absence of Lieut.-Col. D. D. Gaillard on leave.

GEO. W. GOETHALS, *Chairman.*

Acting Division Engineer, Pacific Division.

CULEBRA, C. Z., August 19, 1912.

CIRCULAR No. 457:

Effective August 21, 1912, Mr. John M. G. Watt will act as division engineer of the Pacific Division during the absence of Mr. S. B. Williamson on leave.

GEO. W. GOETHALS, *Chairman.*

Chagres District of the Central Division Abolished

EMPIRE, C. Z., August 17, 1912.

CIRCULAR No. 318—CENTRAL DIVISION:

By authority of the Chairman and Chief Engineer, the Chagres district of the Central Division, as a separate construction district, will be abolished, effective August 19, 1912.

Effective the latter date, all dumping operations, north of Gamboa, on what will be hereafter known as the relocation dumps, will be under the jurisdiction of Mr. Rance Ferguson, general foreman, who will report to and receive instructions from the division engineer, Central Division.

D. D. GAILLARD, *Division Engineer.*

Chief Clerk, Central Division.

EMPIRE, C. Z., August 17, 1912.

CIRCULAR No. 319—CENTRAL DIVISION:

During the absence of Mr. W. J. Beam, chief clerk, Central Division, on leave of absence, the duties of chief clerk will be assumed by Mr. A. E. Bronk, general inspector, in addition to his regular duties as general inspector.

Effective August 21, 1912.

D. D. GAILLARD, *Division Engineer.*

Acting Chief Timekeeper, Central Division.

EMPIRE, C. Z., August 20, 1912.

CIRCULAR No. 320—CENTRAL DIVISION:

During the absence of Mr. H. A. Haywood, chief timekeeper, Central Division, on leave of absence, the duties and responsibilities of that position will be assumed by Mr. Charles J. Dibowski, with the title of acting chief timekeeper.

Effective August 21, 1912. A. E. BRONK,
General Inspector.

Approved: D. D. GAILLARD,
Division Engineer.

Band Concert.

A band concert will be given by the Isthmian Canal Commission Band at Hotel Tivoli, Ancon, C. Z., Sunday, August 25, 1912, at 8 p. m. The program follows:

Auction of Fire Horses at Cristobal.

Three fire horses, which are no longer necessary in the fire department on account of the new automobile fire engines, will be offered for sale to the highest bidder, for cash, at the Cristobal fire station, Saturday afternoon, at 2 p. m., September 7, 1912. The horses are now at the Cristobal fire station and may be inspected by any one interested. The three horses were purchased in the United States at a cost of $250 each. Their weight is about 1,300 pounds; color, bay; height, about 15½ to 16½ hands. Right is reserved to reject any or all bids.

C. E. WEIDMAN, *Fire Chief.*

Auction Sale of Calves and Dairy Cow at Ancon Hospital Dairy.

On Saturday, August 24, at 10 a. m., there will be sold at public sale at the Ancon Hospital dairy, ten calves between the ages of one and two and one-half months, and one dairy cow about five years old. Terms of sale, cash.

The dairy is located near the insane asylum buildings in the rear of the hospital grounds.

CHAS. F. MASON, *Superintendent.*
